Silver Seven Win New Year's Match

Defeated Strathcona by a Score of 7 to 1

The Silver Seven sprung a surprise on Strathcona on the afternoon of New Years day, when the local team defeated the University City seven by a score of 7 to 1. The betting was even money early in the day and 2 to 1 at the beginning of the game that Tofield would win but after a few minutes of play no money could be found that the visitors would put up. There was no question as to which team was the superior. While at the end of the first twenty minutes neither team had secured a goal the visitors seemed outclassed. Within two minutes after play was resumed Parsons scored a goal and this seemed to wake up the home team who secured the puck from the face off and within one minute placed it in the visitor's nets, Bisset doing the trick.

The suddenness of the table turning seemed to amaze the visitors and from that moment to the end of the game they lost ground. Had every shot upon goal been a score the tally would have been several figures against the visitors and it was only by maintaining an extra sturdy defense that they kept it as low as it was. Haine played up to his old standard, although suffering from a lame knee, played a star game and scored no less than three times after splendid rushes down the full length of the ice. Bob Lee made a good showing, placing the puck twice in the visitor's nets and Latour once had one to his credit.

While the game was fast it was clean throughout, although its being so one sided was a disappointing feature to the spectators. The visitors had a run of hard luck, S. McNulty being struck on the side of the nose by the puck inflicting a bad gash which resulted in the suspension of play for several minutes and Parsons later being laid off for the rest of the game through being knocked senseless by a bad fall against the fence. Notwithstanding their misfortunes the Strathcona boys put up a splendid game which was heartily enjoyed by the crowd.

The line-up was as follows:—

Strathcona	Tofield
L. McNulty	G. Charlesworth
Weir	P. Haine
W. Kernan	C.P. Somers
Paywes	O. Bisset
A. McNulty	R. S. Macdonald
S. McNulty	L. W. R. Lee
F. Richards	R.W. Latour-neau

Officials: Referee, Lendrum; Judge of Play, McConnell; Goal Umpires, McLeod and Hammond.

The failure of the Camrose lunch to come through with a return game as promised was not wholly unexpected after the triumphs given them by the Silver Seven last Christmas night. The local organization acting in good faith went to the trouble and expense of advertising the game with our sister town for New Years Day and it was almost the last moment when it was ascertained that the hockey fans from the "burg that was born lucky"(?) had taken cold feet. Efforts were at once set working to secure a good team for the New Year's Day match, with the result that Strathcona agreed to come down. The public were not disappointed. Tofield is a hockey town and the people both in town and in the surrounding country love to see good hockey. They show it by attending in good force, many coming ten and fifteen miles into town to see the games. Tofield Hockey Boys recognize this fact and are determined to pull off some fine matches throught the season, full announcements of which will be made in time so that all will be acquainted with the day, date and and hour of the games.

Tofield has in sight a game with Wetaskiwin, a challenge having been given them through N. C. Leggo on the occasion of his visit to that town on New Year's Day. The visitors will not only bring a hockey team but curling and bowling teams. The compliment of return games has been agreed to. Dates will be announced later.

Hockeyists

No fines on the Silver Seven.

Haine showed up well in spite of a game knee.

It was just the kind of a game our boys needed.

The Silver Seven are out—out to win games only—but to put up good, clean, fast sport, win, lose or draw.

To be beaten by a better team is no disgrace. Defeat is a tonic to a brave man.

Strathcona put up a good game. Our forward line needs the practice.

Just a little more generalship, steady all combination work, and unflinching, resolute courage and the forward line will be able to do big-gre things.

The biggest room of all is the Room for improvement. Don't lose sight of this Silver Seven. You will need it all one of these days. Steady genuine hard work at practice is the only way to maintain the traditions of the past. Go to it. The public is there to back you.

Ye Shades of the past! Is the Holden Cup to remain in Tofield uncontested for this season? As yet there does not seem to be any arrangements made for a series of games for the cup this winter amongst the teams from Tofield east along the C. T. P. Being the holders of the cup, Tofield is open for a challenge. "Put on your old grey bonnet, etc."

To Our Customers

Commencing January 1st, 1912 we take inventory of our years business, in order to doso we must balance our books, therefore we will be obliged to insist on ALL ACCOUNTS owing to be settled by note or otherwise on that date

Kindly bear in mind this absolutely necessary, we will expect you to call. Thanking you for your 1911 business and soliciting a share for 1912

HALL & KENNEDY

To My Customers

Early last Wednesday morning I was the victim of a bad fire at my home and the distressing circumstances attending this unfortunate occurrence have compelled me to, for a few days only, neglect as willingly, my watch repair business. Will you kindly bear with this delay as it is unavoidable. Assuring you of my appreciation of the same and that your commands will always have my careful and prompt attention, I am

Yours faithfully,
JOHN. C. KELLY.

Returned From Nebraska

Chas Kallal returned on Friday last from a six weeks trip through central Nebraska. He reports that crop conditions have not been entirely satisfactory in that state for [illegible] but that on the whole [illegible] of the Esther are thinking of coming to Western Canada, and Mr. Kallal lost no opportunity of telling them of the wonderful resources of Alberta and the Tofield district in particular.

Miss Flossie G. Bissett
Teacher of Piano and Organ

is prepared to take limited number of pupils on above instruments at her home

Local and General News

WANTED—A General servant, apply J. D. Kennedy.

Rev. A. M. McColl went to Edmonton on a short visit last Friday.

Jas. Fletcher of Farmington was in town on Tuesday.

R. J. Stirrett of Farmington was in town last Tuesday on business.

Miss McKean of Strathcona was the guest of Mr. and Mrs. Hugh Mitchell on New Year's Day.

Tofield Local A.F.A. meets on Saturday afternoon of this week in the council chamber.

Miss Bartness of Bardo leaves this week for Edmonton where she will study music at Alberta College

Miss Roberts of Edmonton has arrived in town and taken up her duties in the Public School.

Owing to a breakdown in the engine operating the electric dynamo, last Thursday evening, the moving picture show had to be cancelled for that night.

If your children are subject to attacks of croup, watch for the first symptom. Boarseness. Give Chamberlain's Cough Remedy and the attack may be warded off. For sale by all dealers.

Mr. and Mrs. H. J Jamieson of Lemberg, Sask. spent the Christmas holidays with the latter's brother C. E. Jamieson of this city, returning by yesterday's eastern express.

The Tofield Sunday Schools extend to all best wishes for a Happy New Year and invite one and all to start the New Year right and be at Sunday School at 3.00 P. M. next Monday, Either church.

Miss Flossie G. Bissett, late of Winnipeg, has decided to form a class of beginners in piano and organ. She may be seen any afternoon at her residence, 3rd Avenue, East.

Another visitor, he of the smiling countenance and ready wit, welcome amongst his circle of friends on New Years, was Count. Thorne, R.N.W.M.P. He was the guest of Dr. Tofield and others.

Persons troubled with partial paralysis are often very much benefited by massaging the affected parts thoroughly when applying Chamberlain Liniment. This Liniment also relieves rheumatic pains. For sale by all dealers

Tofield Lodge Knights of Pythias has been reorganized under the influential efforts of re-organizer Solom working under the direction of the Grand Lodge of Alberta. The lodge will meet every second Monday.

The weather took a spell of cold immediately after Christmas, its temperature going down to 30° below for a few days. The cold snap was enjoyed particularly by the coal mine operators, a rush of orders coming in from far and near.

A. W. McKinnon and a bunch of other good sports of Ryley were up to Tofield on Monday to take in the match. The only thing they complained of was its being so one sided. The Silver Seven cannot be blamed for that.

A. C. Mackay, formerly of Tofield and now of Athabaska Landing was down New Years Day renewing old acquaintances. Alex tells us he is building a new home in the spring at the landing. Its no place for a single man to live anyway. We don't blame him.

Miss Laura Burke came back to Tofield on New Year's Day to take a place on the staff of the Tofield Public Schools. To come to Tofield on New Year's Day to reside is better than all the good New Year resolution any way. Her many friends will welcome her back to her old place.

Here is a remedy that will cure your cold. Why waste time and money experimenting when you can get a preparation that has won a world wide reputation by it's cures of this disease and can always be depended upon? It is known everywhere as Chamberlain's Cough Remedy, and is a remedy of real merit. For sale by all dealers.

K. P.s Instal Officers

The installation of officers of King Arthur Lodge No. 56 K. of P. Tofield took place last Tuesday evening in Castle Hall. Bro. Solom D.D.G.C. installed the officers who are as follows:

C. C.—E. W. Rogers
V. C.—Johnston W. Ferguson
Prel.—A. M. McColl
K. of W.—M. E. Mahaffey
M. at A.—Dr. Terwillegar
Inner I.—D. H. Mitchell
Outer G.—R. Davidson

C. E. Jamieson, TOFIELD

Municipal

New Town Council Takes Office

"That he house and [illegible] each and every councillor will do his duty and work together with the others in the interests of Tofield," was the inaugural address of the mayor when, last Tuesday evening, the 1912 council met with a full house.

The tender of Gorman. Clance & Grindly for 1800 feet of main at 67c per foot f. o. b. Tofield was accepted.

The following accounts were read and passed:

C. Sutter's bill which had been previously passed for $2.50 but not paid.

G. T. P. development Co. $25.00 and interest.

F. McHolley, work $24.75

J. Ferguson, Painting as hall, $5

C. Sutter, use of clock and barrows $5.00.

W. G. Ginter, duty, etc. on lamps $7.55.

M. W. Urquhart, blankets & coal oil $7.40.

Fire Brigade, salaries, 12 men and chief for quarter, $42.00.

E. S. McQuaid, costs of gas rights $162.10

Total $299.40

Bylaw No 64 authorizing the issue of $6000 debentures to raise money to deepen the gas well had not received its third reading within two weeks after being voted on on by the ratepayers,as required by the Municipal Act, which fact came up before the council from the secretary. The latter was instructed to ascertain from Burgess Co.'s solicitors and the Atty. General's Dept. what should be done to validate the bylaw.

Geo. Dixon appeared before the council asking that draymen be licensed stating that the townspeople would get more satisfaction out of the dray service if the draymen were protected.

The mayor submitted the following names as a suggested personnel of the standing committees. The draft was accepted and is as follows:

Finance: Young, Bird, Urquhart.

Works and Property: Lee Young Logan.

Fire, Water, and Light: Logan, Young, Lee.

Licenses and Police: Emery, Bird, Urquhart.

Health and Relief: Urquhart, Emery, Logan.

Railways and Emigration: Bird, Emery, Lee.

Councillor Urquhart remarked to the council regarding the urgency of every committee getting a line on the work to be done during the year. Mistakes had been made in the past and these should be profited by. Estimates should be secured in all the various branches of the civic work.

The mayor said it was up to the committees to make up their report on estimates required for the work in their various departments and to bring these reports in in writing.

Big Reduction Sale in Clocks

Regular $1.50 Alarm Clocks at..... $1.00
Regular $2.50 Intermittent Alarm Clocks at $1.75

CHAPTER XXVII.—(Continued)

The Cross Bolts

"Where's the use of that?" said I. "Oh, I've been astin' all the masters I've met." he answered. "But I look a fool when I make the wards of it. Now, if you'll be somethin' longer or a noise' more, an' that'll give me time to remember. Bull they really agreed to play five games in three for five dollars to propose. If the lucky one got the girl he was to pay the beat half the profits; if he lost an the second feller got the girl on his proposal, he was to get fifteen an' half both. They was still fond in the Cross Bolts in them days when they was more than average all right. Well, they played the five hands an' it was even honors on the fourth show. Then Jordan made a crackin' move a' Ann hind, an' Walsh was called for a show. It was the first complete deal that ever rested in local lowness' ten, for they looked at their cards an' each other's eyes a long time before Jordan took agree. Then Walsh laid down his hand, an' Whitman was, 'Tittle tattle, the girl, an' after a time he answered, 'Again' you, Jordan an' me thinks you won't crack good luck so badness but when the girl was done to a stand, but they both laughed. Jord Jordan was a good sport, an' he was glad to lose to Walsh. Seems as he had for the stage had a friend when he'd lost Whitman. They took him into the ol' man's cabin, an' after he'd had a drink or two on me, he Whitman insisted that Jordan make an act to meet that girl. They'd met a hard time gettin' the girl to see Jordan, an' they'd told her she was a widow with only a hundred an' seventy a month, an' Jordan would be home an' have to work. Now Whitman wanted Jordan to go down an' meet her, an' he numbered the letter. The little feeling had made me mean, an' I told him I'd go, too.

"I was astin not the girl, an' the servant who had tagged along—the name of the servant was Medium, if you wash all the details."

"I see," I said, "go on."

He brought the girl back to where the Cross Bolts was tendin' to Whitman in a mighty gentle an' tender way. The girl hadn't seem to care much for Whitman when she was here, an' that sure say they had it out. She didn't make no fuss, tho she was a game one all right, an' said that it was a mistake an' we would not tell on the real stage, provided Whitman would.

Whitman was laid up six weeks, an' in this time he was out Jordan had taken a shine to me enough to propose to the girl an his own hook. Whitman agreed, an' Jordan made his play, an' a favorable answer, an' Whitman made me come to lead to the Cross Bolts an' look at this time of Florence cashed on, an' he first thing Whitman knew he was married to the Cross Bolts, and that was all. I wasn't mine an' started for home the country. Down at the station he took a chance and shot green how a city, an' he knew his note there was a girl in the case. He asked Jordan if he'd told the eastern girl about the Cross Bolts, an' he said he'd told about the cross and the way they was many nice herself. Jordan shook it, but Whitman said it'd write a real letter, an' Jordan got those bullets in his hand, an' they laughs about it; but he stared Whitman twice, an that forget me, an' it was reported that he'd died. Anyhow, he's taken down to the town an' put on board, out of his head, an' was never heard of again.

"Jordan's ol' ha wounds pretty well, back's tore a wonderful girl but just when he was gettin' around again, one of the boys that wildness held down the Cross Bolts an' shot him in the back. Jordan died, an' they said he'd told the eastern girl about the Cross Bolts when he was many nice herself. Jordan shook it, but

Editorial Comment

The Old and the New

This week we have stepped into a new year. Tofielders look forward with anticipation to the realization of developments which will accrue. The year just past brought with it considerable increase in population, an active period of building, a substantial addition to the numbers in our farming community and a development in our coal industries which is but the beginning of developments on a much larger scale to take place this year.

The new year into which we have just entered will see a number of changes which will add greatly to the general good of the community. Already numbers of farmers have sent word that they are coming to locate early in the year. The Board of Trade is in touch with many inquirers and the information being sent out almost daily will result in more being influenced to come to the Tofield district. The G. T. P. is putting into effect an active and agressive immigration policy and will undoubtedly be instrumental in adding to the numbers who will in the future make Tofield district their home.

Tofield should be alive to the necessity of enthusiastic co-operation of all its citizens toward the making of the town an attractive place to live. By the judicious use of its revenues in improvements of a permanent nature and which will be of benefit to all, by encouraging the beautification of the town from both private and public sources and by fostering that spirit of hearty concord amongst its members in the movement which will tend to build up a prosperous urban and rural community. This is not so big a task as some would have us believe. Let us all then go out of our way if necessary in each doing his part toward making 1912 the best year in Tofield's history.

ooo

1912 Sees Remarkable Epoch

The passing of 1911 and the ushering in of 1912 are co-incident with several remarkable and worthwhile interesting epochs. China is awakening to a sense of its own importance and privileges and the dawn of a new era is already breaking. Things are already happening swiftly in Persia and it seems that the dynasty in power in that country is falling into oblivion' Russia is assuming tremendious proportions in huge acquisitions of territory in Mongolia, Turkistan and Persia. Italy and Turkey are in the throes of combat. Germany and Britain have been on the verge of disagreement and the tension is not wholly relaxed. Portugal has switched from a limited monarchy to a republic. The great labor strike in England a few months ago is succeeded by another in which many hundred of thousands are thrown out of employment. Spain is having her internal troubles. Really it does seem as if things were shaping towards some tremendious upheavals in the months to come and truly it should be a relief for us to realize that our lot has been cast in pleasant places.

ooo

Tofield Observes Holidays

Christmas and New Year's Day were observed better by Tofield business men than ever before by Tofield business men than civic holidays hitherto have been observed and as a result a better feeling all round has resulted. Now that the start has been made, there would be nothing better than to keep right on in the good work. Nobody loses and nobody gains any more than anybody else.

ooo

Civic Affairs

The mayor and councillors-elect were sworn in last Tuesday evening when the whole council met in the first regular session of the year. Beyond considering tenders for gas will casing, current accounts and the appointing of the standing committees there was little business to be done.

A very wholesome and heart to heart talk ensued which bore on the past methods of doing business in the council and the manner in this could be improved upon. The result of the discussion appeared to be that both councillors and mayor are determined that committees must do committee work, get their estimates in early, bring their reports in in writing, and generally conduct the business in their respective departments according to Hoyle and the Municipal Act.

That there was need for considerable organization work in the civic system was remarked by several councillors the other night. That previous councils, while unquestionably acting in good faith, had in some ways acted not wisely but with rather much zeal. The need of a competent engineer and a legal councillor was mentioned and generally conceded.

It is to be hoped also that the proceedings of the council will be much facilitated as a progr system is worked out. In passing it might be noted that the time of the councillors in council meeting should not be wasted and the proceedings rendered tardy and monotonous while the clerk looks up missing correspondences which should be on the table on a communications file. Much valuable time has been lost in the discussion of accounts which should be referred to the finance committee according to the bylaw governing the proceedings of the council.

The apparent neglect of last Council to pass the last debenture by-law within two weeks of the voting on (favorably) by the ratepayers was an oversight and will be an object lesson to the new council. While there may occasionally occur, (they do not in the best of councils) The fact arising and the embarrassing results of such occurrences should be an incentive towards the greater determination of succeeding councils to place the civic business on a system which will in future eliminate as far as possible this recurrence.

Urquhart's
New Year Announcement

The coming of 1911 brings with it a new plan of business to our establishment, henceforth we are o is known as Tofield's Cash Store. There are numerous reasons, from the standpoint of both Merchant and Customers, why we should initiate such a Store in Tofield. Among the obvious ones are the lessening of expensive and laborious work to the Merchant and illimination of ill feelings between patrons and merchant, by the placing of all consumers on the basis of equality in conducting a Cash Store we are enabled to sell at cash prices. All Stores doing a credit business must necessarily at larger profits. Since a double scale of prices is impossible the persons paying cash are charged alike with those receiving merchandise on credit. we feel that in making this change we are fulfilling the wishes of our numerous patrons who pay cash and we earnestly ask them to aid in its support

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS
ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by the father, mother, son, daughter, brother or sister of an intending homesteader.
Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.
In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.
A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.
W. W. CORRY,
Deputy Minister of the Interior.

CANADIAN WOMEN AND THEIR WORK
By Marjory MacMurchy
(Copyright by Publishers Press Limited, Montreal)

CANADIAN WOMEN IN MEDICINE

MISS JANET CARNOCHAN,
Pres. Niagara Historical Society,
One of the oldest teachers in Canada.

women teacher in Canada who has been trained in England Girls' schools and colleges all over Canada are engaged in fitting Canadian girls for the profession of nursing. Canada has already a number of splendid hospitals of social service to their credit. Canada has always been a potentially a wealthy country. But in a few years the graduates of these schools will have opportunities given to them whether they will or no of filling arduous social positions. The girls' college has been planned to train girls who will be able to fill such positions. On the other hand, the public schools, high schools and collegiate institutes are more or less designed to train girls who will become teachers, or who will fill business positions. So the training of the nurse is more practical than that for the business world. It is impossible naturally to draw a hard and fast line. The graduate of a girls' college may become a teacher, and the girl who is trained in a collegiate institute in a few years may be one of the leaders among the women of a large private town. But generally speaking, the nurse's school training is more rigorous and the private school training more decorative. It would be impossible to make one out of every girl in the public schools and colleges but it would be more than possible to make a large number of them into nurses. Many of the women teachers of Canada would be able to do this work willingly if the necessity arose for the sacrifice. The great majority

A TRAVELLER'S EXPERIENCE

"My one wish will be," writes Harry Tolford, a well known hardware traveller of Hartford, "that everybody with a bad stomach may learn as I did before it's too late, that there is the one remedy to cure. Why, I was in mighty bad shape, my stomach all wrong, and I could'nt digest. I would seldom sit up with a meal but I would get sick. I was in misery most always. Nothing seemed to relish. Everything I got better mighty fast. It is simply a great remedy for the troubled stomach. Keeps your stomach in order, cures cramps, prevents headaches or sensations, bloating, or that cold feeling in the stomach. I have recommended it to pass hosts of people outside of the past two years that I travel with Nuxated. Do you wonder I recommend it?"

INFLUENCE OF CHEWING ON THE CONDITION OF THE TEETH

Brief opinions on the children in the days of Keating, in Detroit, showed that a person who had lived long enough to have a mouth filled with teeth was a fit subject for study and both hard and soft tooth. In fact, nothing could suit Doctor Bell, his assistant better, and after the introduction of soft bread were an effect in 1864, when soft bread was the rage. It's not easy, in 1937, just to offer soft bread was introduced, but in 1864, most of the bread was soft. It

LOVE OF DISPLAY

The display of the Victoria's have reached such a which can night and Miss Victoria's display of h'r hair here.

"Come, Charles, I know that's the furniture you seeing with the new bed. mean you've bought a day, and if it I just won't receive it, that's all."

"Why, Ada!" asked Mr. Vanity.

"Why, indeed!" replied Mrs. Vanity, "to pay $100 for a suite and then have it sent out here and not to find some of the neighbors can see it when it's brought in? I'd know it."

WOMEN NEED GIN PILLS

"Port Daffrin, N.S.

"I was troubled with Kidney Backache for several years. My back was weak. I had trouble kidneyhen, and was always tired. I got Doan's Kidney Pills. I at once got a box and after taking them I felt better—after three boxes I was cured.

That Reminds Me

"Pa, can you tell me what fame is?" "Fame, Johnny, is what a man gets for being said to apologize now."

Jones: Pops, I ain't got to sympathy. Father: John, correct your brother. Johnny: Aw, correct yourself, you fat-head.

"Now, Willie, what's the matter with you, Bobby?" said Willie, "is that you bother too much over little things. It has become a habit with you."

"Well, it would become a habit with you, too, if you had a pair of those shoes pinching your feet all the time," replied Bobby.

Salesman's conversation was soon cut up by a very successful fiend of conversation, who declared that if Talley's Pills were not discovered at the creation he would have exclaimed:

"Why, you're taking me. Why, I'm not sick!" replied Mrs. Vanity.

"Then you're going to pay $100 for a suite and then have it sent out here and not to find some of the neighbors can see it when it's brought in? I know it."

"You have created one of our Greats," said the South American man to Mrs. Vanity.

"Why," said the leader of the crowd "you're the leader of the crowd."

"We will exchange two Colorado for Ohio."

"Then two Colorado and a Captain."

"Nothing doing," said the Ohio man, however, for a ran of condensed milk."

"Here in Hoodoo can you afford a couple of houses?" inquired Barkaway.

"Oh, I mortgaged my house and lot," replied Jed Hicks, "I am building a garage now."

"You are building a garage, eh?" said Barkaway. "Why, Hicks, the drive are you going to put in that?"

"Oh, I mortgaged my car," said Hicks. "I'm mortgaged up, see."

"But any dear fellow—those mortgages will full due some day, won't they?" asked Barkaway.

"Correct," said Hicks, "but that's all right. Then I can mortgage the garage."

"Is this man of whom you speak a fellow of good carriage?" asked Jones.

"I don't know," said Dalby. "All I know is that he keeps house at all."

"I mean is he a man of good deportment?" asked Hawkins, smiling openly within.

"Now," said Dalby. "His address is brought with it from—there's no reason which better is known."

"Oh, now, Dalby," said Hawkins, "stop this nonsense. You know perfectly well what I mean. How does he support monthly?"

"Why—I don't know," said Dalby, watching his hand in perplexity. "I guess he just forks up like everybody else."

Hudson dined one day with one of his fraster admirers, and the latter, knowing the former's predilection for fine wines, had a bottle of renowned quality brought to the table toward the end of the repast.

"This is to be exclaimed, "is the Rinshea among my wines!"

The host smiled at it, saying: "Excellent, wonderful! Now bring on your Rinshea!"

Horace Greeley once wrote a note to a brother editor in New York, whose wife had presented Daughter as his own. The recipient of the note, not being able to decipher the writing, took it to a printer acquaintance of his. Mr. Greeley for absolutely declining it to be the answer to his note to him, and after looking it over it, he said, he could make out a full size tin by return mail.

"Do take it back. What does the fellow mean by it?"

"I'm sir," said the boy; "that I just what he says."

A physician of Montpelier was in the habit of employing a very ingenious art of his own. When he came to a town where he was not known, he pretended to be very much in a hurry, and ordered the post by order to offer with best of dram, a coward of twenty-five bucks he schooners should bring it to him. The ruse took from ever to number all the tidies and new dainty scraps of the doctor, as well as the pile of medicines. He soon became the talk of the town.

"Do you want to know more, "that I'm the best doctor in—name here, a true, clever fellow? He must be very rich for her charges twenty-five bucks for fine big dog."

The dog was not found, but patients were.

A passenger who escaped waitjaret from a country railway smash, owing a fellow-traveller something seriously damaged in the accident, was asked by the latter to look after his property for a little in the smash, and, thinking the old man had lost his wits, asked in sympathetic tones:

"What part of the train was she travelling in?"

"She, sir? I am looking for my trunk!"

When Marshal LaFlesche was made Duke of Dunlise, the new duchess (who was the original of Gordon's Miss Dora Gross) went to the Tuileries to thank the Empress Josephine. As Mrs. in Marie Chalk had not demanded an audience, the usher, mentioned to call her by that name, deemed to take the lady in waiting (chamberlain in waiting; he returned and addressed her: "Mrs. Marshall was my name."

Jones, after looked solemn at him, and then, shaking his head gravely, replied, with a feeling deep to treat her subject: "Ah, my dear fellow, consumption!"

"No—for the Duchess of Dunlise!" Jones was somewhat disconcerted, winked intelligently, saw Lone, saving himself the trouble of the rest, and left off abetting the door.

"Say, my boy," said she, "what do you think of this?"

Sir Matthew Begbie, Chief Justice of British Columbia, was born before him a man charged with having killed an Indian with a tomahawk. The accused was conclusive, and the judge charged the jury accordingly, but a verdict of "Not guilty" was promptly brought in.

"Gentlemen of the jury," he said, "I cannot conscience the disgrace with you. Many repetitions of such conduct as yours will make it hard for a law abide face, and the city of Victoria it self. Gentlemen of I have nothing more to say to you."

And shook, turning to the prisoner: "You are discharged. Go and sang your thanks of those jurymen; they do serve it."

THE URGENT OF CITIES

They lay the health of cement down
And level it with ever;
The purpose is to make the town
A liking of beauty even.

The wind and rain and rain
Will wash the streets so clean
Again they turn it loose,
And then they wash it of grow,
Fit for the public use.

And those who don't seem to be
Like stones *leaves* but,
Are those who are the most of use,
Forever tempest tossed.

AFTER POE

It was down in the Valley Sons of Aiden,
At Aiden far under the hill,
That this thing happened to a maiden
Who went by the name of Jill.

She was sent up the hill by her mother
Along with a youngster named Jack,
He was to carry the pail of water
(She gone is to good as another)—
Good enough for a
mother,
And that's a misfortune, abide!

They were sent up the hill to fetch water,
Jack stumbled and dusted his crown;
And, all in a pother,
Accompanied the young fellow down,
Came Mother Hubbard tearing,
Came Mother Hubbard, slithering down.

It was upon her, and then came Jill of Aiden
Of Aiden far under the hill,
And then came Jack after
Who went by the brief name of Jill,
By the Hubbard name, the daughter
Of Mother Hubbard, still.

The stately procession of Jill

IDIOTIC INQUIRIES

If a saw horse saw what a saw horse saws

Would a saw saw saw what a wood saw saws

Bill with a bill file filing bills—
Bill may file for a long, long while,
But the way a bill is filed is the test of his pile
Bill with his bill file
—ill file!

THE GREEDY LITTLE BOY

Little Willie was a greedy boy
Just a dozen, stunning lad;
And the way he ate would annoy
the grocer,
Then he'd take them, one by one,
Rake slowly, while his son
Made them disappear like magic
Sic.

The mystic procession of Jill

IDIOTIC INQUIRIES

If a saw horse saw what a saw horse saws

Would a saw saw saw what a wood saw saws

Bill with a bill file filing bills—
Bill may file for a long, long while,
But the way a bill is filed is the test of his pile
Bill with his bill file
—ill file!

THE GREEDY LITTLE BOY

Little Willie was a greedy boy
Just a dozen, stunning lad;
And the way he ate would annoy
the grocer,
Then he'd take them, one by one,
Rake slowly, while his son
Made them disappear like magic
Sic.

"Supposing," began the former "that you were to find that the Bible is fantastic mountains, and the private rules of the Bible, and you were to find supposing that you were on the point of finding out that the Bible is not true, and there just to—just to put your finger on it, and you were to find, that the Bible is not true, and that you were to find, at your sight, the pretty tough wouldn't compensate you for all the years of misery handy?"

He looked at the smoking compartment ceiled. Then scanning the passengers in the opposite seats, he seemed to contain the element of a new line of fun.

"You know, went on the one-time Bible student, "I've had a terrible time, and I've had a terrible time, and I've had a terrible time, "it takes a whole lot to ruffle me, but I've had to ruffle me with the non-enough criminal conduct that I've had to contend with. I've had to contend with the criminal conduct in the tariff on my article always raises the duty on my article always raises the duty on my article always raises the duty

FARM AND FIELD

GIVE THEM EXERCISE

Animal owners Should Bear In Mind that all Nature's Family Require Regular Exercise.

A farmer's young bull terrier once took it into his head to grip his master's father by the leg. The old man gave tongue, but his son rubbed his hands delightedly at the sight. "He's had it before, dear lad," he cried. "It's hard on the old man, but it's splendid exercise for the pup."

This man was not a model son, but he held correct views on the value of exercise. In fact there is no animal from man down wards that is not the better for exercise, and this is something every farmer ought to keep in mind. Both the stallion and the mare in foal must have it, which owns are the more productive with it, oats or other grain scattered in a dry spot for oxen where they will have to rustle and pick it up will keep them healthy and result in more and heavier fattening with less waste. Poultry fattening will present the best fattening which gives a step to their laying eggs. In a word, the farmer has to see that every creature that is his gets its share.

JOHN T. BURNS

Secretary-Treasurer, International Dry Farming Congress, Colorado Springs, October 1911.

TEMPERATURE AND VENTILATION

There is an interesting story told by Mr. E. H. Grubb, a most successful potato grower of Colorado, of an incident in his own experience relating to potato storage. When Colorado territory was young Mr. Grubb was prospecting for gold at an altitude of about 12,000 feet. He met an old prospector who was leaving the country, and who directed him to an old mining tunnel which contained some supplies. Mr. Grubb found them, and among them a dozen sacks of potatoes that had been there for two years and were in fine condition and sound as new. When cooked—by the way, he could distinguish from new potatoes, kept in the ordinary way. They were far enough back in the tunnel to be protected from freezing, while the adit at the end of the tunnel had induced a constant stream of dry air through the tunnel. Hence the ventilation was perfect. Mr. Grubb took advantage of the lesson when he came to build his potato cellars in later years, with brilliant success as a consequence.

Care of Farm Implements

The main indispensable thing is an implement shed, and in child proportion to the protection from the sun, rain, above and below. A further valuable protection against the insidious attack of decay is the liberal use of oil on the more delicate parts of the machinery. This can be applied when the implement is put away for some time, and wards off the corrosive rust which costs the owner so much of the value of the machine. If the lack of time or money forces the owner to postpone the erection of an implement shed, a temporary protection may be had in the shape of a tent, or even a waterproof covering fastened over each implement.

Horse Transport by Rail

The fifty new horse cars which were recently got into operation by the Canadian Pacific Railway have become very popular with shippers of horses. Recently, at the Woodbine races in Toronto as owner of a big Southern stable wanted to buy one of the cars outright, in moving about from track to track his horses had to cover a large amount of railway mileage and he thought that these new cars were the safest and best in which to ship them. The cars are fully box stalls, made and collapsible for straight haul and are so improved over the ordinary cars used for shipping horses.

Lice in the Poultry House

Systematic work is required to rid a poultry house of mites or lice. Of course thorough cleaning is the first requisite, the house should have all nests removed and destroyed and the walls scraped down to the bare wood. This will leave you ready to combat the parasites in the open. A campaign should be started treating both the fowls and the interior of the house. The fowls should be thoroughly dusted with insect powder, most commercial preparations are reliable, and at the same time the building should be thoroughly sprayed with a strong insecticide.

When you want a reliable medicine for a cough or cold take Chamberlain's Cough Remedy. It can always be depended upon and is pleasant and safe to take For sale by all dealers

Fire Destroys Kitchen

Fire broke out in the dwelling occupied by John C. Kelly early yesterday morning and occasioned the calling out of the brigade which responded in full strength with the exception of the chief who was away in the country. The fire originated in the kitchen where Mr. Kelly was lighting the fire for breakfast. The kitchen was soon a mass of flames and had it not been for the fact that a north wind was blowing the whole building would have fallen a prey to the fiery king. Prompt and effective assistance resulted in practically all the furniture and effects in the main part of the building being removed, not, however, before considerable damage had been made by the fire and smoke. All the kitchen furnishings were destroyed. Kelly's loss is covered by insurance. – There was no insurance on the building which was owned by Hammond Bros. The total loss will be in the neighborhood of $350.00.

Mrs. Chas Robarge of Beaver Lake west is on a months visit to friends at the capital.

Mr. Tom Cookson is one of a number of visitors to home folks this winter around Tofield. Tom has been in B. C. for the past two years or more and is now staying with his brother Ed.

Boats on Fraser

Tne material for the two new boats being built for the Grand Trunk Pacific construction on the Fraser River from the Tete Jaune Cache to Fort George, is being prepared at New Westminister B. C. at the local shipyards of Mr. G. S. Askew under the supervision of Capt. S. B. Johnson, who will be in charge of the boats operated on the Fraser River. These boats will be 110 feet long by 34 feet wide, stern wheelers with a carrying capacity of 250 tons each. Two barges will be built in addition, and each boat with a barge in tow will have a carrying capacity of 500 tons of cargo each trip. The engines for these boats have been removed from the "Conveyor" and "Operator" which have been operated on the Skeena River for the past two years, and will give those boats a speed of fifteen miles an hour.

The British Columbia Express Co. have announced that they will have boats on the Fraser next season on the same route, carrying commercial business, so that there should be facilities for handling of freight and passenger business from the end of steel to Tete Jaune Cache and points on the Fraser River to Fort George and with other steamers operating on the Northern distribution will be afforded up to the head of Fraser Lake, a distance of approximately 100 miles only from the end of the steel from Prince Rupert, and in the course of another year there should be through communication established across the central interior of British Columbia, thereby opening up with suitable transportation facilities, the rich agricultural, [illegible] and moderate climatic conditions, which is to consistently expected will prove to be one of the most extensive and most productive areas of arable land in Canada. The scattered settlers in the interior have been obliged to rely on steam transportation during a short period of the year from that point to Fort George. The cost has been enormous, but with access to the railway at Tete Jaune Cache freight will be delivered next year under comparatively normal conditions, and incidentally building up the trade of Edmonton, Edson and Pittsburgh Alta., on the main line of the Grand Trunk Pacific as a natural sequence.

Tofield Agricultural Society

The Second Annual Seed Fair held under the auspices of the Tofield Agricultural Society will be held on Tuesday, January 30th in the town hall, Tofield. The following values in prizes are offered:—

Local and General News

The Young People's Guild met last Monday evening in Rev. Andrew's church.

Rev. B. Nicholson paid a visit to Viking Sunday, delivering two sermons at the Methodist church at that place.

Mrs. Collins, who has been quite ill for the past week, is reported to be improving at present.

W. L. Jenne left last Thursday for North Pinnacle, Quebec where he will stay this winter.

Leslie Lincoln, who some time ago suffered from a gunshot wound in the biceps of the right arm has almost fully recovered.

Of course you will hear Frank Lloyd and his famous company of comedians, playing in Bellamy's Hall, Jan. 12th. Procure your seats early.

If you want to laugh you must attend the performance of Frank Lloyd on January 12th, in Bellamy's Hall. He is famous for his ability to produce side splitting laughter.

The Venerable Archdeacon Grey of Edmonton will occupy the pulpit in Logan Church on Sunday Jan. 14th at 2.30 in the afternoon and at Bellamy's Hall at 7.30 in the evening.

Jas. M. Hazleton of the Canada West Townsite Co. owners of Tofield Heights was in town this week. His Co. has purchased the west half of Crofts and Lee's portion of the townsite and will shortly put it upon the market.

Chas. E. Rogers preached two interesting and instructive sermons at the Methodist church last Sunday night which was highly appreciated by those present. Mr. Rogers is a young man of ability and last as a preacher and anyone will be well paid for coming out to hear him next Sunday as he will be in the Methodist church both morning and evening.

Second Fire in Month

The fire brigade had a run shortly after 8 o'clock last Sunday evening to an incipient blaze in the bottom of a bin full of coal, within a foot of the corner of C. Moss' house on Seventh St. north. In the teeth of a heavy gale tugging the sixty gallon chemical through the snowdrifts was a hard task but the boys made it in good time.

How the fire started in the bottom of the coal pile is a question. But it not been noticed by Herb Lett who is was, a bad blaze could not have been averted as the house is unoccupied. Lett and W. Bowick were out watering their horses and saw sparks issuing from the corner of the house. Bowick instantly mounted a pony and made for the fireball to ring out the alarm.

Prompt response on the part of the volunteer fire brigade in getting the hose open owing to there being no light in the fire-hall. The pounding of a lighted lantern in the station at night to enable anyone to see his way amongst the vehicles to the bell ropes has been mentioned to councillors before this but nothing has been done. To Mr. Bowick it seemed a long time from moments he got into the hall to the time when he found his way to the ropes. This a small matter and surely should be attended to in the interests of the citizens.

Conflagration At Viking

Large Portion of Business Block Wiped out Early This Moraing

Viking felt a pang in a disastrous fire this morning. The blaze started in the Chinese Laundry and quickly spread. At the time of writing the following pieces of business had been destroyed: Chinese Restaurant, Postoffice, Gazette Printing Plant and Hellicker General Store.

The latest report is that the fire is spreading, it being beyond control. Communication by telephone is unavailable.

The fire is located in the block between second and third avenues on the east side of Main St. The business places at the corner of main and 2nd ave have gone up and as the fire is spreading, the King Edward hotel which is located on the northwest corner is in evident danger.

FIRE AT VEGREVILLE

The telephone exchange at Vegreville was wiped out by fire last Tuesday night.

A natural Cure for Catarrh Obviates Taking Drugs

It Has Superseded the Old-fashioned Nostrum Inhalation, and Is Virtually Nurse Quickly.

It was their inability to reach the real source of catarrh and bronchitis that caused medical professors to say liquid cough medicines and adept "Catarrhozone" instead. Catarrhozone provides a method of breathing right into the lungs certain rare medicinal vapours which are so healing and comforting as to entirely banish coughs, catarrh and throat trouble in a very short time.

The most wonderful thing about Catarrhozone is, that no matter where the germs of bronchitis or catarrh are hiders, Catarrhozone will reach and destroy them.

"About five years ago I took a cold in the head and Catarrh set in. It kept increasing by leaps and bounds. I have passed all kinds of nasty, repulsive stuff in bed. I would have to sleep sitting up. I was always getting a cold. I was a regular nuisance. I tried a bottle and began using it," one not long in healing out. I had expected that a long time. I am recommending Catarrhozone to all who have catarrh, etc.

(Signed) Harold Everlee L. Wasson.

"Hair Fill, Queen's Co., N.B."

Catarrhozone is made in two sizes, price 1s. and 2s. 6d. (sufficient for a month's treatment), and can be obtained of all chemists, stores, and stalls throughout the world, and in Australia, New Zealand, and South Africa, of the Inhalers, Limited, Sydney, Melbourne, Brisbane, Adelaide, Perth, Hobart, Launceston, Auckland, Wellington, Christchurch, Dunedin, Invercargill, Johannesburg, Durban, Cape Town, Port Elizabeth, Bulawayo, Salisbury, Umtali, Gwelo, Buluwayo, Kimberley, Beira, Lourenco Marques, Delagoa Bay, Natal, Transvaal, Orange River Colony, Rhodesia, Cape Colony, Mauritius, Ceylon, India, China, Japan, Straits Settlements, Hongkong, Manila, Philippine Islands, Java, Egypt, Malta, Gibraltar, Canada, United States, Mexico, Cuba, Jamaica, Trinidad, Barbados, Demerara, Brazil, Argentine, Chile, Peru, Uruguay, Paraguay, Bolivia, Panama, Colombia, Venezuela, Costa Rica, Nicaragua, Honduras, Guatemala, Salvador, Hawaii, Fiji, Tonga, Samoa, Norway, Sweden, Denmark, Iceland, Russia, Germany, Holland, Belgium, France, Spain, Portugal, Italy, Switzerland, Austria, Hungary, Roumania, Turkey, Greece, Servia, Bulgaria, Montenegro, Albania, Corfu, Crete, Cyprus, Smyrna, Syria, Palestine, Arabia, Persia, Afghanistan, Beluchistan, Siberia, Manchuria, Korea, Formosa

R. N. WHILLANS, - - Manager and Editor

TOFIELD, ALBERTA, THURSDAY JANUARY 1, 1912.

Editorial Comment

The early morning fire yesterday will doubtless result in another fire protection spasm throughout the municipality and should awaken some live interest in this matter in the Fire, Water & Light department of our civic affairs. While the chemical engines undoubtedly did good *Fire!* work at the fire, their utter inadequacy, had a stiff south wind been blowing, is quite apparent. It is sincerely to be hoped that this year's council will take this problem up early and with some exhibition of an understanding of its importance and their responsibility in the matter. Steps should be taken to put our fire fighting department on a more modern basis. The fire ladders are willing but without proper apparatus and material their efforts would prove unavailing in a crisis.

The above article was written last week immediately after the fire at Kelly's but was unavoidedly left out from publication. As hinted at the time of writing, the lesson given by the fire was not lost and an impromptu meeting of Council was held in the afternoon at which all but Mr. Logan, chairman of the Fire, Water & Light Com. were present. Sec. Nicholson was instructed to ascertain the cost of the installation of en electric alarm system. While the meeting of the Council was in session on the whole, it is to be hoped that the Council's good New Year resolution ro making the respective committees carry out the work of their departments and incidentally in regard the work in hand, the Fire, Water & Light Com., will not be overlooked.

o o o

The first of the year is no time to be gazing into the sky; it is the time to be looking into the future and to arrange the things which are to be done. The start-off should be with no uncertain movements and every member of every committee which has certain departments of civic matters under its jurisdiction should prepare himself for specific action. If at the beginning of the year council sets before its eys a definite list of concrete problems, *The Time For Planning* v preeise number of possible achievements, an exact schedule of desirable attainments, it has something to stir its pulses and to hold it straight and strong when the sun is up and the morning aspirations begin to wit.

There must every year be advances along the line and if a mark is set so that council can see it, so that the people can see it, all will take delight in the effort to come up to it. Life gains fresh zest when there is something definite to live for. Council can look for every encouragement from the citizens if its plans show there is something set to accomplish.

Beaver Lake

The weather continues unsettled. Coldest record here during recent snap 32° below zero at midnight on the 30th. Some thermometers less than this.

We regret to state that Mr. Miller, engineer for Spengler & Miller, met with a painful accident recently, one of his eyes having been scalded badly. This has caused the mill to be stopped temporarily.

There was a free concert by the children of the public school on Christmas nights. The building was crowding and the pupils acquitted themselves so well that everybody was delighted. Miss Kathleen Kerr, the teacher, deserves census of credit for the pains she took in the affair. James A. Stewart was Santa Claus. Mr. Crumb the Presbyterian missionary made a very acceptable chairman. Messrs A. R. Moody and J. S. McCallum were called upon for school addresses and the former made a happy response.

Now is the season of savearing off from bad habits and the swearon of good ones. In looking back over our record as a correspondent for 1911 we find little to cry pessmi about. Once only, just after the Dominion elections, while hot blooded from the fray, did we break our rule, never, if possible, to write anything that would hurt others feelings. Our remarks re the Liberal officials here were somewhat "off-color." We regretted then having made them, and now, viewing the battlefield with cooler blood and vision, we regret them yet more. After over thirty years' experience few, indeed, have had reason to complain. May we all have a joyful and prosperous time of it during 1912, is our earnest wish.

Jan. 1st, 1912.

Estray

On the premises of the undersigned Section 2-50-18-W. 4, M., One bay mare 8 or 10 years old, indistinct brand Jor U on left shoulder; one yearling iron grey horse colt, no brand; one 2 year-old iron-grey filly, and 1 sucking colt, since December 15th 1911.

LILLIAN NORDICA

The Struggles and Triumphs of a Famous Singer

The success of Lillian Nordica, one of the greatest contemporary opera singers, is a tribute to the ambition and struggles of two women—the singer and her mother.

The daughters of Mr. and Mrs. Norton, Lillian was born in Farmingham, Maine, in 1865, in a family where music was the atmosphere of the home. Her father was a violinist and her mother a singer with no unusually sweet, rich voice. Mrs. Norton's ambitions clashed at the limitations of village life; she wanted broader opportunities for the development of her children, so when Lillian was six the family made its gradeome exodus from Maine to Boston, the Mecca of her dreams.

The future prima donna early revealed the promise of her wonderful voice, and the mother of the impecunious family laid aside money from her meagre income for the musical instruction of her daughter. From twelve to fifteen Lillian was under the best instructors obtainable, with Prof. John O'Neill, who considered the young girl the most talented of all his pupils. When her interest flagged in the slightest she was stimulated to new endeavor by her mother, who begged her daughter's sake to order a lunch bar, worked untiringly and saved lavishly for the new goal of instruction.

Lillian was growing in power and courage. She was singing for $1.500 a year as a church singer, but singing in church did not satisfy her high ideals. She underwent severe criticism from her choir master because she would not sing her own music; she met the occasion with her customary high finance; saved, scraped and borrowed enough money for a ten years' course in the conservatorio, where she studied diligently over her beloved daughter.

On completing the ten years' course Lillian and her mother went to Europe. Gilford, heard the singer and engaged her for a hundred concerts in Europe. In 1878 came the début at the Theodore Thomas concerts for a term of years, which established an enthusiastic audience for the young, reckerienced her "Digby Bondage," the Lily of the North. At Brussels she received her crowning triumph, when the Queen of the Belgians brought her to the unending plaudits of the enthusiastic audience.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

New Year Bells
A number of exuberant boys anxious to display their feelings of peace and good will toward all men decided to celebrate the outgoing of the old Old and the incoming of the New Year, Now Year's Eve, and in the course of their travels presented themselves at the town hall with the idea of asking the law into their own hands and stilling the old town tom as the fire bell tower to "Ring out the old Ring in the New."

They were met by the Chief of Police at the station and his assistants, and before they had time to get started on their celebration, Glen down town. As the company passed the Standard block, one of the assembled the watchful eye of the matrimonial candidates in getting the bell rope just as the marshall was congratulating himself that he had the bunch of blue Bore well in hand down town. The first pull startled a few from their beds but the second allayed any foreboding whilst the third and succeeding peals warmed everybody's heart to the spirit of the occasion.

Not so one who jumped from bed hastily scrambled into his duds and out the door, bit for the down town section How he kicked the boys was a caution but when he found out all was well he, too, joined in with the spirit of the occasion and retired, not hastily but with better grace and comfort of mind.

CANADIAN WOMEN AND THEIR WORK

By Marjory MacMurchy

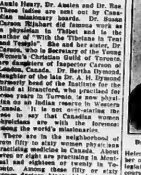
(Copyright by Publishers Press Limited, Montreal)

CANADIAN WOMEN IN MEDICINE

The first woman who practised medicine in Canada was Dr. Emily Howard Jennings Stowe. She attended the New York College for Women, because she could not study medicine in Canada, and graduated in 1867. Dr. Emily Stowe practised in Toronto. She was for long a familiar figure in

the life of the city. Her death occurred as recently as 1904.

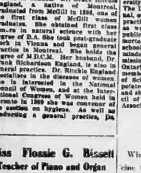
The first medical degree granted to women who practises medicine has a history. Medical being what it is, we believe that it is in older countries. Yet Tofield in Canadian society is more conservative, and, as it was said before, the woman who practises medicine in Canada is co-eals to have a considerable struggle before being recognized. Even the woman is far from being either lazy or incompetent. Dr. Augusta Stowe, daughter of Dr. Emily Stowe, was the first woman to receive a medical degree in Canada. The same year the Women's Medical College in Toronto, was founded, and Dr. Stowe Gullen was a member of its first staff, combining this work during the history of the College which lasted for twenty-three years. The Medical Faculty of the University of Toronto became open to women students in 1907, and in the same year the Women's Medical College ceased to exist. There is at present only one woman professor on the Medical Faculty of the University of Toronto, Dr. Helen MacMurchy — a graduate of the University of Toronto. She is also on the staff of the Toronto General Hospital was appointed about the same time that the Medical Faculty of Toronto University, and Dr. Jean Dow, Dr. Mitchell, the two women physicians were appointed to the staff of the Toronto General Hospital. These two are Dr. Ida Lynd and Dr. Margaret Patterson. Dr. Ida Lynd, Toronto, the medical courses at the University of Dalhousie and Halifax previous to women. Women have graduated in medicine from Queen's University, Kingston. The medical faculty of Bishop's College now merged in Montreal, also has a number of women graduates in



Dr. Ida Lynd

medicine. The medical faculty of McGill does not admit women students. But Dr. Rosalie Abbott was on the staff of McGill University as a lay tutor in Physiological Chemistry.

These are probably the only Canadian women who have taken the degree of medicine and surgery. The average career which lies before a medical graduate is a varied one. Dr. Margaret Patterson, a native of Montreal, graduated in 1898, one of the first classes of McGill women graduates. She went to Europe for a time, as the holder of a travelling scholarship, and with her degree of B.A. she took post-graduate work in Vienna and began general practice in Montreal. She holds the degree of M.D.C.M. Her husband, Dr. Frank Richardson England, is also in general practice. Dr. Richardson specializes in the diseases of women. She is a member of the National Council of Women, and at the International Congress of Women held in Toronto in 1909 she was convener of the section on hygiene. As well as conducting a general practice, Dr.



Dr. Margaret Patterson

There are in the neighborhood of forty to sixty women graduates in practising medicine in Canada, about seven or eight are practising in Montreal and eighteen or twenty in Toronto. Among these fifty or sixty women doctors, biographical notes on a few typical cases will show what the training undertaken by Canadian women in medicine and the average career which lies before a medical graduate. Dr. Margaret Patterson, a native of Montreal, graduated in 1898, one of the first classes of McGill women graduates. She went to Europe for a time, as the holder of a travelling scholarship, and with her degree of B.A. she took post-graduate work in Vienna and began general practice in Montreal. She holds the degree of M.D.C.M. Her husband, Dr. Frank Richardson England, is also in general practice. Dr. Richardson specializes in the diseases of women. She is a member of the National Council of Women, and at the International Congress of Women held in Toronto in 1909 she was convener of the section on hygiene. As well as conducting a general practice, Dr.

Rhoda England specializes in diseases of the throat. The dean Elizabeth Fisher is a soloist and Mrs. Howard Fisher is Dr. England's sister.

Dr. Maude Abbott of Montreal was the first Canadian woman to receive an honorary degree from a Canadian university for merit in scientific work. Dr. Abbott's first medical degree was received from Bishop's College. She is a graduate in arts of McGill. Her training includes years spent in medical work at the universities of Zurich and Vienna. She took the degree of Doctor of Medicine in 1894, and began medical practice in Montreal in 1898. She was appointed Assistant Curator of the Pathological Museum in 1899 and Curator in 1902. In 1911 she was given the rank of lecturer and the degree of M.R.C.M. honoris causa. Dr. Abbott was born in the village of St. Andrews East, Quebec. Her grandfather, the rector of St Andrews, was the uncle of the late Sir J. J. Abbott. Dr. Maude Abbott contributed a monograph to

Dr. Stone Gulles

Dr. Osler's well-known "System of Medicine".

Practical school inspection in Montreal is carried on by twenty-four physicians who visit the large schools daily, and the smaller schools and separate schools twice daily. School experience are fairly typical. She was born in Perth, Ontario, the daughter of a Methodist minister. Like other Canadian girls of the period, she was living in a large number of Ontario towns for the education of her children. Then she studied medicine. Her medical course was taken at Bishop's College, Montreal, and Dr. Elizabeth Fisher graduated in 1895. Beginning general practice in Montreal, Dr. Margaret McKellar, the medical health officer when medical school inspection was begun in 1907.

Mrs. Shortt, wife of Professor Adam Shortt, Civil Service Commissioner, for the Canadian Government, was born on a farm near Wroxeter, Ontario. She was educated at Hamilton Collegiate Institute and at Queen's University, being one of the first women in Canada to receive a university degree. On her marriage to Professor Shortt of Queen's University, Kingston, she began a literary career, but she is best interested in public questions, especially in questions of public health. She now resides in Ottawa where she is an active member of the Local Council of Women. She was a joint convenor of the section on women's occupations at the International Congress of Women in 1909.

Dr. Helen MacMurchy was born in Deer Park, Toronto, her father, Archibald MacMurchy, M.A., was for many years Principal of the Model Grammar School, which is known as the Jarvis Street Collegiate Institute. Dr.

Dr. Mrs. Adam Shortt

Annie Henry, Dr. Annies and Dr. Rae Theses laboratory boards. Dr. Susan Carson Richardson, who was also a physician in Toronto, was the author of "With the Tibetans in Tent and Temple". Her sister, Dr. Jean Carson, who is Secretary of the Young Women's Christian Guild of Toronto, are daughters of Inspector Carson of London, Canada. Martha Drummond, daughter of the late Dr. A. H. Dymond formerly head of the Institute for the Blind at Brantford, who practised for some years in Toronto, is now physician on an Indian reserve in Western Ontario. Dr. Jessie Gray, who is known to us as that Canadian women physicians who has had the most interesting work in connection with the Balkan wars.

There are in the neighborhood of forty to sixty women graduates in practising medicine in Canada, about seven or eight are practising in Montreal and eighteen or twenty in Toronto. Among these fifty or sixty women doctors, biographical notes on a few typical cases will show what the training undertaken by Canadian women in medicine and the average career which lies before a medical graduate. CHAPTER XXVIII.

The Day of the Wedding

I did smack the Diamond Dot on a box-kite wan variety of monday, but I never fell like I did the mornin' arter back to dirch Hartlee's wedding. I knew all the chances were ag'i'nst Hartlee from the start, I had only a course upon, an' I didn't intend to forsook my self-respect, even if I was a hired man. I knew Hartlee's chances was still fainter, for he was in love, an' love is blind. I was in love through considers to Wide Stration, where I used to drive out to see Miss Wilkins a mile or two on Sunday nights. He knew was that he was goin' off to these weeds.

Jabez an' Hartlee was both glad to see me; but I didn't make much arf'ections for fancin' without bother an' I didn't tell all about my trip. Just told 'em about my experiences as a knight an' on the boat an' each Hartlee was pleased his ann' a mile on my color; but her grit was still beyond his reach. I told him I was sorry for his fath ers, but that I could not a lot o stuff about the funeral ceremonies was thank ers' a' marryin', an' tried to get his to tast ness, but he was so full of his come from an' what to wear, but she wouldn't decide. I told me that she would not think it friendly if I was anything ag'inst the man she was to marry. I couldn't understand her, she didn't seem like the same old Hartlee, but the more I hinted the more he wouldn't see it. I stopped it.

Then I told her that I had found out all about her folks, an' that I was sorry I'd ever said anything about her pa's pretty squint-eff father's match. She wouldn't believe it, an' she wouldn't pay any heed to my suspicions; an' I was considerably put out about it. I got afraid if I turned her ag'nst Dick she might quit him flatchers thing, an' if I turned her ag'nst him too soon she might run off with Jack the rebounding ox I was pretty much hobbled, an' made a botch of it.

Finally she turned on me. "I've been good pals, Happy," sez she, "but I'm a'fraid you're going sour on me; you're not playin' square now—I can tell by your actions—an' I'm not going to stand for it."

"I'll go," sez I, in a quiet tone, an' I breathed free; an' so soon as she opened the door I dragged the two men inside. They were lioneers, the same as the old Cavalier had first called 'em, an' I was glad to see 'em. I had never seen the woman with the soft voice before, but I knew she was a lioness, for she still wore a heavy veil, an' I never looked at her once right straight—but I could see that she walked with her head held her ease on the top of her neck, so I was pretty certain that she was a lioness. She had to finish the weddin' as the star performer she'd put on an interests' exhibition.

Spider Kelly was at the station when I got there, an' I turned the weeds over to him, tellin' him to bring her to the house an' wait for the remains' of the weddin', not to talk to her, an' not to look at her, an' not to speak to her. I couldn't look that way, but to smuggle her into the office as soon as prepar'tions for the ceremonies got started. I still half looked for Dick, but I thought I had shook him for a million years. He was not around the station, an' I dapped on my hoss an' rode him at about his best.

Everything around the house was in full swing with preparations; but Hartlee was about the palest lookin' bride'n groom I ever got ready to toe the scratch, I looked. The Hawthorn critter had agreed over at the inn when I left for the last week, an' Hartlee wouldn't let her come over to his house one inch if he had ever seen her. I told her that she would not think it friendly if I was anything ag'inst the man she was to marry. I couldn't understand her, she didn't seem like the same old Hartlee, but the more I hinted the more she wouldn't see it. I stopped it.

Then I told her that I had found out all about her folks, an' that I was sorry I'd ever said anything about her pa's pretty squint-eff father's match. She wouldn't believe it, an' she wouldn't pay any heed to my suspicions; an' I was considerably put out about it. I got afraid if I turned her ag'nst Dick she might quit me Hartlee's

Hockey Match Saturday Night

The Wetaskiwin Hockey team and the locals will meet on Saturday evening at 8 o'clock in what promises to be the one best bet of the season. Wetaskiwin has trimmed up pretty nearly everything they have met so far this season and are coming up here with the avowed intention of taking the measure of the Silver Seven. Don't miss this game or you will be sorry. Admission 25c. Reserved seats, 10c extra.

BARDO

Nelius Ronning, Palmer and Marin Anderson Harry and Olaf Horte have gone to Camrose to continue their high school studies at the United Lutheran College.

Chester Ronning is sufficiently recovered from his recent illness as to be able in a few days to leave for Camrose to attend the Lutheran College.

P. B. Anderson is in Camrose for a few days this week.

Norman Jevning has gone to Indianapolis to attend a school for stammerers.

Rev. Mr. Carlson of Camrose is not yet so far recovered from his recent attach of erysipelas as to be able to renew his pastoral work. Rev. H. N. Ronning is relieving him for a few weeks, after which he will take a trip to the U. S.

A Farmer's dance will be given in Bellamy's Hall on Friday Jan. 26th 1912.

Local and General News

Rev. R. J. Mirrian B. A of Vilna will occupy the Methodist pulpit in Tofield next Sunday at both morning and evening services.

The Grain Growers Guide published in Winnipeg is a publication which should be in every farmer's hand. It is brim full of information which the farmer of the west should have at his finger ends. It is fearless and outspoken in the farmer's interest and should have his warmest support.

The Venerable Archdeacon Gray of Edmonton who was to have officiated at the Anglican Service last Sunday Evening will be heard to the great delight of all next Sunday Jan 21st at 7.30 in Bellamy's Hall and at 2.30 in the afternoon at St. James Church, 1 p.m. Many were disappointed at not hearing the Archdeacon last Sunday, but owing to important parochial duties, he was unable to be here in that date.

Tofielders Abroad

J. D. Berry is spending the winter at Kansas city.

Norman Jevning of the Bardo [illegible] to Indianapolis.

John McConnell is renewing old acquaintances near Auburn, Neb.

Chas. Taylor of the Tofield Coal Co. Ltd. is away on a trip to Germany.

T. W. Ferguson of West Beaver Lake is down in Eastern Townships Que. He left Tofield Dec. 31.

Miss Roberts of the Tofield Public Schools teaching staff went up to Edmonton last Thursday for a few days

Mrs. John C. Kelly left last Friday morning for Wheeling, West Virginia, to spend a few months with home folk.

Victorious Silver Seven

Win Two Good Games on Home Ice Last Week

The Silver Seven gave a good account of themselves last week in two rattling good games on local ice, trimming the Mirror Huskies by a score of seven to one, on Thursday afternoon and administering dire punishment to the visitors from Wetaskiwin Saturday to the tune of six to two.

THE MIRROR GAME

Tofield 7, Mirror 1

The Mirror Huskies came up on the morning train from the south and at three o'clock, P. M. tried conclusions with the Silver Seven. Owing to their not having brought a referee with them, Jake McDonald was agreed on to handle the game and W. S. McConnell was agreed upon as judge of play.

At the start of the game there seemed to be no doubt that the visitors were good skaters and knew how to handle the puck individually, but there seemed to be a bad lack of combination work, a feature which was evident also on the side of the home forward line which had two regular men out, the regular players, center and left wing, being absent from town. Notwithstanding this disadvantage the home team played rings around the visitors and scored goal after goal almost at will. There was considerable rough play in this game, a feature to which the Silver Seven are unused and the prompt action of the judge of play in penalizing several runningsout amongst the visitors. To pacify them the home leaders took the official off in the second twenty minutes of play but tactics of play put up made it insistent that such an official be put on again and N. C. Legge was put on the ice in this capacity. The Huskies resented the objection of the Tofield fans to their methods of play and felt sore about it. But regarding this, it must be said that while these methods may be used in the visitors country, they cannot be countenanced in good sport, nor are they allowable in the rules of the game.

SILVER SEVEN 6

WETASKIWIN 2

Without doubt the match between Wetaskiwin and Tofield last Saturday evening was the best seen on local ice since Tofield aspired to hockey fame. Play was fast and clean from the instant the puck was put into play. Not for three seconds during the entire game was the rubber stationary. Both teams were in the pink of condition and combination work on both sides was the pleasing and spectacular feature of the game. That the players were held down strictly to the rules of the game was in evidence

(Continued on Page 8)

Council

The second regular meeting of Council was held last Tuesday evening. In brief, the proceedings were as follows:

Amending record of proceedings of last meeting by rescinding motion adopting Mayor's draft of standing committees by motion and appointment of special Committee to draft standing committees.

New draft of standing committees adopted.

Passed number of current accounts. Voted $800 to acc. of School Board.

Paid balance of $34.32 outstanding on rink improvement.

Received petition from O. H. Mahaffey signed by a number of residents asking that the Council pay bill of costs re Mahaffey vs. McEvoy. The costs amount to $387.24.

Referred Mahaffey petition to License & Police Com. to report on.

Com. Younie gave notice of motion to amend bylaw governing rules and proceedings of Council (to committees etc.)

Council bought three old wheel scrapers from Donohue of Irma for $125.

Referred report re fire alarm system to Fire, Water and Light Com. also recommendation of Fire Brigade, for report.

Authorized Fire Brigade to purchase certain supplies.

HAPPY HAWKINS

By ROBERT ALEXANDER WASON

Copyright, 1909

By Small, Maynard & Company, Inc.

CHAPTER XXVIII.—(Continued)

The Day of the Wedding

Silver looked as though she had struck him in the face with a whip, and he began to beg to be his slave, to do anything. Slowly Silver again began to walk away, and Hawkins followed like a dog at her heels. Then she stood looking like the statue of a king, and Hawkins fell on his knees before her. "I never failed myself," he cried, "but I failed you. Oh, I failed you!"

"Hear the news," I yells. "Come, everybody, in the hall to dog Hawkins out! Come in the store-room an' dance if you want to, but the vaudeville has been postponed."

They had it in good order, all of 'em, and think, Peter Twig, an' Hawkins, Hezekiah and Jabez against the wall, looked as fuck as though he was mean. "I'm a better man than you, Hawkins," Peter Twig was sayin', "an' I'll show you I am. I'll show you that I'm the master of a king, an' I'll show you that I'm a better man than you. I never failed myself, an' I never failed you, an' I'll show you that I'm a better man than you."

"Hear the news," I yells. "Come, everybody, in the hall to dog Hawkins out! Come in the store-room an' dance if you want to, but the vaudeville has been postponed."

They had it in good order, all of 'em, and think, Peter Twig, an' Hawkins, Hezekiah and Jabez against the wall, looked as fuck as though he was mean.

TOFIELD, ALBERTA, THURSDAY JANUARY 18, 1912.

Editorial Comment

The tremendous losses in the past two weeks resulting from fires in small towns where a water supply is inadequate should most forcibly remind us of the two lessons given to us two and three years ago respectively. Two Viking, Alta., banks Landing and Indian Head free of last week are all vivid pictures of the ca-

Adequate Water Supply

lamity that would overtake us should another conflagration break forth.

The local Board of Trade could greatly assist the council if this problem were made a burning issue. Then we must have an adequate supply of water stored at hand and the apparatus to handle it in case of fire is a most important question and the dilatory manner in which this matter has been and is being handled is positively shameful. Why do we not get right down to business and get the means wherebby we not only have the proper fire protection, but get our insurance rate cut in half!

o o o

If the boys who are old enough to appreciate and benefit by a short course can possibly be spared from the farm this winter, they should be given the opportunity to take advantage of the chance to learn something that will be of last-

Try Short Courses

ing benefit to them all through life. The short course beats the pool hall and the dance hall as an educational medium. It is more profitable than the barn dance or the soirie, though perhaps not so popular. The governments of Alberta and Saskatchewan have placed good short courses within the reach of practically every farmer's son. If farm work is distasteful to the young man, give him a short course and he may view it from a different angle. If he still revolts against the farm, then it is time to think of placing where he will be more contented. But give him a chance to find out what farming really means. Unless he has studied, he only knows one side of farming, the drudgery side. Give him a glimpse of the other side, the human side, and he may change his mind. The experiment will not break any one and is worth trying.

o o o

The second annual seed fair of the Tofield Agricultural Society, which is announced to take place on the 30th inst., is an event of more than passing importance to the community in general. Many farmers throughout the West are in need of good seed grain. In fact, the farmers

The Seed Fair

of even this community should take particular care that the seed which they sow this spring is of a good germinating quality.

The Seed Fair is for, amongst other purposes, the purpose of enabling farmers to obtain sale of or to purchase seed grain. The mere winning of prizes is not the most important feature of the Seed Fair, by far. The farmers of the Tofield district should see to it that the coming event is largely taken advantage of.

A GOOD DEFENCE AGAINST THE WHITE PLAGUE

We can not afford to insure his property to-day, and to have insurance you must have good reasons.

The human body is the greatest machine ever produced, the most wonderful mechanism in the world.

It is about necessary to state that to keep your body in good condition you must furnish nourishment to the body by means attained by the White Loaf. Such is by building up your nerve forces and body tissue.

The finest flavour you can get is Nyal's Cod Liver Compound. A dose in time is a saving of many. A dose in time is a saving of many a cough or cold and a great deal more. For the young and healthy it is a good plan to take a dessert spoon full whenever you feel the need of a tonic. The children will take it as a sweet. For the aged, the feeble or the delicate it is a great help. For the consumptive it is a great help. For the consumptive it is a great help. For the consumptive

Zymole Trokeys—That Best Cough Drop that relieves tickling sensations, stops hoarseness, relieves immediately.—Jamieson's

[Continued from Page 1]

from the fact that Judge of Play Jamieson, without fear or favor, penalized men from both sides for exceeding the limit. The Tofield line showed splendid improvement in work, particularly in combination play. The success attending the improved manner of their play, Ing should spur them on to greater effort to improve in this style of play.

That the Wetaskiwin boys are a good bunch of sports was the popular vote of all the Tofield hockey fans. In contrast to the previous visitors, they took their defeat with splendid sporting grace and owned up to being beaten fairly and squarely. Their rallying and cheering for their voices on the ice after the game was none the less hearty on account of the result of the match.

BOWLING TOO

After the match adjournment was made to the Bowling alleys at the Pool-room where a visiting bowling team from Gus town bowled a home team in response to a challenge previously extended to them. Great interest was kept up in the game until the totals were made up when it was found that Tofield had won out in this also the score being 818 to 547 68 to the good for the Tofielders.

WETASKIWIN BOYS DINED

At the close of the bowling match the Tofield fans capped the day's hospitality by royally entertaining their visitors to an oyster supper at Charlie's where an ample spread was done full justice. During the function many capital speeches were given by both Tofield and the guests and the very best of feeling prevailed.

One of the most interesting, probably one of the most amusing and yet one of the most important matches that the Silver Seven will have been up against is billed to come off at 8:00 P. M. Friday on local ice. The Silver Seven are matched against the Edmonton Ladies Hockey Seven and the Ladies are determined that they will have the last word, move and goal in the match. Many a man finds that even with both hands he is no match for a woman, but when the poor Silver Seven, bachelors every one of them are pitted against seven native strong and lively winning ladies, and every man of the Seven understands the handicap of having his left hand tied behind his back and the goal tender without a weapon of defense at all—and this being Leap Year at that—what is to become of them! Remember the last contest Friday at 8 P. M. The rink will be crowded. Get your seats.

Viking News

Born—Jan. 14th to Mr. and Mrs. W. Murray, a son.

Born—Jan. 16th to Mr. and Mrs. J. L. Horton, a daughter.

Messrs. Strohl and Stringer made a large shipment of hogs this week to the Edmonton market, making the third shipment during the past month.

The Viking Livery and Feed Barn, owned by R. B. Gray, was sold to Brandt Bros. of Bruce this week. The sum realized being approximately $6,000.

Swift Bros. threshing outfit is very busy threshing. They have a very large area to cover in this locality, for owing to the severe weather of late they have not been able to finish their work.

Viking was visited for the second time on Sunday with what threatened to be a repetition of Thursday's fire. Had a not been for the prompt action of the fire department. The fire started in the basement of the fire pool hall from an overheated furnace, but with the quick application of the chemical, was subdued before making much headway.

Wedding Bells

A very pretty wedding took place in St. Stephen's Church, Viking, on Wednesday, Jan 17th when Miss Mollie Cotter, only daughter of Mr. Cotter of this district, was united in the holy bonds of matrimony to Mr. Jas. Hennessy, hardware merchant of this town.

Entering the church to the March "Seraphs" by Louis Raffy, played by Rev. Carpenter, of Wainwright, and supported by Mr. Kelly and Miss Berghaen, the nuptials were at once proceeded with by the Rev. Steinmetz, assisted by the Rev. Gaborite, Superior of the Priest of the Sacred Heart, Edmonton. The bride wore a handsome bridal crepe silk dress, draped with old point lace with large duchess bead gear covered with a plentiful display of Ostrich Tips. After the ceremony the bridal party partook of a sumptuous repast, provided by the bride's father and will leave for the west where they will visit different points of interest before returning to Viking at which place they will make their home.

Seed Grain Question

The Seed Grain question for the coming season is a perplexing problem to very many farming districts through the west. Farmers who have good grain should take advantage of the opportunity to have a seed germination test at the Govt. Seed Laboratory at Calgary and if they have any seed for sale, they should let this Seed Branch know. The following article from an exchange shows how urgent the question is in many parts of the west:

As things look now there is likely to be a scarcity of good seed grain next spring. In saying this we speak of conditions in Canada as a whole and not of this locality. No doubt a great deal of the seed will be sown next year with seed grown in the Creik and immediately surrounding districts, where good crop s of an excellent sample of grain were grown this year.

While the western farmer generally has been blessed with a big crop, the bad fall and the unfavorable condition for harvesting and threshing the crop have cut into the supply that will be suitable for seed. The prairie farmer who was able to harvest his crop in the usual way should hang onto the grain for seed purposes. There is bound to be a big demand next spring for good seed. Already there have been enquiries for seed grain and it looks as if the whole of Canada will be drawn upon in order to get sufficient for next year's seeding in the west, especially oats and barley. We do not wish to exaggerate the situation, but merely to impress the western farmer with the necessity of looking after his seed supply early. There is this to be said, too, the western farmer wants a better quality of seed than would satisfy him a few years ago. He has learned that the success of the harvest depends, in no small degree upon the quality of the seed sown, its vitality, its freedom from weed seeds and its power to reproduce itself in a strong vigorous way. As to the probable prices, it may be said that one firm in the west that has secured control of practically all the Marquis wheat grown the last season, has already sold a large quantity of seed at three dollars a bushel.—Creik, Saskatchewan, News.

HALL and KENNEDY

Local and General News

W. P. Streng made a business trip to Edmonton yesterday.

S. A. Hall made a trip to Edmonton last Wednesday.

E. Ed. King paid several visits to the capital city during the past week

Rev. A. M. McCall went up to the capital yesterday, returning today.

Geo. Barrocker went to the capital Wednesday morning on a business trip.

Mrs. E. C. Cole and Miss Clara Cole went to Edmonton last Wednesday.

Miss Clara Cole of Edmonton was the guest of her sister-in-law, Mrs. E. Cole, for a few days this week.

A Grand Concert under the auspices of St. Andrew's Presbyterian Church, for the purpose of defraying the expenses of re-lighting the church, will be held in the Bellamy Hall on Thursday, Eve., Feby. 1st, 1912, at 8 o'clock. The local talent will be augmented by a well appointed force of vocalists and musicians from Edmonton. The Admission will be 25c, and 50c. Plan at Somers Drug Store.

There will be an attractive program at the Presbyterian Guild meeting on Monday Eve. (Social Night) Jan. 29th, when Dr. Hansmond will deliver a lecture entitled "Hygiene in the Home." No subject could be better calculated at once to interest and instruct. The Girls' Brigade will parade in uniform. It is expected that there will be a large turnout such as the occasion demands. Everybody male heartily welcome.

B. of T. Bouquet

The Board of Trade held its annual meeting and luncheon at the Queen's last Tuesday evening at which there was a large and thoroughly representative attendance. If interest in matters affecting the development of Tofield and district is equalled by results, the Board of Trade of Tofield will surely be an important factor this year is acknowledged much of that which is necessary in the upbuilding of both.

The company assembled at 7:30 informally and did ample justice to a substantial dinner after which the business of the meeting was taken up. Pres. Leggo occupied the chair and after a few introductory remarks called for the election of officers for the new year. This having taken place, the new presidents, Jos. Rogers, was called on gave a very interesting and entertaining number of remarks. Dr. Hammond as 1st Vice-President was next called and made a large number of important and valuable suggestions as to the work which should be done by various committees and the Board during the coming year.

The chairmen of several committees of the several committees gave short addresses on the work of the respective committees over which they have been appointed to preside. Several others spoke, among them being Messrs. McCauley, Whillans, Jamieson, Richardson, Leggo, Smith, Tomnie, Stroud, Urquhart, Emery, Dr. Terwilliger, Latimer, P. F. Ingram, Saunders, Bird and others. The spirit of optomism was shown in every speech and a plain realization that while the rising was all right in its place all must get down to hard plugging to make the Board of Trade work the success that it is desired to be. Better roads, telephone and mail service, regular periodical market days for the farmer and producers, improved transportation and land service, industrial encouragement, extended and judicious publicity and other important subjects received prominent attention and consideration.

Secretary Nicholson presented a report of his official work during the term he had been in office. This showed a splendid activity on his part for the upbuilding of both town and district and the fact that a vote of appreciation was unanimously passed indicated the appreciation which his services are considered.

R. N. Whillans was appointed a delegate to the Second Annual Convention of the Alberta Development League which is being held today in Edmonton.

The officers for the current year are as follows:

Pres., Jos. Rogers
1st Vice Pres., J. L. Hammond
2nd " W. C. Swift
Secy-Treas., S. Nicholson
Roads Com. McCauley, W. Lee, Kennedy
Publicity, Whillans, Young, Terwilliger with power to add.
Telephones, Morton, Jamieson, Trowt
Transportation, Leggo, Henderson C. H. Cress
Industries, Howe, Richardson, Smith.

Council

Council met in regular session on Tuesday evening of last week, all being present except Mr. Bird who was absent in Edmonton.

Upon the reading of the minutes of the proceeding session, Coun. Younie arose to make the statement that the Mayor's choice of the committees at the proceeding meeting was such that, from his view, could not give to the men new thereof to the council and to the ratepayers the justice which was their due. He, himself, was one of the most important of the committees and the work would be too heavy for him and so much that he could not possibly do justice to it. He moved, seconded by Coun. Emery, an amendment to the minutes: That the adopting of the minutes as read be deferred and that a special committee be appointed by the council to draft the standing committees for the ensuing year. Carried unanimously.

Emery-Logan: That Couns. Urquhart, Younie & Lee be appointed a committee to draft the standing committee for the year Carried.

The committee then retired and considered the matter. In a few minutes they returned and presented the following draft which was accepted by the council on motion. Urquhart & Lee:

FINANCE:
Younie, Urquhart & Bird.
WORKS & PROPERTY:
Emery, Lee & Urquhart.
FIRE WATER & LIGHT
Urquhart, Leggo & Emery
LICENSE & POLICE
Lee, Bird, Urquhart.
HEALTH & RELIEF
Leggo, Younie & Emery.
RAILWAYS & IMMIGRATION
Bird, Younie & Lee.

On the motion of Urquhart-Younie the minutes were adopted as amended. The motion carrying unanimously.

The minutes of special meeting on Jan. 4 were read and adopted.

Communication from W. A. Naher re manays to be paid to Mrs. Ginter was read: Canada West Township re council's approval of the proposed survey of N. W. 1-4 51-19, within the town limits which was given: MacLean Stinson and Co., Toronto asking for information as to our fire protection, which was tabled; Burges and Co. offering to purchase our $1,000 debentures at par flat, which was tabled; Nay and James off-ring to buy same, tabled; Tofield school board asking for $800 on their balance which was granted.

O. H. Mahaffey had a petition before Council, which bore the signatures of a number of ratepayers asking Council to pay the expenses of his trial, McKay vs. Mahaffey, at Edmonton. A statement of the costs accompanied the petition showed his lawyer's bill to be $107. 61, and the costs of the proceedings to be $273.80. On motion of Couns. Younie and Urquhart this petition was referred to the Lands and Police committee for consideration and report at next meeting Carried unanimously.

Secretary Nicholson reported that he had, acting under instructions from Council, taken necessary steps to have bylaw No. 61 validated by act of legislature. He also reported that Mr. Naher had found that Council had ordered the wrong kind of casing for the well and that the committee had had a special meeting and made the necessary changes in the order. This would increase the cost from 67c per foot to 87c per foot.

Coun. Younie rose to remark that he thought that when Council authorized a committee to take certain steps and that committee finds it necessary to make deviations from instructions involving greater expenditures than those authorized, it should bring in a report in writing to Council when it should be considered by Council and ratified if satisfactory.

Coun. Younie then gave notice of motion which he would bring in at next meeting of Council to amend By-law No. 1 somewhat as follows:

The appointing by council of a special Com. to draft the standing committees.

The examining of all accounts before submission to council and the recommendation of action to be taken re same.

The consideration by this committee of all estimates for the year advising council of the amount of revenue needed for the year and striking the rate of taxation, and the allotting of the amount appropriated to the departments of the affairs

The making of careful estimates for the current year by the Fire and Light, the Property, Water, Public Works and such other committees as are standing committees for works to be done in the various departments respectively under the the administration of those committees and the advising of the Finance Com. of those estimates by a certain date in each year.

The creation of an active department of civic advancement whose duty it will be to investigate and and encourage new industries, etc.

Mr. Bond moved Brose appointed beforement and asked them either to buy his three wheel scrapers which they used last year or pay a rent of 30c each per da., used last summer. Council bought them at $125 on motion of Emery-Logan.

The arrangement for an effective fire alarm system was placed in the proper committee's hands.

The fire brigade was authorized to place an order for necessary supplies, an itemized list of which they placed before the council.

Chief McHeffey who was present asked council to see that a light be placed in the fire hall at night so that any person coming in to ring an alarm would see where to go to get to the hall now. This was referred to that committee.

Improvement Dist. Election

The electors for council in Local Improvement District No. 1 are hereby notified that a poll is required to be held at the following polling places between the hours of 9 o'clock a. m. and 5 o'clock p. m. on Saturday the 27th day of January, 1912, for the purpose of electing two councillors for the said district:

No. 1 E. Bell, Tofield
" 2 G. A. Weber, Tofield
" 3 F. Beckett, Lauderdale
" 5 C. Plants Tofield

A Farmer's Dance will be held in Bellamy's Hall on Friday night Jan. 26. Everybody welcome. Special invitation extended to farmers. Admission $1.00. Gents with two ladies 50cts.

CHAPTER I.

A Born and Bred New Englander.

My first great grandfather was killed in the revolution, my grandfather fought in the war of 1812, my father wrinkled his hoofs in the Civil War; but I, though born in New England, am the first of my family to emigrate to this country—the United States of America. This sounds like a risible as a paradox. (I am it; it's a plain statement of fact.

As a matter of convenience let me call myself Cholston. I've no desire to advertise my wife's family as notorious; my only idea in writing these personal details is the hope that they may help some poor lorn one of the same hole in which I found myself mired. They are of too sacred a nature to share except impersonally. Even behind the shadow of an assumed name I paused some mighty uncomfortable hours a few months ago when I sketched out for a magazine and now I've written a book—I've written it, I've—I'm still. It made me feel as though I had pulled down the walls of my home and was living my life open to the view of the street. For a man whose home career is what it once to me, there's nothing pleasant about that.

However, I received some letters following that brief article which made the discomfort more than worth while. My wife and I read them over with something like awe. They came from Maine and they came from Texas; they came from the west, they came from the south, until we answered our names through them. We've been corresponding through these letters ever since. I'm sorry that had never reached our own hearths—"Here we are!" As we read some of them our throats grew hungry.

"Dad help them," said my wife over and over again.

As we read others, we felt very glad that our lives had been in some way an inspiration to them. After talking the whole matter over we decided that if it helped say to let people know that we were not dead yet, that we were not dead so far. So Pinky's poem, which is the purpose of this book. Perhaps it is not a name to say.

My people were all honest, plodding, middle-class Americans. They simply where they were born, accepted their duties as they came, carried a respectable living and died without having money enough left to make a ripple worth while. They were all privates in the ranks of life, and they were content to be so. They were all industrious and loyal unto death. They were faithful to their families and conscientious in their duty to their country. The records of their town aren't illuminating, but they are as open as daylight.

My father seems to have had a little more ambition stirring within him than his ancestors. He started in the lumber business for himself in a small way, but not with any great success. He still had to work for a living, and in the course of time married and occupied a comfortable home. My mother died when I was ten, and after that father sold his house and we boarded. It was a dreary enough life for both of us. Mother was the sort of woman who lives her whole life in saving for her men folks so that her giving will be as habitual as her living, so long after she didn't even know when she was living herself. She was the center of the family tradition; father recognized his lot stoically and so final. No one in our family ever married twice. When the death of the wife and mother the home ceased and was the end of the lot.

I remember my father with some pride. He was a tall, old-fashioned looking man, with a great deal of quiet dignity. I came to know him much better after I was grown, after my mother died that ever made me feel that I lived together in one room and boarded. I can see him now sitting there by a small kerosene lamp after I had gone to bed reading or trying to mend some rent in my clothes. I thought it an odd occupation for a man, but I didn't know what he was about. I think the love for my mother must have been so deep, for he talked to me a great deal about her, and I remember how proud he was of her because she was a writer, or rather his own—I think it was she—she was a woman of strong spirit—she reminded him to consider minding me to college. She encouraged me partly for the moralizing, although there was some sentiment behind it too, for I think he liked to feel that he was carrying out her work for me even in such a small matter as this.

I was twenty-six when I met Ruth, and she was twenty-three. The date on which she met Saturday afternoon to go to the theatre with me was the first time I had ever been to a theatre in my life. She was my first love, and I don't remember that I ever asked him for any pocket money but what he gave it to me. It was towards the end of my senior year in the high school that I began to notice a change in him. He was at times strangely excited and then at other times strangely blue. He asked me a number of questions about my prospects in the event of a college education for me being cut short, and he began to shrug a little, and I found out afterwards that one reason he gave to this business he did agree to send me his mess meal. It makes my blood boil now when I remember where this fragment of this self-sacrifice were. I wouldn't recall it here except as a humble tribute to his memory.

I was a little late in the room and thought I was not yet dark I was surprised to see him sitting there in the light creeping out from the hallway. I still suspecting something was wrong. I pushed open the door and saw my father seated by the lamp with a pair of trousers I had worn when I had on his knees. His head was bent and he was trying to sew. I went to his side and asked him what the trouble was. He looked up but he didn't know me. He never knew me again. He died a few days later, and I was left to feel that he had intended all his savings in a sufficient mining scheme. They had gone.

I don't believe I was left alone with the—child that succeeding generations of my family ever inherited—a sense of shame and a big responsibility. My father's tragic failure was a heavy blow, but the worst fact that I was thrown on my own resources was a relief. I was glad to be the prospect rather relieved me. I had a wholesome boyish atmosphere of the boarding house so long that the idea of having to earn my own living came rather as a diversion. While dependent on my father, I had been educated in this way and that one way and another, but now I felt as though the opportunity to work had suddenly been opened up to me. I had no particular ambition, no particular desire for anything, and I was entirely ignorant of my rights as being able to do this. I chose, I could go to sea—there wasn't a cent but what would take us long passages; I could go to Texas—I would go into ranching—here again there was a demand for youth and brawn. I could go into a factory and learn something about making, or I could go into an office and learn a business. I was a boy, and I was free to do as I pleased. There is no one so free as such a young man. I could settle in any town I chose and work my way and settle in Seattle or go north into Canada. My legs were stout and I could walk if necessary. And wherever I was, I had only to stay and after the use of my back and arms in return for food and shelter. Most men feel like this only once in their lives. In a few years I had become fettered again—like most of them.

Having no inclination towards the one thing or the other, I took the first opportunity that offered. A chore of mine had overheard the agent of the United Woollen Company and seeing another company there in the clerical department, he persuaded me to go. I left, I hugged a dog affair a week. I was put at work adding up columns of figures but had no more meaning to me than the problems in the school books. I was given a desk and told to work there. I sat there and worked and no mention pleasure. I had no idea of a certain grade in being part of the vast enterprise. My chum and I hired a room together and we both felt like pretty important business men as we sat there writing at paper on the our every morning and went down town.

I took some figuring to do anything but live that first year, and yet we pushed our way with the crowd into the bigger heavens and are most of the good things of life as a matter of course.

I can't remember, except that I was very fond of Ruth, and that I thought I'm sure of is that at the end of the year I didn't have anything left over.

This is true of the next six years. My salary was advanced steadily on every quarter, and at the end of that time I had pretty dollars a week for me to live. I wasn't extravagant and I wasn't dissipated, but every raise found a new necessity. I moved into better rooms continually. You might almost say that I moved into a better room as my salary increased. I had a room to myself in the place of life to a fifteen dollar one, and then to a twenty. And we all went together—that is the men who started together. Each advance meant unconsciously the wearing of better clothes, and another dinner across, and another theatre party, and another dinner, and another theatre party. The left us better acquainted with the city, but it left us no richer. I didn't—and I don't know much to say of us at this time; we all thought we were blessed in just about the way we were. Up to the time of my marriage I was not dissatisfied, and even if a man had been foreshadowed and of a saving disposition, there was no way of saving without sacrificing the only friends I had and the only social connections I possessed. To remain single was to remain poor. The left us better acquainted with the city, but it left us no richer. I didn't—and I don't know much to say of us at this time; we all thought we were blessed in just about the way we were. Up to the time of my marriage I was not dissatisfied, and even if a man had been foreshadowed and of a saving disposition, there was no way of saving without sacrificing the only friends I had and the only social connections I possessed. To remain single was to remain poor. Then I met Ruth.

Mr. Crane, who is a Conservative, and Mr. Lloyd George, who is a Radical Lloyd George, for the dandiacal of Mr. Crane, who is a Conservative, and Lloyd George, for the dandiacal of Mr. Lloyd George, who is a Radical and demands small holdings for Hodge and his cottage, and Mr. Crane and his countrymen. This writer, in order to illustrate the case for small holdings and into small holdings for landless laborers, has taken the case of a typical Conservative gentleman who have delivered themselves of their views on the land question. Mr. Crane, who is a Conservative, is perfectly satisfied, and is the two rooms downstairs, which are used for the dining room and the kitchen—in case we have delivers a lecture on the land question—in the fifteen-dollar house in the right of the house, which is used as a study and the left as a drawing room. Mr. Lloyd George has in the fifteen-dollar house a lower grade at school. I remember that when I was finally released as an office boy I was given a desk and told to sit down and work. I was given a number of figures to add up, and I remember that when I was finally released as a clerk I had learned to add up columns of figures and to put down the result at the footing of the column. I remember, further, that I was finally promoted to the position of a bookkeeper, and that I had learned to add up columns of figures and to put down the result at the footing of the column. I remember, further, that I was finally promoted to the position of a bookkeeper, and that I had learned to add up columns of figures and to put down the result at the footing of the column.

It was then that I met the girl who became my wife. My best excuse for remaining anonymous is the opportunity it affords me to tell about her. I want to feel free to rave about her if I wish. She objected to the magazine article and she objects even more strongly to the book, but I have been so accustomed hand in this matter that I feel that I am entitled to my own way. I think it was she—she was a woman of strong spirit—who reminded him to consider sending me to college. She encouraged me partly for the moralizing, although there was some sentiment behind it too, for I think he liked to feel that he was carrying out her work for me even in such a small matter as this.

I was twenty-six when I met Ruth, and she was twenty-three. The date on which she met Saturday afternoon to go to the theatre with me was the first time I had ever been to a theatre in my life. She was my first love, and I don't remember that I ever asked him for any pocket money but what he gave it to me. It was towards the end of my senior year in the high school that I began to notice a change in him. He was at times strangely excited and then at other times strangely blue. He asked me a number of questions about my prospects in the event of a college education for me being cut short, and he began to shrug a little, and I found out afterwards that one reason he gave to this business he did agree to send me his mess meal. It makes my blood boil now when I remember where this fragment of this self-sacrifice were. I wouldn't recall it here except as a humble tribute to his memory.

The left us better acquainted with the city, but it left us no richer. I didn't—and I don't know much to say of us at this time; we all thought we were blessed in just about the way we were. Up to the time of my marriage I was not dissatisfied, and even if a man had been foreshadowed and of a saving disposition, there was no way of saving without sacrificing the only friends I had and the only social connections I possessed. To remain single was to remain poor. Then I met Ruth.

Mr. Crane, who is a Conservative, and Mr. Lloyd George, who is a Radical Lloyd George, for the dandiacal of Mr. Lloyd George, who is a Radical and demands small holdings for Hodge and his cottage, and Mr. Crane and his countrymen. This writer, in order to illustrate the case for small holdings and into small holdings for landless laborers, has taken the case of a typical Conservative gentleman who have delivered themselves of their views on the land question. Mr. Crane, who is a Conservative, is perfectly satisfied, and is the two rooms downstairs, which are used for the dining room and the kitchen—in case we have delivers a lecture on the land question—in the fifteen-dollar house in the right of the house, which is used as a study and the left as a drawing room. Mr. Lloyd George has in the fifteen-dollar house a lower grade at school. I remember that when I was finally released as an office boy I was given a desk and told to sit down and work. I was given a number of figures to add up, and I remember that when I was finally released as a clerk

TOFIELD, ALBERTA, THURSDAY JANUARY 25, 1912.

The manner in which Council approached the discharge of their public duties last meeting night is one which will be of much unstinted approval to the citizens. It does seem that the body has come to nothing down to business. The opportunity of capable committees and the placing upon them of responsibilities of departments of civic affairs with definite duties to perform will be productive of much good and better progress than the past has shown.

Council Making Progress

The installation of an electric fire alarm system this week is an improvement which has become a necessity. This is getting down to doing things on the part of our executive and a matter of such importance as demanded immediate attention. The wisdom of Council's action is such as to commend itself to every personal property holder in town.

o o o

U. F. A. in Politics

The United Farmers of Alberta last Saturday concluded a most successful convention at Edmonton. Among other things considered a number of important resolutions were passed, some of these dealing with Seed Grain, government elevators, rail insurance, direct legislation, single tax, abolition of govt. aid to railways, government operated coal mines, etc. The farmers decided at this convention that the Association should not enter politics.

The U. F. A. is becoming an important factor in Alberta politics. While the society itself does not enter politics, it is becoming more and more an effective agency in promoting legislation protecting and fostering the interests of the farmer. As the farmer is the backbone of the country, it is with active and sympathetic interest that the progress of this enterprising organization is watched.

o o o

C.P.R. May Change Main Line

Announcement has been made from Winnipeg that the C. P. R. has purchased the Alberta Central the charter for which was granted to John T. Moore at one time representative in the local House for Red Deer. This bears out certain information gained a couple of years ago regarding the possible policy of the C. P. R. with regard to its rival competitors, the C. N. R. and the G. T. P. The present route of the C. P. R. through the Rockies is no rival for the G. T. P. through the Yellowhead and it could not be expected that so strong a corporation as the C. P. R. would allow such competition as the G. T. P. to pass without adequate efforts to protect this capture of their business. It has been reported that the Alberta Central all along has been in some way an off shoot of the C. P. R. to divert their main line traffic through Red Deer to the Yellowhead pass and out to the Pacific. Red Deer is bound to become an important railway point and undoubtedly Calgary, while it will always be a great railway centre, will eventually pass from being a main Line city.

PROSPERITY OF HAIR DEALERS A BAD SIGN

It's a question whether the trade in hair is enjoyed in general living human hair was ever so rich as it is right now. Quite a few manufacturers in the United States and Nature's supply is supplemented artificially indeed of encouraged naturally, and one there is but little natural hair to supplement. The elaborate contortions keep the head hot, damp and unventilated, the hair loses its vitality and falls out worse than ever.

The pity of it is that with proper attention the hair could be made luxuriant the boy say now. Through brushing and combing every day, right down to the skin, would keep the hair in proper condition—though it would take hours to do it properly.

"Bah!" you say, "I haven't time to spend hours a day brushing my hair." Nine brush it as much as you can, and Nyal's Herpicide Rejuvenator with your fingers. Nyal's Herpicide loosens and removes all the dead skin and foreign matter that accumulates—stimulates the hair bulbs—softens the hair and restores its healthy lustre. Used regularly, it not only stops falling hair, but makes the "crown of glory" thicker, softer and more beautiful than ever.

Nyal's Herpicide is known to be sold by Nyal's Druggist. Nyal's Remedies are sincerely believe to be the best medicine values offered.

Sold by C. E. JAMIESON, Tofield.

Nyal's HERPICIDE

Use for each everyday shampoo.

Yule as "Bob Acres"

An engagement of more than ordinary importance and attractiveness to the local lovers of the drama will be that of William Yule, the clever comedian, at the Masonic Hall on Thursday, Feb. 8th when he will present for the first time in this city, Richard Brinsley Sheridan's famous comedy "The Rivals." Mr. Yule has shown distinct artistic instinct in adding this great play to his already extensive and scholarly repertoire, for it is a play every student of literature should see. Mr. Yule will appear as the swaggering yet timid country squire, "Bob Acres," a role that should give him every opportunity for the full display of his unquestioned talent in low comedy.

Mr. Yule is supporting, as usual, a highly capable company which includes the charming young leading lady, Miss Violet Eddyn already known to us, and Miss Lester, Mr. Rancell McAlister, Mr. Healey Edwards, Mr. Walter Hotchkiss, Miss Lenore Harrington, Mr. William Coote, Mr. Frank Halliday and others.

To Our Customers

Thanking our many Customers and Friends for their kind patronage in the past year, and hoping we shall be able to satisfy you still better in the coming year, wo wish you a merry Christmas and a Happy and successful New Year,

Yours faithfully,

A. HORTE & SONS,
GENERAL MERCHANTS,
KINGMAN, - ALTA.

Short Course in AGRICULTURE

A Short Course in Agriculture will be Held Under the Auspices of the Department of Agriculture at

Stony Plain

FAMOUS PEOPLE
BY FANNIE HEATHERLY

BLISS CARMAN
Canadian Poet, Critic and Editor

Bliss Carman, the poet, critic and editor, one of the foremost of Canada's contemporary litterateurs, was born in Fredericton, N. B., in 1861, and on his father's side is descended from the de Carmans who fled from the King Poland, N. Y., to New Brunswick, while his maternal ancestors fought in the American Revolution. He was educated at the college school of his native town and the University of New Brunswick, from which he graduated in 1881, and then went to Oxford, where he studied for three years, after which he returned to his native province, and for two years (1884-5) was an editor.

There seems to be a restless, Bohemian strain in his nature that chafed under routine and restraint, for he first came from there, but he had somehow a compelling homing instinct that always brought him back in a bottle of ink and a pen. For a few years he tried it, then ventured into the field of civil engineering, then taught school—but it all proved empty and unsatisfying: he had not found his place.

It was not until his post-graduate days that his poetic nature became manifest and under the stimulus of the inspiring personality of the editors of the college literary magazine he began to write verse in a timid, furtive sort of a way at first, then he grew bolder and more irrepressible, until the editor's drawer was stuffed with the result. Carman seems to last for years, and then he went to Boston, where he met the well known litterateurs who were the editors of the Atlantic Monthly, Longfellow, Whittier and Holmes.

He sent set poems after poem, but they almost invariably returned, with no leaf of promise; but he had supreme confidence that his strong of verse would find resting place in some ark of editorial appreciation. The last came, which always made the greatest effect at first before acceptance, especially interested him, and he gave them pet names to commemorate their travels, such as "The Flying Dutchman," "Ulysses" and "The Wandering Jew." One manuscript he sent to Australia by way of San Francisco and it came back via the East Coast and London, visited many editors, and that seems he christened "Captain Cook," because it circumnavigated the globe.

Mr. Carman has been on the editorial staff of both a dozen newspapers for years and recently retired from the editorship of the "Literary World," to live in the country and devote himself entirely to his muse. He is a tall, fine looking man, with a well-shaped head, a sheet of wavy hair, and has a personality of subtle that you'd make him conspicuous in any company.

Throat Becomes Diseased from Neglecting Colds

Then Catarrh Sets in, Mucous Drops Into the Stomach, Coughing, Headaches and Debility Follow

If at the first method of using catarrh it causes catarrh in using it a little more in one breath administered internally from an antiseptic compound like Stuart's Catarrh Tablets, appears and relieves the head part are the first symptoms of what is called catarrh. Then the mucous begins falling back into the throat, causing a tickling sensation, and sometimes a slight cough. Then it passes into the stomach, where it forms a catarrhous condition, and you have developed a bad case of catarrh.

Stuart's Catarrh Tablets are put up in convenient tablet form and are sold by druggists everywhere at 50 cents per package. They are pleasant to take, and their use will prevent the development of catarrh in any part of the system. Ask your druggist for them.

Write for free booklet on catarrh. Address F. A. Stuart Co., Marshall, Mich.

That Reminds Me

Dumfounding landing wheels, which end up within the chassis, feature a new acceptance.

"Is he Barnes fond of him?" asked Mamie.

"Why, should say so," replied Maymie. "She has given me much of him as she has of her engagement ring."

"Is he engaged?"

"Yes. I couldn't stand the way he has treated me."

"What did they do?"

"Took the diamonds off me yer visit."

There were ten in it in France, during 1916, no fewer than 1,200 aeroplanes, with a consistent motive power of 90, are knew power, and the distance cut over in flight at accustomed rate had a total of 318,000 miles.

Judge, I simply have an irresistible impulse to steal."

I have those irresistible impulses myself sometimes," said the judge. "I have right now to send you to jail. Next!"

The doctor was asking questions with a confident motive power of 90, are sometimes to cure serious answer. The question was as follows: "Now, boys, how many months have it in your mother's family?"

Boy (after counting up to workman)): "Please, are you doin' up there, mister?"

Workman: "Yes, lots; bricks, as you see."

Boy: "Then I'll move."

Teacher (reading aloud): "The merry waters leaped from the gun and made a few moments' sleep."

Pupil: "Please, where he stole it from."

Teacher: "Where, Burl?"

Burl: "Him his mug's on."

Teacher: "I was not proud Frank Fox his father's hat to his father was."

Boy: "Can you lend me fifty cents?"

Father: "Certainly not. What do you want to do with it?"

Boy: "Why, I want to go to the big circus here."

Father: "I want to know where you get such ornamental ideas. Here, take a dollar and don't bother me."

Boy: "Have you a quarter of a dollar, dad, you don't seem to have either?"

Father: "Yes, I have a quarter, but I'm not going to give it to you. Here's a dollar. How do you summon your mother when you want her?"

The captain was equal to the occasion. "Oh, we just whistle for her," he replied. "We sends 'em all a postcard."

"Oh yonder hill," cried the general, and led to the victory of the day.

"Tell, uh, what," she hysterically cried, "is a black mass of men. What do they?"

"Seven floods," replied the second in command.

"And why are you copying that field to the south west?"

"Those," answered the R.E.C., "are operators for the blueprint."

"I see a battalion of cavalry," she gave."

"They are not guns; they are grenadiers and photographs, in which are the artillery of the enemy. Now you see the rites of the wounded."

"I see a black mass of men. What are they?"

"Those,"

Viking News

C. Councilman returned on Saturday after an absence of five weeks, most of which time he spent visiting relatives and friends in St. Paul and Minneapolis.

T. W. Thomson, the proprietor of Rex poolhall has decided to make an addition to his popular place of amusement, and intends installing a complete outfit and equipment for a set of double bowling alleys. The building will be 18x78 with a concrete foundation. Brunswick, Balk and Collender of Toronto have secured the contract for the necessary furnishings.

Hellicker Bros. are getting settled in their temporary place of business, and expect to erect a new and more commodious building in the spring.

G. Stowe occupied the the Methodist church pulpit on Sunday last in the absence of Rev. W. J. Morrison

A. Noland made a business visit to Holden at the early part of the week.

C. H. Stevens retarped this week after completing the contract of painting and decorating the Manville branch of the Merchants bank.

John Looke, brother of Mrs. Richard Hepper, passed away on Saturday last after a lingering illness of several months, from heart trouble. Mr. Looke had been a resident of this district for a number of years and was held in high esteem by all who knew him. Brought up on the farm in Ontario and afterward being a co-worker with his father in the management of the farm of the Hon. John Dryden, until he came west to take up land. Deceased will be interred in Viking cemetery Thursday.

F. A. Gassman will hold an auction sale of stock and implements at the farm of E. Brandt N. W. ¼ 4-49-14, 2 miles northeast of Bruss on Friday Feb. 9th.

Viking Seed Fair

The Third Annual Seed Grain Fair of the Viking Agricultural Society held at Viking on Monday, Jan. 22nd was a most decided success in every way. In all, there were 36 exhibits of various kinds of good seed grain, and considering the bad season, Viking came to the front with the goods; an exhibit not to be turned down any year.

A great many farmers in some districts had been worrying a great deal as to where they could procure seed grain for next crop, and many present took advantage of the situation and booked their order early.

The Secretary of the society has kept an account of the grains, the owners, and the amounts for sale, also the prices listed, and will be only too pleased to place owners and buyers into communication with each other, all that is asked is the stamps for correspondence.

The judges for the occasion were Messrs. F. S. Grisdale of the Experimental Farm, Lethbridge and W. J. Tout of Innisfail.

The following is a list of winners and the scores (total) for the various classes.

Winter Wheat	Variety	Score
1st J. M. Lorge	Alberta Red	92½
2nd Jas' Newby		89½
Spring Wheat		
1st J. M. Lorge	Preston	92½

Maritimers Win Game

The Maritimers of the Edmonton city league won last Monday night from the Silver Seven by the narrow margins of one goal. After full time was up, Tofield evened score five to five. The game was good throughout and was most exciting toward the close.

The first half seemed slow, neither team getting up much speed until after quarter time. Then Maritimers began to show better class and rained shot after shot at the Tofield goal, which were skilfully defected by Charlsworth. At the close of the half the score stood. Maritimers 2, Tofield 1

The Maritimers developed wonderful speed at the beginning of the second half and scored three goals in quick succession. The score was now 5 to 1 against the home team and they began to see the necessity of playing some real hockey. By most fast play, with excellent combination work, they soon turned the tide of the game. In the last thirteen minutes of play they succeeded in scoring four times, tieing the score.

The teams decided to play off the game, the first team scoring to win. Stanley for the visitors scored the winning goal.

Goals Scored: by Maritimers: McDonald Mcdonnal, Grady Jackson, Mcdonnal, Stanley

By Silver Seven: Herb Lee, Hains Bissett, Bobby Lee 2

Penalties: Grady 2, Stanley 2, Chubb 2, Herb Lee 2, Somers 2.

The line-up of the teams follows:

Maritimers		Silver Seven
Wright	G	Charlesworth
Chubb	P	Hains
Grady	C P	Somers
Stanley	R.	Bissett
McDonald	C.	Herb Lee
C. McDonnal	R. W.	Bob Lee
Jackson	L. W	Letourneau

Referee C. E. Jamieson, Judge of Play K. E. Kennedy

Miss Ellen Wenger Miss Eva Francis Mr Healey Edwards Mr. Randall McAllister Mr. Walter Hutchings Mr. William Gloria Mr. C. F. Clayton Mr. J. Fennell Mr. Harry Parsons, Business Manager.

Grand Local Talent Concert in Bellamy's Hall To-Night

There will be a program of vocal and instrumental music rendered by To-ght artists and their friends. It is arranged that a comic quet will arrive from Edmonton, it is expected that there will be much enjoyment to h found in a program of this kind. The object in raising funds is a worthy one, namely, to defray the expenses incurred in the installation of better lights in the Presbyterian Church. Admission 25c, Reserved Seats 50c

Free Masons Entertain

Palestine Lodge, A. F. & A. M. entertertained over 100 guests last night at a very social Ladys Year At Home in the Lodge Room and Hall adjoining. Many were present from neighboring towns down the line and from points in the rural district, among them being Mr. Brisbin and mother, Dr. and Mrs. Farrell, Mr. Hagen and Mr. Beaely of Holden, Dr. and Mrs McPherson, Mr. and Mrs Weeks of Ryley, W. J. Parker and Mrs. Parker of Bardo and others. The event was quite a social function many of the ladies present being attired in most tasty and beweiling evening gowns. During the evening Mrs. F. C. Corberay rendered appreciated instrumental music and Mr. R. N. Whitlaw sang two solos. After dainty refreshments were served, dancing was indulged in until the final dispersal about two a. m.

Council

Council met in regular session Tuesday night, all being present except the mayor. The secretary called the council to order and asked for nominations for chairman Coun. Bird was elected and took the chair.

A bill from the Standard Press of $12 for printing of bylaw was presented. On motion of Councillor Lee the bill was ordered paid.

Coun. Urquhart, Chairman of the Fire, Water & Light committee, brought in report containing following recommendations:

The acceptance of the tender of Burnham-Frith of Edmonton, to instal fire alarm system, including four alarm house wire, etc. and a gong that can be heard all over town. The boxes are to be located at the corners of Main and Second Ave., Queen and Third, Kings and Fourth Ave., and on Morton St. a half block east of the town well. The secretary was instructed to petition government for use of government poles.

That council erect water tank, 60 ft. above ground to hold not less than 30,000 gal with mains to the central part of town.

That a house be given for the construction of fire walls in Blk. 11 between lots 3 and 6; Blk. 10, between lots 3 and 4; and Blk. 7, between lots 3 and 4. The walls to be of stone brick or cement at least 12 inches thick.

That lots faring on Main St. between 1st and 4th avenues be declared a restricted area in which only fire proof buildings may be constructed

That another fire tank and waggon be rented.

That an ash can be placed at each house to be emptied once a week at the expense of the town.

That the services of an engineer be secured to make estimates on the proposed work be secured.

On motion of the committee chairman seconded by members of the council the recommendations were received.

Chairman Lee of the License & Police committee reported:

That the committee be given more time for investigation in regard to license of pool hall, dray, dog tax etc.

That the committee could see no way of dealing with the proposition of paying the costs of the Mclaulay-McEvoy case.

The report was accepted on motion of Lee-Urquhart.

Chairman Logan of the Health & Relief committee brought in report recommending that the mayor, secretary, C. H. Cross and C. E. Jamieson constitute a board of health.

Logan-Lee moved receiving of report. Carried.

Coun. Lee gave report of Works & Property committee recommending:

The grading of King & Queen streets across slough. Construction of culvert at corner of 5th Ave. and 1st St. The raising of grade and removal of water near the S. W. corner of the exhibition grounds from there to the railway crossing. The completion of last year's grading. The grading of first avenue and fifth avenue south to the government road, and Hunt Ave. from 1st St east to the town limits. The repairing of the government road south of town both east and west.

The construction of a six foot sidewalk on north side 2nd Ave. from Main St. to Rebillion grounds, four feet sidewalk south side of 3d Ave. from King St. east to Rebillion and sidewalk on north side of 4th Ave. from Main St. Exhibition Grounds.

That service of an engineer be secured to make estimates on work.

Lee-Urquhart moved that the report be received. Carried.

Sec'y-Treas Nicholson was instructed to communicate with parties interested in dealing property south and west of town and ask their co-operation.

As the town's account in bank was overdrawn, on motion of Lee-Urquhart a bylaw providing for the borrowing of $8,000 was given a first and second reading.

Coun. Young then brought in an amendment to Sec. 18 and 19 of bylaw regarding committees. The amendment makes slight changes in name of standing committees and defines duties of each. Young-Emery moved first and second reading of amendment. Carried. Urquhart-Lee moved third reading Carried.

It was decided to seek legal advice before taking action in the Mclaulay-McEvoy case.

As considerable work was unfinished at a late hour, on motion of Coun. Urquhart, council adjourned until next Mon day.

Lecture on Hygiene

Dr. Hammond Gave Interesting and Instructive Talk

Last Monday night at the Presbyterian church, Dr. Hammond delivered a lecture on "Hygiene in the Home." The lecture was given under the auspices of St. Andrew's Young People's Guild and was well attended. In addition to the lecture, several addresses were made and a short program of music rendered.

The subject of the lecture was ably handled by Dr. Hammond in explaining bacteria and their effects on the human system, he avoided all technical terms, choosing language that could be understood as well by the children as by the older people. By diagram, he explained the nature and varieties of bacteria, their rapid multiplication under favorable conditions, and named several conditions that aid the growth of these minute but troublesome plants. He then explained the connection of bacteria to disease, and named simple ways of destroying bacteria.

The speaker then took up infectious diseases, explaining the nature of several as well as ways of prevention and cure. He explained the germs of diphtheria, smallpox typhoid and tetanus or lockjaw.

In speaking of the care of the body as a most important factor in the maintenance of good health Dr. Hammond laid special stress on the necessity of cleanliness in regard to the hands and teeth. The mouth is a place especially adapted for the propagation of germs. Consequently it is essential that the teeth be kept clean. He said that none were too old and few too young to use the tooth brush.

The hands also aid the germ in its war against the body Unclean hands are covered with germs, that are ready to fall to the food and thus enter the system. The speaker said that it was very important that every one wash his hands before eating.

In closing the speaker touched on the matter of bathing. The seasons in the northern country are such as to render the lakes and rivers unfavorable for bathing purposes the greater part of the year. Dr. Hammond advised his hearers not to wait for the lake to warm up but rather to patronize the tub at least twice a month.

Rev. McColl followed the speaker with a few happy remarks. A duet by Mr. and Miss Bissett followed. Their voices, blending in perfect harmony, made this one of the enjoyable features of the evening.

W. P. Strong then gave a short talk of the Girls' Brigade, explaining the work of the organization and progress made during the past six months. He also told of the work planned for the near future and eg which is the installing of first aid kits at the school and in some central place in the business portion of town.

Another lecture by Dr. Hammond under the auspices of the Girls' Brigade will be given in Methodist Church.

This is the season of the year when mothers feel very much concerned over the frequent colds contracted by their children, and have abundant reason for it as every cold weakens the lungs, lowers the vitality and paves the way for the more serious diseases that so often follow. Chamberlain's Cough Remedy is famous for its cures, and is pleasant and safe to take. For sale by All Dealers

WILT SNEEZE WITH CATARRHAL CHILD?

By Breathing the Healing Vapor of Catarrhozone You Get Relief in Ten Minutes

It's almost certain that you must cause a terrible lot of misery to the little fellow, with his head stuffed up, his throat sore, his eyes watering, and his nose running. Catarrhozone contains a healing cure which is found in no other remedy. It will straight into the lungs and bronchial tubes, may cause the cold, sneezing and rain that weigh down, breathing easier, coughing, in short, you are rid of misery by a pleasant, simple remedy.

Catarrhozone is a small outfit, and a few breathings of its healing vapor is passed by the full many treatments. Catarrhozone is sold by druggists everywhere.

"In the year of 1903," writes Mr. Pa lee, under date of June 10th, 1904, "I contracted a very severe cold which developed into Catarrh. At that time I was living in New York State and treated with four different physicians who attended me no relief. On coming to Brockville I was advised by a friend to try Catarrhozone. I bought the outfit, and was gratified by the results. I was completely cured by Catarrhozone, and have used it since to check a cold, with satisfying results. It is the quickest medicine in existence, and I know my testimony will be of some use to other fellow sufferers."

(Signed) "George Pace."

An adult should use the large outfit, lasts, some, and three in the experience of a schoolboy. Two months' treatment (the large size) costs $1.00. Medium sizes 50c; at all dealers of the Catarrhozone Co., Buffalo, N.Y., and Kingston Canada.

A FINE ARRANGEMENT

"It just 'Shaeacks," said Hobson, as he ran was smoothly along the high way, "it is really a pleasure to ride in this way. No annoying, no care, no bounce—how on earth did you ever get such a fine road as this?"

"Ah-h-h," said Shaeacks, "it was a simple enough. I pay him five dollars a month and he maintains it. He will fare me to come out for a ride."

RAY RINGS

Animals born with tails generally develop considerable use for them, but a motherless may happen to them that will cause them to wish they had no tails. A curious instance of this is what has been called a "rat king," in which, by an accident just after birth, the members of a litter of rats become connected by their tails so that it is impossible for them to extricate themselves.

This singular condition is said to be caused by the tails of the young rats getting twisted out, should a little clay get here to them, they cannot be separated.

After this condition is perceived by the mother eats the young are not left to starve but are revealed the greatest care.

"I rat king" discovered and killed in Germany contained seven members in perfect condition, physically, except for the entanglement of the tails. These had grown in such a way as completely to entangle one another; but the rats themselves, the very best health, continued to eat at astonishingly good rate had been increased upon them by their more fortunate relations.

Collapsible water towers adopted by the Japanese for invasion are to be fitted with a steel, yet can be extended to a height of seventy-five feet, so that when the eighth piece of a

That Reminds Me

Dentist—"Hey! You just missed me! I am rich"

Assistant—"The patient, I'm coming back already."

Dentist—"Will be the next man to bust Jack Johnson?"

Assistant—"The answer."

Inspector—"Why do you think dog was stolen from a lady?"

Constable—"Because as I walked down the street with it it stopped us and all the passers' stopped whistling."

"I want to marry you," said the young young author, bluntly.

"Why?" replied the young the great heroine, preparing to listen to his eloquent declaration.

"Well," he replied, "it would be a great advantageous for me."

Poor Jones was in a dilemma, was Mrs. Jones's birthday, and how much was still worse that she would be extremely unpleasant if no present was forthcoming. It was not until the morning when he awoke that he remembered that he lay for some days thinking of the best way out of the difficulty.

Then he arose, crept downstairs, took the biggest plate he could find from the breakfast table, and hid it on the hall table. The door, he opened the door and let the milkman in to leave the usual. Then, tripping lightly upstairs, he called to Mrs. J.

"The boney year birthday. I have prepared a little surprise for you, love, and come and see how you like it."

Then he ran downstairs again and, looking out the step, cried in accents sweet and wrath. "If that vile bread man has been here and taken the biscuits once I had bought for you!"

But he was relieved to remember the next day that the fact took a lot of explaining away.

A man came up to the window of a small railway station at Worcester and asked for a ticket to Kansas City, in Missouri. "Single or return?" asked the booking clerk. "Single, sir," was the reply. "I may have to live there for some time, but even when the time comes I shall not return. I will stay there."

"Then you had better take a return ticket," said the clerk, "for you never know what you will do."

"I will never lend money without ample security."

"Then you bet you have my furniture," said one prepared to pay you interest at 10 per cent. per week."

"That makes 520 per cent. per annum," silently calculated the money lender.

"Then I shall have to carry away every stick and stone in the furniture, you know," said the borrower.

"I see," grinned the money. "It will be a long time before I can count on the money and rent for the furniture.

Mrs. Dack and family were to remove to other quarters. Where did you put the furniture, Mrs. Dack, asked a neighbor.

"Ah, the furniture van! I quite forgot it, I declare," was the hasty rejoinder. "Just step! I have an idea. I know where I left it. He searched up his hat and went to see a well known pawnbroker. "Good day," said the pawnbroker.

"I'd

TOFIELD, ALBERTA, THURSDAY FEBRUARY 1, 1912.

The establishment of regular market days in Tofield should be an incentive acceptable and beneficial to all the farming, stock raising, dairy and produce sections of the public. The creation of a cash market for all that is raised or produced in the district at large would also be hailed with pleasure by the many householders in town who will then be assured that anything in the dairy line which they need will be strictly fresh. Once a regular cash market is established here, there is no doubt but that buyers will come from Edmonton and other points to pick up many lines of dairy, poultry and garden produce.

Market Days

The farmers of the Agriculture Society last Tuesday voted a unanimous for the project. Now that the scheme has been started, it is well that the details of its working out should be followed up and the plans brought to a realization. In this proposal is a scheme which has the hearty endorsation of both towns people and their friends from the country. It is to be hoped that we will, at no distant future date, see the realization of this proposal.

Coming from the States

Unora, Sask.—"The surgical operation of removing an American coal grafting him onto the Canadian tree is not altogether easy, simple or painless, but it must, and once they are here you have got them," says President B. M. Fredericksen of the Scandinavian Canadian Land company of Chicago. This company has recently located not further than 300 families of Scandinavians in the Unora district. The company's plan is to interest large sized farmers and locate them in the Spring upon land where improvements are already under way, thus enabling them to harvest crops the first year. "By this plan," says Mr. Fredericksen, "no matter whether they locate in town or country, it becomes a simply a question of time when they will be well-to-do. They can't help but make money." Mr. Fredericksen also instances one town farmer who recently became interested in timber lands, and who is coming out in the Spring with sixteen carloads of stuff, horses, traction engine and general supplies. As it happens, the man is a German, showing that all is not Scandinavian even with a company dealing in that specialty.

Annual Convention

The Central Development League met in annual convention in Edmonton last week. Most encouraging reports were presented regarding the work of the past year. The delegates present, representing 21 affiliated Boards of Trade from Red Deer to Athabasca Landing and from Breso to Stony Plain, voted unanimously for the continuance of the League. Very effective work was accomplished by the League in its publicity campaign throughout the States and Eastern Canada. Many places within the League reported evidences of benefit of participation in the co-partnership effects of the affiliation. Great work for Central Alberta was accomplished in the exhibiting at various fairs and exhibitions in Toronto, Chicago and many other places of collections of grains, grasses and vegetables grown in Central Alberta. The League is accomplishing splendid work and it is stated that the Alberta govt. in its publicity campaign fails short in.

L.I.D. 23-P-4

The council for L. I. D. 23-P-4 met in first session for 1912 on the 19 th inst. Messrs. Wilcox, Plant, and Hoffin being present. On motion of Wilcox-Plant, R. A. Hoffin was appointed chairman.

The minutes of last meeting on Nov 29th was read and approved.

Hoffin-Wilcox: That Wm. Thomson be appointed secretary-treas. Carried.

The Sec. was instructed to write to the Dept. re erecting of the railway crossing at 14-15 Twp. 50-19.

The secretary was instructed to order steel culverts as follows: Div. 1—4 12"x16' Div.2—1 18"x18' Div. 2—1 10"x16'.

On motion of Plant-Hoffin the assessment was struck at 6c per acre and the ratepayers may be given the privilege of working out half of their taxes with the exception of those in Division No. 4 where on account of so little money coming in under this plan and money being required for the purchase of tools and mats/drals three fourths of the sum may be worked out and one-fourth must be paid in cash.

A rebate of ten per cent was allowed on taxes paid in before July 1st.

Each councilor is appointed a committee to select foremen to lay out and inspect and have general supervision of work of that councillor's Division.

The secretary was instructed to get the necessary supplies for his work, revise the assessment and mail the notices of assessment to the ratepayers.

Council decided that the councillors will be allowed the fees and allowances provided for by the Ordinance.

The secretary was instructed to have special notices calling attention of ratepayers in Div. No. 4 to the fact one-fourth of their taxes must be paid in cash and to mail them to the ratepayers in that division.

The next meeting will be held in Tofield on March 23rd.

BARDO

P. B. Anderson is recovering from a recent attack of influenza.

Rev. Mr. Running preached last Sunday in Camrose, taking the pulpit of Rev. Mr. Carlson who is yet on the sick list.

Palmer Anderson and Nelius Running were home from Camrose last week end. They report 70 enrolled at the College.

Adolfa Rorem is attending High School at Edmonton.

Norman Jevning went to Minnesota to a school for stammerers some time ago and reports that he is doing well.

The youngest child of Mr. and Mrs. D. F. Black met with an accident last week which almost terminated fatally. It fell into a tub of water and was nearly drowned. Medical aid was too great for Mrs. Beebe, the computer's grandmother who was present in the house and she was laid up for some time. The little one is now well.

Messrs. Rorem and Running sold a car of oats recently to Lee & Lee.

Beaver Lake

An item in the Edmonton Journal states that the recent rains is a new idea of the weather man so far as northern Alberta is concerned. Hubbish! The first year we were in (1895) there was rain in December, and at least a dozen winters, at intervals since, have had a similar experience. In 1899 there were very heavy winter rains.

The election for councillor for 20 M 4 passed off very quietly, Mr. McCallum being elected by acclamation. Mr. Daby (the redoubtable T. H. D.) was also elected trustee for Baker Lake S. D. without opposition. J. C. Morrison was re-elected councillor for township 51. Mr. Morrison has been appointed an official auditor.

The whistle of the thresher is again heard in the locality. The snowstorms have plastered the stacks pretty effectually, causing considerable extra work and rendering a first class job impossible, still we are mighty glad to get it done at all. That this experience may be the last for many years is the devout wish of those interested.

We don't usually complain about the typographical mistakes in our correspondence, for we know that in a country printing office, ideal conditions are impossible, but our last had rather more than the average number. In one place we are made to state that A. R. Moody and J. S. McCallum were elected for "school" addresses. It should have been "short."

Jan. 23, '12

The Protestants of Ontario have petitioned the government for one marriage law for all Ontario. They don't want any church law interfering with law of the province.

The Dominion government has announced that it will grant lands to the honest settlers on the vacated homesteads this spring. Preference will be given to those who have taken up the homestead

The Borden government has passed a resolution through the House of Parliament to refer the No Transcontinental matter to the Supreme Court of Canada and then on to the Privy Council. Five conservatives voted against the government on the division on this motion.

The U. S. Interstate Commerce Commission has ruled that U. S. empty cars can be loaded with grain in western Canada and returned east through the States and Canada in transit for export. This will tend to relieve the car shortage throughout the west.

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this sub-division. Lots facing South on Cookson Avenue will be ideal for residential purposes.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months residence upon and cultivation of land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may preempt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

W. W. CORRY,

Deputy Minister of the Interior.

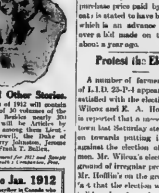
MISS ARMOUR

Notice

Re Bylaw No. 61 of the Town of Tofield

NOTICE IS HEREBY GIVEN that application will be made by the Town of Tofield to the Legislative Assembly of the Province of Alberta at the present Session thereof, for an act to validate and confirm By-law No 61 of the said town of Tofield, being a By-law to authorize the issue of debentures of the Town of Tofield to the amount of Four Thousand ($4000.00) Dollars for the purpose of further drilling the present Town Well to a depth of Fifteen Hundred (1500) Feet which is being drilled for the construction of 25 housandths and incidentals, the means that the time of the article in Canada is broken in as by occupation to some degree alien in her choice. All their industrive work rests long pondering. If the artist's mind is confined to the scenes of the land in the present. Among the Canadian women who have done really good work in the brush is Miss Hertrut Ford who was born in Coburg, Ontario, and gave much time to study and work abroad and returning to Canada took a studio in Toronto two



MISS HERTRUT FORD
A Canadian Artist

or three years ago. A study part of her year, however, is spent in work on the Continent and in Paris. Her paintings secure attention, particularly from artists. Last winter at an exhibition in Toronto she showed some 12 studies a series of a certain family of subjects taken from Parisian cities in which the true atmosphere of architecture and the decorative element were pretty well delighted and a credit to Canada

Of all things there is nothing more to be desired in a man than that he who practices it have some of the sense of folly in thinking it will remain undiscovered.

Ross Creek

Peter McPherson and Elmer Hallbrat are away on a visit to Vancouver Island B. C.

J. W. Malcolm is on a visit to relatives at Fernie, Vancouver and other points in B. C.

A. T. Banks is also a business trip to Tofield this week.

W. F. Reiman was in Tofield last Monday.

Horses have had splendid range in the Ross Creek district this winter. As yet, few indeed have been brought in for winter feeding. Those on the range are in excellent condition. The weather so far this season has been very propitious for the cattle and horses.

(CHAPTER I ...(Continued)

A Born and Bred New Englander

...915, very soon forty dollars a month and I signed a three years' lease before I left for next week ... all over it for both. We bought ... and furniture. We ... Both at my new ... Mary Ann ... Jane Ruth and I ate out breakfast by lamp-light. It gave us an extra hour, and she was bred on the country she's getting up in the morning is no great hardship.

We couldn't afford a servant, and we didn't want one. Ruth was a fine cook, and I certainly did portion on her! I'm dashed after ten years of restaurants and boarding-houses. On rainy days, when we couldn't get out, she used to do her cooking early so that I might watch her. It seemed a lot more like housekeeping when I saw her put on the dough and put it in the oven in small cakes of various kinds. She was all done. I used to fill up my pipe and sit by the kitchen stove until I had got over it with the train by spending the day.

But when the morning was fine we'd either take a long walk through the big park, sometimes, which was near the house or we'd run out the garden. We had twenty-two inches of rainfall, the city got an hour of bright, fair to the middle of May. Then it rained for a little of hours and about four cents of grass. It was the first Ruth had seen ... and I can't ... after a fashion, for four dollars a week we had a ... and there was ... the whole time she ... at. In spite of Ruth's super ... she got married so much as she ... to do. ... that our provision bill was ... than it had been in the old days. ... I'm going for the furniture before ... Rebecca Lodge I.O.O.F.

The Oddfellow having been deserters of organizating a Rebekah Lodge realized it Tuesday night when degree team from Maple Leaf Rebecca Lodge No. 3 of Edmonton arrived Tuesday and organized Lakeview Rebecca Lodge with a membership of thirty new members

The Degree was conferred by Past District Grand Master, Lizzie Mackay. Past Noble Grands McCallum, Taylor, Angus, McIntyre West, McCoppen and Sisters McKenzie, Oliver, Currie, Clark, Brobant, Orchard, Barnett, Hodgins, Stewart, Moffat Seburn, Fleming, L. West, Coulthard, Olmstead and Bros. Deputy Grand Master Al. Brown, Past Grand E. L. Harkell, Bros. McIntyre and McKenzie.

The work put on by this team was certainly very creditable to themselves and the Lodge to which they belong as well as Oddfellowship in general. The work was very much appreciated by the new lodge instituted for which they thank the Sisters and Brothers who so kindly came down to institute. The Oddfellows of Tofield showed their appreciation of this by a most sumptuous repast served by the ladies in the adjoining room of the hall, which could only be judged by the way in which the viands disappeared. After this a pleasant hour was spent in tripping the light fantastic. The hour of two A. M. arriving the merry party dispersed for the night. The Degree Team returned to Edmonton this morning well pleased with their short visit to Tofield.

The officers of the new Rebecca lodge are as follows:

N. G.	Sister Shipp
R. S.	" McMullen
F. S.	Bro Letourneau
V. G.	Sister Wood
R. S. V. G.	" Sherlock
L. S. V. G.	" Lee
Treas.	Sister Ferguson
Con.	" Kennedy
Warden	" Hall
R.S.N.G.	Bro Ferguson
L.S.N.G.	" Ingram
Chap.	Sister McColl
R.S.S.	" Hosier
L.S.S.	" Steinbach
O. G.	" McHeffey
O. G.	Bro. Ray

Churches

METHODIST

Mr. Sykes of Alberta College, preached in the Methodist Church last Sunday, both morning and evening. Next Sunday at the morning service the sacrament of the Lords Supper will be administered. The evening service will be a special one for the children and the music will be in charge of the Sunday School Choir. The pastor will preach at each service.

Apology to Church of England

Apology is due to our friends of the Church of England for the non appearance of a local leaflet in fact publication last week announcing Sunday services in the local parish. The item referred to was set up in type but was left over with some other matter that was crowded out.

An Important Movement

At a meeting of the committee of the Circle of Ladies, few days ago it was decided to instal complete sets of first aid appliances, consisting of a stretcher, bandages, splints, medicine chest, etc. in the school and in Dr. Hammond's office. These will be placed in those places for the sole use of the people of Tofield in case of any accident and will be in charge of one of the officers of the Girls' Brigade. It is expected they will be ready for use some time within a week. Next week's paper will give person's name who has charge and also direction of what to do in case of accident.

Here is a message of hope and good cheer from Mrs C. J. Martin Bonne Mill, Va., who is the mother of eighteen children. Mrs Martin was cured of stomach trouble and constipation by Chamberlain's Tablets after five years of suffering, and now recommends these tablets to the public. Sold by All Dealers.

Two Cars of FURNITURE

Will be sold in competition with Eaton's Prices. Eaton has the leading retail store in Western Canada, his prices are reasonable and their cash methods are good. They put a catalogue in the hands of the people twice a year and if we were to undertake to do this perfectly it would cost us several thousand dollars. We don't intend to, yet, for what's the use, when you can look up an article in Eaton's and add the freight, and have our price. We use it every day and know just what to charge to compete and you are well satisfied. I personally met one of the Eaton's some years ago and was very favorably impressed. He has done us a good turn and I am sure he has no enmity towards us even though we have run off with most of his Hardware & Furniture business in Tofield since coming here five years ago.

We wish you to look up Eaton's price or any other catalogue house, and our local competition. Get posted then see.

Local and General News

Toronto Gun Club in the Masonic Hall Feb. 12.

R. N. Whitlaw was a business visitor to the Capital on Saturday.

D. M. Bissett spent the latter part of last week in Edmonton on business.

Dr. McQueen, dentist, will be in Tofield on his regular monthly visit Monday, Feb. 19th.

Mr. and Mrs. Hy. Blain have moved into J. F. Mahaffey's house on 5th St. North.

Rev. Nicholson occupied the Methodist pulpit in Tofield last Sunday

Messrs. Jamieson, W. Lee, Morton and J. C. Kelly went to Ed. Tuesday evening to take part in the Edmonton Bonspiel. Jamieson skips.

K. T. Latimer has taken over the Logan Block opposite the Reliance store and will shortly open a first class boarding and rooming house.

An incipient blaze occured at the house of Mr. J. C. Phillips, last Sunday evening, when, by lighting a match to look for something he had just around a sofa, little Johnny ignited the upholstery. The sofa was badly spoiled but prompt action of those in the house prevented the conflagration spreading.

Last Sunday evening in the Presbyterian church, Rev. A. M. McColl preached a very eloquent sermon on Friendship taking for his text 1 Sam. 23-16 "and Jonathan Saul's son, arose and went to David into the wood, and strengthened his hand in God." The large congregation present listened with rapt attention to the discourse and the meeting will be repeated next evening at 8 o'clock. All are welcome.

Played Tie Game

The long looked for and much hoped for game between the girls and the Jr. Silver Seven took place Tuesday night. The game was not only a magnificent exhibition of hockey as it is sometimes played, but was a stupendous demonstration of the acrobatic abilities of the Juniors.

It was just about 7:30 when Gordon Hains, who was ably assisted by Geo. Bissett, got the tussle away to a good start, and it was soon apparent to the large crowd present that the boys were not going to have everything their own way as the girls seemed as though no sooner time they had seen a real hockey game and had not forgotten how it was played, but lack of speed prevented the latter including details. The opposing forces were drawn up as follows, after this style:

School Girls	Junior Silver Seven
Mildred Sherlock	G. Rowland
Hetty Keasey	P. A. Pruden
Ora Mahaffey	C. P. Dent
Olive Pruden	R. J. Letourneau
Clara Vergus	C. Cliff Bissett
O. Letourneau	L. W. Latimer
Mary Bethel	R. W. Cecil Bissett

Officials: Referee, Gordon Hains; judge of Play, Geo. Bissett; Goal Judges, Misses Richardson and Thompson.

Penalties: Con Bissett, 2; Ray Latimer, 7; Cliff Bissett, 7; Bobbie Dean, 7; Archie Pruden, 5; John Letourneau, 6; Jos. Rowland, 2

"THE CASH HARDWARE"

Silver Seven Are Again Defeated

Varsity Wins by Score of 6 to 2 in Rough Game

Last Saturday the Silver Seven added one more to their list of defeats when they met the fast varsity team of the Edmonton city league. To those who are devotees of the pugilistic art the game was well worth the price of admission. Not to those who went in hopes of seeing fast clean sport, the game was a disappointment. The varsity seven was the lighter of the two but had two or three heavy men who proceeded to use their weight to good advantage. The first half was the better of the two but was little cleaner than the last.

The first half started off with the visitors rushing the game to the home goal and after a few seconds of play, Steel, varsity left wing, placed the puck in the nets. After several minutes of hard play, Steel scored again for the Edmonton team. The home team then took a brace and for some time the play was mostly around their opponents' goal. Herb Lee spoiled the scoring for the home team with a nice shot from the side. The play continued for some time to be rushed around the varsity goal and the next score was made by Mata, the speedy center for the visitors after a fine rush down the length of the ice. Just before the end of the first half, Hains managed to lift the rubber into the goal from a fine combination. The first period ended with the score: Varsity, 3; Silver Seven, 2.

The second half was all varsity and although several times the puck remained in the vicinity of their goal, their defense was too strong to allow the home team to add to their score. Mata started the Varsity scoring by slipping one past Clarkesworth from the center of the ice. The home team now found great difficulty in keeping their men on the ice. A tendency, or tired feeling, seemed to draw them to the fence and hold them there for short intervals.

The second goal was made by Blainey, the Varsity rover after several rushes down the ice. Lavelle ended the scoring, about five minutes before the end of the game. At the time the last score was made, two of the Tofield men were on the fence. The end of the game showed three points added to the score of the visitors with the Silver Seven still holding their own. The final score was: Varsity, 6; Tofield, 2.

The home team did not play up to their standard. Whether or not it was rough play, or whether it was simply an off day has not been decided. Hains for the team part played his game, but was checked more than usual. Smoker McDonald in the first half played a star game and played consistently throughout. Bissett played a hard steady game but could not get away with his rushes as well as usual. Herb Lee played a hard game and did good work, scoring one of the goals. Clarkesworth played his usual game at goal and aided greatly in keeping down the score of the visitors. Somers played a good game, especially on the defense. Letourneau as usual had an off day. He failed to get into the game when most needed and several times got in the way of his own men.

Mata, the Varsity center, was the fastest man on the ice. His rushes were hard to stop and usually last ed the length of the ice. Blainey, rover, played a star game in the last half. He was a hard man to check and usually got the puck to Charlesworth. Dota and Steel on the wings were in the game all the time. May at goal is hard to beat. He seems to have a family of always being between the puck and the goal. Olmstead and Lavelle on the defense were hard to get past. The line-up follows:

Varsity	Tofield
Mata	C. Charlesworth
Olmstead	C. P. Somers
Lavelle	P. Hains
Blainey	R. Bissett
Mata	C. McDonald
Steel	L. W. H. Lee
Dietz	R. W. Letourneau

Official:—Referee, R.C.Jamieson, Judge of Play, Dean, of Edmonton Leads scored:—For Tofield: Lee Hains; For Varsity, Steel 2, Mata 2, Blainey, Lavelle.

Council

Public Works Considered—Constable Mahaffey Resigns

The adjourned meeting of the town council was held Monday evening. Mayor Letourneau alone being absent.

The report of the Health & Relief committee was accepted on motion of Urquhart-Lee.

The report of the Public Works Com. that an engineer be employed to report on the following, was accepted.

Grading of Queen St. across low part of Roadside; also Kings St., & right of way across railway property and block 36 can be arranged.

Building of culvert at the corner 5th Ave and 1st St.

Raising grade and removing water at S. W. corner of Exhibition grounds.

Completing of grading done last year.

Grading of 1st St. from 5th Ave south to government road, and Hunt Ave from 1st St. to eastern town limits.

Necessary repairs on front road east and west, south of town.

It was decided that the Public Works committee be empowered to engage an engineer to estimate cost of these and other necessary public works.

By-law No. 64 authorizing the borrowing of $5,000 from the bank on strength of current year's revenue received third reading and was passed.

A letter from S. B. Woods, solicitor, Edmonton, in reply to inquiry of License and Police committee re the Mahaffey case, was read. He said that council has no authority to pay costs. The matter was placed in the hands of council for consideration.

Mr. Mahaffey who was present, then placed his written resignation in the hands of council. That it asked to take effect at once.

After several councillors expressed regret at Mahaffey's resignation motion was passed:

That Constable Mahaffey's resignation as constable and nightwatchman and license inspector to take effect at once be accepted. That the License and Police Com. be empowered to engage Mr. Mahaffey if possible as night watchman and if not, to engage another man.

This is the season of the year when outdoors feel very much exposed to the frequent colds contracted by their children, and have abundant reason for it as every cold weakens the lungs, lowers the vitality and paves the way for the more serious diseases that so often follow Chamberlain's Cough Remedy is famous for its cures, and is pleasant and safe to take. R. K. WHILLANS, - - Manager and Editor

TOFIELD, ALBERTA, THURSDAY FEBRUARY 8 1912

From the business like manner in which council is approaching the business of the year and the amount of work it is setting out to accomplish, it is evident that 1912 will be much in the way of permanent improvements effected and done in such a way as to merit the commendation of the citizens of the municipality.

Plans of Council for 1912

The public works contemplated for the coming season include all of those suitable by representative of council last spring to be in the wind viz. the placing of the roads leading into town into a good condition and the draining oil of the water lying east and south of town. This was not done last year, but as this year's council has decided on retaining the services of an engineer to survey and lay out the work and has already entered into the matter of preparing estimates besides making definite plans of the various improvements to be effected, it looks as if matters are to be the Aikel mixed etc. In this council will undoubtedly have the hearty endorsation and approval of the ratepayers who have long desired the accomplishment of these municipal undertakings.

o o o

The Constable's Resignation

The late town constable's action at council meeting the other night when spanking in support of the immediate acceptance of his resignation of office was, to say the least, manly. Admitting that as an officer he had made an error, and saying that he felt that in a large measure he was to blame for hasty actions, he asked council to be immediately relieved of the duties of his office.

Not everyone is in full sympathy with the men who are called upon to act as the keepers of the peace. As officers these men are often called upon to undertake things that call for deeds involving quick thought action. Possibly few private citizens are called upon to submit to abuse both oral and physical, such as many men in this calling have to do. And comparatively few private citizens ever find themselves in the positions in which constables find themselves unavoidably placed.

On this account all, while regretting the incident in which the late constable was a party, will undoubtedly appreciate in a measure the trying difficulty of his situation and recognize that in committing the error, the chief element was a lack of judgement in a trying moment and that while the late official is the unfortunate victim of the affair it is a matter of fact that there are many others of the same profession are responsible for like mistakes.

o o o

Late Hours vs. Children

The fact that many children of tender and susceptible age should be running at large during late hours when they should be in the immediate precints of their homes has engaged the minds of several of our leading citizens and has been incidently brought to our attention.

While having been aware of this condition it is pleasing that several have mentioned this fact to this paper as we have felt the necessity strongly at times of calling the attentions of parents to the fact that children have been roaming at large during the hours of night and frequenting places where they learn little good and much that is not good. It is regretable that parents should, perhaps thoughtlessly, allow these conditions to exist. The evil influences which are at large will affect this younger generation soon enough without needlessly allowing them to be exposed to such when they are particularly in need of parental or guardian care.

Story Competitions

The Morning Albertan, in connection with its Anniversary Edition which will appear next month, offering prizes for three different competitions. Four prizes valued at $200 the first being $100 are offered to bona fide Alberta residents, the stories being laid in Alberta, to contain about 5,000 words. The second competition is for poems, the subject and conditions being the same. The prizes are $25, $15 and $10. Five prizes are offered for a story competition among school children attending years and under. The stories are to be about some Alberta subject and the prizes are $05, $15, $10 and two prizes of $5 each. The competitions are open to all and not merely to readers of The Albertan. The Albatan, according to annual custom, is celebrating its own birthday, which is February 28, with other Albertans born on that day, and will give a silver mug to every baby born in Alberta on Feb. 28, 1912, and ask that doctorsgo throughout the province report such events before April 1.

The Toronto Glee Club in the Masonic Hall on Monday night, Feb'y. 19—Plan at Jamieson's

B. of T. Hold an Important Meeting

The Board of Trade met in regular session Tuesday night Present Pres Rogers, Sec. Nicholson, Strong Howe, Richardson, Story, Swift.

The first work of the evening was the presentation of a financial statement to the council. This was not completed but placed in the hands of the President for completion and presentation to council.

The resignation of Mr. Younie as a member of the publicity committee, because of other duties was accepted and W. P. Strong appointed in his place.

Some time was spent in discussing methods of advertising, and it was decided to take a half page in Wagberg's guide for three months. The other propositions were placed in the hands of the publicity committee. It was emphasized that an aggressive campaign of advertising was essential to the growth of the town.

Chairman Howe of the Manufactures committee reported recommending that certain action be taken in inducing manufacturers to locate in Tofield.

The secretary was instructed to act with committee in entertaining any and all who may favor a view of establishing manufactures.

The matter of the establishment of good roads was brought up and the suggestive action will be taken in the near future

The standing committees were instructed to have their boards ready for out courses of action for year, including estimates of financial expenditure and present same to the board as soon as possible.

Various public bodies in western Ontario (New Ontario) are petitioning the government to have partitioned off a district into two, with the seat declaring in favor of the amalgamation of the western districts. Principal among these is Temiskaming and Northern Ontario, where the seat of government will have to be made to the British North America Act which does not provide for the Dominion creating a new province from territory which comprises part of a province already formed.

There is no better medicine made for colds than Chamberlain's Cough Remedy. It quickly cures a cold, relieves the lungs, opens the secretions, aids expectorations; and restores the system to a healthy condition. For sale by All Dealers.

The many local friends of Mr. and Mrs. Fry of the Fred de Motta will be interested and pleased to learn that on the 25th of January last, they became the happy owners of a bouncing baby daughter.

COD LIVER OIL WITH THE OIL TAKEN OUT

A Triumph of Chemistry and Pharmaceutical Skill

Oil from the liver of the cod-fish has been used for ages as a preventative of disease and a restorative

For a long time it has been the general opinion that the medicinal value of Cod Liver Oil was the greasy, oily part itself—the only drawback being the unpleasantness of taking it. Many efforts to disguise it have been trying to find ways to make it more palatable. They used to "cut" it with whiskey—take it in wine—flavor it with lemon juice—anything to get away from that abominable fishy taste and smell

Many people still take it in Emulsion form, which is nothing more than "cutting" it—breaking it up finely in the presence of hypophosphites and glycerine.

Scott's Cod Liver Compound is simply this liver extract combined with an extract of malt and bringing wild cherry, so as to make it more palatable. They used to "cut" it with whiskey—take it in wine—flavor it with lemon juice—anything to get away from that abominable fishy taste and smell

Scott's Cod Liver Compound is simply this liver extract combined with an extract of malt and bringing wild cherry, so as to make it more palatable. They used to find out that the oil was a distinct drawback to the medicinal principles contained in the cod liver.

Crude oil is quite indigestible, and will, in time, put the strongest stomach out of order.

A way has now been discovered to do away with the grease and the smell, and the full value of the medicinal properties get into use. This is done by removing the fresh oil from the new livers. The liver pulp is then reduced to the form of an extract like beef extract.

Scott's Cod Liver Compound is simply this liver extract combined with an extract of malt and bringing wild cherry, so as to make it more palatable. They used to find out that the oil was a distinct drawback to the medicinal principles contained in the cod liver.

This combination makes Scott's Cod Liver Compound a delicious tonic, toning up the system, and makes you strong.

Take it when you feel yourself losing your grip. It's a pleasure to take—even the children like it. $1.00 per large bottle.

If you try this remedy we know you will be pleased. Send Scientific we absolutely believe to be the best medicine value offered.

Scott & E. BOWNSON, Toronto.

Neal's Remedies

Sure for each everyday ailment.

Farmers Declare For Cash Market

That the farmers and producers of the community are heartily in favor of the establishment of a regular periodical market day at Tofield was manifested Tuesday, Jan. 30th when at a general meeting of the Tofield Agricultural Society in the town hall, the proposition came up for a lengthy discussion which culminated in the unanimous approval of a resolution setting forth their views on the subject. During the discussion it became manifest that it was desirable that a regular market day for produce, dairy, poultry and vegetables etc. should be held on every Saturday and that the last Saturday of every month a big market day should be held at which general stock, as well as produce, and any thing and everything anybody has to sell, might be brought in and sold at either private sale or by auction.

The farmers followed up the idea in recommending that the town see that a regular market space is arranged and fenced.

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this sub-division. Lots facing South on Cookson Avenue will be ideal for residential purposes.

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build there in 1912

The Seed Fair
From the point of interest taken in it the Seed Fair, Tuesday, Jan. 30th was a success While the number of exhibits was disappointing, the grades of the various grains showed up to a good advantage. The afternoon lecture by the judges resulted in a very general discussion in which a large number took prominent part. The net results attained by holding these seed fairs is that the standard of of the grain produced on our farms is raised. In this way the holding of the seed fair is a splendid undertaking by the Agricultural Society.
Messrs. Cristale and glass of Southern Alberta were present representing the Dept of Agriculture, acting as judges of exhibits and later on giving interesting lectures on Agricultural methods. The prizes awarded were as follows:
Spring Wheat: P. O. Molino 1st C. Currie 2nd
Six-rowed Barley: P. O. Molino 1st Hy Stutzen 2nd
Long Oats: I. H. Oens 1st
Short Oats: Sam Stirrett 1st Hy Sutton 2nd
Potatoes: J. M. McIlraith 1st

WHAT CANADIANS ARE DOING

A. S. GOODEVE.

Although born in Guelph, Ont., Mr Goodeve is more generally associated with the far west, where he has been located for considerable portion of his life, and where for a time he filled the position of Provincial Secretary in the McBride Government, prior to coming east to represent

A. S. GOODEVE,
A Western Pioneer

Kootenay, B.C., in the Federal House in 1908.

Educated at the Guelph Public and High Schools, he followed on to the Ontario College of Pharmacy, from which he is a medalist, and at an early date thereafter, migrated to British Columbia, taking up his residence at the town of Rossland. Here he soon began to take an active interest in municipal affairs and in the session 1899-1900 was in accordance of the mayoral chair. He was elected to the assessment of the Provincial Government, and was appointed Provincial Secretary in 1902. Mr. Goodeve is married, and has family circle includes four boys and two daughters.

Dr. R. P. Robinson, Succeeded Sir Wm. Macdonald

One of the prominent physicians of Ontario, young Robinson is the parental farm as the hamlet of the Eldons in Leeds County, is an energetic, professional life appealing more strongly than that of agriculture. He was educated at Trinity and Queen's Universities, obtaining his medical degree at the latter college.

About 22 years ago Dr. Robinson started practice at Carleton Place under the aegis of his uncle, Dr. J. F. Preston, M.L.A., who is now Provincial Secretary of Ontario, and other whip of Sir Wilfrid Laurier's Ontario party forces. In about a year the doctor moved to Perth, and began to practice, devoting much time to hospital work. He manifested considerable interest in politics, and from the first identified himself with the local Liberal-Conservative organization. A Conservative all his life, Dr. Robinson probably inherits his politics, as another uncle, Dr. R. H. Preston, also represented the county of Leeds in the legislature for 18 years.

MISS ELLEN MARY KNOX

It has been said, and truly too, that Hawaiian Canada stands to the Revenue ranch. And little wonder when we think of the class of men and women who devote their lives to teaching. No one has done more to raise the standard than Miss Ellen Knox, the Principal of Havergal Ladies College, Toronto. Since coming to Canada in 1894 to assume the principalship of Havergal, this lady has made her college one of the largest and best known on the Con-

MISS ELLEN MARY KNOX
Havergal College, Toronto

tinent. Possessed of the same mental attributes as her celebrated brothers Sir George Knox of the Supreme Court of Allahabad, India and Bishop Knox of Stepney, England, Miss Knox who was born in Surrey, England, in 1854 climbed from first class honours in her final examinations at Oxford and a special diploma for teaching from Cambridge University to the principalship of one of the finest of teaching in Canada. Miss Knox has published a number of books, mostly of a religious character, of her articles are always welcome to magazine publishers.

WHAT CANADIANS ARE DOING

T. L. WIGHTH

Mr Magrath, who represented Medicine Hat in last parliament, is notwithstanding his recent defeat, looked upon by his friends, and by the Conservative party in general, as one of the strong men in the public life of the times, and strong confidence is expressed that he will come to the front at some early date. He is

T. L. WIGHTH
Late M.P. for Medicine Hat

a native of Eastern Ontario, the son of a brilliant Irish school master, and was educated at the Collegiate Institute of Belleville, Ont., and subsequently at Toronto University, where he graduated in physics, practical chemistry, and mining. In 1898 he was in each respect prominent during his term at Ottawa.

RICHARD ST. LAKE

By birth a native of the old land, Mr. Lake reached Canada when he was but a mere child of four, coming direct from Cyprus, where during a silence in the laws of Hamilton. Here he soon began to take an active interest in municipal affairs and in the session 1899-1900 was in accordance of the mayoral chair. In addition to the appointment of Provincial Secretary, he was also appointed Government Immigration Commissioner in 1902. Mr. Goodeve is married, and the family circle includes four boys and two daughters.

RICHARD ST. LAKE
Farmer and Parliamentarian

Territories and in 1904 was sent to the House of Commons by the voters of Qu'Appelle. He is unmarried.

JAMES JOSEPH MACLAREN

Lawyer and Athlete of Ottawa

Mr. Smellie, who was one of the hard workers of Ottawa in connection with the recent political campaign, is a native of Glasgow, Scotland, where he was born on September 15th, 1869. But he came out to Canada when he was two years old, and now he is a Canadian of the Canadians.

Few who see in Mr Smellie the sedate and successful lawyer of to-day, would think that at one time he was an athlete. He was as much that he first became known to the public. Not so many years ago the name of "Jimmy" Smellie was one to conjure with in the athletic world. As a football quarterback he has never been surpassed, and many prominent Ottawans still remember the time when they used to travel far to rugby matches to cheer for Smellie.

His first appearance in senior football was in 1889, representing the rugbies team in 1889. Later he played with Osgoode Hall and Toronto City. He was captain of the Osgoode Hall team in 1893. Moving to Ottawa in 1894, he joined a rugby club in the city. Still he played rugby, and was captain of the Ottawa team in 1895.

Mr Smellie is a son of Mr W. R. Smellie, C.E., of Scarboro, one of Canada's best known engineers, who has had a hand in many of the works in the construction of much of the transcontinental line in 1886. When Mr. Smellie, senior, came to Canada he settled at Newcastle, N.B., where he engaged in contractor on work on the Intercolonial Railroad Subsequently the family lived in Ottawa, Montreal and Brockville. Mr Smellie graduated and his schooling in Ottawa, where he at one time attended the Collegiate Institute. His legal studies were by studied at Literate's College. He took his B.A. degree at Queen's University, and then went to Osgoode Hall, graduating in 1895.

The Presbyterian Home Talent Concert Success

Last Thursday night, the Presbyterian church gave a demonstration of the fact that we have ample talent in our home town in the way of music, reading and entertaining. The concert was a big success, considering the short time in which it was arranged, and the fact that the groups of Edmonton Singers who were to have been here, failed to put in an appearance. Several of the numbers by local talent on the program were crossed off short, by before the program commenced. Those who took part are certainly to be complimented on the smallness of the entertainment as well as to their willingness in appearing without previous preparation.

Among the best numbers on the program were the instrumental and vocal selections of Misses Eleanor and Flossie Bissett and Mr. Alex. Bissett. As an accompanist Miss Flossie Bissett made a very good impression. She has the knack that is the result of much practice and is accompaniment of vocal selection, brought out the spirit of the song. The violin and piano duet by Mr. Alex. and Miss Flossie Bissett was one of the distinct treats of the evening as was the vocal duet of Miss Eleanor and Alex Bissett. Miss Bissett in her vocal solo made a happy selection in "My Ain Folk." It is particularly fitted to her voice and made a very pleasing impression upon the audience.

R. N. Whillans gave several humorous selections, assisted in his side splitting song, "Ching Ching Chinaman."

The Davis orchestra was much appreciated. They were generous in the number of their selections.

Rev. A. M. McColl was prominent on the program, both reading and singing. His reading of "Dowie Dens of Yarrow" showed good histrionic ability. His other reading was that simple yet distinctly beautiful Scottish poem, "Bairnies Cuddle Doon." The bairnies were when the "bairnies" are put to sleep is portrayed in a manner that has a universal appeal to the heart.

Chas. McMillan made his first appearances in Tofield in vocal solo and violin selections. He has an exceptionally clear tenor voice that was very pleasing.

C. Richards was so well liked in his juggling act that he was forced to respond to an encore.

At Queen's Hotel, Tofield Tuesday, Jan. 2nd

Tofiled Juniors Defeat Ryley

The Tofield Juniors (Smith's Pets) defeated the Ryley youngsters on Saturday night by the decisive score of 9 to one in a fast game in which good team work was one of the features. The Ryley boys were much older and heavier than the home team but despite this they never were seriously in the game. All the Tofield youngsters played well. Archie Pruden and Clifford Bissett, especially the latter playing an exceptionally brainy game scoring 2 goals. For the Ryley team the point was easily the best but he was almost a man in size if not in years.

Gordon Hains and A. Latourneau handled the game, and the Ryley team should have no kick coming as to their ruling.

The teams were as follows:

Tofield		Ryley
Rowland	G.	Kjomess
Cec. Bissett	F.	Lane
Dean	C. F.	Stambeau
M. Pruden	R.	Archer
Cliff. Bissett	C.	Bendickson
A. Pruden	L. W.	Umphrey
R. Latimer	R.W.	Lyalo

SOLD BY
Richardson & Rudd,

Wedding Bells

At the Sutton residence, Bardo, on Jan. 31st, Mr. Arley Sutton was united in marriage to Miss Emily Gertrude Shaw of Ryley. There was a large gathering of friends. After the ceremony, which was conducted by Rev. Allan M. McColl of Tofield, most of the guests with the bride and bridegroom, had a pleasant sleigh ride returning at 5 in the evening when a sumptuous supper greeted their arrival.

Don't fail to attend "The Rivals" in Masonic Hall To-night.

Masquerade Carnival

A Masquerade Carnival will be held on the Tofield Rink on Wednesday, February 14th. Three prizes will be given, one for the best ladies' costume, one for the best gent's costume and one for the best comic costume on the ice. The Tofield Brass Band will be in attendance and skating will be allowed after 9 o'clock.

At the Churches

METHODIST

An Old Fashioned Tea

A very unique entertainment in the nature of an old fashioned tea will be given on Feb'y. 22nd by the Ladies' Aid of the Methodist Church.

This will be the first social festival in Latimer's new dining hall. Further particulars next week.

CHURCH OF ENGLAND

The Venerable Archdeacon Grey or one other of the Edmonton clergy will take charge of the Anglican Services on Sunday next, February 11th in Bellamy's Hall at 7.30 in the evening and at St. James Church, Logan at 2.30 in the afternoon.

PRESBYTERIAN

In St. Andrew's Presbyterian Church next Sabbath the Rev. Allan M. McColl will preach in the morning from the "The Christian Home." In the evening the subject of the address will be "True to the religion of one's Fathers" Every Wednesday evening the prayer meeting is held at 8 o'clock. Everybody welcome.

Here is a message of hope and good cheer from Mrs C. J. Martin Boone Mill, Va., who is the mother of eighteen children. Mrs Martin was cured of stomach trouble and constipation by Chamberlain's Tablets after five years of suffering, and now recommends them to others to the public. Sold by all Dealers.

The Tofield Standard

Published Weekly in the Interests of Tofield and the Welfare of the Public.

VOLUME V — TOFIELD ALBERTA, THURSDAY FEBRUARY 15, 1912 — NO 28

Save Your Money

HOW?

By Using a Cream Seperator,

Which One?

The De Laval

WHY? Because it is the Best

It sets the Standard of all Cream Separators. One may tell you that another make is just as good as the De Laval for in other words they compare with a better article always. Just ask your neighbor which machine they like best. It does the freshest quickest and does it right. It cost lasts any other Separator on the market. It is sold the same to you here in Alberta as to your friends in Ontario or any part of the States. The new selling terms for this year make it possible for anyone who may have two or three cows to secure and pay for a De Laval with but little effort. We put them out. You try them and if not satisfied return them.

Local and General News

Wm. Little of Calgary is the guest of Mr. and Mrs. D. Bissett.

Chas Splinter of Strathcona spent the week end in Tofield.

R. N. Whillans spent part of last week in Calgary.

Rabbits are becoming more plentiful throughout the district.

Editor Leslie Archer of the Ryley Times was a caller at the Standard office on Thursday last.

Messrs E. J. Silcrett and Jas. Fletcher of Farmington were in town last Saturday.

O. P. Berg, it is reported, is going north to Coal Lake district to homestead.

Wardrope Whillans and James Logan have gone to Edson where they have secured positions.

A. A. Story is contemplating making a trip to the coast this week to visit his son Wm.

The Bill to validate By-law No. 61 of the town of Tofield has been advanced to the third stage and will become a law this week.

Mrs. G. A. Trent and daughter, Bessie left on Friday last for an extended visit with friends in Regina, Sask.

Miss Mabel Washburn left last Friday morning for her home in Chesley, Ont. called thither by the serious illness of her father.

Mr. W. J. Foden Grand Organizer of the Loyal Orange Association of Hardisty was a visitor to Tofield last week end.

BORN—At Tofield, Alberta, on Sunday, February 11, 1912, to Mr. and Mrs A. J. H. McCauley, a daughter.

A. S. Bissett formerly of Tofield, now in charge of the Security elevator at Breton, spent the latter part of last week in town.

J. B. Steele of East Beaver Lake was a welcome visitor to town last week. He reports threshings as nearly completed in that section.

Walter Bellamy has moved into more commodious and attractive quarters now occupying the post shop lately tenanted by Charlesworth and Lee.

The show that was billed to appear in the Masonic Hall last Thursday night did not materialize owing to the illness of the leading man.

A company of rabbit hunters had an exciting experience on their homeward bound trip northwest of town last Friday afternoon. Their cutter was overturned when turning a curve too quickly, throwing the occupants out and allowing the horse to get away. It was caught before much damage was done.

R. A. MacKenzie, local Dominion Fishery Officer, has recently returned from a trip to Buffalo Lake, in connection with departmental affairs at that point subsequent to the death, on Jan. 7th last, of Matthew Cook, fishery guardian, who was in charge of that district up to the time of his decease.

Do you know that more real danger lurks in a common cold than in any other of the minor ailments? The safe way is to take Chamberlain's Cough Remedy, a thoroughly reliable preparation, and rid yourself of the cold as quickly as possible. This remedy is for sale by All Dealers.

Mr. D. R. Brown, connected with the Beulah Mission, Edmonton, was in town this week. The Beulah Mission is doing a splendid work in the Capital in assisting unfortunate men and women to better themselves. It has helped hundreds to a better Christian life and ideal many over times of misfortune and distress. Mr. Brown is to understood will again visit Tofield in the near future when he will speak on the work. Tofielders will undoubtedly be pleased to hear with their usual open minds his address which will be unquestionably interesting.

Literature Discussed

Last Monday night at St. Andrew's Young People Guild Mr. Young read a very interesting as well as instructive paper on literature. He gave a definition of the term literature, naming it's different forms. The value of literature is immeasurable as it affords an opportunity to benefit by the experiences of others. Mr. Young pointed out the fact that one, by study of literature, could get an insight into human character, such as could not be gained without long experience.

Rev. McColl gave a short talk in which he proposed the forming of a club for the study of literature.

TO THE PUBLIC

On and after February 20th, 1912, Mr. J. F. Cannil will cease to maintain an office in Tofield. Any person requiring advice, ring up 2528 Edmonton.

Council

What Was Done at Council Meeting Tuesday, Night

The Bylaws, License & Police Committee reported that they had paid O. H. Mahaffey for his services as constable etc. to Feb. 5th and had engaged J. Ferguson as night watchman for two months at $50 per month.

The committee recommended that the duties of the secretary be defined.

The Fire, Water & Light Com. reported recommending the getting in of tenders for 100 salt buckets, the getting of a gasoline lamp for the council chamber, the purchase of a team, harness and wagon and the hiring of a man by the month to perform work for the town.

It was decided to advertise for a single man to act as teamster and man of general work etc.

Mr. Neher wrote asking a further payment on account of work ceasing and the amount of $238.00 was passed.

The defining of the duties of the secretary was left to the Bylaw Com. with Chairman of the Finance Com.

The Fire, Water & Light Com. were authorized to purchase and have installed a gasoline lamp in the council chamber.

Lower Town Well Pump Dislocated

The 2nd Ave. east well is reported to be temporarily in a bad condition of health and was so reported at council meeting.

The pump doctor's services were ordered to be requisitioned to restores it to its normal condition.

The Fire Alarm System

The Burnham-Frith Co. have strung the wires for the fire alarm system through the town and are now awaiting the arrival of the alarm and engine.

The World in Brief

Millions of dollars worth of damages has been done by floods in Portugal last week.

Baden-Powell reviewed over two thousand boy-scouts in New York last Saturday.

Premier Borden has promised conciliation to the representations of R. C. Lumberman.

5000 people were driven to the streets in a $300,000 fire last Sunday evening in New York.

A man named Arthur Mailll committed suicide last Saturday evening while a prisoner in the city cells in Edmonton.

Ontario Liberals are asking for harbors on Hudson's Bay at the mouths of Nelson and Churchill rivers.

Thirteen were killed in a fatal dynamite explosion at Fort Francis Ont., in a railway construction camp last week.

The Western Grain Growers have been down to Ottawa and given the leaders of the government some plain heart to heart talks on the present situation and the railway blockade. It is up to government to come through with some relief measures.

The Saskatchewan Legislature has passed resolutions strongly favoring reciprocity. The defeat of the proposed part last September was blamed for the [illegible] chaotic conditions of the grain traffic.

Tofield Realty Co., Tofield

High Class Entertainment

The Toronto Glee Club appeared Monday night under the direction of Wallace Graham of Brandon, Man. The advent of this company was awaited by Tofielders with pleasurable anticipation and their expectations were realized to the fullest degree. While the attendance was not what the excellence of the company merited, the fact did not deter them from giving their full program nor did it detract from the full enjoyment of the numbers. A return engagement would certainly draw a crowded house.

Mr. H. Mathews MacDonald musical director and bass, is a whole host in himself. He delighted all with his rendering of "The Old Sweetheart of Mine" and "The Wolf" and was forced to respond to a number of recalls. Mr. Lockhart, first tenor, was in good form and his excellent "I Hear You Calling Me" brought from his hearers an insistent demand for another to which he kindly responded. Mr. Stanley, baritone, with his rich mellow and resonant voice in "Thora" and part songs was a favorite. Mr. Kenney, tenor, in "Mary of Argyle" displayed possession of a vein of fine sympathy and wide range. The purity of intonation and the perfect blending of their voices together with the excellent character of their repertoire make this company one of Tofield's best favorites and their return will be watched for with interest and pleasure.

Many Tofielders are getting up ice supply for the coming summer.

When Limbs and Chest Ache

ZAM-BUK GIVES EASE QUICKLY

Is it a cold and cold in your bones? Have you had attacks of pleurisy or lumbago? You know the feeling. Limbs and chest ache, as if every bone were pierced with sharp knives, now and again a paroxysm of rheumatism strikes you here and there. Your chest feels tight, and there is a pain between your shoulders.

You are miserable for the combination of symptoms is a most painful one. Rub on Zam-Buk with hand briskly, and then rub your chest, back and limbs well with Zam-Buk.

Mrs. H. Shore, 24 Berkeley St., Toronto, writes: "I suffered much for months with a bad cold, which settled on my chest. I could get no relief. I was in a most miserable condition. I tried Zam-Buk, and after using it for a few days I felt much better. I persevered with it, and in a short time was completely cured. I have recommended Zam-Buk to many friends since, and all speak highly of it."

Zam-Buk will also be found a sure cure for chapped hands, eczema, blood poisons, ulcers, piles, scalds, burns, ringworm, bad legs, abscesses, blood poisoning, and skin injuries generally. It is 50c. a box, or post free from Zam-Buk Co., Toronto, for price. Avoid harmful imitations and substitutes.

That Reminds Me

At the Zoo two little girls were passing the parrots, sitting on perches and cages.

"I've called 'em, Cliod-ya, come 'ere!" Was for!"

"Oh, look! Here's a few dunes!"

* * *

Lending that a red-hooter bobbing about among a blue mountain range, married 1911 lasths, had been found by a party, set out body rewarded it, and it was learned how the news of the find had come to be spreading among all classes.

* * *

When that man who just hiked over the first road tunnel came to a halt, he was the greatest" inquired one Walter.

He rejoined the other, "Are the arrows pointing the way that has been so plainly marked?"

* * *

The city of Chicago has decided to send a dentist for diseased pants. Such a distinguished person would have more than ever a necessity in this age of flapper dress. Trousers have any share of the number of pants who are run over each year while out for a walk compassing their masters' pants.

* * *

The defence was impetuous, but to any person, but the facts were very much against it. Prisoner's counsel was wound up his impassioned appeal.

"I venture to say that the prisoner's story," he said, "carries conviction on the face of it."

"It does," said the magistrate, with a gentle yawn, "six months of it."

* * *

"Why did you select Charles instead of Arthur?" asked Reggie.

"Well," replied Mamma, "George said he had more fun when he was with bad men, and—but she says and like the rest of us."

* * *

"Yes, Bill Charles said I had won the hundred yards in 10 seconds and a quarter flat, but I'm not sure that it was quite that much. It seemed to me that the whole thing was much more practice's way."

* * *

Once an old Scotch weather prophet at Whitstanding informed Mr. Hall that there would be 215 a yard to rain seventy-six days, so?"

"Why, sir," said the inspector, "but the world was entirely flooded by forty days."

"Aye, sir," was the response, "but the rain fell only on 76 days."

* * *

The boy's fishing-pole was fastened under the front door, a piece of twine in his hand, and he was sitting in the mat jogging with a jerk.

"Fishing?" inquired a man passing along the road.

"Yes," answered the boy as briefly, as he could, and did not get them. "What's it for?"

"Fish."

"Oh!" That's a queer motive for a dog. What did you call him that for?"

"Because he won't bite."

Then the man proceeded on his way.

* * *

Mrs. Mellon tells a story of a little American millionaire.

He stopped at the Savoy Hotel with his sister and governess," she said, and one night the two unskilled were in the sitting room, having tea when in his apartment with his toys.

"Almost alone enough he left running furiously. He didn't understand the telephone, and one of the assistant managers hurried to his suite and answered it.

"Did you ring, sir?" he asked.

"Yes," said the little fellow. "Please send someone to bear me my toy engines."

Sheridan's car had turned turtle, and as he and another man were extricating themselves Uncle Dick Reed rained in his usual breezy manner.

"Turned over, hain't she?" he observed.

"Yep," said Sheridan, shortly.

"Want to sell?" asked Uncle Dick.

"Yes," said Sheridan. "I'll sell out cheap."

"What's your upset price?" asked Uncle Dick, with interest.

Father (impressively): Suppose I were to give you a penny every time you would become a very, very rich boy.

Irreverent Son: I'd stay here. The question is, What would become of you?

* * *

He was a poor, miserable-looking dog, and his whole appearance was that of an unhappy dog. For the dog was bowlegged, and he was only one student that he was suffering pain. So he asked the kind question: "What's-a-matter-a your-a dog-a-bowlegged-a?"

"It isn't," answered the student. "He's just fine, that's all."

"But-a-he-a doesn't-a-make a dog look-a-natural," queried the benevolent Italian.

"Does he?" said the tired sewer. "I only say."

Then the student and the persistent questioner "how can laziness make him bow?"

"Well, you see," said the rural philosopher, "that poor dog is sittin' on a cocoa real, tough thistles, and he's too lazy to get off, so he just sits there and bowls 'cause it hurts so."

* * *

The second-floor room of the little cottage was decorated with a shrivelled-up last year's Christmas wreath, decorating from the crossed and torn blind and on either side of the wreath were placed little bags. It gave the cottage a particularly festive appearance. One of the neighboring women, a broad and buxom person, of middle age, stopped in passing and looked at the window curiously, and as she did so a little old woman, as withered and shrivelled as the Christmas wreath, came to the door and opened it.

"Good morning to you, Mrs. Cooney," said the neighbor, cordially. "It's rather early for you to be up and about, and an unlucky time for you, I'm afraid, to be taking in Christmas."

The latter woman smiled.

"Yes," she answered "I'm taking in the Christmas this for Treasure the 6th. I don't know from this day."

"Is that so?" was asked the neighbor. "Terry's coming home, is he? I don't see I thought he was sent up for 12 months."

"So he was," said Terry's mother, "but he has got out of it for good. He has been a good lad this year off for good behaviour."

"Think of that!" said the delighted neighbor in sympathetic tones. "Try and keep him out of it now."

"I will," said the old woman, "I'm afraid to have a son like that!"

Only the satisfied crowd endure the agony of corns. The knowing ones apply Holloway's Corn Cure and get relief.

With the Horses

Stallion certification at the various shows in Australia is now quite general, and some of the local shows are announcing that mares shall also pass the veterinary test before being allowed to enter. Not any of the state governments, however, have gone to the length of the examinations compulsory for horse breeding purposes, as is the case in Victoria, but in most cases mares can be examined free of charge, and certificates are granted by the veterinarians to the vets. The public can then decide for itself as to the suitability or not of which they may be in doubt. The certification campaign has done considerable good. Hundreds of unfit mares have been condemned and prevented useless for service, so that the percentage of undesirable foals in the offerings now is comparatively small. In the Victorian Stallion Act, which is the most drastic of the lot, there are many heavy penalties. A judge recently visited Australia and was much impressed with the action of the Australian horse, and in the case of youngsters that he saw the certificate of any good show. The certificates are now declared to be a very good thing, and in some of the settlements will not accept for registration the progeny of uncertificated stallions or mares. Where uncertified animals are offered, buyers will have nothing to do with them.

* * *

One of the best prospects for the show jumping classes in 1921 was recently purchased by Mr. Frank Gardiner, of Albert, Sask., from Geo. Arnold, also of Albert.

She is a handsome iron grey mare, rising five years old, and is a big, strong, plain, and with only eight workouts steeplechased in public, she is by Pat Poti, out of Nellie Bly, by Pat Poti, by Jackie 2.11 1/4, a full brother to Nat Poti 2.13 1/4, and the dam of Nellie Bly is

STANDARD PRESS, Limited,

R. S. WHILLANS, - - Manager and Editor

TOFIELD, ALBERTA, THURSDAY FEBRUARY 15 1912

The Government Telephone Department has just issued a new Official Telephone Directory under date of December 1911 and copies may be had by Tofield Subscribers from the local exchange. One has reached our editorial desk. To say the least it seems to be a most wrestled production from its ritter luck of being up-to-date. If either centers are as badly represented as the Tofield exchange is in the book, it were better almost that the book should not have been published. Very few, if any, of the new phones installed in town last August are given in the new publication. Thus, so far as Tofield is concerned, the old directory is just as good as the new one. It would seem that there has been gross mismanagement, carelessness or neglect in the Telephone Department when it puts out such a directory as is, in many cases, positively useless to subscribers. Surely in the interim between October, 1910, the date of the prevailing volume and December 1911 the department could have had time and inclination to compile an up to-date list of the phone numbers and subscribers.

The New Telephone Directory

Unsafe Sidewalks

There have been a number of instances during the past few months when both local and rural parties have come to mishap on our street sidewalks owing to lack of proper provision for the safety of pedestrians and complaint has also justly been made by strangers who have, from unpleasant experience, found that walking on Main St. sidewalks particularly, is unsafe on dark nights. The town should see to it that the life and limb of pedestrians in walking about town on our sidewalks is not endangered, as, if present conditions are allowed to continue indefinitely, the municipality may find itself up against a suit for damages which it might find decidely unpleasant. It's a long lane that has no turning and an ounce of prevention is worth a pound of cure.

o o o

Hail Insurance

Hon. Duncan Marshall, Minister of Agriculture, at the Farm Association Convention in Calgary last week clearly pointed out that hail insurance by the government was a losing business proposition. He said that the government had decided to discontinue this and to allow hail insurance companies to come into the province to do business this year. He emphasized the statement that his department had made a close study of the policies, rates etc. of the companies doing hail insurance satisfactorily in Saskatchewan had examined their contracts and guaranteed the farmers of the province that they need have no misgivings over any possibility of questionable dealing on the part of the companies. In addition to this, The government had compelled the companies wanting to come in, to put up a deposit each of several thousand dollars with the government as a guarantee of good faith. This money would be drawn upon by the wovernment to pay out losses to farmers when the claims for damages by hie farmers were not not satisfactorily by the chospanies uoncerng. The government would have officials appointed to examine all cases of complaint against companies. And in cases where it was found that the insured had not received due compensation for his losses the government would take unto itself the right to draw upon the deposit of the resnidtrnat company and thus protect the former's interest.

The government, it seems to us, has well guarded the farmers in thus holding down the companies to a hard and fast policy and does not merit the abuse which is being showered upon it by certain sections of the U. F. A. Government ownership and operation and the same as regard to municipal utilities is all very well in many instances but become in many cases this works out well and to the public advantage does not mean that care and earned desire to act in the public good cannot succeed in compelling private or corporate enterprise to do fair loon just as satisfactorily as far as the public is concerned as by government or municipal ownership and operation.

THIRD ANNUAL EXHIBITION

AND STOCK SHOW AT TOFIELD SEPT. 27,1912

The third annual Exhibition and Stock Show of the Tofield Agricultural Society will be held on the Society's Agricultural Grounds, Tofield on Friday, Sept. 27th next This is the date set for us by the Alberta Agricultural Fairs Ass'n. which met in annual convention last Wednesday and Thursday in Calgary and at which R. N. Whillans secretary of the local society was present as delegate.

Mr. Whillans, representative of the local organization, reports that the convention was a success. Notwithstanding the fact that almost every delegate wanted a certain set date for the fair of his society, the spirit and movement of the U.F.A.

The constitution was amended setting the annual membership-fee of $5 per year.

Hon. Duncan Marshall, Minister of Agricultural, was present on the second day of the convension and addressed the meeting. He announced that his department was looking into the question of securing two herds of dual purpose Shorthorns from the Old Country which he intended to place on the demonstration farms in the province. The Minister also announced to the great satisfaction and pleasure of the Association that he had increased the grant from the government to the Association to $1000 per year and the general appropriation for Agricultural Societies was in service from $18,000 last year to $35,000 this year.

Hon. Mr. Marshall went into details on the hail insurance question. He explained that last year the government had a deficit of $75,000 in the hail insurance department and in the year previous, the deficit was $300,000. He had been in favor of a compulsory insurance act but on looking into the contracts for hail insurance offered by companies doing hail insurance he found that the companies insured on a 5 per cent. basis and after insuring the government nearly 8 per cent. He also found that the companies charged a flat rate and that the farmers were equally as well protected as with insurance with the government. The new rural municipal act would not come into force for a year or two and in the meantime the companies were to be allowed the license to do a hail insurance business in the province.

The Hon. Minister pointed out in addition to the above that the department would look well into the contracts proposed by the companies and cancel the insertion of clauses which would operate in the farmers' interest.

The explanation given by Mr. Marshall in regard to the reasons for the withdrawal by the government from carrying on a hail insurance business was to the reasons by it of full protection to the farmers in the nature of the policies entered into by companies and not to be quite satisfactory to all the delegates present practically all of whom were farmers.

Several addresses and papers on subjects in connection with the holding of fairs and all phases of the business in connection therewith were given during the convention and thoroughly discussed to the great al benefit of all the representatives present and through them to all the Agricultural Societies throughout the province.

Forests Affect Grain

How can the existence of forests The question is not hard to answer at the sources of a stream affect in the district watered by the stream?

We. The chief need for the growth of a plants is water. One of the best known authorities estimates that field crops use 300 lbs. of water for dry material produced. This uses up the water in from 2) to 5 inches deep of the surface.

Naturally, the nearer the water is to the roots of tie plants to take up the water and the better the crop will grow. Water, whether running free in the streams or lying in the soil, will reach the lowest level. If the level of the water in the stream falls, then the water in the soil (first, from the near neighborhood of the stream, and then from farther away) will find its way to the stream and the level of the water in the soil will fall, and so the plants will find it harder to get water.

In order to keep up the level of the streams in the summer, there must be a constant flow from the head-waters. It is well known that, when the forests are cut away the water from the melting of the deep of the winter and the rains of summer almost dry.

The soil of the forest, however is of a spongy nature and soaks up the water as it, afterwards gives it out gradually and so furnishing an even supply to the streams and enabling them to keep up their levels. The higher the level of the stream is maintained, the higher will be the level of the water in the soil, and the easier the the plants will find it to grow. It is for the reasons above outlined that it is so important to the farmers of the West that the Dominion Forest reserves should be maintained. The Rocky Mountain forest reserves thus serve the farmers of Alberta and Saskatchewan the Riding and Dark Mountain reserves, the farms of northwestern and northern Manitoba and the Turtle Mountain reserve, a consideranble portion of southwestern Manitoba.

Here it a message of hope and good cheer from Mrs C. J. Martin Boone Mill, Va., who is the mother of eighteen children. Mrs Martin was cured of stomach trouble and constipation by Chamberlain's Tablets after five years of suffering and now recommends these tablets to the public Sold by All Dealers.

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Hollinger property situated west of Eighth Street and North of Cookson Avenue This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 99 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this sub division. Lots facing South on Cookson Avenue will be ideal for residential purposes.

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build there in 1912

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

W. W. CORY,
Deputy Minister of the Interior.

Arrangements are being made by the Salvation Army Immigration Department, to bring in a large number of immigrants to this province during the present season to engage in farm work and domestic service. These people will all come from Great Britian and are accustomed to work on the land. The people who come under the auspices of the Army are a very desirable class and of good reputation, being selected by experienced agents who are familiar with the class of workers Canadian farming conditions call for.

As it is more than likely that there will be an extra demand for farm help this spring, farmers who desire to secure farm hands, married or single, experienced or inexperienced, for this season's work should at once get in touch with the Army. Write for application forms to the Salvation Army Immigration Department, 221 Hupert Street, Winnipeg, Manitoba.

Seed Grain Distribution

In order to make use of seed grain available in frosted districts and to provide seed to the homesteader at lowest cost, distribution will be done as follows wherever practicable:

Every housetseader receiving seed grain must, upon application to Mr. J. Bruce Walker, Commissioner of Immigration, Winnipeg stating the kind and quantity of grain required. If seed grain of the kind the homesteader requires, of desirable quality can be purchased in his neighborhood he may do so, but has this grain for sale will be supplied with a list of the orders he is to fill together with a less form. The homesteader applying in that neighborhood will call on the man who owns the grain, present a duplicate order from Mr. Walker sign the lien and get the grain. The seller will then send the signed lien duly executed and witnessed to Mr. Walker, whereupon he will receive his cheque for the amount covered by the lien. It will be readily seen that in order to avoid delay and disappointment, it is very important that the papers be absolutely correct in every detail.

Farmers and seed growers having seed grain for sale and homesteaders who intend to apply for government seed should write Mr Walker at once in order that the work may be completed before seeding time.

Put on Good Show

The Royal Lilliputian Opera Co. put on the opera "Jess Tea" before a large and enthusiastic audience in the Masonic Hall last Saturday evening. For their ages the children are very clever and put on a show that was pleasing to all. Perhaps the best number by the company was the singing of "The man in the Moon." Of the individual numbers, Baby Grace, in "Has Anybody Here Seen Kelly," was easily the best of the evening. Frank Jones as Li was exceedingly good, as was Irene Barry as the maid. These two kept the audience in roars of laughter all the time they were on the stage. Charlie Cooper made quite a hit in his song, "The Bachelors."

KILLED CALGARY UNIVERSITY BILL

The Legislature last week declined to allow the proposed Calgary University degree conferring powers and killed the bill. Calgarians are naturally up in arms over this and now are determined that their University will go ahead They now intend to affiliate with McGill. In conversation with J. H. Boyle, M. L. A. for Sturgeon last week the Standard was informed that the position of the government was that the Calgary University was as yet only a proposed undertaking and that the interested Calgarians had been told if they first won ahead and put up their e dege and got it going, then the government would consider the granting of them degree conferring powers. The Calgarians would not consider it a proposition this way and so the bill was killed.

The Bilton Government last week placed before the House it's railway policy. This provides for a liberal supply of lines running into the north country as well as additional lines to the south. The one line that is commanding the greatest attention is the Edmonton & Dunvegan Railway, a charter for which was secured from the Dominion Government. Bilton's program is to guarantee the bonds of this railway to the extent of $30,000 per mile. The bill was introduced into the House last Friday and was opposed by the opposition on the ground that no information had been given out as to who the company were, that there was as yet no guarantee that the company would operate the line after it's completion, that they did not wish legislation put through in the face of it was better than the A. & G. W. affair, that they wished to see that the proposition was adequately protected in the deal.

The information as to who constituted the company was withheld from the opposition until they had had their say. Premier Bilton then announced that J. D. McArthur was at the head of the company, that the surveys had been completed, plans filed and that these had been approved, 50 miles have to be completed before any money is paid over to the company.

The opposition wanted to know why the government would not themselves build the line themselves. The answer was that they thought it better that Mr. McArthur take the risk than the province.

FARMERS

Who have grain to sell for seed will have a splendid market during the next few months. Thousands of homesteaders throughout every community will have need of purchasing seed. Now is your chance to let all who need seed know what you have to sell and your price. ADVERTISE and your patron will come to you. The columns of the Standard are read by thousands. Let us do your publicity work.

Favor Direct Legislation

Edmonton, Feb. 14—The provincial legislature met on recall as unanimously favoring an investigation of the principle of direct legislation. A resolution was introduced by Chas Stewart, Sedgewick and seconded by Puffer, Lacombe. Other speakers were Patterson, Kennie, Hoadley, Hoberner, Oliviea and Brantley Moore. It read as follows: Whereas largeir signed petitions have been presented to the House asking for direct legislation by way of initiative and referendum, resolved that this house such recommend that the government make enquiry into this subject with a view of bringing in legislation with respect thereto at next session.

This is the season of the year when mothers feel very much concerned over the frequent colds contracted by their children, and have abundant reason for it as every cold weakens the lungs, lowers the vitality and paves the way for the more serious diseases that so often follow Chamberlain's Cough Remedy is famous for its cures, and is pleasant and safe to take. For sale by All Dealers.

CHAPTER III continued
The Middle Class Hell

He went on away every morning to his work, and I stayed at home and got a little more beautiful than I was before. And she did this with no help from any of those specialists. She hasn't one of the big enough brains to understand the existence of any physical culture whatever. I mean she had not kind of common sense that did not admit of any argument. She was wonderfully beautiful about dressing, and in fact in facing the appalling status. She used to place herself in front of the looking glass and say:

"Why, Hilda, there's a new fall coming on, and you've got to get busy."

Then she'd take a gaze at herself and say: "Why, Hilda, you're looking fine. You're the best looking woman in the world. You're the best looking woman in the world. You're the best looking woman in the world

Tofield Defeats Strathcona

The Silver Seven had an easy time of it when they played Strathcona last Saturday evening. The visiting team was apparently not in good form and consequently the game was monotonous from the spectators' standpoint. A little roughness now and then created a diversion but the game as an exhibition of hockey was a fiat failure. Smoky MacDonald played a leading part for the homesteaders. The score stood 7 to 3 in favor of the homesteaders.

Farmers Discuss

At the meeting of farmers recently held in the town hall for the purpose of discussing the market proposition and at which meeting the scheme received a hearty endorsation, several other matters incidentally came up for slight debate. Among the sayings which were overheard the following were the most striking. They show the way the wind blows in the farming community:.

I. H. Olson:—The government is always ready and willing to send out men to tell us how to to raise good crops but they never send out men to tell us how to sell and market the crops when we get them.

J. Fletcher:—What we want is a co-operative flour mill in the province so that we can get flour at cost.

S. Stirrett:—We sowed fall wheat 18th June with a nurse crop of Barley. The wheat came through the winter well and gave a very fair yield. This year we sowed fall wheat again and it looks fine This is a good method for overcoming weeds.

Olson—Fletcher:—That the Agriculture Society is in favor of a produce market being established in Tofield on Saturday of every week and on the last Saturday of each month a general stock and produce fair be held.—Carried unanimously.

Thomson—Lemire:—That we recommend that a high board fence be built on the sides and rear of the market, such fence could be later made the rear wall of a shed. Car.

Old Fashioned Tea

The Ladies of the Methodist Ladies' Aid will give a unique entertainment Thursday, Feb. 22, in the way of an old fashioned tea. The event will take place in Latimer's cafe. Tea will be served from 6 to 8 o'clock and will be followed by a program of the best of the local talent. The Tofield band will make their first appearances of the season and have a fine program in readiness. Admission, 25c.

Latimer's

Latimer's will be ready for business on Saturday of this week. The management of this establishment propose to run a first class and up-to-date cafe, restaurant and rooming house. Mr. Latimer, who is somewhat of a newcomer, and who has already become a familiar figure about town, is an aggressive business man and will undoubtedly make his new venture a go. Mrs. Latimer who is an excellent manager will be found to contribute greatly to the success of the house in her branch of the management. The building, which is the new two story block put up last year opposite the Reliance Block, has been thoroughly gone over from top to bottom and has been equipped with all the comforts of a modern home. They open on Saturday.

At the Churches

METHODIST

Rev. Chas. E. Rodgers of Alberta College will occupy the pulpit of Methodist church next Sunday both morning and evening.

The fortnightly service in the school house at Lakeshore will be started next Sunday afternoon at 2:30.

PRESBYTERIAN

On Sabbath forenoon 18th Feb. at 11 o'clock, the Lord's Supper will be observed for the Tofield and Ryley lodges of the Knights of Pythias. There will be a parade from the halls where the Lodge meets to the church. There will be a special address appropriate to the occasion.

The subject of the evening address at 7:30 will be "What is the Road to Prosperity?"

A hearty invitation is extended to all.

Prayer meeting every Wednesday evening.

A Fine Sermon

Last Sabbath evening Rev. A. M. McColl again preached to a full church on the subject of "Jacob Blessing his Grandchildren."

The speaker emphasized the wisdom of showing respect and deference for the religion of our forefathers. He also quoted from Burn's "Cotter's Saturday night," in praising ot the vanity of the man who boasts of his aristocratic descent.

First Aid Outfit

A Complete First Aid Outfit has been placed in the school by the Girls Brigade and is in charge of Wilfred Sherlock. In case of accident this can be secured by notifying Milfred Sherlock, Annie Hopgood or any of the teachers. The outfit includes a stretcher for carrying the injured, bandages, splints, etc. This is for the public and in case of need do not be backward in asking for it.

M. Mecklenburg, eye specialist will again visit Tofield on Tuesday March 5th.

G. T. P. Cafe

The G. T. P. Cafe will be fitted with private Luncheon Rooms where private parties may be served. This will be an inovation appreciated by the public.

Silver Wedding

Golden Wedding, or in fact, any wedding anniversary may be very suitably remembered by presenting the host and hostess with a beautiful piece of cut glass. We have just received a fine selection. R.O. Bird.

Man Wanted

Man to act as Town Constable and man of all works for the town of Tofield. Will be expected to take care of a team, and to sleep in the fire hall. Application, stating salary, received up to March 1st. For full particulars apply to town secretary, S. Nicholson.

Local and General News

J. B. Steel of East Beaver Lake was a visitor to Tofield this week.

A. S. Bissett of Bruce was a Tofield visitor over Sunday.

Mr. and Mrs. R. N. Whillans spent the week end in Edmonton.

Chas. Ma Wat spent the latter part of last week in Edmonton.

Fred Castell, of Grand Forks, N. Dak. is the guest of Mr. and Mrs. W. P. Strong.

John Florio, of Edmonton, an ex-Tofielder, was a visitor in town on Thursday last.

Tofield hockey team journeys down to Viking next Monday to play a return game with the Vikings.

Earl Ferguson and family of Ryley were the guests of relatives in town last Monday.

Little Miss Nola Hansen of Viking was the guest of Thelma Nokand the latter part of last week.

Mr. D. Bissett made a trip to Edmonton to spend the latter part of the week with friends.

Dr. J. W. McQueen, dentist of Wainwright, paid his usual monthly visit to Tofield on Monday last.

Rev. A. M. McColl went to Vegreville last Monday to attend a meeting of the Vermilion presbytery.

R. J. Stirrett, A. Campbell and Jas. Fletcher of Farmington were business visitors to town on Saturday.

Mrs. D. Bissett and the Misses Eleanor and Dorothy Bissett spent the week end in Edmonton visiting friends.

Leslie Archer of Ryley and his orchestra furnished the music at the hockey dance in the Masonic Hall last Friday evening.

Miss Flossie Bissett, who has been visiting her parents for the past 7 weeks returned to Winnipeg last Friday morning.

N. T. Latimer, proprietor of the New Cafe and Rooming house on Main St., reports a splendid opening business last Saturday.

Robt. Wood of Calgary was the guest of his cousin, Mrs. Wm. Hopgood, during the latter part of last week.

B. W. Anderson, of Camrose was the guest of Miss Mann at G. A. Trent's last week end. Mr. Peterson was en route to the southern States.

Mrs. E. S. Cole is recovering from a slight accident which she met with a week ago by falling out of a sleigh and by which she hurt one arm.

Burt Wood and family of Calgary will be in Tofield in a few weeks for a stay of several weeks during which they will be the guests of friends.

Mr. Wm. Little who has been visiting Mr. and Mrs. D. Bissett for the past week returned to Calgary by way of Edmonton last Saturday morning.

Jim Hannan accompanied the Viking hockey team to Tofield on Friday night. He is looking hale and hearty and his big good-natured smile was much in evidence.

Do you know that more real danger lurks in a common cold than in any other of the minor ailments? The safe way is to take Chamberlain's Cough Remedy, a thoroughly reliable preparation, and rid yourself of the cold as quickly as possible. This remedy is for sale by All Dealers.

Dr. Hammond's house in the north part of town, which was damaged during the first week of January by fire, is being repaired and an addition built thereto.

From the secretary of the board of trade it is learned that there are a number of enquiries from responsible industrial concerns who are anxious to locate plants in growing towns in the West.

A treat is in store for the Tofield public and their friends. The Hebokahs of Tofield are preparing to give a maple sugar social in the near future. Watch for the Big Announcement.

Sam Stirrett, Angus Campbell, Pete Ingram and Frank Mahaffey went to Edmonton last Monday, being summoned to appear at the Supreme court to do duty on the jury.

Good roads are winning a permanent place in popularity with the farmers and no community is considered progressive that has not improved its public highways. Build good roads and place your community in the progressive class.

The G. T. P. Cafe dining room is being changed in its interior this week. A private dining room is being arranged at the south end off the main room. This change is being put in by the management on account of the demand for separate rooms for private parties.

The Tofield Brass Band has taken on a new lease of life and on regular weekly nights, strains of music and other things are heard emanating from the practice room. It is to be hoped that the organization will be in a position this year to be able to fill appointments when their efforts at improvement will be rewarded, not only by encores, but by receipts of good hard cash.

Jimmy Fax, at the Bellamy Opera House, March 7.

Father Passes Away

The death occured in Chesley, Ont. on the 13th inst. of Mr. William J. Washburn, father of Rev. C. P. Washburn and the Misses Washburn. All the members of the family were present at the time of decease except Rev. Mr. Washburn and Miss Mabel, the former being in Nebraska on his way back to Tofield and the latter arriving a few hours late from Tofield.

The large circle of friends and acquaintances of the Rev. Mr. Washburn and his sisters who lived in Tofield during the last few months will feel deep sympathy with the bereaved ones. We will all remember the fascod the departed father, he having been a visitor to Tofield several months last summer, the guest of his son during his stay.

Rev. Washburn Resigns

Many will regret to learn that Rev. C. P. Washburn B. A. has resigned from the parish of Tofield. He will be in the West shortly for a few weeks before returning east to wind up the affairs in connection with his late father's estate. Ultimately, he intends either taking a parish in Ontario or moving to Edmonton and engage in supply work at least for a time.

Show Window Broken

The record of Tofield this week by showing a golden oak finished Dresser and Washstand for $8.95. Yes it. The north window of H. O. Bird Store.

M. Mecklenburg, eye specialist will again visit Tofield on Tuesday March 5th.

Burglars in Our Midst

Just after the Standard had come off the press last week, the astounding report was made public when it became known that during the early morning hours of last Thursday, Bird's hardware store had been broken into and the till pried open and rifled. The drawer had been broken open with some hardware tools which were left lying on the counter. The management over that but a small sum of money had been left in the till as the burglar got little for his pains. The stock was left undisturbed, apparently nothing only cash the robber was after. Entrance was effected by breaking the glass in the front door.

Business Men's Talks

Don't forget the Old Fashioned Tea at Latimer's tonight.

Large size Jap Mats only 25c at R. O. Bird's.

ONE WAY OUT

By WILLIAM CARLETON

Copyright, 1911

(By Small, Maynard & Co., Inc.)

I shall take a chance on the weather," I said. "I'm going to start this morning. I'll be back in a week or ten days, and I'll write you from Montreal and tell you how I'm getting on."

"Very well," said Uncle Jim. "I suppose you're right. You'll have to take your chance. I wouldn't like to see you start, but I suppose you're old enough to know your own mind. Anyway, I'll be glad to have you back again. Let me know when you're coming, and I'll meet you."

"Thanks, uncle," I said. "I'll do that."

"I'll be sorry," he answered slowly, "but it can't be helped. Well, good-bye, my boy, and good luck. We must have good meals and beds for you when you come here again."

"Good-bye, uncle," I said, and I shook hands with him.

Then I went to the market gardeners' parlor and had a last look round. I had left my valise there, and I now took it up and started off for the station.

I had walked about half a mile when I heard a shout behind me, and looking round I saw Uncle Jim coming after me in a gig. He pulled up when he came alongside me, and called out:

"Jack, I've been thinking. You're not going to Montreal. You're coming back with me. I'm not going to let you go. I've got a better plan for you. Get in."

I did as he told me, and he turned the horse round and drove back to the house.

"Now, Jack," he said, when we were sitting in the parlor, "I've been thinking it over, and I've come to the conclusion that you're not going to Montreal. You're coming to live with me. I'm getting old, and I want some one to help me. I've got no son, and you're the only relation I have. I'll make you my partner, and when I die you'll have the business and all my money. I've been thinking it over, and I've made up my mind to do it. I'm not going to let you go. You're coming to live with me, and that's all about it."

"But, uncle," I said, "I've got my own way to make in the world. I don't want to be dependent on you. I'm willing to help you, but I'm not willing to be a burden to you. I'm going to Montreal, and I'm going to get a job there. I'm not going to be dependent on you."

"Jack," he said, "I'm not going to let you go. You're coming to live with me, and that's all about it."

"But, uncle," I said, "I'm not going to live with

NEW LIGHT ON COST OF LIVING

Food Products, Not Manufactures, Are the Articles High in Price

Mr. F. W. Field, Editor of "The Monetary Times," Toronto, in a recent article says

"A statement first in connection with the returns of bill and notes that has originated from the backwood topic, the cost of living, is that in Canada the relief complaint is made against the high prices of food products, and not of manufactured goods. This is a most important statement to make public when one considers that the population of the Dominion is largely composed of farmers, whose interests are bound up with the welfare of the country. Every Government report gives plainly evidence of an increase in the manufactured products. The Department of Labor is to issue in their report of the wages paid in the manufacturing industries, but has not yet published the figures. From the returns of the Trade and Commerce Department for the following table—two months ended, 1910 and 1911, published by the Monetary Times—we have compiled the following table, showing the imports of manufactured goods, chiefly cotton, silk and woollen cloths. The figures are for the two months ended February 28th, 1910 and 1911:

	1910	1911
Cotton	$ 1,200,000	$ 1,200,000
Silk	1,000,000	1,000,000
Woollen	1,000,000	1,000,000
Total	$ 3,200,000	$ 3,200,000

"The above table shows that the imports of manufactured goods have not increased during the past year. The increase in the prices of the necessary items of food is the real cause of the increasing cost of living to the consumer."

It is sometimes considered that the people of Canada, especially those of the north, cannot obtain furniture and household goods as cheaply as they can be purchased in the United States. Such is not the case, however, as the following table, which has been compiled from the returns of the Inland Revenue Department, will show. The table gives the value of household furniture, stoves, kitchen tables and chairs, dining room tables and sideboards, bedsteads and iron bedsteads, in all lines of wooden furniture, as well as and pressed ware imported into Canada under the twenty years:

	Value	Duty
1891	$ 1,000,000	$ 300,000
1901	1,000,000	300,000
1911	1,000,000	300,000

The general tendency in crockery and glassware, table cutlery and silver plated ware has decreased.

There was an advance of from 13 to 15 per cent. in pots and tubs imported with 1910, and of approximately 10 per cent. in 1911 over the previous years, 1910-1907. The most extraordinary advance, however, is shown under the heading of brooms, which, in the closing days of 1907, had considerably more than doubled as compared with the prices ruling in 1896. This, however, was largely accounted for by the scarcity of broom corn that year throughout the west of the yield in the United States, the cost of broom corn in the United States having advanced from $4-616 per ton in 1896 to $100 per ton in 1907. The importation of brooms was fairly consistent with the increase from 1900 to 1910.

The question of raw materials in use in many industries, Canada possesses under the heading of wood pulp

Tofield Wins From Viking

Silver Seven Outclassed Visitors in Hard Fought game

The local hockey team continued their winning streak by defeating the heavy Viking seven in a fast, hard fought contest on local ice last Friday night. The ice was soft, making fast handling of the puck impossible, but the vigor and earnestness with which they played made up for this defect. Because of the poor condition of the ice, the game was divided into three periods.

The first period was probably the poorest exhibition of hockey seen here this season. The locals kept the puck in the opponents' territory the greater part of the time, but although raining shot after shot at the net, could not get past the goal keeper. Twenty-one efforts made by Bob Lee after about five minutes of play by a nice shot from the side.

The second period was fast and interesting. After about ten minutes of play, the visitors took a spurt and for some time kept the puck around the home goal. Neither side scored. The work of both goal keepers was exceptionally good.

After a few minutes play in the last third, Somers rushed the puck to the visitors goal and pushed it into the net. Almost immediately afterward, the Viking center made the first goal for the visitors. Somers and Hains each scored the sensational manner. Herb Lee and Smokey MacDonald each scored and, with the score 4 to 1, the visitors took a spurt and added three to their score. When time was called the game stood, Tofield, 6, Viking 4.

All of the home team were in the best of form and played equally well. The goal for the visitors put up the best game in that position put seen in Tofield

The teams line! up as follows:

Tofield		Viking
Charlesworth	G.	Harrick
Somers	F.	Fraser
Hains	C.P.	Furtier
Herb Lee	R.	Fields
Bine-ts	C.	Thompson
MacDonald	R.W.	Maine
Bob Lee	L.W.	McLeod

Officials: E. T. Johnson, Referee; O. Letourneau, Judge of Play.

Ladies Defeat Bankers

The Tofield Ladies Hockey team made its first bow to the Tofield public when they met and decisively defeated the banker's team by the score of 9 to 7. The game was one of the most interesting of the season. The Ladies' team lined up with Misses Burke, goal; Richardson, point; Morton, cover point, Tofield, center; Spilsted left wing; Letourneau, right wing and Mrs. Legge, rover.

FAX MARCH 7

For Sale:—A 6 year old Polled Angus bull. S. A. Hall.

Man Wanted

Man to act as Town Constable and man of all works for the town of Tofield. Will be expected to take care of a team, and to sleep in the fire hall. Applications, stating salary, received up to March 1st. For full particulars apply to town secretary, S. Nicholson.

Admission 25 cts.

Ice Carnival Big Success

The Ice Carnival held in the Tofield Rink Wed. 14 was one of the enjoyable events of the ice season. A large crowd was in attendance; one of the largest that has been on the rink this year. The costumes were elaborate, many excellent representations of different characters were seen. The comic costumes were good and the entire of the chorus laughable, One of the features of the evening was the appearance, for the first time this year, of the Tofield band. They were liberal with the number of their selections and the quality of the music was good. The band is to be congratulated on their good work as they have been practicing only a short time. It is to be hoped that we see more of them as well as hear more of them often in the future.

Theprizes were awarded as follows:

Best Costume, Lady, Mrs. Clemins
Best Costume, Gentleman, Dennis Corderoy, as cowboy
Best Comic, J. W. Somers

Other maskers were:

John Lee, Happy Hooligan Olive Corderoy, Shewshoe Girl, Clara Ferguson, Cowgirl; Amy Morton, Indian Maiden; Miss Spilsted Puritan; Emsey Phillips, Clown; Horatio Hopgood, Clown; Clovo Richards, Clown; Oliver Letourneau, Old Man; Jack Letourneau, Negro Boy; Mrs. Lee, Old Lady; Ray Latimer, Girl; Miss Thompson Negress; Louis Latimer, Little Eva; Lorne Lee, Jockey; Earl Davidson, Japanese; Dawson Manners, Sunny Jim; Willard McMelloy Comic; Emmett Davidson, Englisee; Mildred Sherlock, Mother Hubbard Dora Collins, Grandmother; Thelma Noland, Queen of Hearts; Karl Willson, Scout; Marjory Corderoy Annie Hopgood, Jessie Hopgood, Sonia Fergus, May Tofield, Mary Bethel, Ora Mahaffy, Miss Burke and Miss Richner.

Judges: J. Adams, J. Kennedy and Conrad

Manager Smith is to be congratulated on the success as well as other entertainments of the winter months. The ice was in the most excellent condition that is always found at the Tofield rink.

AT THE Churches

METHODIST

There will be a change in the services of the Methodist Church from the announcement made on Sunday. Fred Bland who was expected to preach next Sunday will not be able to come until two weeks later, March 10. C. B. Collins of Alberta College will occupy the pulpit.

PRESBYTERIAN

Rev. A. M. McColl preached last Sunday morning to the members of King Arthur Lodge K. of P. who paraded out to church. In the evening the pastor preached to a crowded auditorium on the theme, "Prosperity." During the evening the pleasing announcement was made that a practically unanimous vote for organic church union has resulted from the ballot taken in St. Andrew's Presbyterian congregation.

Hockey

The Holden Cup Series

The Tofield and Viking hockey teams have got together and arranged a series of two home and home games for the Holden cup. The public of these two hustling towns will see some keen play in these games. Tofield is to play at Viking today, Thursday, in the afternoon and Viking is to play Tofield on Tofield ice on Tuesday evening next (next week) goals only are to count in the series. The residence clause has been modified with the consent of the cup defenders, the Silver Seven, from Nov. 1 to Fee 1 in order that Viking might be eligible to play and also that the schedule for this series should not go to Tofield by default.

According to the rules governing the competition for the Holden Cup it seems that if one season goes by default the cup defenders lose their title to the cup by virtue of no competion. It must be played for and won three years in succession to entitle a team to become possessors of it.

Hence we will see an uppy strong games this week. Viking by defeating Tofield can spoil Tofield's chances for winning the cup for the next three years and will be handing Tofield by one year in the race for its possession. Tofield, on the other hand, wants the cup and is determined not to lose it. It will be a battle of the giants and good sport. The first will probably not be able to hold the crowd next Saturday night which will be the deciding game.

J. A. Kennedy, a brakeman on the G. T. P. was killed last Wednesday while attending to his duties on an eastbound mixed at Pevitt, Sask.

Murderous Assault

G.T.P. Employ Badly Injured at Wainwright

Bearing every evidence of having met with foul play and suffering intensely from his injuries, Frank Maugood, a Scandinavian only two weeks in the country, was brought to Tofield last Friday and lodged at the G.T.P. roaming house where he has since been under the care of a physician. His injuries are very grave but it is thought that he will recover.

The scene of the alleged grievous assault is said to be one of the hotels in Wainwright and took place last Thursday. The victim's brother who is an employee of the G.T.P. Co. and whose work has been to keep up the supply of coal at the stations and section houses along the line, distributing it along the line as needed and who has been working east from Watrous, had engaged his brother to work for him. Last week they were in Wainwright in the course of the performance of their duties. On Thursday the brothers had a walk about town and in the pool room they found that they were the objects of suspicion on the part of many of the railroad men who were on strike. They were asked as to what they were doing in town and they explained. Later the brother met Frank Haugood from the car up town on some message and it was then that the alleged murderous assault took place. Haugood states that he had a couple of drinks of rum at the hotel and just as he was going out of the door, something happened by which he knew no more.

The delay caused by his non-appearance made the brother go up town to look for him. On going to the hotel and after search he found his brother unconscious in the basement of the hotel. Inquiries illicited the fact that his brother had been set upon and viciously attacked. It is also alleged that knockout drops had been administered to him in the drinks with which he had been served. He heard that the attack had taken place in front of the hotel and after the victim had been rendered unconscious his body had been unceremoniously flung into the basement by the porter and others.

It will be weeks before the victim will be able to be about as usual again.

Feb. 27. Haugood is now declared to be out of danger. The matter has been placed in the hands of the Mounted Police for investigation.

Young People's Guild

On Monday evening last, the Young People's Guild met in the Presbyterian Church, when a most enjoyable time was spent, in spite of the fact that the ranks were broken on account of sickness. The meeting took the form of a "Hen Night." There was not a dull five minutes during the whole evening. The subjects drawn were most interesting and amusing. The meeting did not close till 10 o'clock.

A New Find

Last Saturday W. P. Strong received from T. Reten Co. Winnipeg, a fine 2 ft. 3 in. by 4 ft. 6 in. all wool hunting Canadian flag as a present to the Tofield Girls' Brigade. To say that the girls are proud of it does not tell half the story.

According to the new Grain Act intendered in the House of Commons, the government contemplates the purchase of one or three grain elevators at Fort Willeo.

THE PURCHASE of one thousand dollars worth of goods from your own town or your own country, instead of purchasing outside, means the addition of one person to your town or your country instead of supporting him abroad.

Editorial Comment

One of the greatest if not the most important problems which confronts the governing body of the municipality, and in fact every citizen, is the securing of a supply of water suitable for domestic purposes, fire protection, *Water* and for manufacturing purposes if necessary.

While the supply for present domestic needs may be adequate, being drawn from ordinary wells, the problem of getting an adequate supply for a fire protection system has faced succeeding councils and has not been mastered up to the present time.

It can, we think, be put up most strongly in past councils that this important feature, upon which rests largely our future development, has not been given the close attention and study which it merits. It may be that we are too much content with our progress as represented in other phases of municipal development. It will be remembered that our first municipal council was elected on a professed platform of water and fire protection. To the regret of all concerned and interested it has to be said that we have not yet attained our desire.

What then is to be our program in respect to this common and great need? Are we to go on blindly as we have done in the past, shutting our eyes to the fact that without water we are in danger at any and all times of a conflagration such as we have experienced twice in the past and possibly greater and more disastrous than before? This seems to be a matter which demands that all citizens of the town and property owners should get together and, with a spirit of recognition of one great necessity, work determinedly together to solve the question.

While among us as townspeople there may be plans suggested towards the solution of this problem, which in each of them there may be something good and worthy of consideration, it is up to us to secure the services of a competent expert engineer or engineers to assist us in getting us what we want and so much need. There is a superabundance of water two miles away in Beaver Lake. Hastings Lake ten miles west is another source which has been mentioned. Deep drilled wells have been tried with moderate success. Then there is a possibility of getting means of water from a source two miles or less south of town on the plateau in which lie the immense deposits of coal which have made Tofield famous.

While there may be features about the preceding propositions which would appeal to some, to others the last mentioned appears to be the more feasible. Known reasons are that it is patent to everyone who has been in the Tofield district for a number of years that the water supply in the coal mines south of town has from the time they were opened been large and ever increasing in volume. Further southwest toward Bardo siding we have flowing wells. It is therefore quite evident that there is strong source of supply behind this volume. Moreover it is unquestionable that the quality of this water is excellent.

It will another scheme has been suggested: that of getting a supply from an available source in a spring nearly two miles west of town near A. W. Hunt's farm. It is said that a large volume of water can be secured from this spring. It may be said here that the town of Hoot in Saskatchewan has already the mains laid for a water system from a source of this kind a mile and one half out of town.

It is therefore evident that around us we have viable sources of a water supply which would be more than ample for our needs. There is every reason then that we should get busy, unitedly put our shoulders to the wheel and boost, push and secure results.

o o o

A Liberal Victory

The reports from the South Renfrew election last week show Hon. C. P. Graham, liberal, elected with a majority of about 300. From all that can be learned, it was a stiff fight, both sides working to the limit to win. That the Liberals should win a bye-election so soon after the general election, and in good old Ontario at that, is undoubtedly indicative of conditions which do not augur well for the comfort of the government party. Graham will be a tower of strength to the Opposition in the House of Commons.

Clarence Larson is in town visiting friends. Mr. Larson has just returned from B. C. where he has been working on the C.N.R. Survey.

W. J. Richards and Mrs. Richards of Calgary were guest of the latter's sister, Mrs. John Lee, last Friday and Saturday.

JUDGMENT IN FAMOUS HEBERT MARRIAGE CASE

Justice Charbonneau Holds Marriage Between Two Catholics in Quebec Performed by Methodist Minister is Valid—No Temere Decree has no Effect as Against the Civil Law

Montreal, Que., Feb. 28.—Judgment was handed down today in the famous Hebert marriage case by Justice Charbonneau. He upholds the validity of the marriage. He maintains that any officer authorized to solemnize marriages can marry any two persons who observe the ordinary formalities including a marriage license, no matter what their religion may be. The judge holds that the Ne Temere decree has no effect as against their validity, which, he holds, authorizes all persons who are allowed to keep registers of civil statutes to marry parties.

As to the marriage between Marie Emma Cloutre and Eugene Hebert solemnized by the Rev. Wm. Timberlake, a Methodist minister, authorized to keep a register of civil statutes, on July 19th, 1906, he holds that it was performed legally. He upholds Madam Hebert's opposition to the judgment declaring the marriage illegal rendered by Mr. Justice Lanctot on the 19th of May, 1911, and sets aside such judgment. Moreover he finds that the withdrawal of the husband from the suit by filing a desistment of suit, did not prevent the wife from seeking to establish her civil status by bringing evidence to prove that her marriage was legal and her children legitimate. He holds the children as legitimate and born in wedlock.

The entire case for the wife was placed before the court several months ago, the judge reserving the right not to adjudicate upon the merits of the question of marriage prevailing he found, if not a matter of procedure and practice it was illegal to hear evidence in a case after the party beginning the suit had withdrawn. Attorneys for the husband claimed that when they filed their withdrawal that ended the case. They desisted from from suit and the lady won. There could be no hearing of evidence after that. When the judge admitted the evidence the attorneys for Hebert abruptly left the courtroom, and the case for the husband that is, that the marriage of a Catholic not performed by a priest is illegal, was never presented to the court.

The original judgment by Judge Lamoureaux was rendered March 23rd 1911, annulling the marriage entered into between Madame Clouarte and Mons. Hebert at Montreal, July 14th, 1906, and solemnized by the Rev. Wm. Timberlake, a Methodist minister of the Centenary Methodist church, Point St. Charles. Both were Catholics and born in that faith. Mrs. Hebert in St Valentine, Quebec, in 1880.

with present headquarters at Mirror

The G. T. P. is rushing supplies to the head of the steel on the branch line preparatory to making an early start on construction. Several train load of ties are waiting at Tofield daily for the branch and are being forwarded as quickly as possible. These ties are being brought in from points between Edson and Fitzhugh on the main Lane's own western or mountain section, and are of excellent quality. Indications point to an early start of the steel laying gang. From 25 to 30 miles of steel rails is waiting at the head of the track to be put into track form.

KEEP YOUR SCALP HEALTHY

And You Need Not Worry About Your Hair

Just as surely as the farmer who keeps his soil clean, cultivated and rich has good crops, so surely does the man or woman whose scalp is always clean and well tended have an abundant growth of hair.

One of the best helps in keeping the scalp healthy is Nyal's Herpicide. Nyal's Herpicide, Sulfo-Naphthol, the first time you should give the head a good wash with Nyal's Shampoo Powder. This cleanses the scalp thoroughly and helps to remove the dandruff. Then rub in, every day, with the finger tips, a generous application of Nyal's Herpicide.

Nyal's Herpicide completes the cleansing, and keeps the skin of the scalp soft and supple. It is a mild and soothing and stimulating preparation, so that it cures or prevents all scalp diseases and at the same time gives vigor to the roots of the hair.

When you use Nyal's Herpicide regularly in the way it is daily necessary to shampoo the head every week, you will find it keep it clean. Your head will feel more refreshed than ever before, for you use Nyal's Herpicide.

Ask about Nyal's Herpicide. There is a lot to know about the real value of this medicine, and we know about the Nyal line.

Sold by C. E. JAMIESON, Tofield.

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in it's sub-division. Lots facing South on Cookson Avenue will be ideal for residential purposes.

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build the c ie in 1912

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

Told in Pithy Paragraphs

W. Morgan Shuster, former treasurer general of Persia, has returned to the U. S. with his family.

The British Cabinet is trying to arrange a settlement of the coal strike situation.

Ontario was storm swept by a tremendous blizzard and snow storm last week. Traffic was blocked.

Hon. Geo. P. Graham was elected last Thursday in South Renfrew by a majority of 330 over his opponent Dr. Mahoney, conservative. The Liberals regard this as a great victory.

The Edmonton Journal says that the C. N. R. and G. T. P. have agreed to build a Union Depot on the site of the present C. N. R. station in Edmonton.

Hon. Messrs. Pelletier, Postmaster general, White, Minister of Finance, Cochrane, Minister of railways, and Hazen, Minister of Public Works, will make trips over western Canada after the session.

Ross Creek

A very enjoyable dance was held in Silverdale School House last Monday evening at which a large crowd was present.

D. Bappenhuis and P. Mosselaar, proprietors and managers of merit great praise for the excellent manner in which they pulled off this fine social function.

J. W. Malcolm has returned from a visit to Vancouver B. C. He looks fine after his trip which he says he enjoyed very much.

Miss Hart of Edmonton is a guest of her sons Mrs A. H. Chambers.

Mrs. Grover Van Berkhirk has returned from a visit to Tofield.

A. T. Banks has purchased some more fine brood sows.

For a sprain you will find Chamberlain's Liniment excellent. It allays the pain removes the soreness and soon restores the parts to a healthy condition. 25 and 50 cent bottles for sale by All Dealers.

Happend in Missouri

Editor Got Wedding Announcement and Auction Sale Mixed

A Missouri editor who was late out of hard cider got a wedding announcement and an auction sale mixed, says the National Monthly, and served to his readers his doom:

Wm. Smith, the only son of Mr and Mrs. Josiah Smith, was disposed of at auction to Lucy Anderson on my farm, one mile east of here, in the presence of several guests, including the following, to wit: two mules, 12 cows, The Rev. Jack son tied the nuptial knot, the least weighing about 1250 lbs. on the hoof. The beautiful home of the bride was tastefully decorated with a sawmill calf, a spade, a milky cake, one feed grinder, one set double harness almost new, and just before the ceremony was pronounced, Mendelssohn's wedding march was played by one milch cow, five years; one Jersey cow to be fresh next April, carrying a bunch of flowers in her hand and looking charming in a gown made of light spring wagon, two boxes of apples, two ricks of hay, one grindstone, meanwhile short, trim-built lambs in the yard were dancing around the sprinkling pot. The groom is a well known and popular young man, and has always stood well among admiring circles of 12 Berkshire hogs, while the bride is an accomplished and talented school girl, and is the proud owner of Poland China—pedigrees if desired. Among the beautiful presents were sets of knives and forks, one spring harrow, one wheel harrow, one go-cart and other articles too numerous to mention. The bridal party left yesterday on an extended trip, term of 12 months time extended to responsible parties, otherwise spot cash. Luncheon will be served at the table. After this Mr. and Mrs. Smith will go to housekeeping in the cozy home at the corner of Main and Dr. H. L. Grasby auctioneer.

This is the season of the year when mothers feel very much concerned over the frequent colds contracted by their children, and have abundant reason for it as every cold weakens the lungs, lowers the vitality and paves the way for the more serious diseases that so often follow. Chamberlain's Cough Remedy is famous for its cures, and is pleasant and safe to take. For sale by All Dealers.

is extended to you to come and examine our display of Gourlay Pianos. Even if you are not yet ready to purchase, come now and spend an hour in seeing and hearing these superb instruments.

Gourlay Pianos

are all of one quality—the best. The lowest priced style is as well made as the highest. The ambition of the makers of Gourlay Pianos is not to make the greatest number of instruments, but to make each one as rich in tone, as responsive in action, as artistic in design and as durable in every way that it will bring prestige and added reputation.

If you cannot come in write for Catalogue and prices.

Gourlay, Winter and Leeming, Toronto

Silver Seven Win From Strathcona

Tofield defeated the Strathcona hockey team in an interesting game at the South Side rink last night by a score of 6 to 5. At half time the visitors had the local boys 4 to 1, but immediately after play was resumed McNulty and Sutherland each scored making the game close.

A somewhat small crowd saw the contest which, apparently, had not been given sufficient publicity.

The Tofield team has improved greatly since its last visit to Edmonton, the forwards being much faster and the defense showing considerably more pep in their checking. Strathcona lost through lack of combination play on the the forward line. The wings seldom passed to center ice when opportunity afford a shot.

Jim Southerland, who played with Wetaskiwin during the season lined up with the South Edmonton team last night and although he did not play nearly as good a game as he played against the Indians added materially to the strength of the home team.

Somers and McDonald were the best men on the Tofield team. They have considerable speed and are fairly good stickhanders. For the team McCoomb in goal made some brilliant stops in the second half. But for him the score would have been much larger.

The teams lined up as follows:

Strona	Tofield
McCoomb	G. Charlesworth
Weir	P. Helm
Parsons	C.P. Somers
Sutherland	R. Binnett
S. Parsons	C. McDonald
McNulty	E.W. Bob Lee
McNulty	L.W. Herb Lee

Officials: Referee, Jones; Judge of Play, R. Kent.

Goals scored, by Tofield: McDonald Somers 2, Helm 2, Lee, H. Lee. For Strathcona, Weir McNulty Sutherland.—Edmonton Bulletin.

Tofield Youngsters Lost

The Tofield Young Trimmers no-hay team journeyed down to Viking last Saturday morning and engaged the Farmers. Notwithstanding that their opponents were longer in leg and arm, and twice over heavier in weight and played on their home ice, the kiddies held them down to a score of three to two. The Tofielders took their defeat cheerfully and gracefully and with serious candor promised the Farmers a good trimming when they play a return game here next Saturday. There should be a good turn out to see the game.

Concessions to the Scrub Homesteader

Hon. Robt. Rogers, minister of Interior, is contemplating certain changes in the homestead regulations which will make them more elastic and aim to benefit the settler who enters the country with small capital Where the homestead is worth land it costs more to break it up than if it were open prairie. It is suggested that the improvements be capitalized and that the regulation of the amount be based accordingly.

R'y. Commiss'n Issues Stringent Orders

The railway commission has just issued strict orders that all railways in Alberta and Saskatchewan must maintain ploughed fireguards not less than 90 feet on either side of the track and 16 feet in width. Railways employes cutting fences or leaving fires open, resulting in injury to cattle are subject to $25 fine and the company $100 for each infraction.

Italians Destroy Turkish Warships

Two Turkish warships were destroyed in Bizerat harbor last Saturday by an Italian squadron under command of Admiral Favarelli.

There is no better medicine made for colds than Chamberlain's Cough Remedy. It acts on natures plan, relieves the lungs, opens the secretions, aids expectoration; and restores the system to a healthy condition. For sale by All Dealers.

An Old-Time Tea Meeting

[Contributed]

The Ladies' Aid of the Methodist Church are to be congratulated on the success of their tea meeting last Thursday evening. Without a doubt, it was one of the best entertainments, financially and otherwise, yet held in Tofield. The sincere thanks of the ladies who undertook the work is due to Mr. Latimer who so kindly and freely gave over his attractive hall for the occasion. They also appreciate the hearty manner in which friends from sister churches in the town aided both by their presence and donations of necessaries for the table.

As previously advertised, the entertainment took the form of an old time tea meeting and this idea for the evening's enjoyment had been carefully planned by the committee in charge of each department. The table bore a generous variety of excellent cookery and, on sitting down, one could not help being pleasantly reminded of the real, genuine, old-time supper given at tea meeting of our earlier days.

The programme further embodied the idea the ladies had in view for the entertainment. Rev. Nicholson occupied the chair, discharging his duties in his usual efficient manner. In a short and interesting address Dr. Hammond recalled in a vivid manner many scenes of earlier days with which many were familiar to many. Mr. A. J. H. McCauley's rendering of several old and familiar selections on the piano was much appreciated and he had to respond to an encore. One of the "hits" of the evening was a chorus by The Ladies' Aid themselves. With their white aprons over their shoulders and their old-fashioned gray bonnets trimmed with blue ribbon it was no wonder that the audience demanded more than the regular two verses of "Put on Your Old Grey Bonnet" and made them sing part of the familiar song again. "The Old Homestead's Story" as given by Mrs. Crase was much appreciated and Tofield can congratulated itself for having such talent, as her rendering of this story was excellent and brought out the full pathos and bound the hearer's attention to the end. Rev. Whillans followed with a good address along of thoughts in keeping with the occasion. Another good item was selection by the male quartette, composed of Messrs. Emery, Latimer, Saunders and Norbury. They also had to respond to second call. For the first time in Tofield, we believe, our genial and well-known G. T. P. agent, Mr. Cross sang a solo in public and his singing of "Billy, The Ram" will certainly mean that he will be requisitioned in future entertainments in town.

A duet by Mr. and Mrs. R. N. Whillans, "What are the Wild Winds Saying," was another selection very much enjoyed. Mr. J. D. Saunders read "The Minutes of The Ladies' Aid Meeting," which provoked much laughter by the ludicrous references to doings and sayings repeated to have taken place in one of their meetings. Another fun-provoking item was "Topsy-Turvey" by several of the girls. The programme closed with a song by Miss R. Lotter and a selection by the band.

Churches

METHODIST

Mr. J. E. Collins of Alberta College preached in the Methodist Church and at Ketchemet last Sunday. Mr. Chas. Rodgers will be here again next Sunday. He was prevented, by a slight accident on the road, from reaching Lake Shore a week ago last Sunday, but, all being well, will be there next Sunday afternoon.

PRESBYTERIAN

Probably no better service could be rendered to any community than to attempt to reach and interest young people than by making to them on "Love Topics," which must reliably concern them. This is being most successfully accomplished by Presbyterian pastor in his Sabbath evening addresses at the Presbyterian Church. Last Sabbath evening Rev. A. M. McColl preached again to a large congregation, mostly of young people, taking as his subject, "Betting and gambling." The manly and fearless way in which the speaker handled his subject, deserved the very close attention with which his remarks were received. The subject of next Sabbath's addresses will be; in the morning, A word to Children, "For the Prize." Second subject, "Christ as Mediator." In the evening the topic will be "Is the young man safe."

Tea Coat Tea

The Ladies Aid of St. Andrew's Church will give a Tea Coat Tea at the residence of Mrs. Cross on Friday, March 1st, from 2 to 5 in the afternoon and from 8 to 10 in the evening. Everybody invited. Music in the evening.

The Firemens' Sports Tuesday night on the rink were well attended and provocative of much mirth amongst both participants and the spectators. The events were pulled off with much spirit and the whole affair much enjoyed. The list of the prize winners will appear in next issue.

Do you know that more real danger lurks in a common cold than in any other of the minor ailments? The safe way is to take Chamberlain's Cough Remedy. It is a reliable preparation, and rid yourself of the cold at once. Try it and be this. This remedy is for sale by All Dealers

Moving Picture Theatre

The Tofield Moving Picture Co. appears this week under new management, Hall & Kennedy having brought out the interest of Campbell and moved the plant over to their block. The new managers guarantee absolutely the best of picture films and that the best of order will be insisted upon, no disorderly conduct of any kind being allowed. They desire that these entertainments which will be run continuously from week to week on set days shall be such that mothers will not be afraid to bring their children at any and all times. Hall & Kennedy have shown their usual enterprise in this undertaking and should merit the liberal patronage of the public and the success which will attend their efforts to provide good entertainment for a moderate price.

Business Men's Talks

It will pay you to see Hall & Kennedy's for furniture.

Did you see the Malleable Steel Range at Hall & Kennedy's Cash Hardware.

Local and General News

Alex Bissett was up from Rosedale for the week end

Town council meets next Tuesday night.

Ladies' Hockey Match Friday Evening, March 8th

A. T. Banks of Rose Creek was in town last Tuesday.

Dr. Terwilliger went to Edmonton last Tuesday on a business trip.

Miss Mitchell made a trip to the Capital last Tuesday.

Mr. Thos. Chicnick spent Sunday last with friends out in the country.

W. F. Beiman of Rose Creek was in town last week.

Mrs. A. McHeffey is recovering from a recent illness.

Edward Bejer, barrister of Edmonton, paid a professional visit on Saturday last.

Mrs. Thos Noland returned three weeks ago from an extended visit to friends in the States.

J. D. Berry returned a few weeks ago from a trip to visit friends in Prince Rupert.

Thos Noland returned from a visit to the Capital last Tuesday morning.

M. Mecklenburg, practical optician of Edmonton paid a professional visit to Tofield last Tuesday.

Mrs. S. George of Ministik Lake is suffering from a serious indisposition.

A dance was held last Tuesday night at the house of Hy Kendall on Kendall Farm.

P. Mahaffey conducted a successful auction sale at J. E. Wilde's farm last Monday.

Miss McClure, of Marseille, returned to her home last Monday after spending a pleasant week in Tofield.

Prof. C. H. Bland B. A. & D. of Alberta College will conduct both morning and evening services in the Methodist Church next Sunday.

A heavy thunderstorm came near Tripoli last Tuesday between the Italian and Turkish armies in which the Turks are said to have been routed. Italy has started a campaign to occupy the entire coast and then invade the interior.

Don't forget the dance in Masonic Hall on Friday night under the auspices of the Tofield Ladies' Hockey Club. Admission, including Supper $1.00

The Ten Cent Tea held by the Ladies' Aid of St. Andrew's Church at the home of Mr. and Mrs. C. H. Cross last Friday afternoon and evening was a very successful affair.

W. P. Strong and family have moved from their recent dwelling place on Fourth Ave. to the house owned by Dr. Hammond in the north section which was recently damaged by fire.

T. R. Henderson returned from a trip to Lethbridge last Friday. While there he interviewed a number of promoters of the new railway to Congress which is being held in that city this fall.

C. W. Latta was in town Monday. Mr. Latta informs the Standard that he and his brothers are doing a thriving trade in getting out posts for the settlers in his vicinity this winter.

Mr. and Mrs. D. W. McAmmond and family have removed to Hardisville in the Clover Bar district where Mr. McAmmond has purchased a farm. They went west last Tuesday morning.

J. D. Kennedy went to Calgary last Tuesday to attend a meeting of Conservatives. A meeting of local Conservatives was held on Monday evening at which Mr. Kennedy was appointed delegate from this section.

W. M. Dobell of Quebec, one of the high officials in the Dobell Coal Company of Tofield, was a visitor to Tofield this week when he looked over the holdings of the company here. He is immensely satisfied with the development which is taking place here both as to the town and his company's operations.

Mrs. McClure, of Marseille, returned to her home last Monday after spending a pleasant week in Tofield.

Prof. C. H. Bland B. A. & D. of Alberta College will conduct both morning and evening services in the Methodist Church next Sunday.

The Secretary of the Tofield Agricultural Society has received notice from the Seed Laboratory at Calgary a report of the germination test of F. O. Mellon's 1st Prize Wheat and 6 rowed Barley. Germination in 4 days was 96 per cent. each. Pretty good seed that.

Viking and Tofield Have Each Won One

Third Year Holden Cup Series 1st Undecided. Tofield Defeats Viking at Viking. Viking Gets Decision Over Silver Seven At Tofield in Fast Spectacular Game.

Tofield's hold upon her Holden Silver was unceremoniously shaken by Viking last Tuesday night on the defenders' own ice to the pain and surprise of the Silver Seven and their numerous supporters in a game characterized by some of the fastest play and presided over by one of the worst officials ever seen on local ice.

Play was fast and furious from the start and comparatively speaking, remarkably clean, but the decisions of McVittie, the referee, as to what was an off side according to the Western Canada Hockey Rules were questioned from the beginning of the game by both Tofield players and fans. The hooting and good intentions of the official were not for a moment questioned, but his constantly declaring what apparently attempts at combination play by the Tofield forward line to be an off side completely soon planed the local forwards and demoralized their play While it can be said that many of his decisions were perfectly correct, the fact that many others properly seemed to be errors caused the feeling of the losing spectators for the time being to run somewhat regardless of whether the decision was right or not.

Judge of Play Wright of the Maritimers, Edmonton, was right on deck with an eagle eye for foul tactics and he penalized right and left acting throughout the entire game to the satisfaction of both teams.

It was conceded after the game when talking things over in a general way by representatives of both that it would be better in all games hereafter in this league to have both referee and judge of play brought in from outside the League altogether.

It might here be said that before the game Tofield registered an objection to the Holden man acting as referee the understanding being that a man from Camrose or Edmonton was to officiate. Tofield had brought down Wright of the Maritimers to act as judge, Viking to come through with a counter objection and said that it was McVittie for referee or no game. Tofield seeing that it was such a McVittie or no game,then consented to go on with the game at the same time holding to the objection that McVittie was not thoroughly competent

THE PLAY

The game commenced at 8:15 before one of the largest crowds which had gathered in the Tofield to witness an exhibition of this rare old winter sport. From the face-off Viking rushed the play, the puck during the first half being fully two-thirds of the time in Tofield territory. Considering this fact, the other also that the referee called the play for officides practically every time the Tofield forwards started combination work, this operated to the discomfiture of the Tofield forwards and to the support of the Challengers who did not make the attempt to work forward through combination play, but rather by reckless weight, fearless checking and speed, forced the contest repeatedly to the immediate vicinity of the Tofield nets. In this bold Charlesworth let three shots past him and stopped many more. Thus the score stood at half time 2-0.

SECOND HALF

In the second Tofield played up to much better advantage and carried the puck into Viking territory making an unceasing attack on Viking goal. From a long shot down the ice Hains secured and in a scrimmage immediately in front of the Tofield nets, the decision of the goal umpire being loudly disputed by players, fans and judge of play, Referee McVittie gave the decision in favor of the umpire as he had the right to do if he saw fit

In the last thirty minutes of play neither team scored although both apparently strove to the utmost. At full time the score stood 4-0 for the visitors.

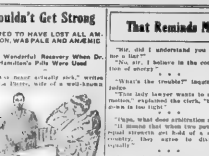
Couldn't Get Strong

SEEMED TO HAVE LOST ALL AMBITION, WAS PALE AND ANAEMIC

Made Wonderful Recovery When Dr. Hamilton's Pills Were Used

"I was never actually sick," writes Mrs La Dierre, wife of a well-known



Ottawa lady, "but I never seemed to have any strength. I was pale and anaemic, and had no appetite. I was always tired and nervous, and could not sleep. I was completely run down, and felt that I would soon be unable to do my housework.

"Then a friend told me about Dr. Hamilton's Pills. I got a box, and before I had taken them I felt better. I continued taking the Pills, and in a few weeks I was entirely cured. I have since recommended Dr. Hamilton's Pills to many friends, and they have all been benefited by them."

Dr. Hamilton's Pills are a reliable remedy for all troubles arising from impure blood or weak nerves. They are 50c a box at all dealers, or from The Catarrhozone Co., Kingston, Canada.

That Reminds Me

"Sir, did I understand you to call me a liar?"

"No, sir. I believe in the conservation of energy."

"What's the trouble?" inquired the policeman.

"Nuthin' only I was walkin' in the middle of the road, and I wanted to get over to the other side, and I asked a man if I was right in doin' so, and he said I was right."

* * *

"Now lady you've made a mistake," explained the clerk, "but he pleases me too."

* * *

"Papa, what does arbitration mean?" "It means that when two persons of equal interests get hold of a saw for exercise, they agree to divide it fairly."

* * *

Lawyer to lazy Jack, fond of music—"Jack, you should not have opened Farmer Giddyman's will. When you read that a musical clock was among the articles you ought to make sure as close to the clock as possible."

* * *

Invalid on response to friendly call—Thanks, Well, Bob, I never knew a physician's services I am at times in the clutches of the death's depression I'm sure I'm not going to die just yet. I have a sort of a notion that I'm going to live a long time yet. I'm not exactly afraid of dying, but I'm not exactly anxious to die. I'm not ready to die. I'm not prepared to die. I'm not going to die. I'm not going to die. I'm not going

R. N. WHILLANS, - - Manager and Editor

TOFIELD, ALBERTA, THURSDAY MARCH 7 1912

"NO goods purchased abroad are cheap that take the place of our own labor and our own raw material."

Editorial Comment

The Calgary News-Telegram takes exception to a writer in Collier's who states that there is a likelihood of the C.P.R. changing its main line route to the coast from via Banff and the Kicking Horse Pass to Nelson and the Crow's Nest Pass and says that the company has no intention of carrying out this program.

C. P. R. Main Line Question

Possibly the Telegram would say the same thing of any statement that the C. P. R. will in the not far distant future make its new diversion through the mountains via the Alberta Central and the Yellowhead and out to the coast, the main traffic artery of the system. Using the Telegram's own words, "The company has no sentiment in the matter, economy is the mainspring of its operation, etc." Economy will certainly furnish one great reason for this diversion but a far greater will be the need for a line through the mountains of as nearly similar grades as time G. T. P. and C. N. R. as possible. Without this the C. P. R. cannot hope to hold as great a share of the through traffic as it would otherwise. In this event neither the Calgary nor Nelson routes will get the business that will pass through Red Deer.

o o o

Other Side up

Much might be said in every community about the wrong way in which affairs of public and general interest are turning. Many place may unfortunately contain a large number of citizens who are not pulling together and cultivating a spirit of harmony and who are not supervisingly working together. In a district so favored as Tofield Standard might be said of the direful effect of the knockers, one might even be a business man who might not be pleasantly impressed with the lack of abundance of ready cash in circulation and who gives expression to his feelings in a blue strain

There is no one in any community in Alberta today—particularly in this section of the province—but can look with no small degree of pleasurable satisfaction to the future of the place in which he has driven his stakes—if he only will. We have a great country around us. Time was only a few short years ago that the settlers were few indeed compared to the many today. Time was not long ago when the settlers had perforce to spend from four days to a week to make the trip to and from town to get supplies. Time was, and many of us can remember it, that we had to experience many difficulties in getting to and from our base of supplies as instance the hardy settlers from Grand Prairie and Peace river today.

Parlsure has indeed smiled upon the older sections of the province of latter years, such as the one represented by the name Tofield. Railway development has given us several lines of transportation. Capital has coaxingly and invested many thousands in coal areas and up in the hundreds of thousands in special appliances for the development of these thus giving employment to a steadily growing number of men. The growth and development of the larger cities has with other sources created markets for the product of the mixed and dairy farms. A golden future is ahead Do not let us be too impatient if it does not seem to grow fast enough.

Limit of Extending Credit

At no time of the year is the question so widely discussed as the present, due to many reasons, some of which is the lagging of the money markets of the world and the prevailing standstill the world over. The opening months of any year are the same, and during this period discretion must be experienced.

The matter to be decided and one that is of worthy importance lies in the extension of credit to those who cannot pay until the necessary cash is forthcoming with the opening up of spring and the resuming of work in respective lines. In the western country due reference must be made to the farming classes, who in many cases are short of cash but still must live until the necessary money with which to keep up the expense of living have been secured. In numerous cases they are in extreme circumstances, following a partial failure of the crops and the prevailing price of farm products.

Both merchant and consumer must live, but where to draw the line is a difficult decision to arrive at. Consistent with terms and ratually according to the minister of the country.

It must be admitted that much difficulty is encountered in determining what amount of credit to stock grain growing and the de-

The Dairy Industry

MEDICINE HAT, Alta. The organization of the Medicine Hat Dairy company here is regarded as an important step ton and the solution of a troublesome problem. The directors of the new company have some substantial ideas as to the conduct of a sanitary dairy farm, and the enterprise is expected to command the support of a big list of customers right from the start

The fact that many thousands of cubs of butter are imported into Canada every month, considerable quantities being shipped even from such points as New Zealand, is indicative of the growing demand and undeveloped possibilities for the dairying industry in Canada. It is pointed out that the New Zealand producers are at a great disadvantage owing to the immense distance to be overcome and only as the local industry is well established, there will be practically no competition to be met with from any quarter.

Provincial Seed Fair

F. A. Adams of Macleod won first prize on barley at the Provincial Seed Fair with his Marquis wheat. There were over 350 entries and 175 exhibitors.

Hon. Duncan Marshall, Minister of Agriculture, at the Fair addressed a fair sized audience outlining his educational scheme along lines of agriculture, which school, when carried into effect, will mean the expenditure of a considerable amount of money, as well as the employment of high salaried officials and the establishment of a number of well equipped schools in the province. His plan, so he stated it, is to establish one school in each of the province a number agricultural schools, giving a three months course every year. This would even-

STOP THAT COUGH—BEFORE IT STOPS YOU

The whole field against the white plague is based upon keeping up the offensive resistance of your body against the germ invasion. If just those germs are healthy and your tissues are in the normal, good shape they are, therefore, just that fleeting cough is more of a symptom than a disease. Don't let it get started this, it may keep your home quarantined and you can't afford to risk that.

Don't be foolish about coughing. Risking a change of weather will bring improvement. Get rid of the trouble at once by taking Nyal's Cod Liver Compound. It contains no oil. It does contain every particle of medicinal value found in pure cod liver oil.

Nyal's Cod Liver Compound is a delicious tonic. It creates an appetite. It builds up and strengthens the lungs, gives new tissues and increases your flesh.

This remedy is one we are proud to recommend. It always does satisfactory, so secure best value for our customers.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by the father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

FACTORIES IN THE WHEAT BELT

Possibilities for Industrial Expansion in Western Canada

A special article in the annual financial number of the Globe, dealing on the possibility of manufacturing in the West showed that the Dominion revenue for 1911 will likely reach considerable development along industrial lines throughout the greater province, particularly in Manitoba.

Industries in the West

The writer in the Globe said: "At least seven hundred separate industrial establishments will be shown to be under operation in the three provinces mentioned, and nearly two-thirds of these have been established since 1906. Enough is still to be seen, are located in Winnipeg alone, but new industries are springing up between Hundred and fifty and three hundred are now operating in Saskatchewan, however, will hardly have a hundred industries as together while Alberta's roll will contain the names of nearly one hundred and seventy-five manufacturing establishments.

What means that manufacturing at any rate is gaining slowly in the West; it means the fact, to have there are possibilities for the further development of certain industries in that new country."

Development and Water Power

Continuing, the writer said: "Fifty years ago the possibilities for varying the agricultural life of the West were unsuspected, and scarcely more than 18,000 horse power turned to use in the mills operated by the hundreds of water powers now supplied to any considerable extent.

Men in Raw Materials

In addition to these natural water powers, all three provinces have coal deposits of various grades, Alberta, of course, having the greatest wealth in this respect. Then there are natural gas which are native to each particular province, as well as to the West, and lumber in Manitoba; clay, lumber and fine fibre in Saskatchewan, and minerals in Alberta. Manufacturing, to a great extent in the West is necessary to much on the raw material as can be done because Eastern Canada has to be shipped in, or in other words, the cost of certain obstacles, barriers, to a large extent, the industrial progress of the West. Other natural resources which are native to each province, such as

Neglected Children

The work for neglected children in the Province of Alberta has been carried on under the supervision of the Honorable the Attorney General since 1908. The Act upon which the work in Alberta was modeled is the same Act which has been used successfully in Ontario A number of changes were made to meet the conditions of the West, and the branch of the Attorney General's Department, known as the Department of Neglected Children, was entrusted with the enforcement of that Act.

The Act provides for the removing of children from conditions of neglect; the placing of them in foster homes from where reports of their condition and progress are required from time to time. Of the dependant children dealt with in the past five years, some 558, practically all have been well placed and are making good records. The best homes in the country are open for children who require the opportunities of good homes, and there is no difficulty so far as Alberta is concerned, in finding homes for all who have come to the care of the Department.

In

Of the

children

homes, and the idea of the reformatory has been kept entirely in the back ground. Probation has been used with great success and the idea impressed upon the child's mind that he is a good citizen and has in him the making of a good man; that he has made a mistake through his foolishness, with a result that very few boys have been sent to the reform school from the Province of Alberta during the past three years.

One of the needs of the department is that there should be a group of three or four interested men and women in every community who would act in the capacity of volunteer agents of the Department, and who would make it their business to report conditions of neglectand cruelty, and who would act in the capacity of the big brother or sister to the child who is beginning to go wrong and thus prevent a criminal being developed by the turning of the stream into the right channel.

Individuals who would be willing to co-operate in a work of this kind are requested to write the Superintendant of Neglected Children at Edmonton. The need is apparent to any, even in the smallest communities, who have given the matter of the child and its relationship to society any consideration.

Children are much more likely to contract the contagious diseases when the have colds. Whooping cough, diphtheria, scarlet fever and consumption are diseases that are often contracted when the child has a cold. For a quick cure of colds you will find nothing better than Chamberlain's Cough Remedy. It can always be depended upon and is pleasant and safe to take. For Sale by all dealers.

AUCTION SALE

J Bailey of Ross Creek is having a farm auction sale on Saturday, March 9. See the big bills.

J. W. Carter, Auctioneer.

Midgets Wallop Viking Giants

The Tofield Midgets slipped one over on the Viking Giants on Saturday night by trimming them to the tune of 6 to 1. The Kiddies went after the Norsemen at the first test of the wheels and from then until the end of the game it was the midgets all the way With only about a minute to play, Viking managed to get the puck in the vicinity of the midgets' goal, but whether it went through or not is a question; it was allowed at any rate All the kiddies played well and if they stick together for another season or two, they will make the seniors look to their laurels.

The teams lined up as follows:

Tofield		Viking
J Letourneau	G.	Hallsberg
Con Bissett	F.	Hagan
Latimer	C. F.	E. Sayers
Dean	fl.	L. Sayers
Cliff Bissett	C.	O'Donnell
A. Pruden	L.W.	McDougal
H. Pruden	R.W.	Van Beg

Referee; Roy Fields, Viking
Judge of Play: George Bissett Tofield.

The World's News

Told in Pithy Paragraphs

Five men wrecked a Royal Bank building in Montreal last week with a view to robbing the vaults. The explosion alarmed the neighborhood and the police in a pretty race with the robbers, shot one dead while the other escaped. Two were subsequently captured.

Mutiny and mobs created great disturbance in Pekin last week, looting stores and banks and destroying millions of dollars worth of property by fire.

It is said that a general strike of coal miners may take place in France at an early date

Sir Wilfred Laurier stated in a banquet given to Ll. P.Graham and the leader of the Liberal party at Ottawa last week that no long as his health permitted and he was wanted in the position, he would retain the leadership of the Liberal party.

Reports from Toronto indicate that the movement for church union will fail. Ontario Presbyterians are split absolutely on the question. Both Methodist and Presbyterian leaders state that it will require a vote of at least five to one in favor of union before the matter can be satisfactorily dealt with.

Eight men were killed last week in a premature explosion of dynamite at mile 41 B. C. on the G. T. P.

Hon. Edward Blake, one of Canada's Great Men passed away last week after a long and honorable career. He was an able lawyer and for a time leader of the Liberal party in the Dominion.

It is reported that the Manitoba school question is to be again reopened as an after effect of the extension of the boundaries of that province.

Italy has formally decreed the annexation of Tripoli.

The Manitoba legislature defeated the proposal of a referendum on the "banish the bar" question.

T. R. Henderson, managing director of the Dobell Coal Co., Ltd., has purchased section 14, Twp. 53 R. 19 which lies a couple of miles northwest of Tofield. He intends to make this a stock farm. That this is a great dairy country is his opinion. Many will coincide with him in this view.

Local and General News

Dr. Hammond made a business trip to Edmonton last week.

J. Bailey of Ross Creek was business visitor to Tofield last Monday

C. H. Cress went to Edmonton on Thursday returning Friday morning.

Miss Roberts of the Tofield Public Schools spent last week end in Edmonton.

Miss Grace Thompson of the Tofield Public School staff was a week end visitor to the capital.

BORN: To Mr. and Mrs. Wellake, Tofield West, Thursday, March 7th a son.

Mrs. Wilde and family left last Saturday for Strathcona where they intend to reside for a time.

Mrs W. James and daughter Ethel of Edmonton were the visitors of Mr. and Mrs. H. Bissett for the latter part of last week.

Dr. J. W. MacQueen, dentist, will be in Tofield on his regular professional visit, March 18th to 20th.

Mr. Dewey, General Freight Agent G. T. P. passed through Tofield last Thursday night on his way to the coast on a tour of general inspection.

Clive Richards, the genial and jovial chef of the Tofield Bakery, recently purchased Mr. Powell's residence a couple of miles south of town and the other day had it removed into town where it was placed on his lot on .... St. He is having an addition built to it and it looks as though Mr. Clive is contemplating becoming one of Tofield's Settled Cuh.

Remember the Irish Dance in Bellamy's Hall, Monday evening March 18th. GOOD MUSIC

BORN - At their residence, Tofield East, on Friday, March 8 1912 to Mr. and Mrs J. Munro, a son.

The Girls Brigade are in receipt of a fine new Scouts togle as a present from the Robert Simpson Co. Toronto.

Robert Henry, who has been a resident of Tofield for the past eight months left last Tuesday for Pembroke, Alta., where he has accepted a position as manager of the Pembroke Coal Company's store.

The Girls Hockey Club wish to thank the Silver Seven and Mr Haines in particular for interest and aid they gave to making the Hockey Match a success, and also all others who so kindly and generously contributed to make everything a success.

Council

Town Secretary Receives Raise of Salary

Council Getting Down to Progressive Business Tactics

What Council did last Tuesday night.

Passed accounts for Brenen's salaries, $67.50, Supplies for fire Brigade $1463.13 and cost of casing for well Gorman, Chaney & Grimsby, 1230.00 4, pending approval of goods by committee.

Received reports from Fire, Water & Light Com., Public Works Com., Bylaws, etc. Com. and Civic Improvement and Industrial Com.

Accepted application of A. McMullen for position of teamster, general workman and constable for the town at $75 per month.

Appointed Councillors Emery, Lee and the mayor a special committee to purchase a team for the town.

Appointed Councillors Urquhart and Logan a special committee to purchase harness and waggon for the town.

Instructed the secretary to call for tenders for the construction of stable, particulars regarding which will be settled by the public works Com.

Raised the salary of the secretary treasurer to $100 per month, dating increase back to Jan. 1st, 1912.

Authorized Civic Improvement and Industrial Com. to engage a well boring machine as soon as a team is purchased by the town and secure samples of clay tests for manufacturing purposes.

Passed an appropriation of $200 on account to the Civic Improvement Com. with which that Com. is empowered to go ahead and get out suitable literature for advertising the resources, inducements and full information regarding the agricultural, pastoral and industrial development and possibilities of Tofield and district, testing of clays etc.

The report of the Public Works Com. said that the Com. had received the report of Engineer Mitchell re the east and west drain. This is estimated to cost $1500 or over, exclusive of the cost of right of way across the J. W. Crohens property and the lowering of the culverts under the railway. The engineer recommended the cost of the undertaking to be divided as follows: On the Crohens property equal to cost of right of way, the G. T. P. equal to cost of lowering culverts; Tofield Townsite Co., Councils West Townsite Co. and Town of Tofield each equal, at one-third shares in balance of cost $1500

P.w.t.t.o.c.

Tenders for Stable

TOWN OF TOFIELD

Tenders for the supplying material for and building of a stable 20x22 ft. 12 ft. standing for the Town of Tofield will be received by the undersigned up to Monday, March 18. Building to be complete by March 28. Plans and specifications at Town Office.

Sec'y Treas. Tofield

AT the Churches

PRESBYTERIAN

On Sabbath morning next Rev. A. M. McGill will preach to the children on "Richard Lion Heart." The sermon subject will will be "Insomnia." In the evening the subject of address will be "Prejudice and its cure."

McBelley and Kirkpatrick

At the first of last month Fred McBelley and Thos. Kirkpatrick Tofield's Practical Blacksmiths amalgamated their forces and the new firm will be known as above. They have made substantial additions to their plant in the way of power machinery until now it is a veritable machine shops. Among the machines installed are one for sharpening discs, farmers will understand this, a power trip hammer which greatly facilities work and saves manual labor, a power drilling machine and soon recently a power driven band saw. Power is furnished by a 8 horse Bickley gasoline engine.

In Kirkpatrick former stand a new branch is being carried on, wood and carriage work. This is under the Personal ... of Scotty McColl than whom there is no more painstaking workman in town. The new firm is busy in all of its branches of work.

The Ward's News

Told in Pithy Paragraphs

Black smallpox has broken out in Quebec.

Yuan Shai Kai's soldiers in Pekin mutinied and killed many natives.

The Tariff Act and the New Grain Act have passed the house of Commons.

A Paris paper says that England is tending towards conscription in naval and military matters.

Upwards to three quarters of a million coal miners in Great Britain have laid down their tools and gone out on strike.

All the thrill of a reported gold strike are being experienced at Cochrane these days. Hundreds are flocking in and staking claims'

There is a movement on in England to revive duelling. Its devotees claim that it will result in:

1. Better manners and more civility.
2. The purity of the home.
3. The practical abolition of divorce.
4. A higher standard of morality.
5. Less friction and rivalry between the sexes.
6. A finer physical standard for all who practice fencing.

Seven were killed, including two firemen, in an explosion at a spectacular fire last Saturday evening in Winnipeg.

Several hundred thousand coal miners in Prussia have gone out on strike.

Yuan Shi Kai was formally inaugurated as President of the Chinese Republic at Peking last Monday.

Hockey

It seems as though hockey for the season is over so far as the Silver Seven is concerned. (This on the assumption that Viking has finally refused to play off the third game at Strathcona.) All efforts of the management of the local team to pull off a third game with Viking on strictly neutral ice have been fertile. Immediately after the last game with Viking here last week, negotiations were opened up with Jim Hannan, Viking, to have a third game pulled off on strictly neutral ice. Viking held for games at either Wainwright or Ryley. Tofield held that both of these places were in no sense neutral for games and wanted the game pulled off at either Edmonton or Strathcona, which places are entirely without other than ordinary interest in the progress of the League.

Viking simply refused to play at either one of these places. Last Monday Manager H. Rogers phoned to Jim Hannan telling him that as the Silver Seven were the holders of the Cup they had the right, more than the Challenges, to say where the deciding game should be pulled off and gave them the ultimatum of playing in Strathcona at the earliest possible date and let the Cup Defenders know their decision Monday evening March 11th or the Silver Seven would consider the game defaulted.

Six men had their lives in a lodging house fire in Chicago last Saturday.

The appeal in the A & C. W. case from the judgment of Mr. Justice Stuart on Nov. 6th last is expected to be heard before the Supreme Court en banc on Monday March 25th next.

Spinst rs' Club

Rumor has it that the Tofield Spinsters have amalgamated forces and effected an organization The fact that—they couldn't keep a secret—the password of their secret (?) organization is H. L. M. let travel at all times, and that this is H. Leap year is significant. Bachelors in town and out—feel therefore be alert as the unwritten law regarding the refusal of a proposition for matrimony from a bright winsome and buxom unmarried lady, carries with it certain penalties.

It is also rumored that a number of prominent married women in town have lent their influence and co-operation to the new and enterprising organization. A convention of the Spinsters at which there will be a public re-union will be held shortly at which there will undoubtedly be a lot of fun

New Oil Warehouse

The Imperial Oil Company are building a large warehouse and installing a large tank across the tracks from the depot at Tofield. This has been warranted by the large business which has grown up at the point under the able management of J. W. Carter, local representatives of the company.

Conservative Rally

A meeting of all Conservatives of Tofield District will be held in Masonic Hall on Thursday Eve., March 21st at 8 o'clock, to hear J. D. Kennedy's report of the Convention at Calgary also other important business to be discussed We want you all by order

—Abraham Lincoln

Editorial Comment

The Board of Trade

From almost every town in Central Alberta is coming word to the central office of the Central Alberta Development League that without exception they are coming into the league and taking active part in a publicity propaganda for this portion of the province.

This must be indeed satisfactory to the original promoters of the league and will undoubtedly result in a great development taking place throughout the district covered by all those towns.

The Tofield Board of trade has already signified its determination to again affiliate with the league this year. Much good was derived last year from being in the union. Had we had better secretarial management during the greater part of the year our benefits would have been proportionately greater.

The benefit to be derived from an active follow-up campaign is great. That there is great need of activity in any Board of Trade, if it wishes to be an important factor in its community, is conceded without question.

This brings us to a consideration of our own Board of Trade. Is it making for itself a status worthy of being estimated as a body meriting public trust? Has it work to do? Has it a head? Has it an official head who is conscious of his position as leader of a body of men who are willing to do what is necessary to be done and anxious that it should be done? Are our citizens intelligent enough to realize the influence of their personalities, even though their executive abilities may not be as great as those of some others, count for much at meetings of the Board of Trade. Much depends upon the man who has accepted the presidency of the board. That he should be one of the most active men of the organization all will insist. He has a good work to do. Let us hope that he will quickly get the Board down to hard pan and work intelligently and diligently for the good of the town and community. Let us have done with stagnation. Let us be up and doing.

Edmonton City Dairy Open Branch Depot At Tofield

Will Open Practically Unlimited Market for Dairy and Produce

The farmers of the Tofield district will welcome with pleasure the announcement that a cash market for all their dairy, poultry and garden produce is being opened in Tofield. The Edmonton City Dairy company have leased the old Merchants Bank building on 3rd Avenue east and this week have started what will become a very important supply gathering depot for their ever increasing Edmonton business.

While the dairying industry is growing year by year in the Tofield district to no ceasing to proportions, it must be said that a much greater increase could be made. The Tofield district is an ideal dairying section and while many are making this one of the chief means of their farming operations, there is room for a vast amount of improvement. The provision of a steady and healthy cash market for all dairy, poultry and garden produce ought to encourage a much greater enthusiasm for the most profitable of rural callings mixed farming. Given a few good milch cows the owners will have a comfortable income the year round from the sale of their cream while with the skim milk and the grain that they raise hog raising would be a very profitable following industry.

One small farmer who lives a few miles north of Tofield informed the Standard the other day that he purchased a couple of good milch cows at the beginning of the year, one being fresh and the other coming in on the 6th of Jan. They kept themselves and the returns from the sale of their butter and found that by the end of May the cows did not owe them a nickle.

He had three brood sows in factor and fifty bushels of grain. With the skim milk and the grain he raised three dozen of young hogs and besides having a clear profit from the sale of better subsequent litters he received $200 from the sale of the young hogs in the fall.

Who says that mixed farming doesn't pay? It matters not whether the crops harvested are No. 1 hard or frosted or damaged in any other way. By feeding double the returns are secured than by milkoff in the first instance to the mill or elevator.

Revolutionize Methods

WINNIPEG Man:—The possibilities of mixed farming methods in Manitoba and the West; as a remedy for the recurring congestion in crop movements, are being urged in many quarters. H. F. Young, an American writer of some note, also a practical farmer and dairyman, has recently made a story of personal observation through Western Canada; and in summing up his impressions he says: "Mixed farming is certain to revolutionize farming methods in Western Canada. Conditions are ideal for diversified cropping and live stock. Such a combination keeps farms rich and

MISS ANGELA GIBSON,
Who appears in Masonic Hall, Monday, March 18th, under auspices of St. Andrew's Church.

makes farmers rich. Western Canada is an agricultural empire capable of supplying enormous quantities of all food products. Its soil and climate are particularly adapted to agricultural production; and its development is bound to set a pace unparalleled in the history of agricultural countries. This statement is fully confirmed by facts and figures. At present, Alberta and a few other more other points through the West where government conditions are approved, the demand for butter and other dairy products is so heavy that it cannot begin to be supplied. The Edmonton 15 of last year one dealer alone in Minneapolis shipped 700 gallons of milk to Winnipeg, a distance of 400 miles. There are thousands of acres of splendid farming country within a few miles of Winnipeg awaiting the coming of the dairy farmer. In order to encourage a full and free discussion of this subject a local publication is now inviting letters of not over 300 words from farmers, stating their reason for or against mixed farming. Letters should be addressed to The Western farm at Winnipeg, and should be signed with names and addresses of the writers. The unwisdom of the one crop system in Western Canada is now coming to be fully understood.

KEEP THE CHILDREN STRONG

Even the Puny Youngster Can Be Made Well and Happy

Keep a watchful eye on the children and when they show signs of lagging in their play and do not chance for their meals, be slow to find and remedy the trouble.

Particularly after measles, fevers and other little troubles of childhood, it is hard for the little ones to get back their appetites or regain their former health and vigor, for they may be slowly going backward. That is the time for a good rebuilding tonic—one that will give them strength, flesh and vigor.

Children don't usually take medicine readily, but you don't have to coax them to take Nyal's Cod Liver Compound. It is delicious to the taste and it is a delight to the entire how they soon pick up flesh and color and vigor. There is no greater joy than a healthy, playful, happy child, and no greater anxiety than to watch a child's health fail.

You cannot get anything better to keep the little ones in a vigorous health than Nyal's Cod Liver Compound. It is a general tonic, and will build up the whole system, and is just as good for you as for the children. Any child over its present health is thus relieved of all and they like to take it every day and since it is so good you can give them a course of Nyal's Cod Liver Compound.

Ask or call at druggist. There's a lot to know about the real values of medicines and we know most them. 11

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this subdivision. Lots facing South on Cookson Avenue will be ideal for residential purposes.

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build there in 1912

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

QUEBEC'S WONDERFUL INDUSTRIAL RESOURCES

The Province Has the Greatest Water Power on the Continent of North America

"The Province of Quebec is equipped as to other portions of the Dominion, or the continent, is for the industrial race. It is not generally known, for instance, that Quebec has one of the largest available water powers in the world. The estimate is that Quebec has 7,000,000 horse power. There falls in a year, virtually, 400 billion tons of water. The capacity of Lower Canada is 5,000,000 horse power. The Dominion, and he has only to understand the resources of the climate to appreciate the value of some million horse power, declaring that there can be little doubt that these Falls will some day supply the greater part of the Province of Quebec with power. The Falls have a sister drop of 210 feet, and a total drop of over 700 feet, compared to a drop of 168 feet at Niagara.

The position that Quebec is bound to take as the premier manufacturing region, of the whole continent is indicated by the following comparison of her water powers with those of other parts of the Dominion, taken from a report by Mr. J. B. Challies, C. E., of the Department of the Interior, on water powers in Canada:

Location	Min. Flow Power	Dev.
Yukon	170,000	170,000
British Columbia	2,862,000	73,750
Alberta	1,247,000	1,250
Saskatchewan	500,000	1,200
Manitoba	300,000	15,000
North-West Territ's	600,000	
Ontario	2,738,161	331,197
Quebec	17,875,250	60,000
Nova Scotia	168,000	
New Brunsk	54,300	13,300
	26,539,961	696,647

In the matter of water powers, Quebec has more than 60 times the development of any other province in the Dominion, and more than $50,000,000 of American money invested in industrial establishments. This is only an example of what is going on all over the River. Similar powers this Province of Quebec possesses in the Saguenay River, and other regions on the continent, and if we have to be humble and modest, we have more than 16,000 men, all of whom, like those in the Province of Quebec, are natives of the Dominion and therefore consumers of the finished product. Many large pulp and paper mills are now either under construction or in operation, besides many power in the outlying districts of the Province. This industrial activity is attracting people from all over the English speaking world, the consequence being that the population of Quebec is increasing at a most surprising rate. French-Canadian farmers, but of a different type from those of the past. From the town and steel centres, the pulp and paper mills, and the mines, and industrial enterprises, its income and its expenditure are rapidly growing. It is true that the water powers of Nova Scotia are rotting compared with those of Quebec, but look at its coal! Nova Scotia's production of coal in 1911 was 7,735 square miles, and the Dominion Coal Company alone, have in its 7 mile boundings enough coal in its seams to supply the whole of the output of three and a half million tons per year for 1,000 years.

The total manufactures in 1905 it was about $200,000,000. There are big figures. They show a total production so far back as 1905 of $1,000,000,000 enough to buy to the whole of the 1911 wheat crop in Western Canada, and still leave one million of dollars on hand.

WHAT WILL THE CENSUS SHOW

There are Indications of Great Development in the Maritime Provinces

The census returns for the past year of the west twelve months will be awaited with interest by many. The returns for manufactures, but it may be taken as certain that they will show a large increase in the year 1911 over the year 1901. The census of 1911 will be the first one taken since the inauguration of the new era of industrial development. In the Maritime Provinces alone, and more New Brunswick, there has been a most remarkable increase during the past ten years. The Province of Quebec, but look at its coal! Nova Scotia's production of coal in 1911 was 7,735 square miles, and the Dominion Coal Company alone, have in its 7 mile boundings enough coal in its seams to supply the whole of the output of three and a half million tons per year for 1,000 years.

The total manufactures in 1905 it was about $200,000,000. There are big figures. They show a total production so far back as 1905 of $1,000,000,000 enough to buy to the whole of the 1911 wheat crop in Western Canada, and still leave one million of dollars on hand.

CANADA DOES NOT PRODUCE ENOUGH

Problem at the Bottom of the High Cost of Living—Too Much Wheat and Land Speculation

"The Globe," Toronto, early in February published an interesting letter view with an expert on the question of the high cost of living. The letter in part was as follows:—

"Prices have already reached a dizzy height. But they have not yet done climbing. The people, at such a time as this, are apt to talk about the extortionate practices of the butcher, the grocer, the baker and the other purveyors of our daily substance. It is one of the foibles of human nature to blame the man next to you when in physical distress, but the present condition of the commodity markets is the effect of a cause that lies farther back than the store or the wholesale house with which you are doing business. The high cost of your food can only be due to one thing —scarcity, a lack of supplies. This is the explanation, based on the general law of supply and demand, but it contains the reason why there is no stopping in Ontario, and, in fact, in all Canada.

"The production of food has steadily failed to keep pace with consumption. Many commodities which Canada used to export in large quantities are now being consumed entirely at home. Some phases of the foreign trade returns to-day tell the complete story. For, although the total value of all agricultural products exported increased from $37,614,409 in 1906 to $62,000,000 last year, the exports of cattle barely held their own, sheep declined a large percentage, while the shipments of butter, after increasing from $1,181,116 in 1906 to $7,873,000 in 1909, fell off to less than two millions in 1911. Of course, the two millions or more dollars' worth of the total output of butter in 1911 was exported at a handsome net profit to the dollars, a year, is being consumed at home.

"Canada's exports of cheese are about the level of what they were ten or twelve years ago. The net increase in agricultural and dairy products, then, is explained by the growth of the home consumption trade. Exports of wheat in the raw state increased by 15,000,000 bushels from 1906 to 1909, while exports of wheat flour fell 4,000,000 barrels.

HALF BILLION BUSHELS OF WHEAT IN TEN YEARS

Production of a Financial Writer Within Sight of the Prairie Provinces.

The Monetary Times, of Toronto, in a recent article estimates that the wheat producing capacity of Western Canada, undertaken to produce half the three prairie provinces will produce within a short space of over half a billion bushels in the next ten years. The writer of the article, Mr. Fred W. Field in making this estimate says:—"In calculating the probable increase there are many important factors which engineers must be taken into account. It is said that there is still unoccupied land available for cultivation to the extent of over 70,000,000 acres. This will be increased when the area of the province is enlarged to Saskatchewan, of an area of over 155,000,000 acres of wheat land, there are about 15,000,000 acres of cultivable prairie. Of the 162,000,000 acres in Alberta it is estimated that 50,000,000 acres is fit for cultivation, while only about 12 per cent. are under cultivation. The increase does not include the large area of timber land in the province of Alberta. There is less than 15 per cent. of the land in the Province under cultivation, so that the field for labor is where it is most needed, comparatively speaking, is large.

In 1914, we shall have two more transcontinental railways, which will open much new land for settlement. The improvement in harvesting implements will mean the tilling of greater acreage in less time. These factors should compare, or somewhat for the possibility that mixed farming in the West will be engaged in more than at present, and consequently less attention to wheat, and for the fact that certain districts grow to make the area of wheat growing, after allowing for these factors, the ratio of increase in the next ten years will be as great as in the last ten years. There are provinces whose acreage is 31,000 acres and a wheat crop of 1,000,000 bushels. The accompanying figures show an ideal of the rate of increase, which allows only a yield per acre of 15 bushels, the average wheat yield per acre in the West during the past four years was 17.3 bushels. Accepting that figure as the yield of 1920, the 31,000,000 acres should yield 674,640,910 bushels."

CANADA'S APPETITE FOR DAIRY PRODUCE

The value of the home market to the dairy farmer in Canada is explained by Mr. J. A. Ruddick, the Dominion Dairy Commissioner, in the following statement contained in one of his reviews of the dairy industry for 1911:

"Canada's home consumption of dairy produce, it is needless to say, continues to increase, but few people seem to realize the extent of this increase. The increase cannot be less than 12,000,000 every year to feed milk and all its products. This means that our home market absorbs every year practically $12,000,000 more than it did 10 years ago. The total home trade cannot be far from $42,000,000 a year, which means that our home market is by far the most important one for the dairy farmer."

You judge a man not by what he promises to do but by what he has done. That is the only true test. Chamberlain's Cough Remedy judged by this standard has no superior. People everywhere speak of it in the highest terms of praise. For sale by all Dealers.

Extensive Public Works

The Standard is pleased to inform its readers that it has learned from Mr. Holden that the following and Land Speculation

Building ... Tofield
... Ryley, H... Viking
The ... Trunk Trail ... Edmonton to Viking along the G. T. P. via Tofield.

The building of a trunk telephone line from Tofield to Camrose

The extension of a through telephone line from Tofield to Camrose via Kingman ... consultation all subscribers a ...

The ... Tofield to Camrose.

The public of Tofield, both town and district will be glad to learn that the telephone facilities are to be extended.

The spending of dollar for dollar with the G. T. P. on the improvement of the road running straight south from Tofield throughout the district and that certain bridges are to be constructed. What will be of vital importance and interest is the decision of the government to build the road from Edmonton to Viking. This directly in line with the representations placed before the Premier last spring by a deputation of the Tofield Board of Trade in its request that the government open that section of road through line in the Beaver Hills south and east of Hastings Lake. Considerable work was done on this section last summer, but the work was not finished. The work will be taken up this year and pushed with vigor. Concrete culverts will be put in wherever culverts are necessary and the road built in a cupable and thorough manner.

Mr. Holden, M. L. A. of Vegreville constituency has removed to Vancouver to take over the management of the Wm. Holden Real Estate business Wm. Holden being owner of the former. Should he do his new undertaking, Jas. B. Holden will remain permanently at Vancouver. In the meantime, he will personally conduct the real estate all his interests in this constituency and will return to the capital as his constituency for the next session of the Legislative Assembly. He also informs the Standard that he will not be a candidate for this constituency at the ... st elections.

Tofield's Cash Store

Stock Brings Good Prices

Frank Mahaffey conducted a successful sale out at Teddy Wilde's last Monday afternoon. Cows brought good prices there, ranging $45 to $60. Heifers sold high, from $30 to $46. Nearly $2,000 worth of stuff was disposed of at the sale. A large proportion of this sale was for cash, buyers preferring to take advantage of the discount and save interest.

The Hockey Dance

The dance announced to take place in Masonic hall last Friday night under the auspices of the Ladies' Hockey club could have been announced as taking place under the auspices of the Silver Seran. An error crept in in the announcement for which no particular person was responsible.

It is officially announced from Ottawa that another strip of the construction of the H. B. Railway is to be let by contract at once so that work can be started this spring. The government expressed intentions are that part of the crop of 1913 may be moved out this way.

Children are much more likely to contract the contagious diseases when the have colds. Whooping cough, diptheria, scarlet fever and consumption are diseases that are often contracted when the child has a cold. For a quick cure of colds you will find nothing better than Chamberlain's Cough Remedy. It can always be depended upon and is pleasant and safe to take. For Sale by all dealers.

Scottish Entertainment

MISS GIBSON'S sympathetic interpretation of the spirit of Scottish literature is as rare as it is delightful. IT IS THE REAL THING

But why not —since Miss Gibson by birth and breeding is a Scotch girl. She catches accurately and reproduces admirably, the spirit of her revelations, She is always heard with equal profit and pleasure

Masonic Hall, next Monday, March 18, under the auspices of St. Andrew's Church.

To The Public

I wish to announce to Star dard readers that I have opened a Real Estate Office in Tofield and will appreciate a part of your business. If you have any lands or property to sell or exchange, will be pleased to have your listings and will do my best to make a deal for you. I am in touch with a great many buyers who are coming this way soon. Come in and let us talk it over.

Yours for business,

O. L. PUGH

Chamberlain's Cough Remedy has won its great reputation and extensive sale by its remarkable cures of coughs, colds and croup. It can be depended upon. For sale by All Dealers.

C. P. R. To Build New Main Line

The C. P. R. has announced that in order to keep pace with the abnormal development and growth of the west, it will spend sixty millions of dollars on an entirely new line of railway, the location of which will not be announced until plans are completed. At one rate, it will be an entirely new outlet for the grain and products of Western Canada.

Angela Murray Gibson

The public of Tofield and district will be pleased to learn that St. Andrew's church has locked the appearance of that splendid Scottish entertainer Miss Angela Murray Gibson for Monday night March 18th in Hall & Kennedy's concert hall. Her readings and impressions are of a very high order. She is a most versatile and accomplished young woman. Besides being an unusually well-gifted reader, she proves herself a cultivated vocalist and clever impersonator. Everywhere she appears there springs up a perfect storm of applause and praise.

KINGMAN, ALTA.

Dry Goods | **Rogers' Bros.,** | Men's Furnishings

Commencing April 1st we are going to put our business on a cash basis. We have arrived at this decision after much careful consideration of the several reasons that make this necessary and also of the effect for the betterment of conditions existing between our customers.

In this action we are following the general trend of business throughout the west. The enormous abuse of the credit privilege, the absolute inability in some cases to meet bills after having run bills for some time and the unfairness to the man who pays promptly, in making him pay the higher prices which the credit system necessitates, are clear cut, well defined reasons for the movement being adopted all over the west.

And probably the strongest factor in bringing this about is the indisputable fact that on a cash basis, the merchant is able to give better values, for he can secure the cash discounts from the wholesale houses, which, though only from 1 to 2 p.c. on each invoice, amount up considerably on the years business, and receiving the cash for every article sold he is enabled to pass this discount on to the customer, so that you, our customers, are going to gain at least that discount and it is a fact that you yourself have often proved, "That paying as you go, you buy what the purse dictates," paying "later on" you buy very often unnecessarily, and one wonders why it is that the bills are higher, it is because on the credit system the average man or woman does not become acquainted with the same judgement as when paying actual cash for purchases.

Saving even the discounts which will come to our customers in reduced prices will mean a great deal, but the one reason which is in itself sufficiently strong to make the cash system necessary, (i.e. some of some of them have been running an account and paying it when rendered at the end of the month, if there were only those two classes of customers there would be practically no need for introducing the cash system, unfortunately for these and ourselves, there two others, those who run an account indefinitely, who are good pay, but do not seem to consider that the merchant must meet his bills promptly, and those who have as much intention of meeting their bills as they have chances of meeting anybody on the Golden Stairs.

How to give the consumer the best possible value is the problem, and we have decided that we can give you a fairer and squarer deal on your everyday business on a cash basis than on the credit system. Next week we will give a number of articles (everyday necessaries) at prices which you will find are real values we can give you, with the saving you effect by economical buying, the total absence of the misunderstandings that sometimes happen over accounts, and the general increased satisfaction to you and ourselves, you will find that it pays to deal at

Council

Town Secretary Receives Raise of Salary

Council Getting Down to Progressive Business Tactics

What Council did last Tuesday night.

Passed accounts for firemen's salaries, $87.70, Supplies for fire Brigade $106.18 and rent of casing for well Dorman, Clancey & Grindley, 130.64, pending approval of goods by committee.

Received reports from Fire, Water & Light Com., Public Works Com., Bylaws, etc. Com. and Civic Improvement and Industrial Com

Accepted application of A. McMullen for position of teamster, general workman and constable for the town at $75 per month.

Appointed Councillors Kenney-Lee and the mayor a special committee to purchase a team for the town.

Appointed Councillors Urquhart and Logan a special committee to purchase harness and waggon for the town.

Instructed the secretary to call for tenders for the construction of stable, particulars regarding which will be settled by the public works Com.

Raised the salary of the secretary treasurer to $100 per month, dating increase back to Jan. 1st. 1912.

Authorized Civic Improvement and Industrial Com. to engage a well boring machine as soon as a team is purchased by the town and secure samples of clay tests for manufacturing purposes.

Passed an appropriation of $200 on account to the Civic Improvement Com. with which that Com. is empowered to go ahead and get out suitable literature for advertising the resources, inducements and full information regarding the agricultural, pastoral and industrial development and possibilities of Tofield and district, testing of clays, etc.

The report of the Public Works Com. said that the Com. had received the report of Engineer Mitchell re the east and west drain. This is estimated to cost $1500 or over, exclusive of the cost of right of way across the J. W. Cushman property and the lowering of the culverts under the railway. The engineer recommended the cost of the undertaking to be divided as follows: On the Cushman property equal to cost of right of way, the C. T. P. equal to cost of locating culverts; Tofield Townsite Co., Canada West Townsite Co., and Town of Tofield each equal, at one-third shares in balance of cost $1500 or over.

The Com. recommended that an agreement be entered into between all the parties concerned on the above basis before tenders are called for. It also recommended that special committee be appointed to buy a team and to buy wagon and harness and that a stable be erected.

The Fire, Water and Light Com. reported that tenders for asbestos were called for and that of Ross Bros., Edmonton, at $1 for 3 inches was found to be the most satisfactory. The secretary was instructed to obtain a sample bucket from them before ordering an order. The Com. recommended that the ash buckets be purchased by the town and be town property. The secretary was instructed to write the John Galt Engineering Co. to send a representative here to look into the matter of a water supply in accordance with their offer to do so free of charge. Also to write to the Canadian Airbrake Co. for prices and full information re wood or steel elevated water tanks, frost proof, and on steel frame 45 feet high and to inquire what pressure would be available from above at point of nozzle 1000 feet from tank. The Com. also recommended that if a motor is purchased for town purposes, water for domestic use be delivered regularly under proper regulations to householders desiring it at 25c per bbl.

The Bylaw, License & Police Com. recommended the request of J. Ferguson for consent to his transferring his obligations as night watchman, etc., to A. McMullen be granted. This was done.

West Story of Port Alberni, B.C. is a visitor to Tofield, being called here on account of the severe illness of his mother.

A social evening and dance is being given on Friday evening in Kennedy's Hall by a large number of the Ladies of Tofield.

The Board of trade meeting in on Tuesday night in the town hall universe under the railway. The engineer recommended the cost of the undertaking to be divided as follows: On the Cushman property equal to cost of right of way, the C. T. P. equal to cost of locating culverts; Tofield Townsite Co., Canada West Townsite Co., and Town of Tofield each equal, at one-third shares in balance of cost $1500 or over.

The Com. recommended that an agreement be entered into between all the parties concerned on the above basis before tenders are called for. It also recommended that special committee be appointed to buy a team and to buy wagon and harness and that a stable be erected.

The Fire, Water and Light Com. reported that tenders for asbestos were called for and that of Ross Bros., Edmonton, at $1 for 3 inches was found to be the most satisfactory. The secretary was instructed to obtain a sample bucket from them before ordering an order. The Com. recommended that the ash buckets be purchased by the town and be town property. The secretary was instructed to write the John Galt Engineering Co. to send a representative here to look into the matter of a water supply in accordance with their offer to do so free of charge. Also to write to the Canadian Airbrake Co. for prices and full information re wood or steel elevated water tanks, frost proof, and on steel frame 45 feet high and to inquire what pressure would be available from above at point of nozzle 1000 feet from tank. The Com. also recommended that if a motor is purchased for town purposes, water for domestic use be delivered regularly under proper regulations to householders desiring it at 25c per bbl.

The Bylaw, License & Police Com. recommended the request of J. Ferguson for consent to his transferring his obligations as night watchman, etc., to A. McMullen be granted. This was done.

Silver Seven Winners of the Holden Trophy

Tofield Wins Third Game of Series in Easy Manner at Wainwright Monday—Large Ice Favors Gun Defenders.

In a clean decisive game on Wainwright ice last Monday, the Tofield Silver Seven climbed their claim to the Holden cup by defeating Viking 1 to 2 in the third and deciding game of the series. This is the third successive season that the locals have won the cup and the trophy now becomes the permanent property of Tofield.

The officiating was uniformly fair and satisfactory to both teams. Hough work was tolerated from the beginning of the game and numerous penalties were inflicted. The game was witnessed by a large crowd which fevered within side bed cheered for both.

THE GAME

While both teams were ready for play at 2 o'clock a delay ensued for a quarter hour owing to a dispute as to what rules the game was to be played under. A majority of Ryley asserted positively that the constitution governing the Holden cup competition called for O.H.A. rules. Viking held out absolutely for W. C. rules. Tofield finally agreed for sake of peace to play Viking have their own way and the puck was faced off at 2:15.

The large size of the Wainwright rink enabled the Silver Seven to skate rings around their opponents and while Tofield virtually played six men to Viking's seven, Stanley MacDonald being practically useless owing to a lame shoulder, each man of the six played a star game. Hains in a new role of rover, Bobby Lee as cover and Bissett at centre ice combined to perfection and Hains in a new role of rover, Bobby Lee as cover and Bissett at centre ice combined to perfection with glory. On half time the score stood 4-0 for Tofield, Viking picking up a couple of scores in the latter half.

Darcky Morrison of Dayland officiated ideally as referee and Johnson of Ryley gave excellent satisfaction as judge of play. Both were extremely strict in handling the game and penalized severely.

Tofield fans gave the boys a welcome on the arrival of the homecoming train in the evening. Hundreds assembled at the depot to cheer the champions and a huge bonfire on the square gave the scene a coloring attitude to the occasion while the joyous strains from the local brass band provided fitting music to render the occasion perfect.

The boys were banqueted at Latimer's after the crowd intoxicated with pleasure with the victory had cheered itself hoarse and the bonfire died out.

The Standard is in receipt of the following account of the Tofield-Viking game at Wainwright through the courtesy of the Wainwright Star which we are pleased to acknowledge Brother Cook of the Star informs us that the same account appears verbatim in his worthy paper.

As a result of the hockey game played here on Monday afternoon Viking now relinquishes all claim to the much coveted Holden trophy and surrenders the silverware to Tofield's Silver Sevens. The vanquished team was outclassed in practically all points of the game. Strong in defence work, swift in skating and possessing superior knowledge of stick handling, Tofield won on merits, although by a narrow margin.

Sharp at 2:30 the two teams lined up on the ice, "Dutchy" Morison of Dayland holding the whistle. Both teams were well supported, a special train load of rooters arriving at noon from Viking and points west. More than five hundred were in attendance and they were all enthusiastic sports.

As play started, the Tofield team rushed the puck towards the Viking net and pressed aggressively from the beginning. On a good rush and effective combination work, Hains scored the first goal for the visitors and the latter was a clean one. Play then centered around mid-ice, continuing until Bissett on a pass from Lee slammed the disc into the net for the second counter. Shortly after, half time was called with the score standing 2-0.

Immediately following the faceoff in the second half, Viking apparently bucked up and made repeated shots on the Tofield defence work, the puck being kicked out by Charlesworth, the "stonewall" guard in the Tofield nets. Viking showed more class and penalties were less numerous. A third goal however, was scored by Lee of the Tofield aggregation on a fine combination play during the time that Viking was playing most effective hockey. A fourth goal followed almost immediately after, Hains finding the rubber in the nets for the last tally. The next score was Viking's number one McLeod slamming the puck between the posts. Numerous shots then followed on the Tofield net. Dupreen, the clever rover, ended the game by scoring the puck for consumer number two. No further goals followed, yet play was fast and furious until the close of the game and excitement was intense.

Undoubtedly it was the best game seen on local ice and the teams were evenly matched in many respects. A clean display of hockey good feeling on the part of the players and competent officials made the game a pleasant one to witness. Of the Tofield aggregation, Hains and Bissett were easily the cleverest of the septette, while Fraser and Field of Viking showed up to advantage. Several penalties were handed out by Judge of play Johnston, who acted in a fair and impartial manner. Referee Morison again displayed his knowledge of the game in his judicious decisions.

Captain Hains of the Tofield aggregation was well pleased with the result and stated that he was naturally proud of his team. He was sorry, however, that the game had not been played under O.H.A. rules as well as under the Western regulations, the conditions of the cup calling for the former. The Viking boys took their defeat well and showed that they were sports of the first water.

The line-up of the team follows:

Tofield		Viking
Charlesworth	G.	Herrick
Somers	P.	Fraser (Capt.)
R. Lee	C.P.	Forde
Hains (Capt.)	R.	McCusker
Bissett	C.	McLeod
L. Lee	L.W.	Dupreen
McDonald	R.W.	Field

Excitement did not cease by any means when the game ended, several little exhibitions arising at the station, as the wonlsomed arrived. A Tofield man flung out the statement that "Dutchy" Morison was honest and couldn't be bought and a fight immediately ensued, only to be followed by another, in which two supporters of the Silver Sevens came off second best.

Before Supreme Court

Ottawa, March 20.—The marriage law reference by the dominion government arising out of the Lemoine bill and the operation of the new Ontario degree will be heard by the Supreme Court on May 7.

Coal Strike in England

Conditions in the Old Country have been reduced to great distress as a result of the coal strike. Business completely paralyzed, railway systems tied up, steamship sailings hampered and in some cases cancelled, price of foodstuffs going higher hundreds of thousands of disinterested workers idle and starvation facing the poor. An effort is being made this week by Premier Asquith to bring the contending parties together and effect a settlement.

AT THE

METHODIST

Rev. A. Barner, Principal of the Indian Industrial Inst., Red Deer, and Pres. of the Alberta Conference of the Methodist Church is expected to preach in the Methodist Church Tofield, both morning and evening next Sunday, March 24.

PRESBYTERIAN

On Sabbath morning Rev. A.M. McCall will preach from the subject "We Know." Address to children on "Acts." Popular evening sermon entitled, "The Opposing Stars." Attractive music by the choir.

Sabbath Evening Services

Last Sabbath evening Rev. A.M. McCall preached again to a crowded church from the subject, "The Prejudice or Nataneal." In the course of his remarks, the speaker said that prejudice was responsible for the arrested advance of the church. Prejudice and ignorance go hand in hand. Prejudice has caused hindrance to progress in every department in life. In the world of industry, development has often been retarded simply through prejudice. Endless suffering has been caused to those who deserved the very best rewards and success that the age could keep upon them. It was prejudice that crucified the Saviour. It is still prejudice that blinds men to the matchless beauties of Jesus Christ. To study the "Christ of the Gospels," is to lose all our prejudice against Him. To know Him is to love Him.

A. S. Bissett was up from Edmonton for the week end.

The friends of Mrs A. A. Story who has been seriously ill for the past week will be pleased to learn that she is slowly improving.

"ANYTHING that is produced in Canada from Canadian materials, by the application of Canadian brain and labor, will always have first call with me. And it's only good business on my part that it should."

Editorial Comment

Split in the Council

Tofielders this week witness the first split in the town council. This is over an increase of salary for the secretary-treasurer. What amounts in a sense to a minority report on the subject signed by three opposed to council's action appears in our columns this week. The public have a full chance to read what actually took place at the council meeting as the account of the proceedings also appears in this issue. The Standard refrains from comment this week as it believes the citizens of the town are sufficiently intelligent to form a sane conclusion. The majority of council, exclusive of the Mayor voted two to one, or to be exact, four to two, for the increase in the salary of this official. The situation provoked by the letter to the public from the three opponents to the measure will be interesting and the outcome will be more so.

o o o

Is it a White Elephant?

From Ottawa comes word that Mr. Bennett, M. P. for Calgary is engineering a deal by which the Government would take over the irrigation interprise of the C.P.R. If there is anything in the story it is time for the country to sit up and take notice. The C.P.R. has not been in the habit of relinquishing its concessions or other parties anything that paid dividends, save for a handsome price. If there is a deal on to unload the irrigation project onto the country, it may be taken without evidence that the irrigation project is not going to be a success. By building dams and digging ditches the C.P.R. has been able to sell most of the land in the irrigation tract. In doing so it assumed an obligation to supply the land with water through the irrigation system. The C.P.R. having received the benefit of the outright sale should now be able to fulfil the obligations involved. Edmonton Bulletin.

Tofield is right in line to receive quite a number of new settlers this year. Word has been received from a number who are on the way. Several have arrived already. Others are on the eve of pulling their stakes to take the road.

Immigration from the U. S. into Canada has begun and indications point to a greater influx this year than in any previous. Uncle Sam's desperate endeavor to stem the Canuck-ing tide does not appear to be very fruitful. The U.S. farmer is intelligent enough to know a good thing when he sees it. That is why he is coming over in annually increasing numbers.

The Edmonton business men, wholesalers and retailers, contemplate a tour of the district this year similar to that of last year. Tofield will remember the visit of the special train last year. The town people should be prepared to make the visit of our Edmonton friends doubly welcome and pleasant on this occasion.

A Montreal dispatch quotes R. B. Bennett, M. P., speaking to the members of the Canadian club in that city, as saying that one of the great difficulties encountered in the west was the great proportion of settlers from the U. S. who come in full of prejudice and even hatred of British institutions. They make trouble for Canadians but not Britishers.

Wainwright Board of Trade has outlined an aggressive policy for the current year. Among the things they are going after are the immediate installing of a flour mill, rural telephones, electric lighting, a permanent postoffice building and the institution of a cantonment. Agricultural work. Pay Worship—Free Outfit and Exclusive Territory. Stone & Wellington, TORONTO, ONT.

Wainwright should have a permanent postoffice building and the institution of a cantonment. Agricultural work. Pay Worship—Free Outfit and Exclusive Territory. Stone & Wellington, TORONTO, ONT.

In this part of the province we have a large proportion of former U. S. citizens. Conscientiously speaking, we cannot agree with Mr Bennett's alleged statement. There are good and not indifferent in all classes, Britishers as well as United States People. But among our good friends from across the border there are a large proportion who delight to live in Canada largely on account of the splendid institutions under which we live. Then, too, we cannot expect a former citizen of another country to lose entirely all feeling of patriotism for his mother country for that of his adoption. They make splendid and loyal Canadians for all that.

"TOFIELD" The Town With a Future

Sunt in Seed

Reports from different farmers in the vicinity go to show that there is a great deal of moisture affecting the wheat and oats year after year The experimental farms of Western Canada and those of the northwestern part of the U. S. have been at work to find some means of destroying the fungi which causes smut. When examined under a microscope it is found to be a black powder consisting of round spor, s and this is gets the name of parasitic fungi, that is, it lives on the substance from the grain on which it is found having little or no substance to develop the kernels. The best known remedy is the treating of the grain in a solution of formaldehyde and water. One farmer living near Banks who had very smutty oats tried sowing a small strip without treating in formaldehyde; one strip he treated and let dry before sowing and another he treated and sowed while wet. In the first it was about half smut, in the second there was some smut, while in that which were while wet he could find none This is certainly worth knowing and may induce other farmers to try out the different methods.

The Home Rule bill will be presented to the British House of Commons immediately after Easter.

Why Can Bald-Headed Men Grow Whiskers?

Why doesn't the face get bald at the same time as the scalp?

Simply because the gland and nerve tissues in the scalp are starved for food and sunlight as the scalp does. The skin of the face is clean and the hair-glands are nourished with moisture.

The scalp, though, is too often neglected, dried perspiration, dust and dandruff collect around the hair roots, making them weak and sickly, dooming the hair to become harsh and dry and begins to fall.

Then you need Nyal's Herbatone, the great astringent, tonic hair dressing. First give the head a good wash, using Nyal Cocoanut Powder, and then rub in Nyal's Herbatone every day.

Nyal's Herbatone is a new preparation which is doing wonders for people who have been troubled with dandruff, falling hair or any scalp disease. They find that it not only stops dandruff, but does new hair—that is puts new life and vigor into the hair, making it soft and lustrous. It is also a dressing so sticky, does not change the color of the hair, and will not soil the finest lace.

Try Nyal's Herbatone as we know you will be pleased. Nyal's Dandelion Cream we believe to be the best medicine known for Constipation.

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this sub-division. Lots facing South on Cookson Avenue will be ideal for residential purposes.

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build there in 1912

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male is years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

Letters to the Editor

NOTE—The Editor does not necessarily run our with the views of correspondents published under this head.

Editor Standard—

Permit us, the undersigned members of the Municipal Council of the Town of Tofield to convey a small space in your columns to place ourselves on record before and to the people of Tofield in the matter of what we consider an unwarranted action by the majority of the council at last week's session. At last week's session of the council a motion was passed to increase the salary of the secretary-treasurer to $100 per month and the increase to date back from the first of the year. A vote by ballot showed that three were opposed to this. We have no hesitation in coming out publicly as being the three opponents to this measure and for the following reasons:—

We are occupying our positions on the council in the interest of the people of Tofield in general and unless the people signify their willingness to pay the present secretary $100 per month, the council should declare the office vacant and call for applications at a salary of $75 per month.

If the present secretary cannot work for the present salary, we believe there are plenty of men willing to do so and who would agree with the whole council, Board of Trade and people in general.

The present official made his application for $75 per month.

It seems to be a disease to tap the municipality for more than they can get anywhere else.

The mayor refuses to sign cheques for the above until the consent of the people of Tofield is secured.

The salary of $75 might not be enough to keep a man with a family but it is all that the town can afford. In that case there is nothing for him to do but resign.

Signed:
J. O. Letourneau
John Lee
R. Logan

COUNCIL

Continued from Page One

and benefit the town. The matter was referred back to the Com. with instructions to push the work and a temporary grant of $200 was made to carry it out.

Coun. Young submitted a motion to increase the salary of the secretary-treasurer to $100 per month increase to date back from the first of the year. He said that the work of the secretary had been increased by the re-organization of the council, more attention to the detail work of the committees besides having been largely augmented by the growth of the town and the subdividing of the properties surrounding the town had created almost three times, if not more, work for the assessor and collector. The work had grown in volume so that it was out of all proportion to that done by the preceding secretaries at the same old salary. The new civic improvement and industrial department in itself created an immense amount of new work and additional responsibility. The new conditions therefore called for more remuneration in return for the additional duties imposed and he thought that it was only right that council should recognize its responsibilities and give the official a salary commensurate with the value of the work done.

Coun. Urquhart seconded the motion and Councillors Bird and Emery spoke in favor. Coun. Logan spoke against the motion saying that the position should be declared vacant and applications called for. The mayor asked if a vote by ballot was wanted. Mr. Bird said that a ballot vote was all right. A opposition was offered to this and the vote by ballot showed four in favor and three against, the mayor voting. The mayor then declared the motion carried.

Children are much more likely to contract the contagious diseases when the have colds. Whooping cough, diphtheria, scarlet fever and consumption are diseases that are often contracted when the child has a cold. For a quick cure of colds you will find nothing better than Chamberlain's Cough Remedy It can always be depended upon and is pleasant and safe to take. For Sale by all dealers.

Fred Kelly was a successful tenderer for the supplying of the material and construction of the town stables which are to be built on the rear of Lot 20 Blk. 19. His figure was about $315.

Conservative Rally

A meeting of all Conservatives of Tofield District will be held in Masonic Hall on Thursday Eve., March 21st at 8 o'clock, to hear J. B. Kennedy,s report of the Convention at Calgary also other important business to be discussed We want you all, by order

Stop Your Hair From Falling

The West seems to affect the scalp and hair in a manner different from any other place.
The scalp becomes dry and hard, the hair becomes brittle and dead, to overcome this there must be something used to counteract the nature in the west. Rexall Shampoo Paste is prepared to cleanse the scalp thoroughly and to loosen the pores, so that when the Rexall "97" Hair Tonic is applied it will have a chance to do its work.
We will guarantee these two preparations to stop the hair from falling out, put the scalp in a healthy condition and promote the growth of the hair.
Try these and if they don't do as we say your money will be refunded.

Hair Tonic, 2 Sizes 50c. and $1.00 Shampoo Paste 35c

Local and General News

A. S. Bissett was up from Bruce week end.

John C Kelly paid a business trip to the capital last Monday.

Ward Somers went to Strathcona on a visit to friends last Saturday evening.

W. G. Swift spent the week end in Edmonton, returning last Monday morning

Mr and the Misses Grant of Strathcona were Tofield visitors the later part of the week.

[illegible] Order [illegible]

[illegible] Miller has purchased the [illegible] and Feed [illegible] at [illegible]

[illegible] Bruce [illegible]

Miss Belcosto of Wetaskiwin was the guest of her sister, Mrs J. C. Legge, last week

Tom. Kirkpatrick started the construction of a new residence on 6th Ave. West, last Monday morning.

Work was resumed on the town wall this week. The casing arrived Monday morning. W. A. Nober has the contract.

McHelley and Kirkmanrick are busy these days posting farmers stockmenry into shape for spring operations.

Messrs. Chas. Hinkey, Clair Leeson and Fred Castell left on Friday morning last for Spokane Wash. where they intend to reside in future.

J. W. Morton is intending to erect an addition to his store on 5th Ave. West. Work will begin on the improvements as soon as the present tenant vacates

Josh Noland and Wm Ingram have had a well put down on their property on 3rd Ave. East. A fine flow of excellent water was struck at a dept of 22 feet.

Mr. and Mrs. Wm. Lamin, of Logan had the misfortune last week to lose their little six months old child. Interment was made in St. James the Apostle cemetery.

J. O. Letourneau is spending this week in the Capital preparing to take up the work of the management of the local depot of the Edmonton City Dairy.

It is reported that fifteen or more dwellings will be erected by the Ronalds subdivision people upon their holdings south of town during the coming season. They also state that they will build considerable sidewalks.

The new machinery ordered in Europe by the Tofield Coal Co., Ltd., will arrive soon, when development work on a large scale will be undertaken. The company will ship out many cars of coal next season to one which they have shipped out during the winter just closing.

The spinsters of Tofield are becoming more fully organized and a strong firing force. They expect to have an announcement of great interest to the public in next week's paper. Everybody, bachelors in particular, should be on the lookout for this.

Girls Brigade

The girls' brigade held their general meeting of the season last Wednesday evening and showed their interest and loyalty by seven-teen being present. Some important business matters were attended to after which the girls attended a social time. An effort is being made through Alberta and B. C. to organize the girl scouts. At present Tofield has the destinction, so far as is known, of having the only girl scouts in Alberta. Hebden has a combination of girl and boy scouts.

Conservatives Organize

Meting largely attended by local men. Report received by J. B. Kennedy on the business transacted by Conservative Convention at Calgary. The meeting was held chiefly for the organization of an association. The association was formed, the following officers being elected; Hon. Pres. R. Michener, Pres. J. B. Kennedy, Vice-Pres. J. W. Somers Sec.-treas. J. A. Charlesworth; Executive committee—J. Smith, S. Nicholson, R. Logan, E. Latimer, E. Gladue, A. W. Hunt, L. Macqueen, J. C. Kelly, T. R. Henderson, Chas. W. Taylor, S. A. Hall.

The meeting was by the most successful and enthusiastic ever held in Tofield and fruct the interest displayed the Tofield Conservative Association is going to gone in numbers and polished one many rapidly

St. Andrew's Church

Rev. A. M. McCall will preach on Sabbath morning on the subject entitled "Let us Pay" next to children on "Prayer." Subject of evening sermon will be "The how and a reunion."

Many sufferers from rheumatism have been surprised and delighted with the relief affected by applying Chamberlain's Liniment. Not one case of rheumatism in ten requires any internal treatment whatever. This liniment is for sale by All Dealers

P. S. We need some money by April 1st. The amount of your account would cause a smile

Trunk Road to be Completed This Season

As a result of a conference held early last week between the roads committee of the Board of Trade and the two Local Improvement District Councils, 23-P 4 and 25-R 4 which both border on Tofield, a delegation was appointed to go to Edmonton to interview the government officials in charge of the Department of Public Works and charged to inquire into all that the government could be influenced to perform in the way of public works in this section of the province this year.

E. A. Hoffin, and Frank Mahaffey, chairmen respectively of the above L. I. Districts Councils, A. J. H. McCauley and R. N. Williams representing the Tofield Board of Trade were the delegation which interviewed the Deputy Minister of Public Works. They report a most satisfactory session and come back bearing the assurance that the Edmonton-Tofield section of the Trunk Road would be completed this year, that the construction gang would improve the two miles on the correction line west from R. R. 1-51-21 and also the road running south from Tofield. Bridges west of Tofield will be built and also on the Township 49-18 remived.

The Local Improvement Districts have assured the Government that in the last two mentioned pieces of road work they will bearing co-operate with the Government in the construction. All local taxes for that purpose from lands in the vicinity will be spent on these sections respectively and under the general and direct supervision of the government's road construction foreman

Presentation

Miss E. L. Bissett

A very pleasant affair took place last Monday evening in St. Andrew's church when members of the church, the choir and the guild in all of which Miss Bissett took a leading part assembled to take part in a social evening in her honor. After spending a pleasant time in games and after refreshments had been served a presentation of an address and a beautiful gold brooch let was made to Miss Bissett, those speaking being Rev. A. M. McCall Messrs. Rogers and R. N. Williams. Miss Bissett responded feelingly. Keen regret is felt by all her old friends and associates at Miss Bissett's departure. This week the family leave to reside in Edmonton.

ONE WAY OUT

By WILLIAM CARLETON

Copyright, 1911 [By Small, Maynard & Co., Inc.

When she'd cried out that this was the greatest sport in the world, he'd answered in greasy glory. And it isn't any wonder, it looked white.

Why the road, before we knew it, had become a race track, and the whole thing was like the exhilaration of driving the cushioned white of an egg in the kitchen bowl.

Why the conditions down there are terrible, cried Ellis. He's been working for very poor pay. The floor wasn't washed, you remember, out of the windows and the clothes—

But that's the point, Sarah! I said, "the chance to have to move it there and wash it clean."

"How have they?" she insisted.

"We can't buy coal by the ton, so now we borrow and place to pay if she thought a moment and then she said:

We could take care of a fifth of a ton, Billy, and have the fire handier. They won't sell five any cheaper than—

And every family in Ellis house would take care of five," she went on. That would make a ton.

I began to figure out the amount and I thought if I didn't see why it wasn't a practical scheme.

"It looks like a good idea," I said. And if they'll only let some women have a chance I don't believe there'd any trouble at all.

"Then we'll do it!" cried Sarah. "Just leave it to me now and I'll see the other women in the house. They are the ones who'll appreciate a good outing that

She saw them and after a good deal of talking they agreed, so I told Ruth to tell them to save out of next Saturday night's wages a dollar and a half apiece. I was a bit afraid that if I didn't get the ride when the coal was delivered I might get stuck on the deal. The next Monday I ordered the coal and asked to have it delivered late in the day. When I came home I found the fifteen washing and it created about as much fuss as the street as on Fourth of July. I guess it was the first time that the Little Italy that had ever stopped before a tenement. The girls had been busy all day with hot water and soap and had got a look in to a store nearby and bought two pounds of real butter. With that for my share I gathered up the fifteen dollars that I had saved and made them carry the coal in the cellar. Then I went out to supper, after all first was finished to object to the arrangement, as I thought it would let things go on when he found him-

Sarah and I had a little supper by ourselves and then we started out to see the show. We walked down Fifth Avenue and there in every window were examples of hard times. In fact of sheer abstract poverty. Why, I suppose 95 per cent. of the cases the unemployed were making their own clothes rather than wear a drunkard or a loafer. Especially of the white. Some of the coats of the southern farmers were fairly pitiful. Their trousers were two hundred years old. There were two hundred years of patching on them and they dried in a sprinkle with water, although they were still dirty. They were starched to a perfect stiffness and ironed with a hot iron. Their shirts were clean and ironed to a shine after the fashion of the days of Queen Anne. In fact, I suppose that the whole wardrobe of the average southern farmer was not worth more than a dollar and a half.

Then we went to the show and there was a fine picture of the Grand Canyon of Arizona. It was a beautiful thing, and I thought of the time I had spent there. I thought of the time I had spent there. I thought of the time I had spent there.

TOFIELD, ALBERTA, THURSDAY MARCH 29 1912

Editorial Comment

Under the caption, "A Curious Blunder" the Hobden Herald last week makes the amazing announcement that Dr. Goodwin of Vegreville is an aspirant to the Vegreville seat in the Provincial Legislature and had been making calls in that section. The Dr. who is lounging for Hobden's scalp is already upon the warpath and well the story is not good that we give it as the Herald put it: "Dr. Goodwin, the Vegreville Liberal politician, was in Holden on Saturday and made a curious blunder in calling upon Dr. Farrell, president of the Conservative Association there, to consult him in connection with the election rendered necessary by the removal of J. R. Holden, the present member to Vancouver. It is evident that Dr. Goodwin expects an election before long."

What do You Know About That?

* * *

Residents living west of Tofield are complaining about the town nuisance ground which is located a mile or so West of town on the North side of the Government Road. It appears that the town is not giving the matter of deposits on these grounds any attention whatever. One man states that the piles are heated shamefully near the road allowance. There is no reason that this should be, as the grounds cover an area of ten acres south of the road. This will be a nuisance for sure in the spring when all this rubbish will be burned, and on the Edmonton-Tofield Trunk Road at that.

Nuisance Gr'ds a Nuisance

More Snow Needed

The following article should have appeared two weeks ago but was crowded out owing to lack of room. It is just as splendid today as then. The papers referred to are from the state served in Minnesota when spending a month last winter.

Oh, that we had more of the beautiful in Alberta the winter than we have had. Not the harrowing experiences of hunger, and blizzards that the Nevada County Republican of Auburn Nebraska and the Argus of Prescott, Adams Co., Iowa have been howling about, but just a little more of the beautiful snow to make sleighing more enjoyable and modestly to provide a more moderate abundance of moisture for the ground when spring opens in April or May. Not that the soil is longing for more moisture, we had an abundance of rain in the latter months of last season.

The Standard has had brought to its desk copies of the above mentioned papers with a correspondingly lamentable dissertations on the howling snowstorms blizzards and cold snaps which have swept the wilds down in those regions. But here in sunny Alberta where the sun has shone brightly and merrily almost every day since the New Year where we have had just enough snow for fair sleighing, but enough cold weather to provide a plentiful supply of ice for our summer use, where the stock have been running out all winter and are fat and otherwise in splendid condition where the usual lovely weather has prevailed day after day, when everybody is delighted to the core with the balmy winter atmosphere, we sit and read in our papers from the east and south of the blizzards in Nebraska, Missouri, Oklahoma, Iowa, Ontario and Quebec and many other places where the snow lies from six to ten feet in depth, where trains and roads are snowbound cattle freezing to death, settlers losing their lives, traffic blockaded.

Oh! who wouldn't live in Sunny Alberta?

Thinks This is a Great Country

If I were to write a letter back home, I would like to do so, but it would be of no use, and I would tell my neighbors and friends down there the kind of weather we are having here, that the snow is all gone, that we are having beautiful, sunshiny weather and that we are looking for seed to start as soon, that we are having beautiful, sunshiny weather and that we are looking for seed to start as soon as the ground within a week, they would simply say that I was raving or speaking an untruth and that I had got among those northern boasters and to blowing my own horn as loudly as any of them.

So said Mr. Raph the other day. Mr. Raph arrived from Iowa only last week and to say the least he is a little disgusted to death with the Iowa weather conditions which prevail in this section of the West. Down back home where he left only three weeks ago they have had more snow storms and blizzards, three more feet of snow having fallen.

Speaking of the excellent weather conditions, the Standard was informed by Mr. Alex. Kellner, who lives a mile from town, last Monday that he was beginning disking on his farm on that day.

This corroborates the statement made by Mr. Raph as above and the same could be confirmed by a large number of farmers in the community who are busy preparing for the opening of spring operations

Dry Dock at Prince Rupert

An agreement has been made between the Grand Trunk Pacific Ry. and the Dominion Government for the construction of a floating dry dock at Prince Rupert B. C. to cost approximately $2,000,000, and previous have been given to proceed with the work. The construction of this large dry dock is in charge of the G. T. P. engineer, Mr Wm. T. Donnelly, who has drawn plans and specifications, and who will be in charge of the construction of the dry dock.

A GOOD DEFENCE AGAINST THE WHITE PLAGUE

No one can afford to lower his prospering power to-day, and to have power one must have good enrichment.

The human body is the greatest machine ever produced—the most wonderful mechanism in the world.

It is above economic waste not to keep your body in the best condition. There is a good defence against the White Plague. Insure against it by building up your reserve forces and finally defence.

The best defence you can get is Nyal's Cod Liver Compound. It builds up the tissues and prevents disease. A delicious tonic and a splendid vitalizer; puts on flesh and strength because you get it all. For any invalid, for the puny and underweight child there is nothing like Nyal's Cod Liver Compound. It will soon bring the roses back to the cheek and give vigor and vitality.

It is a good plan to take a spoonful tonic like this whenever you feel the slightest lowering of the vitality. It builds up the system against sickness. Nobody. A great, big bottle for a dollar, and if it does not do all we say, we have offered to the public. The Nyal's people had to convince us of this first before we would offer them to our customers, and this remedy we know to be all they claim for it.

Sold by C. E. McMillan, Tofield.

"The Same Old Stand"

H. MILLER - Proprietor

If you are Planning to Build a Home in Tofield Investigate the New Model Sub-Division

Tofield Park

We have recently purchased and are now having platted the Crofts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this subdivision. Lots facing South on Cookson Avenue will be ideal for residential purposes

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build there in 1912

CANADIAN DEMAND FOR BINDER TWINE

United States Cuts Adventure of Canada's Dry Market—Story of Competition has Hurt Home Industry

Last year there were over 727 1-2 lbs. bushels of grain tied up in the farm in Canada. That is, binder twine was used for the harvesting of more than $27 millions bushels of grain. This year the use of twine in this way was still greater, as in Canada's unbroken area of wheat land becomes smaller and the growth of coarse grains extensive with the last few years the use of twine will be greatly increased in this country. Yet, with this most notable future advertising evident the binder twine industry, comparatively little of the product is made in Canada. Our market is really supplied by the United States.

Such a condition exists chiefly because of no unequal competition in the binder twine trade between Canada and the United States. The advantages are with the latter country, whose larger and older and more profitable industries have not only absolutely free access to the Canadian market, but also practically speak in the valuable supplies of raw material in the Philippine Islands. Thus was born the great part of the binder twine used in Canada was caused so by Canadian manufacturers. To-day, an overwhelming share of this business is in the hands of the so-called Harvester Trust, which does not make a pound of twine in Canada, but sends it from mills located across the line.

Prior to April, 1897, the rate of duty on binder twine was 20 per cent ad late Canada from the United States was 5½ per cent. At that time the industry was operated under Canadian auspices. From 1897 to 1904 the duty was only 10 per cent, but since January 1st, 1905, the rate was removed altogether, and ever since the whole trade in Canada was turned over to the United States and, with the reduction in the tariff a steady increase in the importation of twine into Canada from the United States since 1896:

1896—2,818,863 lbs. ..... $ 154,252
1900—10,628,211 lbs. 510,454
1911—24,519,258 lbs. 2,205,122

The above figures show the growth of binder twine after the removal of the duty, there being more than three times the inflow to-day that there was in the last fiscal year. In the latter year a bounty was opened—has been responsible for the closing down of many twine mills in Canada, and is one big reason why Canadian binder twine is not to be had, yet their money in this industry at the present time.

HARDWOODS SCARCE FURNITURE HIGH

Increase in Cost of Furniture Due to Small Supplies of Raw Materials.

While furniture has increased 10 per cent in Canada more per cent in the United States it is a well known fact that the cost of furniture has increased more than 10 per cent in Canada during the past two years as in the United States it has increased from 50 to 100 per cent in two years as rapidly as in the latter country.

The average index price for furniture in 1910 as taken by the Department of Labor was 97.5 and in 1911 had increased to 102.5, an increase of 5 per cent. The average price of bedroom suits in the United States for a like period changed from an index number of 97.5 to 141, bedroom chairs from 97.5 to 142.5, and kitchen tables from 97.5 to 134.6. This item showed in the United States a decided increase from 1907 to January 1st, 1911, of 38 per cent. Taking heavy hardware, which is largely manufactured in the United States, there was an increase of 61 per cent. In price, six of the seven articles noted by the Department having decreased and five increased in Canada last year on the other hand the change whatever occurred in the prices as represented in Branch's furniture

The chief reasons for the high cost of furniture are increases in wages and in the prices of hardwoods. It is sometimes contended that the manufacturer who buys low and whose country's upbuilding is advised by a properly regulated tariff takes advantage of these circumstances to reap a harvest of profits. Machinery and plants. The fairest test in this case is a consideration of the way with an episodic tariff. The plan now the tariff to counterbalance the inferior results of his plant. In Canada, this is not so. Notwithstanding the fact that there has been a marked improvement in the machinery for manufacturing furniture in this country during the past twenty years, which has enabled a furniture to be placed on goods and numerous devices designed to be turned out at less cost, or less expenditure, the two leading manufacturers in Canada have counterbalanced the effect of the superior machinery. Mr. J. MacMillan, of the Forestry Branch of the Department of the Interior, says that whatever can be done to encourage the production of hard- or in suitable localities in Canada should be done at once. [illegible] Canada [illegible] forests. The Government [illegible] show that its average [illegible] per hour in Canada for [illegible] manufacturing [illegible] and none will be below a [illegible] in the factories in the United States and in the United States 12½c.

The "Gibson Girl" Concert

On Monday evening, March 18 under the auspices of the Presbyterian Church Miss Angela Murray Gibson gave a Scottish entertainment in the Masonic Hall before a fairly good audience. Mr A. J. H.McCauley presided at the piano, and gave Scottish selections during the intervals, as well as accompanying Miss Gibson in the musical part of her programme. Mr. Macauley's rendering of the Scottish pieces were masterfully executed. The cause at religion owes much to Mr Macauley's kind and valued help.

Miss Gibson provided the entire program of readings, songs and Scotch stories. As a reader Miss Gibson excels. Her rendering of the little girl in the pantry, is simply perfect. Again when she appears in Scottish Highland costume, in reading and singing in the Scottish dialect there is nothing left to be desired. When we add to these her piece in the costume of a Newsboy fish-woman, when she sings "Caller Herrin", and then her stories, it is difficult to say whether any travelling concert yet heard can surpass that given by Miss Gibson.

During her visit she was the guest of of Rev. A. M. and Mrs. McColl at the manse.

Mr. and Mrs. Matt Nom, of Bardo, were made the happy recipients of a pair of twin girls last week. Thus our population grows. Congratulations.

Real Estate — Tofield, Alta.

Glad to be Back Again

John McConnell returned a few days ago from a winter's visit to old friends and acquaintances in and about Auburn Neb. John is heartily glad to get back to Sunny Alberta. Such a winter he has not experienced in many years and the like of which he has never seen in Alberta. Showstorms, hurricanes and blizzards, blockading traffic and the inflicted privations suffered by people and stock were something fearful. While it was doubtless a something out of theordinary winter down there Mr. McConnell says Nature of the South for one, Alberta is good enough for me I am satisfied to remain for the rest of my life in this good country. Mr. McConnell felt himself getting poorer every moment as the train which carried him back to Alberta sped across the prairies from Wood to Tofield. Old Sol up in the heavens shone out a glorious warm reception. The black soil looked up in happy expectation of being tickled. His stock greeted with pleased expressions of welcome and their showed sleek backs after a winter's rustling out on the prairie and at the straw stacks.

The returned ex-Nebraskan spoke with a finality that was utterly convincing. The weather here, even though he had experienced so different in the south was not so much of a surprise to him as he has spent a few years in Alberta, but the trip has had it's effect in making him far more appreciative of the good things which the people of the West have. Mr. McConnell was kept busy answering many thousands of questions about Canada while on his visit and no doubt did justice to the subject. Owing to storm impeded traffic he was unable to visit all desired. Glad is he is to be back again on the old place at Tofield.

Children are much more likely to contract the contagious disease when the have colds. Whooping cough, diphtheria, scarlet fever and consumption are diseases that are often contracted when the child has a cold. For a quick cure of colds you will find nothing better than Chamberlain's Cough Remedy It can always be depended upon and is pleasant and safe to take For Sale by all dealers.

NEARLY THREE TO ONE

Some Interesting Facts Shown in the Immigration Returns

According to the immigration returns for 1911 the proportion of male to female immigrants has been nearly three to one, while about one-fifth of the total arrivals have been children under sixteen years of age. Male adults arriving in Canada are now well over during the past twelve months have numbered a little over 150,000, as compared with a little less than 100,000 female adults, and about 50,000 children. The immigration to portions expects that forty odd immigrants will settle in Canada during the coming year.

Official figures given out in Winnipeg show that 138,000 settlers from the United States came to Canada last year, bringing effects valued at $30,000,000.

WELLAND CANAL RECORD

Two Thousand Five Hundred and Seventy-Four Vessel Passages

Twenty-five hundred and seventy-four vessels of all kinds last year passed through the Welland Canal, 1,287 had down, breaking the record of the previous year in the history of the canal. The tonnage total nearly four hundred more than last season. Perhaps fifty million bushels of wheat were brought down through the canal during the season. The down trip from the one end to the other was made by the steamer City of Montreal, which took just nine hours and twenty minutes to go through.

"CATCH AND OUT."

Melbourne Australasian:—The young bowler was having his first trial for the Victorian Eleven against New South Wales, with the incomparable Victor Trumper batting. A driven ball came whizzing back like a rocket, and the young bowler prudently ducked, and let it go his way. "If you catch those h's out," mildly observed the cricket "Ted," "and he can't, "and if they catch me, I'm out."

TRUE TO IRELAND

When Dan Donnelly, the Irish pugilist of the early part of the last century, was called before a county magistrate who patronized the ring, he heard this: "Donnelly, they tell me you are the best man in Ireland." "I don't know about that, your Royal Highness; there are lots of good ones there," answered Donnelly, "but I am the best man in Donnelly."

DAY IN NEW BRUNSWICK

The year 1911 in New Brunswick was the dryest in seventeen years. The rainfall for the year was 40.84 inches, while in 1894 it was 54.31 inches, while the average for the past seventeen years was 44.69 inches.

WORK HARD FOR THE MONEY

The long-distance runners do not find rich financial prizes as were the rule a few years ago. The prize-money for which Longboat, Hicks, Jackson and Belmer ran fifteen miles at Edinburgh was only $175.

SHOT A FINE BUCK

Mr. Joseph Fullerton of Streetsville while on a hunt during the last deer hunting season secured a fine buck weighing 200 pounds.

BIG MOOSE HEAD

A record 50-inch brunswick moose head having a total of 61 inches with 12 tech blades and 33 points, and which was taken in the vicinity of Moncton last season.

LAST OF "GOAT MILKMEN."

The late Mr. Z. S. Ash, Minnion, was the last of the "goat milkmen" of the country. Some years ago he kept upwards of 20 goats, and conducted a milk business among townsfolk, elderly people, and infants particularly, feeding the milk of the animals from which he derived a livelihood. Mr. Ash also owned the "camel horse," a beast, which the old residents say, had 3 times or cross of the camel in it. Mr. Ash was a character, not exactly the same as the camel, and its legs were also somewhat after the shape of the desert wanderer.

Mrs. Robert Bowick has been seriously ill for the past week.

Rev. Lee of the Tofield Coal Co. was a visitor from the Capital last Tuesday.

Miss Pearl Lee of the Tofield Public School staff attend immediately after Easter Vacation.

J. D. Manners and R. S. Rudd left on Friday evening last for Hensall, Ont., to spend a month visiting friends.

Miss Shell of the Tofield Public School Staff, returned on Sunday from a pleasant three months trip to Florida.

J. W. Carter conducted a successful Auction Sale last Tuesday at St. Ulbolds farm six miles east of town. A record crowd was in attendance

J. McDonald, prop. of the Queens hotel has been very ill of pneumonia for over a week and a few days ago was taken to the hospital at Edmonton.

Mrs L. Abbott has been visiting her sister, Mrs H. Bissett of Guilford, Alta. Mr. Abbott went up to Edmonton the other day to meet her.

Rev. J. Mason who for the past three years has been acute in charge of the Church of England parish at Leduc has been transferred to Tofield and he has arrived to take up his duties in this parish. He moved in this week. His family consists of Mrs Mason and their two sons.

Suggest Shipping Wheat To Starving Chinese

Toronto, March 20.—At a meeting at the city hall this afternoon to consider the situation in the famine districts of China, it was decided to start a national relief fund and to urge upon other cities the movement be made a national one as an expression of the good will of canada towards the new chinese nation. The Duke of Connaught has signified his willingness to become patron of the fund.

The suggestion is made locally that if the idea were properly taken up in the west, especially in Winnipeg, that it might be arranged to purchase a very large consignment of the damaged grain and ship it westward to China as a contribution which would be very welcome to the starving Chinese, and at the same time relieving the western farmers

Edmonton Spring Show

The Annual Edmonton Spring Show, which will this year be held on the Exhibition Grounds, and under the auspices and management of the Edmonton Exhibition Association, on April 16—17, promises to be a big success. The Department of Agriculture has this year made a liberal grant to the Edmonton Spring Show, with the result that a very attractive prize list is being offered for Horses, Cattle, Sheep and Swine. The entries for this Show, with the exception of the year-lewel Cattle and Swine offered for sale, and any information regarding the show may be obtained by writing to the Secretary W. McCAmeis, Box 216, Edmonton.

St. Andrew's Sunday School Easter Service

The school will conduct a special Easter Service next Sunday (Easter) afternoon at which special music will be rendered. An Easter address will be presented to each of the children attending.

Buried at Clearwater

The funeral of the late Geo. F. Ingram, son of Mrs. Isaac Ingram of Tofield, and who died at Penoka last Thursday week, was held on Sunday following from the Presbyterian church, Clearwater, to Clearwater cemetery. Mrs Ingram of Tofield, was present having been called to the bedside of her dying son by wire. Deceased was in his twenty-third year.

Many Desirable Settlers Arriving in Tofield

Tofield Receiving Her Share Already of Incoming of Desirable Immigration

C. A. Kail, Oklahoma
L. C. Killion, Carson, Iowa
Geo. Rogh, "
F. B. Rosh, "
D. L. Yoder, Milford, Neb'raska
H. L. Yoder, "
J. E. Hoolman, "

Tofield is already receiving her share of the tide of substantial and desirable immigration which is flooding into the country from the middle western states. During the past fort-night between ten and 12 cars of settlers' effects and stock have arrived. The list is a mixed part of the number of new boose holders who, with their families have considerably augmented our rural population. Messrs Haph and Roth with Mr Killion are renting the Harriman farms for this year prior to purchasing same in the district. Mr. Kail is taking charge of the land by the lake and Hoolman's section and north and east of it.

Will Abernethy arrived this week with his household effects and is looking for a location.

Those families are but the forerunners of larger numbers who are following and from all indications 1912 will be a record year in the district in the immigration line.

HYMENEAL

Younie - Mitchell

A quiet but very interesting event took place at one o'clock this afternoon when James A. Younie B.A., principal of Tofield Public School, and Elizabeth, daughter of Mr. and Mrs. Hugh Mitchell, southTofield, were joined in wedlock, the ceremony being performed by Rev Allan M. McColl at the home of the bride's parents. A number of the immediate friends of the contracting parties were present. The newly married couple will reside in Tofield.

Taylor - McPherson

A quiet wedding took on Monday of last week at the Methodist parsonage at which F. V. Taylor of Edgerton and Miss Alma McPherson of Daley, Alta. were joined in the holy bonds of matrimony. Mr. Taylor is a former Tofielder, he having lived here four years ago before going to St. Paul de Metis district with his mother and sisters to locate a claim. Rev. B. Nicholson tied the nuptial knot.

Conservatives Sweep B C

The election last week in British Columbia resulted in a clean sweep of the province by the Conservatives.

Sir Chas. Hibbert Tupper expresses regret over the election and predicts the downfall of the government in time as a result.

E. Brier, solicitor, has changed his office to Masonic Hall. In town on Saturdays.

Maple Sugar Social

The Rebekahs of Lebarieer Lodge No. 26, Tofield gave a very enjoyable Maple Sugar Social in the Lodge and Concert Halls last Tuesday night, a large crowd attending. Maple Sugar taffy was served in the Lodge room after which a program was given in the Concert Hall to the enjoyment of all present.

Hand Gored by Bull

Dave Phillips met with a sad accident the other day, while attempting to dehorn Mac co's bull, the bull rammed a horn clean through Dave's hand mutilating it very seriously.

G. T. P. Cafe Changes Hands

Mah Chow Chung, late of Edmonton has purchased the G. T. P. Cafe from Mrs. Eli Moore. The deal was consummated on Monday last, and the Cafe is now being conducted under the new management. The present owner, Mah Chow Chung has had considerable experience in this line of business and will no doubt make a success of the venture.

TOFIELD, ALBERTA, THURSDAY APRIL 4 1912

TOWN TO BUILD FOR YEAR ENDING DECEMBER 31, 1911

Why He Was Late

"What made you so late?"

"I met Smithson."

"Well, that is no reason why you should be an hour late getting home to supper."

"I know, but I asked him how he was feeling, and he insisted on telling me about his stomach trouble."

"Did you tell him to take Chamberlain's Tablets?"

"Sure, that is what he needs." Sold by all dealers

Opportunities on the Coast

The opportunities which are offering themselves in all lines of trade and manufacturing on the Pacific Coast is demonstrated by the fact that the Canadian Fish and Cold Storage Co. has recently erected a cold storage and data freezing plant at Ritchie Point in the City of Prince Rupert B. C., the western terminus of the G.T.P. Ry. and has been built for the handling of fish in each of these years, exclusive of the Northern Pacific Ocean. The waters surrounding Prince Rupert will soon be a busy hive of industry in this province on extensive scale is very gratifying. There are great possibilities in this direction A few districts, notably those of Red Deer and Innisfail, have already shown what can be done and with proper encouragement th's branch of mixed farming will add materially to province.s wealth.

The Dairy Industry

The news that a large Ontario firm dealing in dairy products is extending its operations to Alberta with an idea of developing a dairy industry in this province on extensive scale is very gratifying. There are great possibilities in this direction A few districts, notably those of Red Deer and Innisfail, have already shown what can be done and with proper encouragement th's branch of mixed farming will add materially to province.s wealth.

PROSPERITY OF HAIR DEALERS A BAD SIGN

It's a question whether the trade in what is supposed to pass as hair tonics, hair wax ever so brisk as it is right now. Quantity is demanded on the suffers, and Nature's supply a supplemental artificially instead of encouraged naturally, and soon there is but little natural hair to supplement. The elaborate surgeons keep the head hot, damp and unventilated, the hair loses its vitality and falls out worse than ever.

Then comes the hair tonic vapor action, in their new hair fine ramps and to buy any more. Thorough brushing and combing every day, right down to the skin, would keep the hair in proper condition—though it would take interest in it properly.

"Why," you say, "I haven't time to spend hours a day brushing my hair." This is such a quick as you can, and you have none of Nyal's Hirestone with Sage and Nyal's Hirestone will cleanse and remove all the dried skin and foreign matter that accumulates—stimulates the hair bulbs—restores the hair and restores its healthy lustre. Used regularly, it not only stops falling hair but makes the "crown of glory" thicker, softer and more beautiful than ever.

If you try Nyal's Hirestone we know you will be delighted with it. Nyal's Hirestone is absolutely believed to be the best hair tonic values offered.

Sold by A. E. MCINNIS, TOFIELD.

Nyal's Family Remedies

For the each everyday ailments

(Continued on Page Five)

You can say goodbye to constipation with a clear conscience if you use Chamberlain.s Tablets. Many have been permanently cured by their use. For Sale by all dealers.

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This progrty is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this sub-division. Lots facing South on Cookson Avenue will be ideal for residential purposes.

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build there in 1912

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within six miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

A certain district a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties.—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties: Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

Adminstration Sale

To close out an estate the undersigned offers the following splendid property for sale viz:

The North-west Quarter of Section Fifteen (15) Township Fifty (50), Range 16 (16), West of the 4th Meridian, Alberta.

This farm adjoins Shouts townsite, and is one mile east and one mile south of Tofield. The soil is uniformly a rich, deep, black loam practically no waste land. A field of 80 acres can be secured with very little cleaning, positively one of the best properties in the District.

Sealed tenders which must specify the price offered per acre will be received by the undersigned up to and including the 12th day of April 1912. The highest or any tender is not necessarily accepted

Courtlay Pianos

THE PRIDE OF OWNERSHIP

To own a Courtlay Piano is to be proud of your piano. If you are a musician, the sympathetic bead between you will be strong indeed, for a Courtlay piano responds to every mood of the player. Its tone is a revelation of delicacy of tone for the daintiest improvisation and a richness and volume for the most exacting bravura passages.

If you are not a player, but a lover of music, the pleasure of your friends' enthusiasm will more than repay you for the amount of your investment, to say nothing of the extra years of pleasure to your piano.

Write for Catalogue and prices.

Farmer's Rural Telephone Line

The farmers in the district to the north of Tofield have long been desirous of getting a telephone line installed throughout the district but as yet they have not been given of such satisfaction from the Gov't as to which they might possibly be established. As a consequence, they have been taking things into their own hands with a view of organizing a Farmer's Telephone Co. to build the line. A meeting was held in the Town hall last Saturday at which there were over thirty farmers present and the subject was extensively discussed. It was decided to effect a provisional organization for the purpose of gaining all the information necessary for the properly building of a rural telephone line. The provisional officers are.

F. Mahaffey, Chairman.
J. Brisk, Secretary.
J. D Berry, W. C. Shultz and A. Belenge Committee

When the necessary information has been secured another meeting will be called.

Commited For Trial

Jakel Kosak of Kingman appeared before Justices Whitlaus and Hunt a few days ago, being charged by N. S. Smith, sheriff's bailiff, with assault upon the complainant while the latter was in discharge of the execution of a warrant of seizure. The accused was committed for trial at the next Court and allowed out on bail

At the Churches

PRESBYTERIAN

Easter services will be held in St. Andrew's Church on Sabbath 7th April. Rev. A. M. McCall will preach special Easter sermons while the choir will be considerably augmented and will render a specially prepared program of music appropriate to the occasion at both morning and evening services

CHURCH OF ENGLAND

There will be service on Good Friday evening at 8 o'clock, with special preparation for Holy Communion Subject "The Easter Message" and Holy Communion. Sunday 11 a.m., morning prayer and sermon; 7.30 p.m. Evening prayer and sermon.

Use of Paint

Some are of the idea that paint is just to add beauty to a building, but as a matter of fact that is a secondary purpose. The main thing is to preserve the wood, Sherwin-Williams, while they do not neglect to beautify. Take great pains to get just the proper mixture to preserve the wood well and long said by R. O. Bird.

Judge Taylor was an interested visitor to the Tofield Coal Co's mines this week.

Albert Rohrer, rep. of the Pacific Coast Paint & Varnish Co., Pratt & Lampert, was the guest this week of his aunt, Mrs. M. L. Shupe.

New Spring Goods Arriving

Our stock is now practically complete. We are showing a number of New Lines this season, which you will find worth your while calling to see.

Don't you think it is about time you threw away that old winter cap and came out with a new spring lid. We are showing a full range of the famous "Kenmore" Hat for Men, in all the latest styles and shades, in addition to a complete stock of the old reliable John B. Stetson Hats.

The "Danford" Elk Shoe will appeal to the man who requires a first-class Elk Tanned Shoe for use in all kinds of service and weather, the leather will be just as soft and pliable when you throw them away after months of service as it is now. The price is $5.00 and for the 10 inch Shoe $ 7.00

For the man who wants a fine shoe and yet feels that he cannot afford to pay the price for the "Invictus," we are showing a range of Tan and Box Calf Shoes at $3.50. These are exceptionally good value.

A shipment of Ladie's and Men's Raincoats has just been put in Stock. These will soon be necessary, and you will find in this lot the coat you want at the right price,

We are agents for the well known Butterick Patterns. Call and get, the Monthly Fashion Sheets. We will have you Patterns for days after receiving the order

PUBLISHED WEEKLY IN THE INTERESTS OF TOFIELD AND THE WELFARE OF THE PUBLIC

VOLUME V — TOFIELD ALBERTA, THURSDAY APRIL 11, 1912 — NO 46

Various Expressions

Above our desk [illegible] of last week were—
"SELLING OUT"
"AUCTION SALE"
"GOING OUT OF BUSINESS"
All of which advertised and helped to make the first day of our Sale a great success.

Our Real Object

was to impress upon all the idea of a Cash System, and also to let the Farmer know that he can have his wants supplied if he has not the money just now when nearly all other stores in this country are insisting on spot cash. Like all of us just at this time of the year, some Farmers are short of cash, and we wished to see them through. We are just making them so they must see another, selling them for workable prices. When the Farmer sells his Stock or other goods he can for Cash or a Joint Note which the Banker will give him money on so that he can pay for what he buys. We only ask the same.

Local and General News

J. E. Whitaker is moving out to his homestead 30-50-20 this week.

Ward Somers spent Easter as the guest of friends in the Capital.

Misses Gladys and Phyllis Shaw of Edmonton were guests of Mrs. M. W. Urquhart over Easter.

Dick Spilsted of Edmonton spent the Easter holidays at his home at Spilsted P.O.

Miss Clara Lee of Edmonton was the guest of relatives in town over Easter.

Miss Oma Hickner came down from the Capital to spend Easter with her mother.

Harry Rogers of the Reliance Store spent Easter as a guest at the home of Mr. and Mrs. Chas. Spilsted, Spilsted P.O.

The Fire Brigade put in several hours good work last Monday afternoon burning fire guards around the town proper.

Mr. and Mrs. Thos. Newbiggins, late of Arrowhead, B.C., arrived in Tofield last Monday to take up their residence in town.

For rheumatism you will find nothing better than Chamberlain's Liniment. Try it and see how quickly it gives relief. For sale by all Dealers

Mrs. Davis, milliner, of 5th Ave. West, has been doing a splendid business in the millinery trade since her announcement of her opening in the Standard two weeks ago.

The boys about town are having sport relishing goshawn, which have made their appearance in large numbers. The boys should be encouraged to make a wholesale slaughter of the varmints.

Dont be surprised if you have an attact of rheumatism this spring. Just rub the affected parts freely with Chamberlain's Liniment and it will soon disappear. Sold by all dealers.

W. F. Reimer of Rose Creek met with a bad misfortune last week when his horse ran away throwing him out of the vehicle and fracturing his shoulder. Dr. Tofield was called to attend him, and this week had him removed to the hospital at Edmonton.

Wm. Hopgood was last week down to Red Deer to where Hopgood Bros. grading outfit have been in winter camp. They expect to start work some forty miles north of Lac Ste. Anne within a couple of weeks. This is on the Pacific River branch of the C.N.R.

You will look a good while before you find a better medicine for coughs and colds than Chamberlain's Cough Remedy. It not only gives relief—it cures. Try it when you have a cough or cold, and you are certain to be pleased with the prompt cure which it will effect. For sale by all dealers.

Local Improvement Dist. Council 25-P-1 has done a good work in effecting a temporary fix-up of the road running south from town at the south-west corner of section 25-50-19, one mile south of town. Twenty-five dollars spent on this bad piece of road has made it passable, and traffic is going that way most satisfactorily.

H. Meeklenburg, A. M.' the celebrated and 20 year experienced eye specialist of Phone 8228, Arch-dekl block, Edmonton, will again be at the Queens Hotel, Tofield on Saturday, May 11th. Spectacles, eye glasses and artificial eyes, the best at moderate charges. Absolute satisfaction guaranteed.

The funeral of the late Edward Watkins took place from the Baptist Church, Viking, Alta., on March 28th. The deceased was 78 years of age, had been a resident of the Viking district for nine years, and was highly esteemed by all who knew him.

"SISTER FARMER: "Say, Mister, what am I going to do with this grain? No one's out, and warm weather is coming!"

MINISTER OF TRADE AND COMMERCE: "I think that you should take it to the Lord in prayer. That would be the best thing to do. Providence is responsible for all your troubles."

Beaver Lake East

The epidemic of measles which has afflicted this community for some weeks is practically over. Good riddance!

The favorable weather is causing the farmers to get out their implements and open the campaign. Of course a sudden change may come any day and give the work a set back, but that's nothing to bow about

Little Miss McCallum is slowly regaining his strength and spirits. He has had a hard time of it, and our sympathies have been with him in it. We hope he will shortly be among the [illegible] he painful experience.

The death of Mrs. A. L. Horton, of Vegreville, came as a sad shock to all who knew her and to the personal friends of Mr. Horton himself. We extend our heartfelt sympathies to the family in their bereavement.

A. R. Moody will conduct an extensive auction sale of cattle, horses, farm machinery, etc., for Mr. Joseph McCallum on Thursday April 11. S.W. ¼ Sec. 15, 52, Range 17 W 4 is the place.

A large amount of seed grain was disposed of by the farmers about the lake front this spring. A party on March 23 phoned from Tofield to a settler here to wheat and oats. Getting a satisfactory reply, he said he would be over with the team. The settler is still waiting his arrival and is wondering what he calls himself. The grain could have been sold to other parties several times over, yet it was held for the man across the lake. Oats on this side have shown a very high germination test, some up to 97 per cent. in four days.

We have watched with amusement, mixed with disgust, the antics of the Hon. Frank Oliver and other Liberals on the new Grain Act and other Government measures. Frank certainly lacks the qualities that go to make a statesman, but his paper, The Bulletin, certainly caps the climax for imbecility and unscrupulous partisanship.

Monday won't seem the same place since Tom Ryan, the station agent, is not there. He has gone to the coast to recuperate after a long siege of overwork. Good old Tom, genial old boy, we'll miss you. Thy equal for your old job can't be found! Good luck go with ye!

[Our Beaver Lake East correspondent evidently sides in his political sympathies with the Conservatives. After all, every man is entitled to feel and think as he sees fit. He, too, has free speech, and this is as far as it goes. Possibly the next man might think Hon. Frank Oliver a good man for the country and in the same way of The Bulletin. This world is full of divers opinions.]—Ed.

New Rural Telephone Line

It is understood that the Government has consented to get in another rural telephone line running west from Tofield and serving A. Hosier, A. W. Hunt, W. Silen, C. S. Blake, D. Jones, G. R. Yager, W. Greenwell. The first two are assured, and the rest will likely be extended telephone facilities when the line is put in.

THE SPIRITERAS

Old Maids of Tofield give splendid entertainment in Bellamy's Hall

The much advertised and anticipated Spinister Conversation by the Old Maids of Tofield was held in Bellamy's Hall last Tuesday night, and to say the least, it was the best exhibition of amateur comic opera ever put on the boards in Tofield. That it was produced by the ladies is all the more credit to them.

As an entertainment feature, it was worthy of the full house which was in attendance, the building being crowded to the doors. The singing was all the more creditable as the music, songs and all the acts were well performed, and reflect great credit upon those taking parts

The rendezvous by which Prof. Makeover put through many spinsters making these young blooming lasses provoked unlimited mirth. The entertainment is well worthy of being repeated at other points in the district.

WEDDING NOTICE

A very pretty wedding was solemnized in the Baptist Church, Viking, Alta., Wednesday morning at 11 o'clock, when Miss Marjorie Florence Maxwell, daughter of Mr. and Mrs Hakson Maxwell, Viking, was united in the bonds of marriage to Mr. Dudwin B. Gray of Viking. The bride was attended by her sister Miss M. M. Maxwell, and the groom by Mr. C. W. McBride. Rev. W. F. Travis officiated. The young couple, who were so popular in the town, will reside on their farm near Viking. The good wishes of all follow them.

Frank Hanlan and wife of Ardrossan spent Easter as the guests of Mr. and Mrs. S. A. Hall.

Settlers Arrive from Oswegatchie, N. Y.

F. Stowell, of Oswegatchie, N. York state was a visitor to Tofield this week, coming on Tuesday night and has come to stay. He started out with W. H. Briggs of the same place in who is bringing in a car of settlers and a number of pure bred Holstein and Ayrshire young stock. Their car was laid off at Williams and this accumulated Briggs stay on with Mr. Stowell and will await the arrival of her husband here. Dad Mr. Stowell and Mr. Briggs expect to locate in the Tofield district before the end of the month. Mr. Stowell intends that they should [illegible] ave ter

THIN, FRAIL WOMEN WITH PALE CHEEKS

Are Rapidly Learning the Way to Health and Vigor by the Use of Dr. Hamilton's Pills.

Thousands of half-dead, emaciated, pale-cheeked women, who have lost their energy from anæmia, nervousness, or other weakness, are rapidly learning that to be fat is indispensable, which directly leads to nutrition, good circulation, and good health.

The first step towards relief is a flesh out all tissues and unbuilding the blood—stimulate the kidneys. Once these organs are toned up, health is quickly manifest their health-restoring qualities.

The best way to correct impaired digestion, biliousness, sick headache, liver troubles, and other ailments is to use Dr. Hamilton's Pills. Mrs. Alfred A. Dempsey, from Wood-stock, Ont., writes: "I was pale, thin, and nervous. Dr. Hamilton's Pills were recommended to me, and I have been so much benefited by using them that I feel I cannot say too much in their favor."

To keep the machinery of the body in active working order, no remedy is so efficient, so safe, as curative as Dr. Hamilton's Pills. Price 25c. per box, all dealers or the Catarrhozone Co., Kingston, Ont.

CUPID AND CLIMATE

Cupid, like a good many other beings, has his views upon the climate that is best for him. Some say he likes the tropics, and for a very good reason. He pays little attention to anyone, and the people alike taken all round, but he has his reasons.

Plump people, for instance, are seriously ill-treated in the tropics. They appear at their worst during a hot season, and they know it. They are feeling flappy, hot, and tired. Cupid's darts are powerless to make the love-shafting sensation for those who are not conveniently slim.

Love, in fact, is largely a matter of constitution and temperament. Given a stout couple on a hot summer's day in the city, and the temperature is 90. But, turn on a spell of cold weather, and they are thrilled at once. Their love is warmed by the cold, and they are happy.

In spring time the weather is rather particularly hot for perfect happiness, and it is for this reason that thin and cheap dressed couples are to be found on every seat and in every shady nook. People love and feel at their best in spring time; and spring time, you know, is any time, for the song bird is

Old Mother Hubbard ebbs to the cupboard
To get her poor dog a bone,
But when she got there the cupboard was bare
Of Spring, she looked, and alone.
And so her poor dog got a cold stomach was.

"Ye Rescue and Yeshoo"

Seth and Si

(By Alfred Bingham)

Goodness me! If I didn't come nigh to forgettin' what I was doin' when I called you. It makes me sorrit. It was mighty careless of me, but I'm so flustered I don't know whether I'm on my head or my heels. Why, I've been here a half hour and more, and I ain't got no money. Yes, sir, I'm in a fix, I am. I'm in a fix. I've been where she's hid her last cent—I'll be bound she's—and I've spent good fat cent, but she dodged me, and I don't know I wouldn't have her if she would.

I find that ain't nothin' to do 'tis Tuppers—Seth an' Si. They lived near my father's farm, and I've known 'em ever since they seemed like—like. Why, I've known 'em ever since I've known myself, for make reasons as well as not, but I like Si best, maybe 'cause he looked sendee like' more'. Sometimes when they'd get to quar' it but we three'd be together, an' I'd take Si's part, an' Seth's, an' sometimes I'd take both sides at a time, over that foolish apple-orchard, an' when we got into a row over under an' I'd get into a kind of a fight, an' I'd get licked, an' then I'd go home an' tell mother I'd been fightin' with Seth an' Si Tupper, an' she'd say, "Why, Jonathan Peabody, you're ashamed of yourself, you're a man grown, and you ought to be ashamed of yourself, you're a man grown, and you ought to be ashamed of yourself, you're a man grown, and you ought to be

TOFIELD, ALBERTA, THURSDAY APRIL 11, 1912

Editorial Comment

The Civic Improvement and Industrial Committee is the first Committee of the Council to get in their estimate for the year. They want $1000, and propose to spend it wisely and well in the interests of Tofield and district.

The results of previous year's efforts of Tofield's Board of Trade are being felt already this season. It surely would be surprising if the efforts of the Board of Trade of 1912 should be relaxed.

Now is the time of high water in the above matter; take the tide at flood, and it will lead on to fortune.

Notwithstanding that the Municipal Committee on Civic Improvement can do much towards the advancement of both town and community, it cannot be gainsaid that a live active Board of Trade would not be of great assistance to this Committee.

The Conservative Government will be riding to a fall so long as it persists in retaining a high protection policy.

—CALGARY NEWS-TELEGRAM.

A ceaseless activity of our Board of Trade will give this district great opportunities for development, far beyond anything that has been put achieved.

WHY?

Why do people tolerate in their own party what they condemn in another?

Makers of History

For some months past it has been rather amusing to notice by the papers throughout Alberta the vast number of stores that are advertising as "Cash Stores." One might easily be led to believe that the merchant had lost faith in humanity. However, it is not exactly that though in some cases there may be some truth even in that. But there must be other and greater reasons. The many opportunities in the West to invest money have caught the most of us until just now ready cash is in a great demand. A great many have squeezed every dollar possible into some real estate deal or other investment, and are living on the prosperity of some good natured merchant. Of course there is a limit to his financial resources as well as any one else, and as a result he is driven to a cash system, and does not do it simple as a matter of choice. The final result will probably be a benefit to the country in general, but it will be hard on those who have speculated on their last dollar. But as for the man who has given his time and energy to his business, and the farmer who has given his best to his farm, they hold the future of the country in their power. No country has ever been built up by speculation, and Alberta will not be an exception. The men who are making Alberta, the greatest province of the greatest country in the world are the men who can see money under the surface of the virgin soil, and are going after it in a convinced and business-like manner. If you will drive out of Tofield a few miles anyone what man is the most progressive, has his farm well improved and always has a little cash, you will find it is not the man with that "far away look" and who is afraid some other fellow is getting rich while he drudges his life away on the farm, but rather that man "with a pleasant smile," and who can see joy and happiness in his comfortable farm home with its table loaded with good substantial food, his stock and well cared for cattle, his fine growing crops and its bright future, to me!

tillers of the soil know that the real of being the Makers of History.

W. F. STRONG.

Dr. de Van's Female Pills

A reliable Pills regulator; never fails. These pills are intended to powerful stimulant to the ovaries, and should never be taken by women during pregnancy, as miscarriage will surely follow. Price $5 per box, or two boxes for $10. To be had only from the Dr. de Van Chemical Co., 344 Dearborn Street, Chicago, Ill. Sold at Somer's Pharmacy.

Aid to Thoroughbred Stallions

The policy initiated in 1911 by the Department of Agriculture with reference to the granting of aid under certain conditions to the owners of Thoroughbred Stallions is generally meeting with approval and is accomplishing, in part at least, the objects sought when the policy was undertaken. Among other things, owing to the rigid conditions imposed, it is encouraging those maintaining really high class horses and is serving to organize the system of breeding followed in the different communities where Thoroughbred stallions are located. The stimulus given in this manner, to the use of Thoroughbred blood will, it is believed, lead to an improvement in the light horse stock of the country. Thoroughbred stallions, if really good individuals, may be expected to exert such an influence in the development of Canadian horses for saddle and harness use, as is greatly needed and greatly to be desired. The premium placed upon quality, soundness and prepotency, through the grants awarded by the Department is serving to check the use of unsuitable sires and is tending to conserve a type of Thoroughbred, the utility of which is beyond question.

While, as perhaps should be stated, it is not the intention of the Department to encourage the breeding of Thoroughbred horses or to develop a type in light horses approximating closely to that of the Thoroughbred, there is no question but that a strong infusion of Thoroughbred blood in the light legged mares of the country will be of considerable value in improving the quality of the stock got from them by stallions of the various light harness breeds.

Believing himself to be justified, therefore, in further prosecuting the policy begun last year, the Honourable Martin Burrell, Minister of Agriculture, has authorized the continuance of the grant, to be available for all Thoroughbred stallions, standing for public service during the season of 1912, which comply with the conditions imposed by the Department.

The conditions under which grants will be given are as follows:—

(1) All horses on account of which aid is given by the Department must be registered in the Thoroughbred Stud Book of the Canadian National Live Stock Records.

(2) Horses shall be of good unquality and conformation and shall be free from all hereditary unsoundness; three conditions to be ensured by submission annually to a thorough, careful examination either at the hands of the Veterinary Director General or such other members of the veterinary staff of the Department, or other persons as the Minister may from time to time appoint for this purpose.

(3) Horse so approved shall be duly and properly advertised to stand for service of mares, under the ordinary and general conditions usual in the districts in which they are to be kept, at an annual service fee (except in the case of Thoroughbred mares) of not more than $10, to insure, such service fee to become due and payable only when mares prove to be in foal.

Any person, firm or corporation owning or controlling any thoroughbred Stallion in regard to which all of the conditions above set forth shall have been duly and properly fulfilled, shall, on production of satisfactory evidence thereof and of the fact that a reasonable number of mares, other than thoroughbred mares, have been served during the season, be entitled to receive at the close of such season... ...um sum of $250. From the funds of the Live Stock Branch. If, in the event of a horse duly approved and registered as stated for service during the season, an approved substitute is deemed advisable by the man in the district, the Minister may, after due consideration of the circumstances, authorize the transfer of the subsidy above mentioned.

The necessary forms will b furnished on application to the Veterinary Director General and live stock Commissioner, Department of Agriculture, Ottawa.

THE FARMER WITH A PAY DAY

The importation of milk and cream into Manitoba from across the United States line is another strong argument in favor of mixed farming, and, particularly dairying.

The scarcity of milk in Winnipeg has necessitated the sending to the United States dairymen for cream which during the last year has been receiving 9520 to 1000 pounds of cream daily, besides large shipments of milk. The Winnipeg dairymen are ever more anxious for buyers to treat the country and purchase supplies for cash.

A similar condition exists about Edmonton, Calgary, and Lethbridge, as well as other cities in Alberta, and the milk problem will become a serious one for them unless more farmers go into dairying.

But

The attention of the farmers of Western Canada is being called to the positive necessity for intensive farming by the International Dry-Farming Congress. At the convention to be held at Lethbridge, October 21-26, one of the features will be addresses and discussions on mixed farming by some of the ablest and far-sighted business managers and agricultural experts.

The grain farmer only gets a pay day once a year—and some years the payment does not come around at all—while a dairy is a constant source of revenue. Whenever there's a crop failure the prospects, while a long, severe winter ahead, are generally serious, but the farmer who has a few cows and other live stock doesn't have to worry—he's on a steady payroll.

YOU MAY NOT BE A SOUR DYSPEPTIC

But Do You Enjoy Your Meals or You Dread Them?

Don't you often feel after a reasonably hearty meal as if you must have had a little more ballast than your ship needed? Just a little bit heavy? Not quite comfortable?

Then, too, you do not often approach a meal with the zest of earlier years. You feel as though your appetite needed a little coaxing. Supply a natural want in the shape of Dr. Von's Female Pills and you will find the long lost interest and fresh, pure air we would stand, so to speak, to meet our appetites.

If we cannot get them, the next best and most helpful thing to do is to use Dr. Von's Digestive Tonic. It isn't an experimental medicine. It is a well known Canadian. They're free for a consideration. Why not send for a sample? Why not buy a dose of Dr. Von's Female Tonic before you decide. You will be surprised at the result. Don't be afraid to try it, it will give you. Your food will look better to you—you will feel better and get more nourishment out of your food. It is free, too, after a fair trial. There's a lot of real comfort in a dollar bottle.

Royal Remedy Co., 344 Dearborn Street, Chicago, Ill. Sold by Somer's Pharmacy. The Tofield people have been so pleased with the results that they would offer them to our customers, but this cannot be done to be of any value for it.

Sold by C. E. JAMIESON, Tofield.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. Application must be made in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

W. T. Hall, for renewal of wholesale license in respect to the premises situate on the west half of lot 28, block 4, Vermilion.

Dated at Edmonton this 2nd day of April 1912.

L. F. CLARKY,
Deputy Attorney General.

The Town of Tofield

We have learned with deep regret that a report in a Stratford, Ontario, paper credits the Camrose special car party with some uncomplimentary remarks regarding the town of Tofield. The Camrose party were essentially boosters, not "knockers." They did not "knock" any place. Their work was to advance the interests not only of Camrose but of the entire district and every town in it. All the towns surrounding Camrose will benefit very greatly from the special car tour It cannot possibly be otherwise.

A great many Westerners and people who had seen West visited the Camrose car, and it was a common thing to hear these outsiders volunteering information. Some such person may have given opinions regarding Tofield, but certainly no reasonable utterance derogatory to that town came from the Camrose party.

We regret the incident, because none but the most friendly feelings have ever existed between Tofield and Camrose. The Camrose people know Tofield as a clean, healthy, vigorous town. It is magnificently situated. The Dominion census last summer gave it a population of 800. The Tofield coal mines are famous throughout the West. The Tofield citizens are alert, enterprising and progressive. No one could truthfully do other than boost Tofield as one of the very best.

The Canadian is sending a marked copy of this paper to the Stratford papers, and if any injustice has been done through accident or otherwise action will give us greater pleasure than to make the correction.

—CAMROSE CANADIAN.

CHAPTER XI. (Continued)

New Opportunities

RAFFERTY at once was getting into the fight. His motive may have been only a desire to help his friend, but it was probably something more than that. He was always ready for a scrap, and when later the meeting broke up he was still in fighting trim. He showed it when he hastily accosted Mr. Hafferty and Mr. Downey as they were about to enter the latter's automobile. Mr. Downey spoke calmly and directly to the point, as was his custom.

"Mr. Hafferty," he said, "I have been informed that you have been using your influence with the police to prevent the holding of meetings in this city. I am informed that you have gone so far as to threaten to make him suffer if he persists in holding them. I have come to you to say that I am a friend of Mr. Rafferty and for that reason I am interested in his welfare. I have come to say to you that if anything should happen to Mr. Rafferty I shall hold you responsible for it, and I shall be able to stand on his own feet. He has been informed before that you have been using your influence against him, and at night when either a trade or a profession. This was especially true in Northeast, I said, which, as you know, is the home of the working classes. There are now 1st trained nurses in this city, and the number is increasing every day. That has not been the case if about ten years ago. Then there were only a few, and they were not very well trained, and the people were afraid of them. Now they are well trained, and the people are not afraid of them. They are in demand in all classes of society, and the advantages I had ever hoped for have been realized in the fullest degree.

I remember some horrible hours I spent in that little room, when I looked forward to the end of my life there. Ruth would sit by my bedside for hours and try to turn my thoughts to other things by telling me stories. I can see now that my thought what would happen to her and the boy if anything should happen to me, or what would happen to the boy if anything should happen to both of us. The rays of Mrs. Downey's influence are now shining on me, and the other possibility was never voiced. Ruth's determination to come down with pneumonia and so die with me was the strongest proof of her love. I rouse myself, by applying my will to the task, and I am going to get well. I am going to live for the boy and for Ruth. I am going to live for my temperance every night and every morning, and I am going to live for my temperance every night and every morning, and I am going to live for my temperance every night and every morning, and

(CHAPTER XI. continued)

New Opportunities

RAFFERTY at any rate was getting into the fight. His shoulders have been seldom more square than his restored ruddy ageing first fresh air in months drew to get into the game. Here he had come to a new country where every man had not only the chance to win with the talents of his hand, the will, the nerve, the patience, but where he had a vote in them. Rumour had it that many of his pioneer wore entrenched in the Tory camp, but the back of them that his speech on a certain night had produced a favorable effect.

At any rate I came away from the meeting with the impression that interest in politics than I had ever felt in my life. Instead of seeming like an abstruse or vague issue it seemed to me pretty concrete and pretty vital. It centered me and my immediate neighbors. There was a man who was going to Congress not as a figurehead, but as a man to do a certain piece of work. He was to be my representative, and I was to be responsible, in a way, for his actions. I had a say in the matter. I was not a voiceless, nameless unit. I had a wife and one child, and I was going to have another. That is why I felt then I felt then either.

As I walked home through the bright, chilly streets, which were still as busy as they would be at midnight, I felt that this was my world and my city and my country. I was a member of a vast corporation. I had been for a rally and had shaken hands with Haverty.

Haverty's only comment was a disdained grunt as she smelled the rank tobacco smoke that clung to me.

"What's his business?" I asked.

"A contractor," he said. "He does big jobs for the city."

He let himself loose on what Haverty proposed to do for the people if elected. He would have the government administer the dredging of the harbor thereby giving hundreds of jobs to the local men. He would do this thing and that all of which had for their object apparently just that end in view. But I was a direct personal appeal to every man voter. In addition to this, Rafferty let drop a hint or two that showed that the Haverty machine was to be filled discreetly from the ranks of the wavering. It wasn't more than a month later, by the way, that Rafferty himself was appointed a foreman in the firm of Sweeney Brothers.

But apart from the merits of the question, the thing that impressed me was Rafferty's earnestness, the delight he took in the contest itself, and his activity. He was very much disappointed when I told him I wasn't even registered in the ward, but he made me promise to look after that as soon as the lists were again opened and made an appointment for the next evening to take me round to a rally to meet the boys.

I went and was escorted to the hotel by Rafferty and Mr. Dooley. We walked half way into Night of Glory. Through the heavy slum smoke which filled the room I saw the table decorated with American flags and the trained singers perched at reverent and rather local pedestals. Large dark banners proclaimed in bank ink the current catch lines of the campaign. At one end there was a raised platform, the rest of the room was filled with wooden chairs. My first impression of it all was anything but favorable. It looked rather tawdry and cheap. The men themselves who filled the room were pretty tough-looking specimens. I noticed a few traitors of the Lee type, one of two shabby genteel Jews, but for the most part these men were of the type known as the solid and hard proletariat. They were the backers—the ward heelers. I certainly had out of pure curiosity taken me to see such a motley horde out of place. There was a freshness, a hope about him, that his talents here don't have.

As he shoved his big body through the crowd, they greeted him by his first name with an oath or a joke and he tossed back at them with a broad wave of his hand. It was evident that he was a man of some importance here. He worked a passage for me to the front of the room and such slap until he reached a point where he could be seen by all parties at once. I was delighted to find about a man of about Rafferty's size in Tuxedo had fairly a good-looking fellow, with a handsome, good-natured face though a bit heavy. His eyes were overpowering. He was the first to welcome Rafferty. He bobbed with a familiar,

"Hello, Jim."

Jim seized my arm and dragged me forward.

"I want ye to meet me friend, Mister Carleton," he said.

Sweeney rested his grey eyes on me a second, saw that I was a stranger here, and stepped forward instantly with a hand that was surprisingly soft upon which a trace of bergin.

"I'm very glad to meet you, Mr. Carleton," he said.

I don't know that I'm really impressed and I flattered myself that I wasn't easy-going a politician when I saw one, but I want to confess that there was something in the way he grasped my hand that instantly gave me a disposition to friendly feeling towards Sweeney. I should have said right then and there that the man wasn't as black as he was painted. He was neither any blacker than the average politician. He was a man of the world, and he had a way with him. He looked you straight in the eye when he felt as though he were very sincere. He had a quiet, good-natured manner that was very winning

Church Union Analysis

Toronto, April 9.—The Church Union Committee of the Presbyterian Church in Canada met this afternoon and received reports showing the total vote cast was as follows: Eldership, 245 for union 2,679 against; members, 106,755 for, 60,578 against; adherents, 57,176 for, 14,174 against. Ninety per cent of the elders and 54 per cent of the members voted. A resolution was passed expressing the opinion that the lay vote of the organic union demanded definite action toward closer union, although the strong minority vote indicated that organic union was not feasible at present.

G.T.P. Tickets to Europe

Prepaid ocean and rail tickets from Great Britain and Europe over all lines by all ports. Passengers travelling via G.T.P. and G.T.P. given special attention through at 1 survey, and the Grand Trunk British officers will arrange for most convenient steamer on any line. Purchase from nearest G.T.P. Agent.

MIXED FARMING CERTAIN

In every country progress has been attained only against opposition. Systems of farming, as of everything else, are improved only as the force of circumstances demand prejudices die out. Everywhere the there has been the assurance that the newer, progressive diversified methods, that made for permanency in agriculture, would and pay." But the men who raised that cry one by one had to d rop out of the race or change their systems.

Mixed farming in Western Canada will pay, and in many of our older districts it will soon be the only kind of farming that will pay. Weeds and soil drifting and mortgages and land improvishment by and bye will put the man who says mixed farming doesn't pay out of business, and the mixed farmer will then buy his land and [illegible] out of it—by "diversified farming"

It is time we let us correct our erroneous wrongs, but don't let us say that progressive farming methods are a mistake—New-West Farmer, Winnipeg, Manitoba.

White Star Line SS. Titanic, on Maiden Voyage with 2200 Souls on Board, strikes Iceberg off Newfoundland Banks and goes down in 3 hours 50 minutes. 700 saved.

Monday, April 15. The greatest disaster in the marine history of the world occured last Sunday night off the New foundland coast when the White Star liner Titanic, on her maiden voyage across the Atlantic from Southampton to New York, struck an iceberg and went down within four hours. She had on board over 1300 passengers, amongst whom were many people prominent in the world's affairs.

The accident happened at 10.25 Sunday night. Immediately the C.Q.D. (the wireless call for assistance) was flashed across the waters. Wireless at Cape Race picked up the message and the Allan liner Virginian, the captain of which advised that he was proceeding for the scene of the disaster. The Virginian was then about 450 miles away from the Titanic. The Olympic and Baltic, the latter being about 200 miles away, both reported making haste to the relief of the distressed ship.

The last signals from the Titanic were heard by the Virginian at 12.25 a m. They were labored and ended abruptly.

Tuesday, April 16.—Shortly after 7 o'clock last night there came flashing over the wires from Cape Race, within four hundred miles of which the liner in the ice-bound Newfoundland region had struck the berg which brought her to grief at 2.20 o'clock Monday morning, three hours and fifty-five minutes after receiving her death blow the Titanic had sunk. The news came from the steamer Carpathia, relayed by the White Star liner Olympic, and revealed that by the time the Carpathia, eastward bound from New York and racing for the Titanic on a wireless call, reached the scene the steamer had sunk. Left on the surface, however, were lifeboats from the Titanic and in them were some 675 survivors of the disaster. Those according to the advices, the Carpathia picked up, and are now being brought to New York. For the rest, the scene as the Carpathia came up was one of desolation. The $10,000,000 floating palace, on which nearly 2200 passengers had been en route to the country, the biggest ship in the world had gone down, snuffing out in her downward plunge hundreds of human lives.

FEW OF MEN SAVED

A significant flaw in the Cape Race dispatch was the announcement that of those saved by the Carpathia nearly all were women and children. Should it prove that no other vessel picked up any passengers from the sinking liner, this might mean that few of the men on board had been saved, as the proportion of women and children among the passengers was large. The same facts would likewise spell the doom of practically the entire crew of 860.

In the cabins were 250 women and children, but it is not known how many there were among the 739 third class passengers. In the first cabin there were 125 women and 15 children, and in the second cabin 70 women and 8 children.

Notable persons who were on board whose fate was in doubt in lack of definite advices as to the identity of the survivors, were Mr. and Mrs. John Jacob Astor, Major Archibald Butt, aide to President Taft; Chas. M. Hays, president of the Grand Trunk Railway of Canada, his wife and daughter; W. T. Stead, Benj. Guggenheim, F. D. Millet the artist, and J. G. Widener of Philadelphia. Mr. and Mrs. Isadore Straus, J. B. Thayer, vice-president of the Pennsylvania Railway; J. Bruce Ismay, Henry B. Harris, and Col. Washington Roebling, builder of the Brooklyn Bridge

New York, April 15.—The text of the message from the steamer Olympic, reporting the sinking of the Titanic and the rescue of 675 survivors, which rushed here late tonight, also expressed the opinion that 1,600 lives were lost

"The loss is to likely total 1,800 souls," the despatch read in its concluding sentence. It is hoped and believed here that this is an error, unless the Titanic had more passengers than was reported.

The list as given out showed 1,310 passengers and a crew of 800, or 2,170 persons in all. Deducting 675, the known saved, would total a loss of 1,495 persons.

The Olympic's despatch follows: "The Carpathia reached the Titanic's position at daybreak and found boats and wreckage only. The Titanic sank about 2.20 a.m. in 41.16 N.; 50.14 W. All her boats are accounted for, containing 675 souls saved, some of the crew and passengers included. Nearly all the saved are women and children. The Leyland liner California remained, and is searching the exact position of the disaster. The loss likely will total 1,800 souls."

Thursday, April 18.—The latest news relating to the appalling disaster is that the Cunard S.S. Carpathia was the only ship to reach the scene of the great tragedy in time to save life. On board are 710 souls, mostly women and children. The Carpathia is expected to reach New York to-night. In the meantime the world will have to wait for the particulars of the catastrophe

Great grief is felt in all the Anglo-Saxon, nations, and many European countries for amongst the list of missing ones are many prominent people of all these countries. Charles M. Hays, president of the Grand Trunk and G.T.P. is believed to be lost inspite of unanimity in message to the contrary; John Jacob Aster, F. D. Millet, the American artist; Major Butt, aide to President Taft; W. T. Stead, London journalist; Benj. Guggenheim, and many others.

Local and General News

A. McMullen is building a residence on 2nd Avenue West.

Born to Mr. and Mrs. Jas. Easten at Tofield on Tuesday, April 9th, a son.

G. M. Abbott and wife of Canastota N. Y. arrived in Tofield early this week and are guests of the former's brother, Lew Abbott, and Mrs Abbott of 4th Ave. East. This is the first time in 17 years that brothers have seen each other.

S. A. HALL, Owner

Miss Adella Boreen spent her Easter vacation at home, returning to school at Edmonton last Monday evening.

Sportsman who have in view the capture of wild geese should bear in mind that a license is necessary. The bird game license purchase last fall are of no value in 1912, but a license purchased now entitles the owner thereof to his bird game sport throughout the entire year 1912. Local sportsmen may obtain licenses from any game guardian or the R. N. W. M. P.

A. Foster of the Dobell Coal Co. left last Monday evening for Edmonton. He leaves next Monday for England on a several months trip after which he intends to go into the general agency business in Edmonton. Mr. Forster will be missed in Tofield's sporting circles as he was at all times an enthusiastic sport, taking a hand in all its phases. Last year he was one of the Foothill Club, a place he will be missed from this year.

While the announcement of the following wedding may be late, it may be of interest to many of our readers as one of the four contracting parties is well and favorably known for years in this community. The wedding took place on the 28 th. Feb. last, at Alberta College, Edmonton, Rev. Prof. Riddell, officiating, of May Gertrude, daughter of Mr. and Mrs. Daniel Francis, of Tofield and C. H. Hodges of Deer Creek, Sask. The young couple reside at Sask.

Dont be surprised if you have an attact of rheumatism this spring. Just rub the affected parts freely with Chamberlain's Liniment and it will soon disappear. Sold by all dealers.

Budget of Live News from Growing Section of Tofield District

Newcomers Arriving

Spring operations have been well under way for the past fortnight, and most of the wheat to be sown in this section has already been put in. Owing to the scarcity of seed wheat in this community this spring the acreage sown to wheat will be somewhat limited, but probably 25 per cent of the crops will be in spring wheat.

All farmers are busy plowing and getting ready for the seeding of oats and barley.

P. B. Andersen has purchased 1 head of heavy oxen, with which he will do a lot of plowing and breaking during the coming season.

Mr Boreen moved into his new house on March 1st last. This is one of the most imposing farmers residences in the country.

Rev. Mr. Ronning returned recently from a protracted visit to the United States. He had contracted an attack of rheumatism from being exposed to extremes of weather, bad roads, music, etc., while travelling there in the interests of the Chinese missions.

R. B. Hilding, formerly of Sedgewick district, recently moved over from that section to the Tofield district, where he has purchased a farm in the Bardo section from John Anderson. He also is a newcomer, and so he made his move. He is well pleased with the prospects here.

A. O. Tretvold recently sold his farm in Farmington section to Neb. Smeith, late of Mudiver, Wisconsin, at $30 per acre. This is a good improved farm and well worth the price. At present Mr. Smeith is staying with Thomas Read, Bardo.

A. O. Tretvold will shortly move to his new farming pre-emption east of Hardisty.

John A. Johnson has built a residence on his farm 2 miles east of Bardo and has moved into it.

Pete Haugen has returned to Bardo from Round Hill, where he was working at the mines as engineer. He has moved on to his farm and will settle down.

Rev. Thos. Anderson, Bardo's friend Old Man, and who is now in his 93rd year, preached a sermon at the Church on Good Friday and another on Easter Sunday. Mr. Anderson is remarkably vigorous and healthy in spite of his extreme old age.

M. Hinsbroker and family, newcomers from Iowa, have settled on farm lands a few miles east of Bardo. Lawrence Hobson, who has farm land in this section, returned from a few months trip to Iowa a few weeks ago.

Oddfellows Anniversary Parade to Church

Sunday, April 28, 1912

Cordial invitation is hereby extended to all O.U.F. Boys in Tofield and district to attend with the members of Tofield Lodge No. 13, I.O.O.F., their Noble March that to Divine Service on Sunday morning, April 28, 1912, at the hour of 10.15 a.m., from the Lodge Hall, Main Street, Tofield.

Lakeview Rebekah Lodge No. 20, I.O.O.F., will also parade to divine service with the Oddfellows on this occasion. All sisters Rebekahs in Tofield and district are invited to attend.

LAKEVIEW REBEKAH LODGE, No. 20, I.O.O.F.
TOFIELD LODGE No. 13, I.O.O.F.

Canal Worker's Experience

Some time ago I came to this place to work on the canal and through the inclement weather and exposure contracted the worst kind of rheumatism. The pain would fill my forehead so that I couldn't see. It was just awful. I wished a dozen times in town and was advised to use a bottle of Nerviline. That was the best advice and the best medicine I ever got. I will always recommend Nerviline for any ache or pain. It is so strong and penetrating it is bound to cure

(Signed) A. B. GROUT.

Trenton, Ont.

Doctors will tell you that nothing but the purest and most healing antiseptic drugs are used in Nerviline—that's why it is so safe for general family use for the baby as well as the patient. If you haven't tried Nerviline do so now; your neighbors are almost sure to know of its wonderful merits and uses

That Reminds Me

Fond Mother—"To be quite frank, doctor, the poor girl has been eating her heart out."

Doctor—"Ah, that's very important. I'll have to order a change of diet."

* * *

Miss Watson—"Did Mr. Sark say in so as I entered the drawing-room last night, Clara, "is that the beautiful Miss Watson?"

Clara—"I'm, dear, with the emphasis on 'that'."

* * *

"You know," said the minister, "that money is man's worst enemy."

"Well," replied the man, thoughtfully, "I suppose that is why some people like him for the enemies he has."

* * *

The baby's crying had awakened every occupant of the room. All this was unknown to the colored individual, who suddenly put in appearance and said:

"Time call for breakfast."

* * *

"I have noticed," said the man sitting opposite, "that the prettiest girls always marry the biggest fools."

"Say no more, Mr. Blowhey," rejoined the fair maiden. "I appreciate your friendship, but I can never be your wife."

* * *

Proud Parents—"How have grandpa and baby been?"

Dusty Rhodes—"Well dat's"

P. P.—"Did some doctor call on you?"

D. R.—"Not me. My trouble comes afore my meals."

* * *

"How fat and well your little boy looks!"

"Ah, you should never judge from appearances. He's got a pain-killer habit at the age of five and he has been using it nearly a year."

* * *

"What did he say about those charges of grafting which have been brought against him?"

"He didn't touch on that subject, but he made a splendid defense and shall be preserved."

* * *

He—"I know how this catastrophe has occurred, and it's a fair wad for a short friend I should like to help you. I will buy your furniture for 200 francs."

She—"You're very kind, but I have had an offer for 225 francs."

He—"Then I'll give you 250 francs."

She—"You're very kind, but I have had an offer for 275 francs."

He—"Then I'll give you 300 francs."

She—"Sold!"

POOR ST. ETHELREDA!

St. Ethelreda has been unfortunate, in many respects, but in none is perpetuated to the disadvantage of the saint herself and the church over which she reigned in the Sandwich Islands, than in the case of Kamehameha—a fair wad for a short friend I should like to help you. I will buy your furniture for 200 francs."

She—"You're very kind, but I have had an offer for 225 francs."

He—"Then I'll give you 250 francs."

She—"You're very kind, but I have had an offer for 275 francs."

He—"Then I'll give you 300 francs."

She—"Sold!"

POOR ST. ETHELREDA!

TOFIELD, ALBERTA, THURSDAY APRIL 18, 1912

Editorial Comment

There are none who know of it but will admire our good friends from our sister town, Camrose, for their boosting enterprise in connection with the eastern tour of their special car and party, which returned last Friday week. Tofield has basked on with pleasure in the united efforts put forth by the Camrose boosters to place their town before the world as the one centre around which the world of activity revolves. Any move put forth by the citizens of any centre or community towards the improvement and betterment of their community has our hearty approval. But, surely the earth is too small much less this portion of Alberta, for any community to issue derogatory statements about any other community. The successful efforts of any community to draw the attention of settlers and capital from the East and elsewhere are bound to be of more or less benefit to adjacent sections and towns. The article under the heading "The Town of Tofield" was published last week from the Camrose Canadian, and was inspired by a report in Stratford to the effect that the touring Camrose-ites had knocked Tofield while at that Ontario town. In conversation with Geo. P. Smith, M.L.A., of Camrose, who was largely instrumental in organizing that party, THE STANDARD heard a most frank denial of the allegations. We are, indeed, loath to believe that our good friends from Camrose made deprecatory statements against the hustling growing town and district. Any such remarks would apply to both towns, as Camrose is but 20 miles or less from Tofield, and the districts are much the same, and even Tofielders might be excused if they allowed to the position that their district was the best in Alberta. That is the peculiar doctrine of almost every homesteader in the West. His particular quarter-section and district are the best. This but emphasizes the fact that all portions of the West, and particularly of Alberta, are, practically speaking, equally productive of great crops, great results from diversified farming, equally blessed with one of the finest climates under the sun, and equally deserving of the attention of all who intend to come where "Nature yields a harvest if she's tickled with the plow."

It might be said that Tofielders are already aware of the strong rumor emanating from Stratford about alleged statements of a Camrose representative about Tofield. The following abstract from a letter from the Secretary-Treas. of the Canada West Townsite Co., Ltd. of Winnipeg, to the Secretary of our Board of Trade alludes to the matter, and shows how such a statement, even if made in haste, can do harm. If such a statement were made, it can only be felt that it was not done wilfully, or at least by any one in his sober senses:—

MR. S. NICHOLSON
Tofield, Alberta.

MY DEAR MR. NICHOLSON,—As you know, the Camrose Board of Trade has had a special car advertising Camrose and vicinity touring Eastern Canada for the past few weeks. Recently this car was at Stratford, Ontario, where we have sold quite a number of Tofield lots. Some of our clients there who found out that Camrose was not far from Tofield asked the man in charge of the Camrose car about Tofield. Mr. A. J. Bates, who is our representative at Stratford and is a very reliable young business man, writes us as follows:

"There was an exhibition car here from Camrose, and their report of Tofield is not very encouraging. Several clients were at the man asking questions, and he said the population was about 100, and that the quarrying of coal was not proving a success, and, so far as he knew, gas was a false alarm."

Now, that is a nice neighborly knock from Camrose, isn't it?

(Signed) CANADA WEST TOWNSITE CO., LTD.
Per JNO. M. HAZELTON, Secy. & Treas.

Tofield has passed the 600 mark in population. Many cars of settlers and effects have come in already this spring. The coal mines are a great success and greatly increasing their plants. Indications point to several industrial enterprises starting up in the near future. Indications for gas are of the best. Electric light and water works are contemplated for installation in short order.

Already the wheels of conjecture are being put in motion in political circles within the provincial constituency of Vegreville in both the political camps. On the Conservative side it is fairly assured that Fred Morrison of Vegreville will be the nominee of that party, while in the Liberal ranks no less than three candidates are spoken of as aspiring for the nomination. These are Dr. Goodwin of Vegreville, who has been known to be after the honor for some time; Mr. Stanton of the same town, and Jos McCallum of Mundare, who is spoken of as the most likely Liberal to carry the constituency. It is highly probable that a still popular official will be selected between the above mentioned gentlemen when the Liberal convention comes on. That Mr. Morrison's candidature will be contested is looked on as altogether improbable. His supporters at the last provincial election were legion, while some Liberals declare that, with McCallum carrying their flag, they will have a walk-away.

The I. P. Baker no doubt but that at the time of another redistribution her constituency will have attained such numbers that they will be entitled to a constituency along this line, when they will be able to have a G.T.P. man as their representative.

Glenn n. [illegible] not yet now. Probably Council might wisely take [illegible] night and declare the civic holiday for the above [illegible] date.

Centre of Population West of Great Lakes

Sir William White says fifteen years will sway balance of power to Prairies.

"Transportation is the greatest problem we have to solve in the West, but if the railways and the Government handle matters well, fifteen years, or at most twenty, will see more people west of Lake Superior than you have in the East."

Such was the remark of Sir William White recently when interviewed. Although Sir William has retired from active operation of the C.P.R. he is still a member of the directorate and takes great interest in the development of the of the western provinces.

He declared that with the C.N.R. and G.T.P. completed he had no doubt as to the capacity of the railways to handle the crops for many years to come, and there would be no large quantity of grain damaged owing to the lack of time in which to handle it as there had been this year.

Sir William also remarked that he had been ongoing mused forming for years, but evidently with little result. He considered that the position of the West in this regard was ridiculous, as thousands of dollars worth of produce was being shipped into the prairie provinces each year which could easily be grown there.

He looked to Manitoba to first adopt mixed farming on a big scale but even this could not be expected until the best of the great wheat territories in Saskatchewan and Alberta had been taken up.

Rural Depopulation Being Investigated

Government finds that Older Settlements have lost most heavily.

During the recent session of Parliament a Committee of the Upper House conducted an inquiry into the alleged rural depopulation of the rural section of Canada. The report made by the Committee shows that in taking the Dominion as a whole, the rural population increased 554,436 in the past decade, all this increase was confined to the western provinces and Quebec.

The decrease of rural population in the other provinces was not less than 74,979. Ontario alone showing a decrease of 50,969. Nova Scotia of 14,000, Prince Edward Island of 9,546, and New Brunswick of 385, with a reduction of population of 13,440 in the West.

While the country districts are being thus depopulated, the urban districts have increased 774,843 in the decade, and now equals the entire rural population, including farmers' sons and laborers.

The suggestion is being made in the eastern press that a portion of the half million dollars voted for aid to agriculture throughout the Dominion might be invested in assisting the canvas which are producing the depopulation of the country districts.

ONLY ONE CROP IN A LIFETIME

This is generally the case with that short, pungent, the breast lure. It is the result of unbearable conditions, to which it is unnecessary to say that Hick-ti-tone and dear sister—and it's one of the hardest things in the world to get another crop to grow.

Like plants, it thrives best when it has plenty of fresh air. Indoor life, close-fitting hats and caps are all unfavorable to its growth.

Like plants, again, it needs cultivation to keep it in a healthy and vigorous state. If every one has time to brush it two or three times a day, there would be very few of the heads where the little hair left in brush and brushes.

Not many people, however, can spare the time to look after the hair properly. The next best thing is to rub a little Hicks-ti-tone every day or two.

Hicks-ti-tone is a happy combination of antiseptics and stimulants which will keep the scalp healthy in a surprisingly short time. It removes dandruff, replaces fading and irritation with cool comfort, gives new life and vigor to the hair roots and a resulting softness and lustre to the hair. Used faithfully, it will stop the hair from falling and prevent baldness.

Ask us about Nyal's Hicks-ti-tone. There is a good deal to know about hair treatment, and we do know the value of Nyal's Hicks-ti-tone. 21

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties: Must reside six months in each of six years from date of homestead entry (including the three required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties:—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this sub-division. Lots facing South on Cookson Avenue will be ideal for residential purposes.

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build there in 1912

weekly newspaper of Southern Alberta.

At the general election of 1909, Mr. Buchanan was elected a member of the Provincial Legislature, and soon afterwards was appointed minister without portfolio in the cabinet of the Government, a position which he occupied until the general election of 1910, when the Liberals were defeated at the polls. Mr. Buchanan was not a candidate on this occasion, but was appointed to the Legislative Council, a position which he occupied until 1911, when he retired from politics for the time being.

LOUIS P. PELLETIER

It is recognized that the selection of Mr. Pelletier as head of the Post-Office Department is one of the successes of the Borden-Laurier-building efforts. A native of Trois Pistoles, Province of Quebec, he was born in 1857. Mr. Pelletier had his education at St. James' College, Montreal, and was graduated in 1874, carrying off first prize amongst other honors. Prizes in Greek, Waiss gold medal (other medals followed, including the Marquis of Lorne award, also of gold, which came as the result of a good showing at Laval, from which our new head of the postal department graduated in 1880.

Mr. Pelletier was called to the bar in the latter year and commencing practice in Quebec, at once began to make good in business. In 1896 he made a try for provincial honors in Montmorenci Co. when he failed to carry the Conservative necessary majority, but a couple of years later he was elected to the Legislative Council two years later. This honor, how-

(CHAPTER XII. (Continued)

Our First Visitor

NOW if our thoughts ever took on a turn to could about quite calmly about it. It was impossible for me ever to think of Ruth as any. My mind couldn't grasp that. But I could think of her as a woman who would find her own husband and some one else's husband. And I had dinner on at the same time. I was glad that was just as good warmed up, after all. Then Ruth made her stews and soups while waiting for the bread to bake and boil her rice or make her cold puddings while we were eating. When that stove was working in the house with company it was the very torch of it that wasn't working. As a matter of fact, we never opened over half an hour on her dinner evenings, and by the time the breakfast dishes were washed she was through with her cooking until then.

She must be bad even in little things when make one dish do the work of three. She never washed the dishes until she was through with it for the day. And she'd find the time at odd moments during her cooking to wash those dishes as they came along. If she spilled anything on the floor she stopped right there and there and cleaned it up with the rag until that when breakfast was served, and then she'd do a thorough job of it. She never put a dish in the cupboard that was not dry, and she was the busiest housekeeper I ever saw. She worked with her head, both hands, and her feet. An idle moment was a thing unknown to her, and when she was through she was through.

When she got up in the morning she looked exactly like what she had to be for the day. Just how she was going to do it I don't know, but when she was going to be out you could bank that the things at night and she'd be ready to step out just as fresh as she had dressed. She thought ahead. That's a great thing to master in any business.

In my own work, the plan I had outlined for myself I developed day by day. At the end of three months I had my own office. My father's letter had then learned was a help to me. Not only did I find that I was studying their language pleased me as a better footing with my fellows. They seemed to receive it as a compliment and feel that I was taking a personal interest in them as a race. My desire to practice in their country was always a point of introduction to a newcomer.

I talked with them, learned their customs, and found out what made them tick. I was a student of human nature, and I found that they worked and what pay they got in Italy, how they lived and what they knew, how they secured their jobs, what they hoped to do, eventually, where they lived, how large their families were, how much it cost them to live, and what they ate. I inquired as to what they liked and what they disliked about their work, what they considered fair and what unfair. I got the money out of the ground but that wouldn't have amounted to much if I had all done for nothing except to keep the machine moving from day to day. The dollar she saved was worth more than a hundred that she spent, and the money I won the most benefit from which assisted them. They say a penny saved is a penny earned. To my mind a penny saved is worth to me at this time every cent of a dollar.

So Ruth was not only an active partner but in time was another side to the game that appealed to her.

"The thing I like about our life down here," she said to me one night, "is the chance it gives me to put something of myself into every single detail of the home."

I didn't know what she meant because it seemed to me that nothing of what she had always done. But she was in her head when I said so.

"Well, you'll have a servant girl, you must have done whatever was done," I said.

"I didn't have time to pick out the food for the table," she said. "I had to order it of the grocery man. I didn't have time to make as many of your clothes as I wanted. Why I didn't even have time to sew."

"Then, you've had a servant girl, you must have done whatever was done," I said.

"No, I haven't had a servant girl, and I have done whatever was done," she said.

"I suppose she felt like that because what she did for me doesn't just worth-while. She ate a hearty breakfast.

But she was very much and made me like it when a meal is done, to the notion that I like what she has all her own.

"It's that think me a pig, Billy," she said. "That I like it. I like to look at all myself every single potato you peel for me. I like to pick out every leaf of lettuce, every apple I eat. I like to feel as though I was doing something for you."

"Should I?" I said.

But she wouldn't let me finish it.

"No, Billy," she said, "I'm understand what all that means to me, how it makes me a part of you and you a part of me. And I like to think that in everything you wear there's a stitch of mine right close to you. And that when you and the boy are out at night I'm touching you because I made everything close for you with my own hands."

It makes my throat grow lumpy even now to remember the smile with which she looked up into my face as she said it. She was so she said it. She made me feel like a little child and either time she made me feel like a giant. But whichever way she made me feel at the moment, she always left me wanting that I had in me every good thing a man can have so that I might be half worthy of her love. There are times when a fellow knows that he can be doesn't count for much as compared with any woman. And with me it was always that way with Ruth. I tried to do my best by her those days and have tried to do that ever since, but it makes me ache to think how little I've been able to give her of all she deserves.

In her housework Ruth had developed a system that would have made a fortune for any man if applied in the same desire to his business. I learned a lot from her. Instead of going at it her tasks in the haphazard fashion of most women or doing things just because they were customary, she studied and did them a certain way, she used her head. I've already told how she did her washing little by little every day instead of waiting for Monday and one memory-crammed down half a day. That's a fair example of her method. She was always looking forward and planning ahead. She was a wonder at it. She was never caught napping. She had dinner on at the same time every day, that was just as good warmed up, after all. So then Ruth made her stews and soups while waiting for the bread to bake and boil her rice or make her cold puddings while we were eating. When that stove was working in the house with company it was the very torch of it that wasn't working. As a matter of fact, we never opened over half an hour on her dinner evenings, and by the time the breakfast dishes were washed she was through with her cooking until then.

She must be bad even in little things she'd make one dish do the work of three. She never washed the dishes until she was through with it for the day. And she'd find the time at odd moments during her cooking to wash those dishes as they came along. If she spilled anything on the floor she stopped right there and there and cleaned it up with the rag until that when breakfast was served, and then she'd do a thorough job of it. She never put a dish in the cupboard that was not dry, and she was the busiest housekeeper I ever saw. She worked with her head, both hands, and her feet. An idle moment was a thing unknown to her, and when she was through she was through.

When she got up in the morning she looked exactly like what she had to be for the day. Just how she was going to do it I don't know, but when she was going to be out you could bank that the things at night and she'd be ready to step out just as fresh as she had dressed. She thought ahead. That's a great thing to master in any business.

I talked with them, learned their customs, and found out what made them tick. I was a student of human nature, and I found that they worked and what pay they got in Italy, how they lived and what they knew, how they secured their jobs, what they hoped to do, eventually, where they lived, how large their families were, how much it cost them to live, and what they ate. I inquired as to what they liked and what they disliked about their work, what they considered fair and what unfair. I got the money out of the ground but that wouldn't have amounted to much if I had all done for nothing except to keep the machine moving from day to day. I've already told how she did her washing little by little every day

(To be continued.)

ASIA THE HOME OF PROVERBS

Asia is the continent of proverbs. It has well been said that "proverbs are sown wit and all sense wisdom." Over on the other side of the world, in India, you meet with many epigrammatic sayings, and one soon comes to realize the great inclination of the mind to think and speak in the shape of proverbs.

The Indian deba is a strange thing to those are rhymed, and the rhymed proverbs are in many forms and combined passages of the poetry of Alexander Pope. Hindi is a language of proverbs. Every sentence is a proverb, and as a result the reader may often make many pages quotes as a performance the Indian mind takes delight in. The Arabic is also a language teeming to be poten out of a Bible with proverbs, and the Koran is a beauty and not a defect to have a proverb. Persian is also a land of proverbs and the Persian poets are the home which the rules adopted by the International Conference in London in November, 1905, as to colorization, the printing of maps, and other details, will be expressed in maps there already adopted by other sheets in the great standard map of the world. France and Great Britain are mapping their African colonies on the same scale. Dr. Henry Gannett, Geographer of the United States Geological Survey, has prepared a system of topographic charts, embracing parts of Eastern Asia, which will be adopted by the Japan Government. Russia is to move in the convening of the London International Conference that it has placed the project upon a practical basis.

The idea of a standard map of the world was first proposed by Prof. Albrecht Penck at the International Geographical Congress in 1891. He clearly showed the advantages that would result from the adoption of such a course in producing a world map on a uniform plan. The idea was not accepted, however, until 1909, when Dr. Gannett, Chief Geographer of the United States Geological Survey, presented a plan which was approved by this and other countries. Germany, France, Great Britain, Germany, and France are now preparing large scale maps of their colonies. Little practical progress, however, was made in the matter of a standard map before they knew of the white man. Some years ago a number of men met and began to illustrate his wanderings and adventures in pictures. Some of these pictures are interesting, for they were first that I was studying their language pleased me as a better footing with my fellows. They seemed to receive it as a compliment and feel that I was taking a personal interest in them as a race. My desire to practice in their country was always a point of introduction to a newcomer.

I talked with them, learned their customs, and found out what made them tick. I was a student of human nature, and I found that they worked and what pay they got in Italy, how they lived and what they knew, how they secured their jobs, what they hoped to do, eventually, where they lived, how large their families were, how much it cost them to live, and what they ate. I inquired as to what they liked and what they disliked about their work, what they considered fair and what unfair. I got the money out of the ground but that wouldn't have amounted to much if I had all done for nothing except to keep the machine moving from day to day. The dollar she saved was worth more than a hundred that she spent, and the money I won the most benefit from which assisted them. They say a penny saved is a penny earned. To my mind a penny saved is worth to me at this time every cent of a dollar.

So Ruth was not only an active partner but in time was another side to the game that appealed to her.

"The thing I like about our life down here," she said to me one night, "is the chance it gives me to put something of myself into every single detail of the home."

I didn't know what she meant because it seemed to me that nothing of what she had always done. But she was in her head when I said so.

"Well, you'll have a servant girl, you must have done whatever was done," I said.

"I didn't have time to pick out the food for the table," she said. "I had to order it of the grocery man. I didn't have time to make as many of your clothes as I wanted. Why I didn't even have time to sew."

"Then, you've had a servant girl, you must have done whatever was done," I said.

"No, I haven't had a servant girl, and I have done whatever was done," she said.

I suppose she felt like that because what she did for me doesn't just worth-while. She ate a hearty breakfast.

But she was very much and made me like it when a meal is done, to the notion that I like what she has all her own.

"It's that think me a pig, Billy," she said. "That I like it. I like to look at all myself every single potato you peel for me. I like to pick out every leaf of lettuce, every apple I eat. I like to feel as though I was doing something for you."

"Should I?" I said.

But she wouldn't let me finish it.

"No, Billy," she said, "I'm understand what all that means to me, how it makes me a part of you and you a part of me. And I like to think that in everything you wear there's a stitch of mine right close to you. And that when you and the boy are out at night I'm touching you because I made everything close for you with my own hands."

It makes my throat grow lumpy even now to remember the smile with which she looked up into my face as she said it. She was so she said it. She made me feel like a little child and either time she made me feel like a giant. But whichever way she made me feel at the moment, she always left me wanting that I had in me every good thing a man can have so that I might be half worthy of her love. There are times when a fellow knows that he can be doesn't count for much as compared with any woman. And with me it was always that way with Ruth. I tried to do my best by her those days and have tried to do that ever since, but it makes me ache to think how little I've been able to give her of all she deserves.

In her housework Ruth had developed a system that would have made a fortune for any man if applied in the same desire to his business. I learned a lot from her. Instead of going at it her tasks in the haphazard fashion of most women or doing things just because they were customary, she studied and did them a certain way, she used her head. I've already told how she did her washing little by little every day

A FIREMAN'S PERIL

HOW ZAM-BUK DELIVERED HIM

At 215 Fraser Ave., Edmonton, Alta., Sept. 11, Mabj, a fireman employed at the local fire brigade, who had wonderful cause to be thankful for the curative powers of Zam-Buk. He says: "A caravan with disease broke out on my face, and spread until I was in a terrible state. The pain and itching the nights were frightfully irritating, and yet when scratched it relieved, they bled and smarted. Shaving caused me agony, and sometimes I would have to go two weeks without a shave. I tried home-made remedies, but nerves and various other preparations, but got no relief. When Zam-Buk was mentioned I had little faith that it would do me any good. My case needed a lot of it, and was an obstinate one. I gave it a fair trial, however, and the first bag made a wonderful change for the better. The sores started healing, and continue. I did so, and to cut a long story short, Zam-Buk, in the end, quite cured me. My face is now clear of all traces of the terrible disease which troubled me for so long."

Thousands of sufferers from eczema, blood poison, ulcers, chronic sores, piles, ringworm, scalp sores, bad burns and skin injuries, have been restored to perfect health by Zam-Buk. So has many a sailor.

Zam-Buk is also unrivalled for all kinds of chapping, cracks, sore nipples, and stiffy or yellow and brittly. Rubbed well into the skin, it feeds and tones the tissues, and helps to prevent inflammation. All druggists and stores sell at 50c box, or post free from Zam-Buk Co., Toronto, for price. Refuse harmful substitutes.

MODERN METHODS

In the old days of sailing vessels the rags were piled in a heap, moistened and allowed to undergo a process of fermentation had proceeded far enough to soften them. Then they were boiled with lime for a few hours. They were to be bleached by the action of the sun and dew as they were spread out on the grass. Sometimes the bleacher ecbe now over night by bleaching powder. Then they were dried, and again opened anew multiply the output of paper. Sometimes the bleacher neighbors like it! What will Aunt Sally say? Well, she'll have to wait!

Let us enumerate some of the objections to the old, cumbersome result, time wasted. He will not answer. He will not write. He will not telephone. The time one will devote to the family dog, for instance, is limited. The family dog would soon give one a liberal value either in cash or in kind. But still, more base of time, some trouble, some expense and attention. On he is not sure to get lost when in a while. Then, of course, the dog time to time will never returns a lost dog and forgets to bring one back. Then, the dog-catcher, rabies—if ever there is a little things that will not suit the dog-possessor, the neighbor's chickens, the baker's dog, the fact that he won't teach him to run when. So, on the whole, the family dog is a doubtful and costly asset to you in some measure or other.

STONE BATH-TUBS IN THE TROPICS

In Mexico and many of the Central American countries the tropical heat makes the water in city mains rather tepid, and a cold bath is not always a plan adopted hundreds of years ago by the Romans.

Bath-tubs are not common, but they must have a natural spring of pure water to be had by a reasonable amount of labor. These stone baths are near the houses or most of the wealthy people, and the baths have them attached to their buildings. They are usually built in countries find these cool baths very refreshing.

BLACK EYES

(By Freeman Tilden)

This story does not concern a young woman named Phyllis. From the point of view she is there is not an indecisive glance. Absolute impression. She promised the reader from the first. Such pictures as "tenderness," "softness," "appealing," "tender" and "pleading." For those black eyes were not blind.

Horace P. Bowse, a respectable commercial person of Knollbrest-on-the-Hudson, awoke one morning with a thing in his head. It was very dark. On his way to the office he stood with his back to the motor vest along, he leaned over the shoulder of another commercial person, and said, pointing his thumb in the direction of Mr. Bowse, "That fellow there's got a look like a scrapper, does he? But you never can tell by a man's build."

Peace for Mr. Bowse in the smoking car was out of the question. He attempted to the car behind, and found a vacant seat, from which he gazed absently out at the passing real-estate investment possibilities. But his neighbors were in fine humor that morning, and he could not help but hear. He looked at the man next to him, and decided that he was a prize fighter. He looked at the man behind him, and decided that he was a prize fighter. He looked at the man across the aisle, and decided that he was a prize fighter. He looked at the man who was standing in the aisle, and decided that he was a prize fighter.

Mr. Bowse overheard the remark of a passenger to the effect that a successful attempt to control a trust had been made by a prize fighter. He overheard the remark of a passenger that he had seen a prize fighter in the act of buying a newspaper. He overheard the remark of a passenger that he had seen a prize fighter in the act of reading a newspaper. He overheard the remark of a passenger that he had seen a prize fighter in the act of riding in a motor car. He overheard the remark of a passenger that he had seen a prize fighter in the act of riding in a motor car.

Mr. Bowse left the train at the next station, and walked back to Knollbrest-on-the-Hudson. He walked to the office of Dr. Henry Tilden, the family physician.

"Doctor," he said, "I've got a black eye."

"Let me see it," said the doctor.

Mr. Bowse removed the remarkably black eye.

"Why, you've had a fight!" said the doctor.

"Not a fight," said Mr. Bowse, "but I've had a row. I've had a row with a prize fighter."

"Nonsense!" replied Mr. Bowse.

"Your eye! What is the matter with your eye?"

"Eye? Whaddnaaaaer eye? Eye? Eye? Eye? Eye? Eye? What eye? Eye? Eye? Eye? Eye?

very work on May 1st., 1873, as office boy on the Quebec, Montreal & Lake Champlain Railway. Six years later after many promotions he graduated as general freight agent of that line. During the same year he became travelling freight agent on the Montreal Division for the Canadian Pacific Railway. Bosworth joined the Canadian Pacific May 1, 1883, as assistant general freight agent of the Ontario and Quebec lines. In January 1884 he became general freight agent of those lines; April 1885 assistant freight traffic manager on the C. P. R. system at Port William; January 1886 freight traffic manager of the Canadian Pacific Railway; December 8th., 1903, appointed fourth vice-president and on 11 June 1910 promoted to vice-president.

MAJOR C. GARDNER JOHNSTON of Vancouver

Major C. Gardner Johnston, R.G., Vancouver, will leave shortly accompanied by Mrs. Johnston, on a trip around the world. The genial major has been in harness for so many years that he has well earned a vacation, and his many friends will wish him bon voyage and a safe return. He will go by way of Australia and the Orient, returning through Europe, the British Isles and Canada. The trip will occupy about a year.

MR. R. W. CHAMBERS

A Little Red School-House Boy

Few are aware, says an Ottawa writer, that R. W. Chambers, of that city, who has cast an impress of originality in a little Red School-house in the old county of Lanark, Township Dalhousie, was for the lasting and of too ambitious a spirit to remain contented any great length of time, and one fine morning, to the delight of more than one little urchin in Lanark, he packed his grip and started for Ottawa in search of more extensive and remunerative employment. He got the job all right, and, while the hours were long, the work hard, and the pay exceedingly small, the Lanark county boy was made of sterner stuff, and he just kept on plugging.

Two years ago he launched out for himself. Today he is one of Ottawa's most enterprising [illegible] merchants.

CHILDREN'S WEAR

WE recognize the fact that in keeping a large stock of the little folks' needs, we are supplying a want that is the cause of endless trouble to parents. You will, therefore, find our assortment in these lines more complete than ever before.

This week we have added to the stock a large shipment of Getty & Scott's "Chelsie" Shoes to supply the needs of Tofield's younger generation from "cradle to college." The "Clasic" is the last word in children's shoes. We do not say they are the lowest in price, but we do claim that they are the cheapest, taking into consideration the finish and wearing qualities.

"Lyon Brand" Boys' Nickers are just what the boys need for the rough wear of the summer months. They have double seats and double knees, and are made from the very strongest tweeds.

In boys' two-piece suits, with the popular bloomer knickers, we have a large assortment, and they are just as classy in appearance as our "Twentieth Century" suits for their big brothers. A shipment is just in of boys' negligee shirts, with soft collar attached. These are attractively made, in plain colors, and are very serviceable for school wear.

There are some very attractive styles in Misses' and Children's Caiaten, Linen and Straw Hats. Also in Boys' Hats and Caps of all kinds you will find what you want.

A consignment of 1000 packets of Potter's Seeds from Edmonton has been delayed in shipment, and, on account of the lateness of the season, we will sell them while they last at 2 packets for 5c.

PUBLISHED WEEKLY IN THE INTERESTS OF TOFIELD AND THE WELFARE OF THE PUBLIC

VOLUME V — TOFIELD, ALBERTA, THURSDAY APRIL 25, 1912 — NO. [illegible]

Picture Illustrative of the Ill-fated Titanic as she went down to a watery grave off the Grand Banks, Newfoundland, with over 1600 souls

Titanic Death Roll 1635
Ocean Route Altered

Captain Rostrom of the Carpathia Wept When He Told Senatorial Committee How He Picked Up Those Set Adrift From Titanic

The living cared for, the dead buried, recall, survivors of the Titanic disaster are now able today to see in calmer retrospect just [illegible] wrought by the North Atlantic, and from their more normal utterances there is slowly unfolding a horror upon horror, the full story of how the great White Star liner, her hand [illegible] to the last, sank off the Grand Banks with more than 1600 souls aboard. From the Countess of Rothes, now quartered luxuriously in a New York hotel, to the six Chinese coolies who escaped by hiding under the lifeboat seats, all of the 705 have been provided with food and clothing [illegible] and soon, lumbering and [illegible] mile, are on their way home to England the Continent, or distant parts of the United States. Many, however, of these the hospitals shelter scores, are still remaining in New York.

WHAT THEY DID.

Passed a resolution to Dept. of Education favoring the taking in of the Tofield Coal Company's Lands into Tofield Village School District upon the basis of their assessment upon their value only as farm lands.

Appointed E. Brice of Edmonton as town solicitor, upon recommendation of Finance Committee.

Referred estimate of Fire and Water Committee to Finance Committee.

Received reports from standing Committees.

Appointed Friday, May 3, as Clean-up Day, and instructed the Mayor to proclaim it a civic holiday for that purpose.

Declared the duties of A. McMillan as chief of police, pounder and man of all works, as outlined in report of License and By-law Committee.

Appointed the Sec.-Treasurer as Building Inspector.

Gave instructions for 3rd Avenue pump to be repaired.

Appointed a Parks Committee to see if park land can be secured.

Passed current accounts.

Referred communications to Committees.

Referred application of Tofield Agricultural Society for grant of $500 and T.A.A.C. for $150 to Finance Committee.

Famine in China

Famine is working awful havoc in China and millions are in danger of death from starvation. Thousands have already succumbed. An offering, however small, will be of great use in extending the work of practical christianity. Rev. H. Williams will accept any offering and send through the local bank on Toronto, at which point the church authorities are collecting add to send direct.

DEATH LIST STILL APPROXIMATE

Even after all this has now been told of, the disaster, the death list remains approximate. The White Star Line has issued a statement and placed the toll at 1635. Exactly how many died will never be known. It has been established officially, however, that the Titanic was travelling 21 knots an hour when she struck the iceberg.

The Titanic's rate of speed, which was approximately 26½ land miles, was brought out from the lips of J. Bruce Ismay, president of the International Mercantile Marine and managing director of the White Star Line, a witness before the United States Senate Committee, which is investigating the disaster.

COUNCIL

Council met in regular session last Tuesday night, all being present.

WHAT THEY DID.

Passed a resolution to Dept. of Education favoring the taking in of the Tofield Coal Company's Lands into Tofield Village School District upon the basis of their assessment upon their value only as farm lands.

Appointed E. Brice of Edmonton as town solicitor, upon recommendation of Finance Committee.

Referred estimate of Fire and Water Committee to Finance Committee.

Received reports from standing Committees.

Appointed Friday, May 3, as Clean-up Day, and instructed the Mayor to proclaim it a civic holiday for that purpose.

Declared the duties of A. McMillan as chief of police, pounder and man of all works, as outlined in report of License and By-law Committee.

Appointed the Sec.-Treasurer as Building Inspector.

Gave instructions for 3rd Avenue pump to be repaired.

Appointed a Parks Committee to see if park land can be secured.

Passed current accounts.

Referred communications to Committees.

Referred application of Tofield Agricultural Society for grant of $500 and T.A.A.C. for $150 to Finance Committee.

BARDO

Last week an unfortunate accident occurred on the farm of Rev. M. Gerdes in the south west section of the district. Mr. Gerdes set out a tree to burn off a stubble field, as the particulars given. THE STAR DARN say, but the fire got beyond control, with the result that it spread so rapidly as to run up upon his stable and outbuildings. In spite of everything in the way of help could do the stable and granary, both of which were good buildings took fire and were consumed. In the granary was a quantity of seed grain.

J. E. Robinson, late from Milford, Nebraska, has moved on to his new farm on east half of 7-50-18, and is living temporarily in his new grain, any while he is getting his residence [illegible]. Carpenters have arrived from the I. S. to do a quantity of building for the Mennonites in this community, of which sect Mr. Kaufman is an esteemed member and will build his residence.

Jos. Stauffer on the Tees farm put up a large and splendid barn for the accommodation of horses and dairy stock.

L. Yoder, who purchased the Herron farm, and this spring moved on to it via Milford, Neb., is building a large and attractive residence on this farm as soon as the seeding is done.

Goodman Swenson is having a well drilled on his farm. T. A. Rorem is doing the work.

Oats seeding commenced last week, O. Hagen being first to get them in in the section. This week oat seeding is general. Indications point to good crops this season.

Wheat seeding is practically finished in this section.

The new German element in this section, the Mennonites, are proving themselves to be a thrifty and progressive people. They are carrying on a well-outlined policy which will result in substantial benefits. They are preparing to go in extensively for mixed farming, a policy which is bound to bring in great results. Building large and comfortable stock barns to house dairy stock and buying in all the dairy stock that they can lay their hands upon, they are undoubtedly a splendid object lesson to all who aim to become settlers with a competence in the space of a few years. We welcome them with a true welcome to the community.

It is understood that W. E. Steinman has closed a deal to secure a gasoline tractor plowing outfit.

Your correspondent understands that F. Hull has entered a Case breaking outfit and intends to go in for breaking on a large scale.

One of the most enterprising and progressive women of the country may be seen at the attractive farm home of Mr. Sewartzendruber where Mrs. Sewartzendruber has been busy this spring making extensive and well carried out preparations for gardening. Her garden will, from all indications, be eligible to carry off first prize for general appearance and variety of produce.

Wedding bells will in a few weeks, if all report be true, be pealing out in all joy in wishing newly married couples long life and happiness. In the south-east part of this district a popular young lady is to be captured by an equally popular young man, and it is [illegible] lose a daughter and gain a [illegible] son-in-law. The latter, it is said hails from Edmonton, and will carry his bride-to-be to the capital city of the province.

Local and General News

Mr. and Mrs. Wes Ingram [illegible] Edmonton last week.

Mrs. R. S. Cole spent last Thursday and Friday in the Capital.

Mrs. Cardeur was a visitor to the Capital yesterday.

Mrs. Johnson Ferguson spent a few days visiting in Ryley this week.

DON'T FORGET the dance in Delamy's Hall on Friday evening of this week.

Mrs. W.C. Swift spent a couple of days last week visiting in Edmonton.

Johnson Ferguson is busy painting R. P. Blackburn's residence in Amisk Creek section. This is one of the finest farmer's residences in the district.

The Girls' Brigade enjoyed a cubical party last night at Latimer, when the members were the guest of miss host Mr. Strong, Brigade Master.

J. H. Taylor of Springhill, Nova Scotia, arrived in Tofield, Tuesday, this week to become a permanent resident. He purchased a lot in town yesterday, and will prepare a garden at once. By trade Mr. Taylor has followed plastering.

M. C. Kent, accountant at the local branch of the Merchants Bank, has been transferred to Calgary, leaving last Saturday evening. His successor has not arrived yet.

Stutzman Bros., who may properly be numbered amongst the newcomers to Tofield district, comprising within the last two[illegible], have demonstrated their right to be classed amongst the most enterprising leaders in agricultural industry in the Tofield district. As a demonstration of their great faith in the prospects and future of this district, they have purchased an International Gasoline Tractor Engine, type D. Titan, and five-bottom engine gang plows with which to convers the virgin soil in large areas into rich productive [illegible]. Tofield district is to be congratulated on the excellent class of settlers it is obtaining.

Steel Laying on the Tofield-Calgary Branch

Steel laying began last week on the Tofield-Calgary Branch Line of the G.T.P. It is expected that the Pioneer will make uninterrupted progress over the 90 odd miles to be right into the heart of the city of Calgary, most of the grading for which has been completed. Train loads of ties from the west and steel rails from the east have been passing through Tofield daily for some time. Ballasting on the new branch has begun. The Company is exhibiting a desire to complete this branch into Calgary with all due speed. It will be completed during the summer.

London, April 22.—And, Montgomery of Netherhall, a noted exporter of Clydesdale horses to Canada, is dead.

Titanic Memorial Service

Last Sabbath the Presbyterian Church was crowded to overflowing when a special service was held anent the great "Titanic disaster." Rev. A. M. McCoil rendered an appropriate sermon, taking as his text, the "Shipwreck of Enongebor." Touching references were made to the great sea tragedy, and many obvious lessons drawn from it. The speaker compared the unselfish [illegible] of Major Butt to that of Arthur Jackson, who gave his [illegible] fighting the plague in Manchuria last year. He also enlarged [illegible] the thought that God is [illegible] tor of "rank," as exemplified [illegible] common lot to rich and [illegible] alike. Finally, the [illegible] upon the "uncertainty" of life in a way that will be long remembered. The discourse was most effective.

The musical part of the service was ably rendered by the choir, the anthems were most fitting to the occasion, and reflected credit on the conductor. At the close, [illegible] sang. Mr. Alex. [illegible] rendered the "Dead March in [illegible]

Oddfellows Parade to Church

Cordial invitation is hereby extended to [illegible] and [illegible] members of Tofield Lodge No. 43, I.O.O.F., their Annual Church Out to Divine Service on Sunday morning, April 28, 1912, at the hour of 10.15 a.m., from the Lodge Hall, Main Street, Tofield.

Lakeview Rebekah Lodge No. 20, I.O.O.F., will also attend in this service with the Oddfellows on this occasion. All sister Rebekahs in Tofield and district are invited to attend.

CHAPTER XIII (Continued)

I Become a Citizen

BUT as for Dick he was too busy with his studies and Dan's affairs to have much time to spend at home and so he and Dan lived and boarded at the house of Mrs. Burke. Dan right there and then made up his mind that he would study hard and work out the basis of a law case which he and Dick had talked about that dinner and which Dan's friend Patrick Foley, the theatre agent, said he thought he could win. That subject was to reach the day when he and Dick would be old and infirm and could live on the interest of their money. To this end, Dan, as well as Dick, had been investing his money in real estate. Not that either of them had any great amount to invest, but they had been saving their money and were now able to put a little by each month. Dan's investments were all in the shape of small mortgages on property in the lower East Side, which he had been advised by Mr. Burke were safe as well as the highest. Dick's investments were in the shape of real estate, which also had been advised by Mr. Burke. Dick had a little more money than Dan, as he had been working for a year longer than Dan, and he had also been receiving a little more salary. Dick had invested his money in a little two-family house on Avenue A, which was rented for $30 a month, and he had also invested in a little house on Fifty-second street, which was rented for $35 a month. Dick

"BOOST"

Before the close of the current year Tofield and district should have a population substantially increased over what it is at present. This growth can easily be accomplished if every citizen aids in the cultivation of those opportunities which are now ours. This does not mean that we should lend ourselves to any scheme that might prove detrimental, but that we should merely boost our splendid resources and advantages. A campaign of this sort will add numbers to our farming and industrial population, assist mightily in the development of our industrial as of agricultural resources, and benefit every portion of the municipality and district. Every ratepayer should take an active interest in the conduct of our municipal affairs and a co-operative part in the work of our Board of Trade. If we all boost and boost together and boost all the time, we will have a town we can take great pride in and a district in which it will be a pleasure for all to live and prosper.

PROTECT THE CHILDREN

THE STANDARD believes in giving credit where credit is due and vice versa if it is necessary. We note that one of the Councillors of the town of Edson has introduced a by-law into that Council compelling children under the age of sixteen years to be off the streets after nightfall. In discussing this the Edson Leader says, "No more stimulus in mischief and all that leads to crime can be had by youths than running the streets at late hours. The by law places the responsibility upon the parents or guardians, and fixed a scale of fines for allowing the children abroad. The pity of it is that drastic measures must be brought to see the necessity of keeping their children under proper control without legislative action."

Comment is hardly necessary. The Leader has spoken out clearly and truthfully, and along similar lines in Edson applies in Tofield and many other like places. Such action on the part of Tofield Council would be worthy and would be a benefit not only to parents, the children themselves, but to the community at large.

THE SATISFACTION OF KNOWING THAT GREAT MEN CAN BE REALLY GREAT

It is some satisfaction to know that the men who have held the front page positions in the affairs of Canada and United States for two or three decades were really equal to the test of greatness when that test came. John Jacob Astor's "Good-bye, dearie," as he set his girl wife over the side and lit a cigarette to await the end, is a picture which will do more to promote charity of feeling among those who harbor a feeling of resentment against the idle rich than anything else that has happened in recent years. It at least proves that, notwithstanding his millions, his life of ease and luxury, his position of unearned supremacy in the big world which he has inhabited, that he was a thoroughbred and a man for all that.

Hays, as officer of the Company, able to command a place of safety, going down with the ship, makes it impossible to believe that any of the harsh things charged against him in his capacity as a great transportation manager could have been more than the result of actions impelled by the accident environment in which his life-work had placed him.

Mrs. Strauss, who, because her husband could not go with her, refused to go to safety and a continuation of a life which held for her all the luxury that money could buy, makes Darby and Joan story look cheap.

Stead, the great moralist, acting exactly true to his ideals, stepping aside while tattered peasant women took to the boats, and then swimming about in the icy water until his feet froze and he succumbed, evinving the true spirit of self-sacrifice which, in spite of a love of life, intensely human, causes the things which he wrote and said in the days of his exile rise once the expression of a soul honest to the core.

The Titanic cost the world dearly in great men, but it has enriched it by the proof that the world's great men can be really great when the test comes. EDMONTON CAPITAL.

Work Starts on Tofield-Edmonton Traffic Road

Work started last week on the remaining part of the Tofield-Edmonton road. W. J. Donnelly, who has been in charge of a road construction gang for the government for several years, started in on the work out and will fit up the places that need repair between Strathcona and the point where will be last fall, left off construction south of Hastings Lake. With his gang he will work east towards Tofield.

T. J. Gourlay is in Edmonton the last week and was engaged by the Department to take charge of a road construction gang and to throughout the province will bear work west along the road from A much fruit in benefit to many com- W. Hunt's north-west corner He munities in which settlers are in- will employ a number of teams and terested to great disadvantage in men. having to put up with desperate

There is no doubt but that the traffic conditions. This point was early activity in the construction touched upon at the time of the delegation's interview with the Premier last year and was the happy result of the agreement which brought the Premier to see the individuality of all town ratepayers existing building permits. These can be procured at the Town Office. A fee of twenty-five cents will be charged for each permit.

By order of Town Council,

S. NICHOLSON, Secretary

of this main road which leads through all the communities between the Capital and the town of Tofield along the south sides of Cooking and Hasting's Lakes has been the result of the work of the Tofield Board of Trade. Not only last year did the Board secure representation was sent up and but again a few weeks ago another with them representatives of the Local Improvement District Council of Strathcona and the point where will be affected by this road and organizations were made regarding this and other improvements in the district.

The policy of the government for constructing trunk traffic roads

THAT LITTLE PAIN IN THE BACK

Is Very Not So Very Bad, but it is a Sure Indication of Weakness Somewhere.

You pay little attention even if you don't expect to die right away. But you owe it to make yourself comfortable or to protect your family.

What about that little pain in your back? It's your kidneys calling for health insurance—warning you that old age will not be comfortable—that Rheumatism or Backache will afflict you intimately.

Your back you are strong and can afford to neglect it, and that you will be all right in a day or so. Nyal's Kidney Pills will put it right in a day or so. Nyal's Rose Pain Compound is a scientific product with a record that means your health.

The cost—a dollar a big bottle—is trifling, and an insurance against future trouble by taking a good kidney medicine while the Nyal's Rose Pain Compound. That is just as reasonable as insuring your life, and you have a well-developed kidney trouble in your yours will bring your family more happiness and satisfaction than leaving a stepson from your life policy.

Nyal's Rose Pain Compound is a scientific product with a record that means your health.

Beaver Lake East

Seeding is going along fast, and the weather is just right for it.

Jas A. Stewart has rented Jos. McCallum's farm for the season There are about 150 acres to be cropped, about half of it summerfallow and new breaking.

Mrs. J. B. Steele has been in the city for two weeks visiting the old folks and her many friends there.

R. H. Bradley, now a leading citizen of Edson, spent his Easter holidays at Beaver Lake. We are always glad to see "Hilliard."

April 18, '12.

Farmers Busy

Sowing the Seed for a Busy Harvest

BUSY—a short word, but indicative of tremendous activities—is the only way to describe the activity described the position in which all the farmers of the Tofield district find themselves at this spring days. In every section of the district the rich soil is being turned over, disced, harrowed and rolled in preparing a seed bed for the crop of 1912, which is expected to yield the greatest crop harvest ever taken off in this part of the province. While the acreage sown to wheat this spring has been limited owing to a scarcity of good seed, the area devoted to oats and barley is largely increased throughout the district, particularly in the southern section, the areas being brought under cultivation are largely increased. With several large breaking outfits at work in all sections this year, a tremendous increase will be added again this season.

Farmers should look well to the preparation of the seed bed this spring and to the condition of the seed. A thorough discing and harrowing in the dry days of spring will make the soiled surface, which will husband the supply of moisture in the ground and put bring the moisture right up to the seed kernels and start early germination. See that the seed is clean, of good size and free from weeds. A delay of a day or two in the spring in attending to these points of intelligent agriculture will more than amply repay one when harvest time comes.

Tofield Park

We have recently purchased and are now having platted the Crafts, Lee & Gallinger property situated west of Eighth Street and North of Cookson Avenue. This property is all within the town limits. It is being platted with a view to the future growth of Tofield, and with a view to making it an ideal residential district. All streets will be 80 feet wide with the exception of Cookson Avenue, which will be 100 feet wide along the south side of the Property. This will give plenty of space for driveways, parkways and sidewalks and for the planting of trees and the beautifying of the district. A School Site will be reserved in this sub-division. Lots facing South on Cookson Avenue will be ideal for residential purposes.

A Liberal Reduction in Prices will be made to residents of Tofield and vicinity who Purchase in Tofield Park and build there in 1912

Plans for G.T.P. Hotels

Further details of the great chain of palatial hostelries which the Grand Trunk contractors expect to have completed with the opening of the G.T.P. in 1914 are now in hand. Plans for the Edmonton Hotel are now completed, and the contract is soon to be let. Provision has been made for more than 150 rooms, and the total cost will be over $750,000. A similar building is planned for Regina, and one of the finest hotels in the railway series will be built in the vicinity of Mount Robson, while the final link will be at Prince Rupert. All will be furnished and fitted out in the same artistic and elaborate manner as the Chateau Laurier in Ottawa and the Fort Garry in Winnipeg now nearing completion. A grand opening of the entire system is planned for the trip of the first transcontinental train, and it is hoped that negotiations being carried on with the British Government may result in securing His Majesty King George V. as one of its passengers. Such an event would, indeed, be an auspicious inauguration for Canada's great national line.

You will look a good while before you find a better medicine for coughs and colds than Chamberlain's Cough Remedy. It not only gives prompt relief, but it is when you have a cough or cold, and you are certain to be pleased with the prompt cure which it will effect. For sale by all dealers.

Board of Trade

The Board of Trade held a well attended and progressive meeting in the Council Chamber last Tuesday week and showed healthy signs of getting down to business.

A draft constitution was submitted by that committee and was adopted in so far as it went. Additions will be made at next meeting.

The meeting, which was largely of a business nature, made good progress towards thorough organization. Regular meetings will be held every four weeks on Tuesday evening dating from April 16th last. Meetings of the standing committees and the Executive will be held regularly on the Tuesday night two weeks after each regular meeting of the Board.

Special meetings will be held at the call of the president and five members.

Several important questions were discussed at the meeting upon which development will be announced later.

Sold by RICHARDSON & RUDD, Tofield

MEMORIAL SERVICE

A Memorial Service in sympathy with the survivors of the recent "Titanic" disaster was held by the local Anglican Church in Bellamy's Hall last Sunday evening. The pastor, Rev. Mr. Mason, chose as his text, "They that go down to the sea in ships, etc," from Ps. 103, 22-4. In well chosen words, full of feeling and deep sympathy, he referred to the great bravery in the face of certain death shown by many of those who went down with the ill-fated ship, emphasizing that they, like true sailors, did their duty, going down to their watery grave at their places of duty. Hymns sung during the service were, "Forever with the Lord," "A few more years shall roll," "Fierce raged the tempest," and "Eternal Father, strong to save."

At the Churches

PRESBYTERIAN

Next Sabbath morning a special service will be held in St. Andrews Presbyterian Church, when the "Independent Order of Oddfellows" and the sister Lodge of "Rebekahs" will march from the Lodge Hall to the Church. The subject of the address will be "The Two Brothers." At the evening service the subject will be "Protestantism."

Prayer Meeting every Wednesday evening at 8 o'clock.

CHURCH OF ENGLAND

Tuesday, April 29th—Third Sunday after Easter—

Morning Service, 11 a.m., Logan.

Evening Service in Bellamy's Hall, Tofield, 7.30 p.m.

JAMES MASON, Incumbent.

METHODIST

The pulpit of the Methodist Church will be occupied next Sunday morning by Rev. S. Nicholson, and in the evening by Mr. Chapman.

The World's News

Told in Pithy Paragraphs

Work began this week on the construction of the Edmonton-Dunvegan Railway. 120 miles of this road is to be completed this year.

Sixty-five miles of the Alberta Central, which was purchased some time ago by the C.P.R., will be finished out of Red Deer to Rocky Mountain House within a few months.

Steel laying is progressing rapidly on the Tofield-Calgary Branch.

Good progress is being made on the last lap of the G.T.P. main line through the mountains.

It is reported that Gen. Manager Chamberlain of the G.T.P. will succeed the late President C. M. Hays in that office.

All the wheels on the Grand Trunk and G.T.P. systems will cease rolling at a given moment some time this week for a space time out of respect for the late illustrious president.

M. Mackleberg, A.M. the celebrated and 25 year experienced eye specialist of Plone 8226, Archibald Block, Edmonton, will again be at the Queen's Hotel, Tofield, on Saturday, May 11th. Spectacles, eye glasses and artificial eyes, the best at moderate charges. Absolute satisfaction guaranteed.

∴ CHILDREN'S WEAR ∴

WE recognize the fact that in keeping a large stock of the little folks' needs, we are supplying a want that is the cause of endless trouble to parents. You will, therefore, find our assortment in these lines more complete than ever before.

This week we have added to the stock a large shipment of Getty & Scott's "Classic" Shoes to supply the needs of Tofield's younger generation from "cradle to college." The "Classic" is the last word in children's shoes. We do not say they are the lowest in price, but we do claim that they are the cheapest, taking into consideration the finish and wearing qualities.

"Lyon Brand" Boys' Nickers are just what the boys need for the rough wear of the summer months. They have double seats and double knees, and are made from the very strongest tweeds.

In boys' two-piece suits, with the popular bloomer knickers, we have a large assortment, and they are just as classy in appearance as our "Twentieth Century" suits for their big brothers. A shipment is just in of boys' negligee shirts, with soft collar attached. These are attractively made, in plain colors, and are very serviceable for school wear.

There are some very attractive styles in Misses' and Children's Caletas, Linen and Straw Hats. Also in Boys' Hats and Caps of all kinds you will find what you want.

A consignment of 1000 packets of Potter's Seeds from Edmonton has been delayed in shipment, and, on account of the lateness of the season, we will sell them while they last at 2 packets for 5c

Steel Arrives at Trochu

April 20, 1912, was a red letter day at Trochu on the Tofield-Calgary branch line, G.T.P., as the track-laying machine arrived with its quota of men and making new track as it advanced. The town was en fete, everybody turning out to celebrate the arrival of the steel. To quote from the enterprising newspaper, The Tribune, of that enterprising town: "The excitement in Trochu was intense; several amature prize fights, runaways and a beer drinking contest added greatly to the success of the day."

Local and General News

Geo. Bissett of Edmonton spent Sunday in town.

Miss Amy Morton was down from Edmonton to spend Sunday with her parents.

H. Coram, of Calgary was a Tofield visitor for a couple of days this week.

Mr. and Mrs. J. Stockdill of Edmonton were the guests of Mr. and Mrs. W. C. Swift last Sunday.

Howard Cole of Edmonton was a week end visitor to Tofield, as the guest of his brother E. S. Cole.

Wm. Cole and wife of Edmonton visited Mr. and Mrs. E. S. Cole last Tuesday. They were returning from a trip to Winnipeg.

A. A. Harriman is having a well put down at his residence on Third Ave. East. Ed. Hill has the work on hand.

Edward Brice, barrister, of Edmonton, and town solicitor for Tofield, was down to attend the Council meeting Tuesday evening.

Many will be pleased to see the smiling face of town constable A. McMullen on the streets once more. He has almost entirely recovered from his recent illness.

Lame back is usually caused by rheumatism of the muscles of the back, for which you will find nothing better than Chamberlain's Liniment. For sale by all dealers.

A. McMullen has recovered almost completely from his recent severe attack of illness, and moved up into his new residence on 2nd Avenue West last Monday.

T. J. Kirkpatrick is making slow progress towards recovery. His ailment being inflammatory rheumatism he has to be careful, the danger from exposure being great.

C. W. Graves of West Lorne, Ont., arrived in town last Thursday. Mr. Graves, who is a druggist of considerable experience, has taken a position in C. E. Jameson's Drug Store.

Miss McHaffey returned to Tofield last Friday evening from a winter's visit to her brother and sister-in-law at Carstairs. She reports a heavy snowfall last week in the south.

There never was a time when people appreciated the real merits of Chamberlain's Cough Remedy more than now. This is shown by the increase in sales and voluntary testimonials from persons who have been cured by it. If you or your children are troubled with a cough or cold give it a trial and become acquainted with its good qualities. For sale by all dealers.

F. A. Kinsman of Waterville, N.S. and C. P. Johnson of Pennbequin, N.B., were visitors to Tofield on Tuesday, being interested in the development of the town. They visited the coal mines and vicinity and were greatly pleased with all they saw. South of town Mr. Johnson had the pleasure of handling a plow on a farm where the farmer was plowing, and he was greatly tickled with the sight of the rich Alberta black loam being turned up as he passed along the furrow.

Fire in Manure Pile

Tofield's new electric fire alarm was used for the first time yesterday afternoon about five o'clock, when a call was turned for a small blaze in a massive pile in the rear of a stable owned by Guy Graves in the lane running between 2nd and 3rd Avenues. The ringing of the alarm caused a lot of excitement as a strong wind was blowing at the time, but, fortunately, the fire was discovered early enough to be stamped out without the use of the apparatus.

Judge Mabee Passes To Rest After Brave Fight for His Life

Head of Railway Commission, well known throughout Canada, yields to an attack of Appendicitis after a stubborn battle for several days.

Toronto, Ont., May 6.—Judge J. P. Mabee, having taken a bad turn at 1.30 o'clock, his heart strength having collapsed, passed away at 2.15 this afternoon. He was conscious till the last, and his son and daughter were at his bedside till the last.

Hon. James Pitt Mabee, Chief of the Board of Railway Commissioners for Canada, was born at Port Rowan, Ontario, on Nov. 8th, 1859. He was the son of Simon Pitt Mabee and Fanny Lenton. He was married to Mary Thorald of Port Rowan, and had one son and one daughter.

After graduating in law he practised the profession at Listowel for some years, and later at Stratford and Toronto. On November 21st, 1903, he was appointed one of the Judges of the High Court of Justice for Ontario, and on March 3, 1908, received the appointment to the position he held until the time of his death. He succeeded Commissioner Killam.

C. H. Hays Body Recovered

The body of Chas. M. Hays, late President of the G.T. and G.T.P., was the first to be recovered by the Minia, the ship sent to relieve the Mackay-Bennett in picking up the bodies of the victims of the Titanic disaster. The Minia arrived at Halifax last Monday with the bodies which she had recovered. The body of Mr. Hays was removed to Montreal by special train and the funeral held yesterday from the family residence

Big Deal in Farm Land

John Phillips yesterday sold to D. W. Warner of Edmonton 398 acres on the lake shore, 2 miles north of Tofield, for $11,940 cash. It is Mr. Warner's intention to raise thoroughbred cattle and hogs on the farm.

Hall & Kennedy's Hardware Changes Hands

Geo. B. Bruce of P.E.I., an experienced and practical hardware man, buys out this well-known firm and assumes control immediately.

The public will be interested to learn that the hardware business of Messrs. Hall & Kennedy in Tofield has undergone a change of management this week, the deal going through last Tuesday. The new proprietor is Mr. Geo. B. Bruce, formerly a Prince Edward Islander, but who has been in the West for the last seven years, and comes more recently from Hagina, where he was two years with Pearl Bros. hardware firm. Having spent the last ten years in the hardware trade, he knows the business from A to Z, and will undoubtedly build up a most successful undertaking here. Mr. Kennedy, who has managed the business up to the present, will remain in Tofield and go into some other line in the near future.

COUNCIL

Council met in regular session last Tuesday night, all being present.

Communications were received from Messrs. Rimmell & Brice of Edmonton on acknowledging appointments of auditor and town solicitor respectively.

St. Andrew's Church wrote asking that a sidewalk be put down on 3rd Street North on the south side of Morton Avenue connecting the present sidewalk with the Church.

C. H. Cross wrote asking that the proposed 2nd Ave. sidewalk be extended from the Reliance Lumber Yard to the front of his lots. These were referred to the Public Works Committee.

A. J. H. McCauley wrote enclosing his cheque for $5 for his part as a councillor last year of the illegal payment Council made in connection with the Mahaffey case. Referred to Finance Comittee.

A draft of proposed conditions and by-laws from the Fire Brigade for the government of that body was presented to the Council for approval. It was referred to the Fire and Light Committee.

Current accounts were passed.

A. Mc. Wright, representing the Canada West Townsite Co., Ltd., of Winnipeg, was present and addressed the Council calling their attention to the fact that there were knockers busy about Tofield, and urging upon them the desirability of everybody in Tofield getting together and uniting in a boosting campaign. He suggested that his Company was willing to assist the town in any way, but advanced no plan of united action nor gave any hint as to in what manner such campaign should be carried on, and a meeting was held next morning at which a more detailed line of united action mutually beneficial was agreed upon.

The Finance Committee reported recommending that a short term loan from the bank of $7500 be authorized by by-law. This was accepted and the by-law passed. The Committee recommended un named grants to the T.A. Society and the T.A.A.C. A grant was passed for $150 to the T.A.A.C. and the grant to the Agricultural Society will be further discussed at next meeting of the Council

Solicitor Brice submitted a draft by law providing for the establishment of a police force. This was given first and second readings.

Mr. Brice was instructed to bring in at next meeting of Council by-laws laying down the principal of a division of coal between the town and properties benefitted of local improvements on a basis of 50 per cent to each; also a by-law providing for the peace, order and good government within the municipality.

The tender of E. P. Rose for the construction of the big ditch at a cost of 20c per cubic yard and $35 per M for lumber for culverts, etc., including spikes and labor, was accepted.

Here on Saturday

M. Sackelbourg, A.M.'the celebrated and 25 year experienced eye specialist of Phone 3225, Archibald Block, Edmonton, will again be at the Queen's Hotel, Tofield, on Saturday, May 11th. Spectacles, eyeglasses and artificial eyes the best at moderate charges. Absolute satisfaction guaranteed.

New Cabinet Ministers Announced

By-Elections to be held May 27th

New Members of the Provincial Government Sworn in by Lieut.-Governor Bulyea on Saturday Night Redistribution of Portfolios follows—Carleton By-Election on same date as others —New Members bring additional strength to Administration.

Four new members of the Sifton Cabinet were sworn in on Saturday evening by his Honor Lieut.-Governor Bulyea. The swearing in took place at the office of the Lieut.-Governor at eight o'clock.

The new Cabinet as sworn in on Saturday is as follows:—

Arthur Lewis Sifton, M.A., LL.B., D.C.L., K.C., Premier, Minister of Railways and Telephones; Charles Richmond Mitchell, B.A., B.C.L., C.E., K.C., Minister of Public Works; Archibald J. McLean, Provincial Secretary; Duncan Marshall, Minister of Agriculture; Malcolm MacKenzie, M.A., K.C., Provincial Treasurer; Charles Wilson Cross, B.A., LL.B., K.C., Attorney-General; John Robert Boyle, K.C., Minister of Education; Charles Stewart, Minister of Municipal Affairs.

The taking into the Cabinet of Messrs. Cross, Boyle, MacKenzie and Stewart will involve by-elections in the constituencies of Edmonton, Sturgeon, Clarenholm and Sedgewick. The writs for the elections were issued on Saturday night, and, allowing for the necessary notice of 21 days, the by-elections will take place on May 27th. The writ for a by election in Carleton constituency, caused by the resignation of J. W. Woolf, was issued at the same time, and an election will take place in that constituency on the same day as the others.

The returning officers for the several by-elections have been appointed as follows:

Edmonton—Percy Hugh Belcher, home, 463 Tenth Street, Edmonton. Sturgeon — John Harold, farmer, Namaya P. O. address, Box 537, Edmonton. Sedgewick — Charles Ernest Motlowan, farmer, Killam. Clarenholm—David Morrison Rose agent Monarch, Carleton—Edward Neale Barker, agent, Carleton.

HON. C. W. CROSS
Junior member for Edmonton, who has been sworn in as Attorney-General of the Sifton Cabinet. The by-election will probably be held on May 27.

How the Vote Stood At the Last Election

In view of the coming elections on May 27th, it is interesting to note the results in these constituences in the provincial general elections of March 22-d, 1909. The present house after that election consisted of 37 Liberals, 2 Conservatives, 1 Socialist. Since then 2 more Conservatives have been elected.

In the general election Mr. Cross had a majority over Mr. Ewing of 1687; Messrs. Boyle and Stewart were elected by acclamation; Mr. MacKenzie had a majority of 267 over J. F. Garson, and Mr. Woolf a 135 majority over Levi Harker.

In the Edmonton and Sturgeon districts the Conservatives have selected A. F. Ewing, who was the unsuccessful candidate at last provincial election, and A. Williamson Taylor respectively as their standard bearers.

No opposition has yet been mentioned to Hon. Mr. Stewart in Sedgewick or Hon. Malcolm MacKenzie.

In Carleton Martin Woolf will be the Liberal candidate and John Parrish the Conservative.

For Mothers

In raising your Baby there is always something needed and it is nice to know that there is some place where Baby wants can be satisfied.

We try to carry each and everything that may be asked for on the list below will show

E. N. WHILLANS, - - Manager and Editor

TOFIELD, ALBERTA, THURSDAY, MAY 9, 1912

Editorial Comment

What are you doing for the benefit of the town?

By-Election, May 27.

Albertans during the past few days have heard the announcement concerning by-elections in the province which will be held on May 27. Both political parties are busily engaging in preparing for the fray, and the condition of [illegible] Edmonton, Strathcona and Claresholm, which have become vacant by the appointment of their sitting representatives to the Cabinet, and London by the resignation of J. W. Woolf, will be remembered for the entire province. Mr. Headly, M.L.A., for Okotoks, is sponsor for the statement that in every constituency there will be strong Conservative opposition to the Government candidate. It is, therefore, expected that the campaign will be the strongest and bitterest put up in the province since its establishment.

How to Kill a Town.

Buy from peddlers as much and as often as possible.

Denounce your merchants because they make a profit on their goods.

Believe in the devil till a man who has done quick to build up your town.

Make your town out a bad place, and stab it every chance you get.

Refuse to assist in any scheme for the betterment of the material interests of the people.

Tell your merchants that you can buy goods a good deal cheaper in some other town and charge them with extortion. If a stranger comes to your town tell him everything is overdone, and predict a general crash in the near future.

Patronize outside papers to the exclusion of your own, and then denounce yours for not being as large and as cheap as the city papers.

If you are a merchant don't advertise in the home paper, but complain of the editor's grasping love for advertisements and howl like a mad dog if he dares to [illegible] your credit stamp and use it. It may save you a few dimes and make you [illegible] but you are doing business in a one horse town.

If you are a farmer, take the place where you trade as the meanest on earth. Talk this over to your neighbors and tell them the men are robbers and thieves. It will make your property less valuable, but you don't care.

Advertising.

Advertising keeps a business from growing lazy and stupid. Advertising injects good red blood into the arteries of business and keeps it healthful and active.

It is said that a man who spends a dollar never squeezes his wife. In looking over the [illegible] it is evident to us that there are a large number of married women in this district who are not receiving the attention they desire.

The Outlook.

Never before has the outlook for the season been better at this time of the year than it is now. The weather throughout the month of April has been ideal for the farmer; the ground is in excellent condition for the growing crops. May list of this year found the seeding nearly finished than any year before, and the early sown grain is up and growing fine. Cattle, hogs, butter and eggs are a fair price and nothing to indicate that they will drop a great deal for some time to come. The alone is very encouraging, as so many of our farmers are running on the mixed farming plan and raise just enough grain to feed their stock. Mixed farming is the only safe method on this or any other district, as the farmers have something to sell nearly every month in the year, who was the grain farmer is [illegible] once a year.

HOME CARE OF THE SICK

Written for Dry-farming by Miss Irma E. Matthews, First Vice-President, International Congress of Farm Women, Oklahoma City, Oklahoma.

No home, however well ordered it may be, is always free from illness of the most beloved ones.

"The rich, the poor, the high, the lowly,
Each must answer to his call;
Before it the haughty bend
At it does the stubborn fall."

The art of ability to [illegible] methods of caring for a patient, at such times we could all be glad if we could call in the well-trained nurse whose quick ways, plain, unassuming dress and ready knowledge of what to do for the patient's comfort, seem to reduce a case to be pain or suffering.

The question for us is: When our the untrained nurse do? The following suggestions may be of some value:—

1. Remove all unnecessary decorations and furniture from sick [illegible] about. Pictures are [illegible] dust must also be removed. Every [illegible] be reduced to [illegible] are necessary.

2. Have all the [illegible] and [illegible] Keep this as fresh as possible.

3. If flowers are kept in the room be sure they are [illegible] and that the [illegible] them [illegible] [illegible] [illegible]

Big Game Hunting on Grand Trunk Pacific

With the exception of antelope and musk-ox British Columbia has every species of big game that exists on the Continent, even the moose being found in fair quantities. In addition, there are still found game birds of various kinds, the native and others acclimatized, that furnish sport, while the waters afford the finest salmon fishing in the world. In fact, the sporting possibilities are as many that it would be impossible to exhaust them in an ordinary lifetime. The Grand Trunk Pacific is opening up this grand territory where the very best hunting will be found.

Some 50 miles up the river from Fort George the "Grand Canon" is reached, and from there a magnificent moose country extends as far as the Little Smoke River. From reliable reports received it is probable that there are more moose to the square mile than in any other part of the Continent, and every year their numbers seem to increase.

So far the country has never been hunted except by a few prospectors. Within the horns attain the large size of the Cassiar moose has yet to be determined, but some very fine heads have been seen. In this district Caribou are very plentiful on the higher plateau, and at places both grizzly and black bears are numerous.

International Dry-Farming Congress

Lethbridge, Alta., May 3. The Government of Saskatchewan, through Hon. W. R. Motherwell, Minister of Agriculture, has offered a silver trophy and a cash prize for the best exhibits of agricultural products of that Province displayed at the International Dry-Farmed Products Exposition at Lethbridge October 21-26 next.

The Provincial Government plans to encourage everything before it at the Exposition, and is arranging for an exhibition that will cost approximately $5000. It is estimated that fully 1000 farmers from Saskatchewan will attend the Dry-Farming Congress.

The Department has placed the matter of arranging a provincial exhibit in the hands of Mr. H. N. Trent Thompson, whose successful exhibit at Colorado Springs last year, coupled with his experience on the Provincial Department of Agriculture with which he is associated, qualifies him as an expert in this line.

Mr. Thompson has made application for the reservation of 2000 square feet of floor space for the provincial exhibit. 300 lineal feet for 20 or more districts in Saskatchewan, and he announces that he will be open to entries in every district of that province that is prepared to enter.

Richardson & Rudd, Saskatchewan last year came within a very few points of winning the Great Sweepstake prize Colorado Springs, losing out only through the fact that it had very few vegetables, whereas Alberta won by having a large vegetable display that scored high.

The Province holds the honor of having produced the best bushel of wheat in the world in 1911 and Mr. Thompson is arranging to uphold this honor this year at Lethbridge. He reports that the Department of Agriculture is making six lectures and organizers who are making a feature of interesting farmers to specialize. Those farmers who make a particular study of any one class of agricultural production will be given a free trip by the Department of Agriculture so that they may specialize in that class. In this way it is expected that the very best products of each class will be produced.

"That Russell Tractor I purchased got lots ... for Swastikas in with a delegation from our Province," said Mr. Thomson at a conference with the Executive of the Canadian Board of Control of the International Dry-Farming Congress at Lethbridge this week. "We have at least 50 farmers already in line to enter a field against the whole aggregate of the world in the one bushel of hard wheat competition for the $1000 sweepstake engine. This is the most untested manifested in this prize, but we are also going after the Stewart Sheaf Loader, which many of our wheat growers are anxious to possess. The International Packer that is offered for the best peck of flax, the grain buyer that the International Harvester Company has offered for the best sheaf of oats, and what is more we are sanguine that we will capture the Oliver Gang Plow which is the prize for the best loaded of oats.

"Not only will Saskatchewan endeavor to win the best exhibit at the Congress, but it will also send a delegation of 100 farmers to see how to attend. The delegates will assemble at Regina. Every district in the Province will be represented if possible. They are all going to Lethbridge on special trains, and they will make the most comprehensive tour of the greatest grain growers of the world."

New Jewelry Store, Tofield

Jackson Bros., Edmonton's leading Jewelers, to open Branch Store in this town in Latimer's Block.

Tofelkers will feel quite pleased and even complimented on the fact that Jackson Bros. of Edmonton, who are known everywhere as the leading jewelers and watchworkers in the Edmonton district, are to open a branch shop in Tofield in the immediate future. They have engaged the north half of the ground floor of the Latimer Block, and will be moving in at once. This is an excellent stand, and as Jackson Bros. have the proud name for excellence and quality in all the goods they carry as well as the roughness in all the work the undertake, the public of Tofield and surrounding country will feel assured and at the same time greatly pleased that they will receive the best of work and attention from this firm, whom all welcome to Tofield.

NOTICE

Anyone indebted to us in any way will please mail at our office opposite the Standard, and arrange payment of same and oblige.

HALL & KENNEDY

M. Mecklenburg, A M., the Edmonton optical specialist will again be at the Queen's Hotel, Tofield on Saturday, June 15th. If your eyes are troubling you in any way do not fail to consult him. Local and General News

J. D. Kennedy was in Edmonton on Monday.

A. Beetz of Kingman did business in town on Tuesday.

A. J. H. McCauley was a visitor to the Capital the first of the week.

Fred Robinson of High River was a business visitor in town last Saturday.

Rev. R. H. Brett and C. N. Brisbin of Holden visited the town last week.

Dr. Hammond and C. H. Crean went up to Edmonton on Sunday returning Monday evening.

C. A. Trent of Fowler, Col., a brother of G. A. Trent, is visiting the latter for a few days.

M. Meeklenburg, the Edmonton eye specialist, paid Tofield his usual monthly visit last Saturday.

Mrs. Geo. Woods of Ross Creek is the guest of Mrs. W. Hopgood a few days this week.

Mrs. G. A. Trent returned on Friday evening from a short visit with friends at Carmangay, Alta.

Mrs. Hon. M. McIntosh and children of Mount Lawn, Sask., are visiting Mr. and Mrs. G. A. Trent this week.

There never was a time when people appreciated the real merits of Chamberlain's Cough Remedy more than now. This is shown by the increase in sales and voluntary testimonials from persons who have been cured by it. If you or your children are troubled with a cough or cold give it a trial and become acquainted with its good qualities. For sale by all dealers.

Dr. R. K. Redd and J. D. Mannen returned to Tofield Sunday after a six weeks visit with friends in the East. One point that impressed Redd upon them was the fact that everywhere down there people are talking of Alberta, and the publicity literature of many districts was in evidence. People down there were much surprised at the development of the Tofield district. Mr. Mannen and Mr. Redd had a very pleasant trip, and are both satisfied that Tofield is the place to call home.

Children's Service

The Children's Service" at the Methodist Church last Sunday night was certainly a credit to the children. The Sunday School Choir of twenty voices made the church ring with sweet music. The trio rendered by Thelma Noland, Barbara Streng and Gwendolyne Bird, was fine and was enjoyed by all. Fay Nicholson and Anna Hopgood very impressively sang "My Mothers Bible" Mr. Fry gave a solo which was much appreciated. During the evening Rev. R. Nicholson gave a very instructive talk to the children

Mr Mecklenburg devotes his whole time, skill and energy to the proper fitting of spectacles and eyeglasses, before he made issues.

W. C. T. U.

A meeting of the Local Union was held at the home of Mrs. Emery on Thursday afternoon, May 9th. Twelve ladies were present at the meeting. Rev. Holt, Whillans in a short address spoke very hopefully of the work and encouraged the ladies in continue their efforts.

Owing to illhealth, the secretary Mrs. A. Whillans has been compelled to resign, but one of the new members, Mrs. Bath very kindly accepted the office and was duly elected. Several important features of the work were discussed after which the hostess with her usual hospitality dispensed tea and cake

The next meeting will be held at the residence of Mrs. Swift on the second Tuesday in June.

Edmonton Spring Races

The Edmonton Spring Race Meet will be held May 23rd, 24th and 25th, beginning at 2 P. I ... each day, at the Exhibition Grounds.

$5,000 will be given in purses for harness and running events. Over one hundred horses are now in training at the track for this meet. Two hundred horses are supposed to pass to-day's events at the track for this meet. Secretary Bell has arranged for fast half-mile track at Edmonton.

The entries for the harness events close on May 21 with the manager, W. J. Stark, and for the running events at 10 o'clock of the day previous to the race. Reduced rates on all railroads.

Lady Tupper Dies at Family Home in Kent

London, May 11.—Lady Tupper, wife of Sir Charles Tupper, died today at Bexley Heath, Kent.

Lady Tupper has been in delicate health for a number of years as that her death was hardly unexpected. On the occasion of her last trip to Canada about two years ago, at which time she visited her son in Winnipeg and another son in Vancouver, she said that she would never again cross the ocean, as the trip had been too trying to her health.

Before her marriage to Sir Charles Lady Tupper was Miss Frances Morse of Amherst, Nova Scotia, a daughter of Mr. Stiles Morse, the first lawyer to practice in Cumberland county.

Three sons survive Lady Tupper, Sir Charles Hibbert Tupper of Vancouver and William Tupper of Winnipeg, both lawyers.

Her grandson, Chas. Tupper, a civil engineer, living in Vancouver is married to Miss Mary Dickie, a sister of Mr. A. H. Dickie, barrister of Edmonton. Mrs. Dickie, mother of Mrs. Chas Tupper, and Miss Dorothy Dickie are now in London, Eng., and if they have not already left for the Continent, will be in attendance at the funeral. There is a double family connection of the Tupper and the Dickes, the latter a cousin of Sir Charles.

Lady Tupper, who has been a leader in society, was especially noted for her gracious charm of manner and her deed which will be a secure blow to Sir Charles, whose devotion to her has always been remarkable.

Shipped a Car of Hogs

Another Instance of How mixed Farming Pays

Last Tuesday several farmers from the south part of the Tofield district sent out a car of hogs through Ruff Bros., Shipped, buyer for Swift. They were Messrs. Mitchell Bros., Jas. Fletcher, Charles Currie and Bath. One of these, Mr. Stibrett, had 10 hogs, which weighed five tons. At 8 cents per pound, five weigh the bunch, netted Mr. Stibrett $800. Who says it does not pay to practice mixed farming? There is no better country for mixed farming in the West than the Tofield district.

Lady Duchess into Flames To Save His Child

The four-month-old baby of Geo. Hill of Vermilion died last Saturday as the result of fearful burns sustained at the burning of its parents' home two days before.

Madly husband and wife strove to fight down the sea of flame that was threatening to destroy all they had in the world. The whole of the interior of the home was a fiery inferno, and it soon became apparent that no earthly power could save it. Then the father remembered his little one lying helpless in its bed.

Dashing frantically through the licking tongues of flame that ever reached out to destroy him, he clutched the baby to his breast and rushed out with his light though precious burden. His heroism was all but unavailing, for the child passed beyond all pain this morning, and he himself received burns so serious that it will be some time before he can re-turn from their effects. Most of the wounds caused by the fire are about Hill's head and hands.

The house was totally gutted, and the barn was also annihilated by the conquering fire king. The family have lost their entire belongings, including many valuable papers, which it will be impossible to replace. The loss is estimated at about $1000.

Construction of Big Ditch Commenced

E. P. Rowe, contractor on the big ditch started work last Monday with a gang of men and teams, and will push along the work as rapidly as possible. Operations began at the lower end, and as the ditch is completed all surplus water along the route will be drained off

Mirror to Incorporate

The townspeople of Mirror on the Tofield-Lacombe branch held a meeting last week to discuss the project of incorporating into a village.

Progress is their watchword, and no doubt we will soon see their desire attained. The growth of small trading centres into flourishing villages and towns is remarkably rapid in the west. Mirror will make a good town.

WITH THE
Boy Scouts
BE PREPARED

The first drill of the season was held on the School Grounds on Tuesday evening last, twenty boys being present, sword drill and marching was taken up and the boys showed that they had not forgotten the training received last summer.

The troops will take part in the Empire Day Celebration on May 24th and it is up to every member to attend all parades that as good a showing as possible may be made that day.

There is still room for a few more boys, those wishing to join can get all information from any of the leaders or the Scout Master.

Until further orders the troop will parade each Tuesday evening at 7.45 on the School Grounds.

Gold Medals for G.T.P.

Three gold medals and three diplomas won by the Grand Trunk Railway System at the great Bennis Exhibition of 1910 have just been received at the Company's headquarters in Montreal from Mr. E. C. Baker, European Traffic Manager, through the courtesy of Colonel Williams Hutchison, Commissioner of the Canadian Exhibition. These are awarded to the Grand Trunk and Grand Trunk Pacific Railways for general installation, exhibit and building. The medals, which are exceedingly handsome, are about 2½ inches in diameter. The obverse shows a lady relief of a mounted herald and the inscription, "Bennis Industrial Exposition, Louisville, Kentucky, 1910" and the reverse is surmounted by two symbolic figures in bold relief supporting the crossing of Labor and the date 1910

Improvements on the Agricultural Grounds

Society spending good money in putting the Race Track in better shape.

Upwards of $300 is being spent by the Tofield Agricultural Society this week in putting the race track on the Exhibition Grounds in much better shape. Parr's railway grading outfit has been engaged to widen and lower the home stretch and grade up the curves at each end. The gang started at the work yesterday morning, and already have made a splendid showing. With the big leading machine, to which twelve horses are attached, a tremendous amount of dirt can be moved in a day. The Society, by yearly receiving a substantial grant from the town, are anxious to improve the grounds in a manner which will be appreciated by the town and be of use to it on celebration days, and this is one of the ways in which the grounds can be made of greater use to the town. Much additional work will be done this year in preparing for tree planting, levelling rough ground and generally making them attractive, and making the grounds a park and an enjoyable resort for pleasure and recreation.

Churches

AT THE

CHURCH OF ENGLAND

Sunday after Ascension Day.
2.30 Service at Ballquin.

BAD FIRE AT BARDO

Disastrous Fire at Frank Lewis's. All Buildings but House Gone.

A disastrous fire took place Tuesday afternoon in the Bardo section, whereby Frank Lewis lost all his outbuildings, including granary, barn, chicken house, work-shop, machinery sheds, etc. A strong wind was blowing at the time the blaze occurred, and, in spite of every effort put forth by a bucket brigade of the neighbors, a clean sweep was made of the outbuildings, and it was only by a hard fight that the house was saved.

Mr. Lewis lost 200 bushels of oats and some wheat which were in the granary, a set of sleighs, a fine set of carpenter's tools given him by his grandfather, and many other things; but all the machinery and harness were removed to a place of safety when it was seen that the buildings were doomed

The fire was caused by the lunch-eon playing with matches by Mr. Lewis's little three-year-old boy, who had been out in the fields in the morning with his grandfather, who was burning brush. After dinner he rifled on a chair and reached down some matches from the top of the cupboard and thought he would go out and burn some for himself. He went round to the windward side of the granary where there was plenty of straw and touched her off. It was only a few minutes until the whole side of the granary was on fire, and it was not noticed by the older ones until then. Neighbors were phoned to for help as I quickly responded, forming a bucket brigade and auto-age corps, and doing good work. Fortunately Mr. Tofelt had his crop all sown and had but a little green feed yet to put in.

Tea Cent Tea Was Success

The tea cent tea given by the Ladies Aid of St. Andrews Church last Thursday evening at the home of Mrs. Rogers proved to be a very entertaining and remunerative affair, besides serving tea, coffee, cake, sandwiches and ice cream there was a table on which was displayed for sale several varieties of choice home made cookery in which a thriving business during the afternoon and evening was done. The proceeds in all amounted to about $15.00.

May 24th Celebration

The Tofield Citizens' Band has secured the Tofield Agricultural Society's Exhibition Grounds upon which to hold a big picnic, celebration and sports on May 24th. The Band is actively preparing a full repertoire of music for the day, and a programme of sports and races will be pulled off, for which prizes will be put up.

TOFIELD, ALBERTA, THURSDAY MAY 16, 1912

Editorial Comment

Let The People Rule

Some days ago we received a poster notice of a farmers' meeting at Holden to take place in a few days. The advt. conveyed the statement in large glaring letters that Dr. Goodwin of Vegreville, Liberal Candidate for this constituency at the next general election would address the gathering.

The Standard stated some time ago that Dr Goodwin of Vegreville was after the nomination as candidate for the Liberal party in this constituency and had been for some time. Now, it seems that he goes one step further and apparently foists himself upon the people. He chooses himself and says to the public, "I am your candidate, you must vote for me." It would appear to this independent sheet that the sensible people of this constituency will not accept this apparently self nomination of the honor coveting doctor of Vegreville who styles himself as the Liberal Candidate of this constituency. The manner of the selection of candidates for election in this country is entirely different from the methods which the learned doctor is pursuing. We believe that the people should have a free and independent say as to who is to be their choice and we believe the people of this constituency will not stand for this cramming down their throats in this case that men to represent their interests, this dictation to them from the aspirant of political honors as to what their duty is.

This is a free and independent country and every man has that right to his suffrage which no man, be he Dr. Goodwin of Vegreville or anyone else can rightly take from him. We do not believe the Liberals of this constituency will pay any attention to the doctor's self styled candidature nor will the independent electors give any more. A convention will be held to select a candidate and if the doctor is successful enough to secure the nomination, why, then he will be the candidate and not till then. Conservatives throughout the constituency are looking upon the whole affair as one greatly conducive to their interests. The Standard is disposed to look upon it largely in the same manner.

The people of this constituency, be they of either party strips, are accustomed to have their own way as to who is going to be their candidate in any election cam, aign.

If plum it be, we do not believe the conscientious representative of the people has any plum in his job, the people should hold that plum until the proper time comes to award it. Let the people have their

What enlightened people want today, particularly in the public service, is to see the office seek the man, not the man seeking the office. The day has gone by to pay attention to carpet-baggers. We have had so much lagging around amongst our law makers. Possibly this is why there are still some in the ring looking for the plums.

Agricultural Society Grant.

The Tofield Agricultural Society is asking a 'grant of $800 from the municipal Council this year. Incidentally it might be remarked that the Tofield Amateur Athletic Club was granted at the last meeting of Council the munificent sum of $150 to assist them in getting on their feet. It is not our intention to unduly criticise this action of Council. Possibly they had good reason for so doing. But, where can we point to an organization which is doing more for the town and district than the Tofield Agricultural Society? There are other ways certainly, of advertising the resources of the district, but there is no better means of development of every phase of Agricultural, Horticultural, Pastoral Industrial and Domestic Science than the inculcating and fostering of the spirit of of keen rivalry and competition in all things that are best.

The Tofield Agricultural Society has started out to do great things. The years of mutual development are the hardest to steer through. Feeling that the town of Tofield was in warm sympathy with its work, and could assist it by co-operation, it purchased grounds within the town. Last year it did not attend the sum of $300 to $0 to development of the grounds and prizes at the Fair. It is thus showing a record of what it can be proud. To good work is just begun. Quality is being aimed at by almost every farmer in the district in everything he produces largely as a result if the distinct reward which comes to him by honors attained and prizes earned at the Annual Exhibition and Stock Show.

Now in the development of the movement started by the Society beneficial only to the farmer. Late benefits accrue to many property holders within the town. In addition for the kindly co-operation given by the town, the Society is putting the grounds at the pleasure of the townspeople to be used as a park and grounds for all celebration purposes But all these developments are costing the Society a lot of money. It is but right that the town should be cordial co-operation. It is understood that the Society has many suggestions and that the grant asked is less than a third of the amount Tofield citizens, in the face of these and many other reasons why, I urge upon the Council to deal with the Society in an up-to-date manner as is consistent with good judgment.

The Dairy Prospects in the Tofield District

POEMS

There is a very noticeable increase in the Poultry Industry in the Tofield district during the last few years and it is no wonder When the family on a town lot, by keeping 20 to 30 hens, can have all the eggs and family can wear (and know they are fresh) as well as a rooster or a pet pig occasionally, and have enough to pay for feed, what does the farmer make? In common with other lines, the demand for eggs and poultry is increasing faster than the supply. It would, perhaps, be impossible to find another place where feed is so cheap and eggs and poultry so high in price. And yet, owing to the uniformly dry weather during fall, winter and spring, feed is unusually well kept. With feed about as cheap and eggs from 20c. to 25c., the margin of profit is large. The demand for fowls is equally good and prices uniformly high. The fowl of large shape is the profitable one. But, when carefully followed up, there are few lines that, for the capital invested, the risk run, and the work done, yield as large a profit. When looking for an ideal plan for poultry do not pass Tofield Hog Raising.

Alberta, with her healthful climate, rich soils and cheap feed does not reason enough begin to supply a home demand. In our stores and butcher shops even our farmers buy imported hams and bacon, and yet it is doubtful if another place can be found where hogs can be raised so cheaply as in Alberta. In the Tofield district, where hogs can be raised for $3 per hundredweight,

PEPSIN DISCREDITED

No Range of Usefulness in an Hour Than It is Proprietary Nuisance

You can't want an unfair digestive agent just for the fun of taking something that will digest what your stomach won't assimilate. How much better to prevent indigestion than to try to cure it. You can do so easily and surely.

We want to think pepsin was the only thing for any form of digestive trouble. But somebody found out how to improve digestion by artificial processes and showed that pepsin was a very poor tool for the purpose. There are better tools in the database, pancreatin, etc., but even they usually work at the wrong end of digestion.

Now up the digestive organs—make them more active—produce a normal healthy appetite—and you won't know you've got a stomach except when you are hungry. Just try Nyal's Dyspepsia Tonic for a change. You will be surprised how differently and how affectively it works.

A good many people—especially aged people—have found relief from stomach trouble in this tonic as a result of recommendation. It is confidently believed that our Nyal's Digestive Tonic Tablets prepared itself to every user. It loads up the whole digestive system by a different process and it is the only rational way to treat digestive troubles. It will give you an appetite and a relish for food. Ask for Nyal's Dyspepsia Tonic Tablets at this remedy. There's a lot to be said about it. Ask us about it—questions and we know about them.

Announcement!

June the 1st.

To successfully compete with the Mail Order Houses we have decided to fall in line with the merchants of our neighbouring towns by adopting the cash system, beginning with the first day of June. Believing that we can better ourselves and save money to our customers in the form of lower prices.

Remember the man who can pay cash for goods or chattels or purchases he may make can always secure a better bargain than the man who buys on credit. Hereafter, will be a great saving if everyone could manage, by rigid economy if necessary, to pay cash for everything they buy. It will pay a high rate of interest on every thing purchased.

All produce treated as cash.

J. LEE, Sr., Main St.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

Oil-Burning Engines on G.T.P. Steamers

In connection with the installation of oil-burning engines on the G.T.P. steamers "Prince Rupert" and "Prince George," Capt. C. M. Nicholson, Manager of the Line, reports that the advantage gained by the use of this fuel as compared with coal, although varying according to the conditions under which it is used, can, nevertheless, be readily appreciated. "The quantity required," he says, "to perform the same service is less both in weight and in space occupied, with a proportionate decrease in fuel bills. It has been the experience also of the shipowners who have changed from coal to oil that charges for boiler maintenance have practically disappeared Another most important economy is the reduction in the number of firemen and trimmers, with the consequent lowering in pay-roll and cost of subsistence. Because of the absence of smoke, cinders, and coal dust, oil-burning steamers are not only cleaner but the supplies for scrubbing and painting are much less, and, while it is difficult to calculate economies from such sources, they are appreciable nevertheless. In point of efficiency the advantages are quite marked, and, while it is again difficult to calculate definitely the future oil supply, still there are no present indications of failure in this direction. Tanlin facilities are becoming more adequate, and ships may now take oil at all of the Californian ports -Portland, Oreg., Tacoma, Seattle and Vancouver on the Pacific Coast.

The contract for the tanks and installation was given to the British Columbia Marine Railways, Ltd., at Esquimault, and the "Prince George" was retired from the service for the purpose of making the change in November last. Some Rome delay was experienced in assembling the material but the work is now complete, and the boat went into commission again on March 1st. Much study and care has been given to this installation in arranging the plans and working out the details, and the result is considered to be the most complete equipment of its kind on the coast by other oil and steamship men. It is confidently expected that not only will times means but that many thousand movements may be found possible under the new conditions; not the least of which will be clean, white painted stockholds, smokeless stacks and smokes decks.

New Stations on G.T.P.

The Grand Trunk Pacific Railway has at present nineteen new stations under construction along its lines, and it is expected that all of them will be completed and ready for service at an early date this spring. The names of the towns at which these stations are being built are as follows:-

Pacific Junction, Boundry, Cabot, Elie, Harte, Knox, Lanrie, Macgowan, Obed, Roundcroft, Jasper House, Henry House, Fort Qu'Appelle, Zehner, MP 6 Alberta Coal Branch, Parkgate, Victoria Plains, Dorenlee, Archley and Pitchgah.

ATHLETICS SPOIL WOMEN'S FIGURES

A Declaration of Artists Who Have Studied Most Dimensions in England

The deterioration in the beauty of women's figures consequent upon the present craze for athletics, is exciting a good deal of controversy in England, where several men are embarked in a crusade against the modern girl's over-development in muscle.

The discussion has come out of the declarations of Louis Potter and Hall Sturges, American sculptors, that the changes in the female form have been so great that women does not seem in any way resemble the Greek type. Consequently English artists are finding it more and more difficult to find suitable models. The new figure," says a well-known associate of the Royal Academy, "is full of heavy muscles of muscles instead of soft, flabby curves, and though this muscular development is beautiful in man it is not so in women. The artist will be over-developed woman is ob viously in the aesthetic sense."

The result is that artists and sculptors now have to rely more on the creative ability than ever before. All Greek Bronzyers points out, is still possible to put models who are perfect in proportioned but the supply is becoming short.

A far more serious objection to the growing athleticism of women comes from physicians and

"Hockey is neither healthy nor graceful," said the head of a famous London girls' school. "A growing girl who plays this game for an hour or five days a week, is almost bound to show symptoms of the strain after a year or so."

One of the best medical experts also declares that "the tendency at hockey is to get strain on the muscles that might not to be trained in young girls and women," the result being that the heart, kidneys, and uterus are frowned by most authorities who specialize in these organs.

The outcry in England to see against the present craze for women, has spread to other countries, and in Canada eminent physicians and athletic experts interpret women's new beauty conditions in Canada against an ideal way to produce a perfect girl, declared, for example: "This new ideal of ours, is due to the craving of "the feminine sex" for complexion and rich men, and accounts for the growing indifference to household duties noticeable in certain sections of modern English cities.

SUGGESTIONS FOR MOTORISTS IN SIX EUROPEAN CITIES.

TRAINING LESS STRENUOUS

Says Lawson Robertson, Famous Trainer and Coach

At a recent gathering of certain members of the athletic fraternity of New York, Lawson Robertson, trainer and coach of the Irish American Club started the gathering by asking the amateurs in attendance why they have to train so diligently for indoor running as they do when they are preparing to compete in the open

"There is very logical reason for making this statement," he said, "but first it must be understood that these many sprinters I do not handle any the run more than 150 yards. Beyond that distance it is largely a test of endurance as well as speed, and therefore these runners must train just as diligently in running on the board tracks as if they were conditioning themselves for running against yards.

"In the first place, one gets in most serious things sprinters have to contend in the wind. Indoors there is no wind, and, other speed is not impaired by any setting there is much energy is not required. Then, too, there is more reliability to board floors than there is to cinder paths. Another reason is the fact that the runner does not have to take into consideration weather conditions while preparing for dashes in the pen as athlete is compelled to be ready to an every ounce of energy that he can gather at any time, for he can never tell when the track may be hasty."

$100,000 FOR A HORSE

Mr. August Belmont's Pitter Patch, the winner of the Dominion Handicap at Post Erie last summer, who he sent to France to head his breeding establishment there, has been sold. Pitter Patch is a son of the Derby and St. Leger winner Rock Sand. He is by Mr. Belmont paid $100,000 and English breeders were very anxious to buy the horse in that country to keep the place of Isinglass.

The Martin-Senour 100 per cent Pure Paint, being made of pure material, covers 25 per cent more surface, wears longer, and is therefore more economical than adulterated paint or lead and oil.—Geo. B. Brace.

His Royal Highness the Duke of Connaught, Governor-General of Canada, who has invited all railway photographers in the International Dry-Farming Congress at Lethbridge, Alberta, on October 21-26, 1912, to be duly registered, will formally open the Convention as official representative of His Majesty King George.

Alfalfa Culture in the Middle North-West

Written expressly for Dry-Farming by L. E. Waldron, Superintendent Dickinson Sub-Experiment Station, Dickinson, North Dakota.

The ground selected for alfalfa should be well manured, plowed well and planted in corn, potatoes, or to some cultivated crop. This cultivated crop should be kept very clean during the period of growth.

In early spring of the year following the previously cultivated land should be disced or well harrowed. Later on the soil should be worked consecutively until late in May. This working of the soil serves two purposes. The moisture in the soil is conserved, has perhaps the main thing is to kill off the young weeds, which will germinate during April and May. We find it quite important to keep the new alfalfa crop as free from weeds as possible, as young alfalfa plants are not good weed fighters.

VALUE OF MOIST SOIL

It is quite important that alfalfa be sown on land that contains moisture stored water. This enables the young alfalfa plant to push its roots down with rapidity during the first season, and a good foundation is laid for the development of an extensive root system, which is important. If alfalfa is to flourish under our dry land conditions.

If alfalfa is sown on land that contains no stored water, then the plants will be stunted the first season, the top will not develop as it should and the crop may be shortened for several years.

INOCULATION

It is apparent that most of our upland prairie soils will need inoculation. It is necessary that certain bacteria be found in the soil. If they are not found naturally they must be put there. This planting of bacteria is called "inoculation." The best and most economical method is to secure dirt from a successful alfalfa field. The dirt should be sowed over the field at the rate of 200 to 300 pounds per acre upon a cloudy day and harrow in. Sunshine is injurious to the germs. An advantage in starting with a small patch of alfalfa is that when the patch is well inoculated a farmer has an abundance of alfalfa dirt to inoculate larger areas.

SEED AND SEEDING

Our experiences with the Grimm alfalfa leads us to recommend this variety for most northern areas. Care should be taken to secure Grimm of known genuineness, as there are dealers who are offering common alfalfa seed as genuine Grimm. South Dakota and Montana seed is of second choice.

Alfalfa seed should be of good quality. It should germinate 90 per cent or more and would be free from foul weed seed. Care should be taken to secure alfalfa seed free from dodder. Alfalfa seed may be sent to "Seed Commissioner, Agricultural College, North Dakota, for testing.

Seeding is best done in late May or in early June. Late in May one has a chance to kill the weeds in the fields which is designed for alfalfa, and also rains usually stimulate to hasten the growth of the plant. Alfalfa should be sown without a nurse crop, especially if the ground is clean. Seed is best sown with a drill at a depth of one inch or even two inches in light soil.

RATE OF SOWING

This is a very important point in semi-arid districts. It is necessary that the alfalfa stand be such that the rainfall is limited in order that the root system may attain excellent development. The rate of sowing depends on many conditions. If one sows barely variable seed and the conditions are good, then 3 lbs. per acre is probably sufficient in areas of diminished rainfall. In this case it is understood that owing is to be done in 6 or 7-inch drills.

Most drills do not make such tight seeding as 5 lbs. per acre, so that it is necessary to dilute the seed with some inert material. We have find oilseed soil is excellent for this purpose, and when sowing on new ground one naturally takes the oilseed soil to dilute the seed.

SEEDING IN HOPS

In the semi-arid districts seeding alfalfa in cultivated rows of hay production demands serious consideration. From what we know at present time it would appear that in many districts this method of seeding will produce the greatest net returns. When seeded in this manner, from 1½ to 3 lbs. of seed per acre, provided it is of good quality, will be a sufficient amount.

Alfalfa germinates rapidly, and under favorable conditions will be up in five days. Very often rains break the dirt, and if the soil is sandy a thin hard crust is apt to be formed through which the young plants cannot force their way. It would not be safe to give this an ordinary cultivation, but a hollow wooden cylinder through which many nails are driven, the points of the nails projecting to the outside should be used. It would be best to effect a slight roller studded with wooden nails.

CARE OF THE GROWING CROP

The crop should be clipped the first autumn once or twice when the weeds become troublesome. Clipping should not be too close, and the last clipping should be made before the growing season is finished.

In the spring of the second season, if the alfalfa is fairly well established, the crop should receive some cultivation, either disking or disring and harrowing. After the first cutting it will be a good plan to disc or harrow again.

TIME OF CUTTING

Alfalfa should ordinarily be cut when it is coming into blossom. To be more accurate, it requires cutting when the basal shoots are starting for their second growth. Examination of the plants will show whether these are starting or not.

When one growth is removed another one comes on immediately to take its place, and on continually as long as moisture and temperature conditions are favorable. But if the first growth remains while the second one starts, then, evidently the second suffers, when the first and second growths are developing at the same time.

SECURING THE ALFALFA CROP

Nearly all alfalfa of the country is utilized in the form of hay. Alfalfa hay differs from that made from the true grasses, in that the leaves are easily lost. The fact is of importance because the major portion of the value of alfalfa is found in the leaves. Thus, in securing alfalfa hay, it is quite essential to secure as large a portion of the leaves as possible. After cutting, alfalfa should be raked before the leaves become dry. It is best that alfalfa be made of its curing in the cock. With favorable weather, and with a yield of 1 ton to 1½ tons per acre, it is possible to cut one day and draw the next. With such rapid handling, and if raked before too dry, the most of weight of leaves is lost and the alfalfa secured with a good green color. In bunching, alfalfa should be handled by hand, as bunching with a rake loses many of the leaves. Rain is very injurious to be cut hay.

DRY SNAPS

Farming is not all horse shoes; a farmer doesn't succeed or fail because of "luck."

For the sake of wealth and health for the accommodation of the ever flow of people, the reclamation of desert lands is a topic of the day.

Runaway Accident : One Horse Dead

C. Better lost a horse last Tuesday as the result of an accident on Main St. Fletcher was in a hurry to have started S. A. Hall's driver which was tied and caused him to break loose. He left the barn run with the buggy it crashed into Better's horse, one shaft penetrating the heart causing a body running an injury from which it died in a few hours.

Guy Owens Meets With Gun Accident

Guy Owens met with a gun accident on Tuesday evening at Mirror where where he went recently to act in the capacity of postmaster for the G. T. P. He went to buy a No. 12 gauge Winchester shot gun from a man who was standing up in the corner of his tent and took hold of it by the muzzle with his right hand. It went off and the discharge blew out a considerable portion of the palm of the hand, He came up to Tofield yesterday morning on the express and had the wound attended to by a local surgeon.

Owing to there not being a quorum present on Tuesday evening a council meeting was held. Messrs Emery, Urquhart and Logan were elected to Edmonton and Councillor Yorath was indisposed. A special meeting will be held to-night.

FIRE AT MINE

Tofield Coal Company's Big Excavating Machine receives bad Scorching.

On Thursday night of last week fire broke out in the boiler room of the Tofield Coal Company's big steam excavating machine and utterly destroyed all the woodwork in connection with the machine as well as damaged the boiler and working parts. It is supposed that the blaze caught from live coals dropping from the fire box. No one was around at the time and when noticed the fire was beyond control The machine is not destroyed but can be repaired. This is being done immediately, but it will be some time until it will be in shape again

Several cards each containing parts of the new machinery purchased in Europe by the Tofield Coal Company for working in their Tofield mines have arrived, and the balance of several cars is eagerly awaited in order to begin the setting up. Owing to the fact that the consignment came over in two separate boats it has not arrived together. Experts are here from the coal country to set up the machinery at once upon its arrival. When this new outfit is set in motion, the development of this Company's large holdings is to will take place with much greater rapidity, and their output will be increased by several times. They now have a large gang at work.

Here Again on June 15th

M. Mecklenburg, A. M., the Edmonton eye specialist will again be at the Queen's Hotel, Tofield on Saturday June 15th. If your eyes are troubling you in any way do not fail to consult him. Mr. Mecklenburg devotes his whole time skill and energy to the proper fitting of spectacles and eyeglasses, he has no side issues.

Girls Brigade

Will be in attendance on Empire Day May 24th.

Dry Goods **Rogers' Bros.,** Men's Furnishings

Summer Dress Goods

Editorial Comment

Proper Diligence

There is a big difference between hustle and bustle. Some men in business seem to put half their steam up through the exhaust. If fussiness, noise, change and bullheadedness might be considered essential some men ought to succeed beyond all pendentvitam. The thing in business is to make every lick tell. It is not only necessary to hit the nail on the head but to drive it. There are men as well as women who try to drive four-inch nails with a tack hammer, and the process is as annoying to those around as it is hopeless for themselves. Diligence in business does not necessarily mean getting down before breakfast and quitting at bedtime. There are people who do this sort of thing year in and year out and never seem to be any further ahead. The right kind of diligence is a combination of brains and muscle that knows when to quit as well as to begin. "Seest thou a man diligent in his business? He shall stand before kings."

Have Faith in Your Town.

The history of all progressive centres of trade and commerce in Alberta and the West in general is such that the citizens of any progressive centre have ample reason to feel assured that in the process of time developments will accrue which will result in their centre of trade and commerce growing to such a size as exceed utterly earliest and most sanguine expectations.

All of the young cities of the present day in the West have gone through this experience. Every one of them has at some time in their existence been smaller and of less importance than we are here in Tofield to-day. To-day they are flourishing young cities. The history of these centres and the results of steady campaigning for the development of every branch of their natural resources, we repeat, is ample reason for Tofielders to feel proud of our position and to feel every assurance that if we take hold we can make Tofield, as it has every chance to be, one of the most important towns in the province. The opportunity is ours. Will we rise to the occasion?

Man's natural propensity is to be restive under conditions. We are prone to feel that progress is not being made fast enough. Is this because we want to get rich quick? Developments do not seem to occur fast enough. Let us remind our readers that it is but a few years indeed since there was no Tofield here as a town. To all the old homesteaders of the district the process of development seemed to occur very slowly indeed. But, after all, the developments have taken place and Tofield has become a thriving and flourishing young town and the district become a prosperous mixed farming community. In looking backward, the time seems to have slipped past very quickly. Let us not be too impatient. Let us unite in a thorough boosting campaign. Real estate investment in Tofield is sound—is sound in any of these young towns in Alberta. Investment is not being made with the idea of immediate returns. The future has much good in store for us. It is up to us to make good. If we make good, then the town will make good. It is up to us to look on things in the light of the future, to boost and to boost all the time.

The Agricultural Outlook.

Few, if any, springs during the past decade have opened up with a brighter agricultural outlook than the present one. The weather has been more than usually propitious for seeding. The farmers have been able to get at the fields earlier this year than usual, and since plowing was possible there have been no drawbacks. As a result, seeding operations in this district are practically completed, as a glance over the local district news this week will indicate. The earlier sown grains are all up and making good headway. There has been an abundant supply of moisture stored up in the soil since last fall, and what fell during the past few weeks has but added to this supply. There has been considerable addition to our cultivated acreage, which will result in a large increase in grain production.

A satisfactory feature in rural development in the Tofield district is the growth of diversity in farming operations. Dairying is increasing at a remarkable pace and the profits increasing proportionately to the farmers going into this profitable branch of husbandry.

With good growing weather the harvest of 1912 should prove a banner one, and it is to be sincerely hoped that when the time comes to move the crops to market there will be no transportation difficulties and disabilities which characterized the fall and winter of 1911.

Alberta Potato Contest

Silver Trophy Cup Given for the Best Peck Grown in Southern Section.

Lethbridge, Alberta, May 20.—Chairman J. W. McNicol of the Exposition Committee of the International Dry - Farmed Products Exposition to be held here October 21-26, announces the donation of a silver trophy cup by R. A. Darker of Calgary, manager for Southern Alberta of the Canadian Life Assurance Company, for the best peck of potatoes grown in 1912 by dry-farming methods, open only to Southern Alberta south of township 23.

This permits all farmers south of an imaginary line drawn from east to west about 20 miles north of the city of Calgary to enter, and the cup, which is of the value of $40, will be a trophy worthy of keen competition. Potato growers in the section described are requested to write to J. W. McNicol, chairman of Exposition Committee, Lethbridge, for premium list and any further information they may desire. He hopes to have a big exhibit, as the object is to show increased demands for spuds and the larger number of farmers who are engaged in raising them.

Cheap Power for G.T.P. Townsite of Fort George

A report has just been filed at Victoria, B.C., on the water power of the Willow River, about 17 miles east of Fort George. At this centre it is proposed by the Fort George Power Company, Ltd., a Company which has undertaken the work to develop power for manufacturing and other purposes. In the development scheme a dam is planned to create a service reservoir, which will be the means of maintaining a constant head of water in a turbine to be installed in a power house erected on the lower face of the dam. In addition, a smaller dam will create a head storage reservoir. According to the report, 40,000 or 50,000 horse power might be obtained with sufficient storage. Such an asset should prove an important factor in the industrial growth of the terminus and Grand Trunk Pacific townsite, closely situated as it is to the source of supply for raw material.

Liberal Victory in the Quebec Elections

Ottawa, May 16—The result of the provincial elections in Quebec yesterday when Sir Lomer Gouin, premier of the province, was returned to power by an increased majority, has given rise to much comment in the capital, and many inferences are being drawn from the liberal victory. The Liberals may count upon such as of great significance to the party all over the Dominion, and as vindication not only of the good government of Sir Lomer Gouin, but also of the old Chief, Sir Wilfrid Laurier, whose name they point out with pride, is as great as ever in Quebec. In the light of yesterday's events, the splendid ovation which Sir Wilfrid received at Sir Lomer Gouin's meeting at Hull, previous to the election, is taken by the Liberals to have indicated that from a federal standpoint the former premier is still the popular idol of old Quebec. For this session strong encouragement has been gained by party in the east in connection with with future federal battles.

Announcement!

June the 1st.

To successfully compete with the Mail Order Houses we have decided to fall in line with the merchants of our neighboring towns by adopting the cash system, beginning with the first day of June. Believing that we can better ourselves and save money to our customers in the form of lower prices.

Remember the man who can pay cash for goods or whatever purchases he may make can always secure a better bargain than the man who buys on credit. It, therefore, will be a great saving if everyone could manage, by rigid economy if necessary, to pay cash for everything they buy. It will pay a high rate of interest on everything purchased.

All produce treated as cash.

I still have a number of A 1 Seeders and Land Packers. Get 'em Quick.

J. LEE, Sr., Main St.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

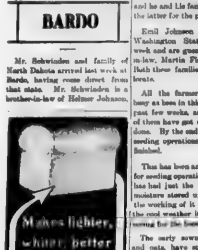
PUBLISHED WEEKLY IN THE INTERESTS OF TOFIELD AND THE WELFARE OF THE PUBLIC

VOLUME V | TOFIELD, ALBERTA, THURSDAY MAY 30, 1912 | NO 41

BARDO

Mr. Schwinden and family of North Dakota arrived last week at Bardo, having come direct from that state. Mr. Schwinden is a brother-in-law of Helmer Johnson.



Made by
Richardson & Rudd,
TOFIELD

and he and his family are guests of the latter for the present.

Emil Johnson and family of Washington State arrived last week and are guests of his father-in-law, Martin Pfunth, at Bardo. Both these families have come to stay.

All the farmers have been so busy as here in this section for the past few weeks, and the majority of them have got all their seeding done. By the end of this week all seeding operations will have been finished.

This has been an excellent spring for seeding operations. The ground has had just the right amount of moisture stored up in it to make the working of it ideal. Owing to the cool weather it has been a fine spring for the horses.

The early sown grains, wheat and oats, have sprouted and are well above ground, especially the wheat, which is in some places from 1 to 3 inches high.

This section of the Tofield district is also giving every sign of outstripping the famous Clover Bar district in aggressive farming development. Here breaking and breaking is completed than in any previous season. The several plowing and breaking outfits in the community are busy. Larsen & Olsen's steam breaking outfit is busy on Mr. Olsen's place moving down the south by the new and breaking. As soon as they have completed the job here it will be moved over to Mr. Rorem's new farm, where a large area of entirely new ground awaits in its primeval state the attack of modern methods and machinery to transform brush and forest acres into fertile fields prepared for seeding.

Arnold Stein and P. Lerbecus's steam rig is busy plowing many acres per day in the south part of the district.

Clarence Rude is doing fine work breaking with his outfit of six oxen and breaker on W. Parker's farm. In spite of the presence of more powerful and tireless methods of motive power, the olde system of breaking sod is not lightly to be despised.

Our recently arrived German friends who have settled around us also have their powerful steam and gasoline outfits at work turning over the virgin sod in large areas.

P. B. Anderson, basket shop, has been busy, and is busy yet, with a double yoke of oxen plowing for dear life all spring preparing for the putting in of the largest crop he will have had in any year up to the present.

Prospects for an excellent crop in 1912 are of the best. The soil was never in better shape for seeding and germination and owing to the best of weather so far the crops have got away to a good two weeks start over other years.

Mr. Yoder is building a fine residence on the old Bailey place. He already has had a splendid barn put up there.

Mr. Kaufman is busy building. He is putting up a splendid barn, and at present he is living in what will be his granary. He will shortly put up a residence which will be a credit and adornment to the community.

The annual celebration and picnic of this community commemorating the securing of their freedom in old Norway will be held by all local Norwegians on June 7th next at Finneth's, when a full programme, comprising entertainment for old and young alike, will be carried out. We expect to see the greatest crowd ever congregated in this community at this celebration of Norwegians' greatest national epoch.

Lars Johnson of Kingman, and formerly of this section, returned from his trip to Norway last week. He brought back with him several young men who are going to make Alberta their home in the future.

The Great Northern Railway Reaches Winnipeg

The Great Northern Railway signalized its entrance into the city of Winnipeg over its own rails by hauling the largest train load of agricultural machinery ever hauled over any railroad in the world. One hundred cars of oil pull traction engines, manufactured by the M. Rumley Company of La Porte, Indiana, left St. Paul in two sections for Winnipeg.

By acquiring trackage rights into the city of Winnipeg, the Great Northern adds about 70 miles to its Canadian mileage. Already it has more than 800 miles in Manitoba and British Columbia. The Great Northern was a considerable factor during the winter of 1911 and 1912 in relieving grain congestion in Manitoba and eastern Sask. It handled about 2000 cars of grain through Portage La Prairie and about half of that amount through Emerson to the head of the Lakes, this excessive of what was handled over its own Manitoba lines.

The Great Northern has more than once helped out the people of Western Canada in connection with coal shortage. Last year it handled thousands of tons of coal through Alberta.

The great trainload of 100 Oil Pull Tractors was valued at approximately a quarter of a million dollars when it left the factory, while freight, and duty will materially increase this by the time it reaches Winnipeg. While the engines on the cars were of three different sizes, the average weight was close to 20,000 pounds each, or 1300 tons as a total. One hundred brand new flat cars, each weighing 40,000 pounds, added 2000 tons more to the burden behind the great mallet locomotives that handled the train.

These 100 engines would have sufficient power to equal the work of 5000 horses in stationary work such as running the threshing separator and wood saw. For plowing and other straight-forward motion the work of the engine would be out in half, but still would be equal to the power of 2500 horses.

This one shipment is only an incident as compared with the stream of agricultural machinery pouring into Western Canada. A recent report of the Minister of Agriculture at Ottawa shows that in ten three provinces nearly 200 million acres of tillable land lie in a virgin state waiting for plows and mechanical power.

Business men in the West realize their dependence upon agriculture much more keenly than those in manufacturing towns, and both business men and farmers have become imbued with the idea of using the machine for the heaviest work. A train load, therefore, that promises to add a million and a quarter dollars to Canada's wealth this year is an event which aroused the keenest interest.

Local and General News

Miss Burke spent the 24th in Edmonton.

Richard Graham returned last week from Rourke, Ont.

Miss Hannah is visiting friends in Camrose this week.

Clifford and Clarence Binett spent the holiday in town, the guests of Syd Carter.

The Misses Washburn of Edmonton were guests of friends in Tofield last Friday and 24th.

Mr. and Mrs. N. C. Leggo paid a short visit to Edmonton last week end

Mr. Will Strachan of Edmonton was the guest of Miss Tofield last Friday.

Mr. and Mrs. Urquhart spent several days in the Capital last week, returning on Friday.

Miss Amy Morton was down from Edmonton to spend the holiday with her parents.

S. A. Hall, J. B. Kennedy and other Tofielders took in the Spring Races at Edmonton last week.

Chas. W. Taylor, of the Tofield Coal Co. returned a few days ago from a trip to the south.

Wilmer Gold and Ernie Dugald, two erstwhile Tofielders, spent a couple of days in town last week.

Two Tofield brave owners, Rob Davidson and J. W. Morton, won prizes at the Fort on the 24th.

The T.A.A.C. dance in Masonic Hall last Friday evening was largely patronized

Mrs. W. A. Griesbach of Edmonton was the guest of friends in Tofield last week.

Miss Eleanor Binnett of Edmonton was the guest of Mrs. Ralph Davison for a few days last week.

A large number of Edmonton ians came down to Tofield last Friday morning to enjoy the holiday on visits to friends.

Thos. E. Henderson, managing director of the Bobell Coal Mines, spent several days in the capital last week.

Dr. McIntyre of Edmonton will be in Tofield on Monday and Tuesday, June 3rd and 4th for the purpose of dentistic.

T. J. Kirkpatrick, who has been ill suffer from a bad attack of inflammatory rheumatism during the past few weeks, is as far recovered as to be on his feet again.

The Bay Scouts made things lively on the Sports Grounds on the 24th to the satisfaction and and pleasure of a lot and thirsty crowd. They were ably assisted by the Misses Corderoy who gave their services to aid the boys

Poor appetite is a sure sign of impaired digestion. A few doses of Chamberlain's Stomach and Liver Tablets will strengthen your digestion and improve your appetite. Thousands have been benefited by taking these Tablets. Sold by all dealers.

J. L. Stauffer of Round Hill section was in town doing business last Tuesday. On Friday he expects his brother Jacob Staufer to arrive at Tofield from Milford, Nebraska. With his brother comes Mr. And. Barky, father-in-law of Mr. Steinman, and seven others, who expect to eventually locate in the Tofield district.

J. H. Thompson of Woodstock, N.B., visited Tofield last Monday, and took a trip around town and visited the mines. Sizing up the situation, he got it loosey that, so far as he had seen about the town, it was certainly the finest town he had seen outside of the large cities. With the excellent country around it and the prospects of great industrial development, he saw no reason whatever but that it would grow into a town of 5000 in a few year.

Mr. Norman Harriss, financial editor of Toronto Saturday Night, and Mr. Horne of the International Securities Co. of Winnipeg paid Tofield a visit last Saturday and spent several hours around town and vicinity by Messrs McCauley and Nicholson. Both were particularly well pleased with the appearance of Tofield and the country around about. Mr Harriss thinks Tofield will develop into quite a large town. He stated that the Tofield country was the finest farming district that he has seen in his trip through the West.

Tofield District's Big Sports Day, July 1st

Everybody in District will be in Tofield to enjoy 12th Annual Celebration.

Tofield District will hold its 12th Annual Celebration of Dominion Day on the Tofield Agricultural Society's Ground, July 1st next. As in usual due preparation must be made beforehand, and this year the work of so doing got off to a good start last Tuesday evening, when a large and enthusiastic meeting was held in the Town Hall and officers elected and committees appointed. The gathering was characterized by a perfect unanimity of spirit and enthusiasm, and indicates point to a very successful undertaking, so far as the management is concerned. The officers and committees are as follows:—

President . . . R. N. Whillans
Vice-Pres. . . . J. B. Kennedy
Secretary . . . J. W. Somers
Treasurer . . . N. C. Leggo
Finance . . . Smith, H. Rogers, McCauley.
Grounds, Morton, M. C. Hammond, Strong. Sports, Somers, King, Morton, Swift, Dr. Terwillegar. Privileges, M. W. Ferguson, H. Davison, Hogewell. Publicity, Press, Vice-Pres. Sec. and Treas.

BUSINESS LOCALS

A fine selection of new carpet squares are to be seen at Bird's.

What is home without a baby but what is a baby without a baby buggy. See Bird.

Charlie Mah Wat had a double oven Hotel Range installed in his restaurant last week. The range was sold by G. B. Brace, and the water connection put in by M. C. Hammond.

G. A. Trent last week sold out his livery barn in Tofield to Wesley Ingram, and purchased the latter's farm, the S.W. 18-50-18.

The Girls Brigade wish to thank the members of the Band for their courteous treatment on the 24th

BAND OF REGISTERED PURE-BRED SHORTHORNS

G. A. Trent Buys Herd of Splendid Pure-Bred Shorthorns from well-known Breeders, which he will bring to Tofield District, and places them on his Beaver Lake Ranch.

An important purchase of registered pure-bred shorthorn stock was made by a foremost Tofielder, G. A. Trent, last Friday May 24, at Edmonton, when by Mr Trent came into possession of the entire herd of pure-bred shorthorns of Jas. Caswell of Saskatoon, Sask., one of the well known and best pure-bred cattle breeders of the three western provinces. The herd was sold at auction in Edmonton last Friday by Mr. Stilmail, auctioneer. Mr. Caswell bringing his whole stock up to Edmonton for disposal. Owing to shortness of help and a lack of room, he was forced to go out of the business.

Mr. Trent is to be congratulated upon his enterprise in going into the pure-bred stock business, and the Tofield district has every reason to feel proud of the fact that enterprise in this line is being fostered. Mr. Trent is doing the public a big service in bringing in this bunch of pure-bred stock.

Every member of the herd has its certificate of breeding, and in grade blood.

many [illegible] are also shown a number [illegible] of registered pure bred ancestors on both sides, dam and sire [illegible] amongst the animals [illegible] Mr. Trent [illegible] at prices ranging from $65 to $42. Jas. Caswell of Saskatoon, Sask., one of the well known and best pure-bred cattle breeders of the three western provinces. The herd was sold at auction in Edmonton last Friday by Mr. Stilmail, auctioneer. Mr. Caswell bringing his whole stock up to Edmonton for disposal. Owing to shortness of help and a lack of range, he was forced to go out of the business.

Mr. Trent is to be congratulated upon his enterprise in going into the pure-bred stock business, and the Tofield district has every reason to feel proud of the fact that enterprise in this line is being fostered. Mr. Trent is doing the public a big service in bringing in this bunch of pure-bred stock.

Every member of the herd has its certificate of breeding, and in grade blood.

Liberal Candidates Were All Elected

Government Policy Received Endorsation of Majority of Voters in all Five Constituencies.

The latest returns from the five provincial constituencies where by-elections were held last Monday show that the Billion Government made a clean sweep, winning the entire five seats. The candidates elected and their representative approximate majorities are as follows:—

EDMONTON
Hon. C. W. Cross, Attorney-General, elected, majority 588.

HON. C. W. CROSS

STRATHCONA
Hon. J. R. Boyle, Minister of Education, elected, majority 317.

SEDGEWICK
Hon. Chas. Stewart, Minister of Municipalities, elected, majority 780

CLARESHOLM
Hon. Malcolm MacKenzie, Provincial Treasurer, elected, majority 21.

CARBUTON
Martin Woolf, Liberal, elected, majority 107.

S. A. Hall Buys the Purebred Shorthorn Herd

Just as we go to press it is learned that S. A. Hall, recognizing a good thing has purchased the entire herd of Purebred Shorthorn cattle from Mr. G. A. Trent.

Tofield Agricultural Society Directors meet Saturday June 1st at 2 p.m. to arrange matters in connection with the 1912 Tofield Fair.

"And the town flag still flies."

All set for the Big Sports Day July 1st.

J. W. Somers spent the 24th in Edmonton.

Mrs. R. N. Whillans returned on Tuesday evening from a visit to friends in Edmonton.

Mrs. G. A. Trent returned on Saturday from a short visit to friends in Edmonton.

Rexall Remedies

Rexall Remedies have been on the market for more than nine years and have become known throughout the world. Each remedy is designed to treat a special ailment or disease. Each remedy is a Physicians Prescription which has been thoroughly tested and which has proved the right to be called Rexall (King of all). Every one of the Rexall Remedies is guaranteed. Still guaranteed in each package and means exactly what it says. The Rexall Drug Co. and the Rexall Store selling this preparation guarantee it to give satisfaction, if it does not, go back to the store where you bought it and get your money. It belongs to you and we want you to have it.

Rexall Beef Iron and Wine

We regard this product as possessing great merit, and strongly recommend as an all-the-year-round tonic and a nutritive for the convalescent or debilitated condition. Full pint bottle $1.00

Rexall Cherry Bark Cough Syrup

The ever increasing sale of this remedy leads us to believe that it is more than giving satisfaction. Has no astringent agents to impair its pleasant taste which makes it of especial value in administering to children. Three sizes. 25c, 50c, $1.00

STANDARD PRESS, Limited,

R. M. WHILLANS, - Manager and Editor

TOFIELD, ALBERTA, THURSDAY MAY 30, 1912

Editorial Comment

The remarks made in this column a couple of weeks ago anent the Dr. Goodwin affair at Holden quickly brought the Vegreville Observer to his relief with the statement that a mistake had been made and that the Holden Editor, Mowhort, was the man to blame as he was a notorious dyed-in-the-wool Tory. A report given us by a Holden man is to the effect that Dr. Goodwin appeared at that town last Saturday as per arrangement and plainlively stated that an error had been committed, but not by him. He disclaimed all responsibility. For some reason or other, the secretary of the Holden Union, U.F.A. took the blame thus relieving the worthy aspirant after legislative honors. The doctor in his speech disclaimed having stated at any time that he was the Liberal Candidate. He was however, before the constituency as a candidate for nomination. This is an entirely different thing.

Some One Made Mistake

The affair will not pass without its lesson. The Standard stands for the people's rights. It feels that its duty is to protect these rights for the people. One feature of this matter is that the mistake was not set right until it had been exposed. There are to many people, who are electors, who have but an indifferent capacity in the sizing up for themselves of the pros and cons of a political situation, and who are to a large extent led by leaders whose selfish motives are stronger than the desire for public good, but, who are wise enough to keep their own motives in the back ground. The Observer takes the stand that our little explosion of a couple of weeks ago was premature. Possibly it was for some people's interests but not for the public in general. It made them come through with a little explanation which will undoubtedly do good. Our expression, then will stand repeating: "Let The People Rule."

Burning up Two Millions a Month

Fire Waste in Canada Mounting Higher and Higher—Measures Adopted by other Countries to reduce it.

In the first four months of this year Canada burned up $8,323 worth of property a day. Eight and a quarter million dollars in a pretty big sum of money to send up in smoke offering to the god of fire in four months' time. Nevertheless, that is the extent of the burning we made.

Here are the fire losses in Canada month by month as given by the Monetary Times:—

January	$3,002,650
February	1,840,155
March	2,261,444
April	1,353,093
Total, four months,	$8,259,272

The worst feature about these losses is that they are increasing by leaps and bounds. The figures given above are nearly three million dollars greater than for the same four months of 1911—$2,887,397 to be exact.

How are we going to reduce these losses?—that is the important question. The greatest reduction in them would be accomplished by having every city and town revise its building by-laws, from the standpoint of fire retention. The next step would be the appointment of officials—not mere functionaries—to rigidly enforce those by-laws.

MANITOBA LEADS.

We Canadians, in the fullness of our prosperity, pay too little attention to this dead economic loss from fire. It is time that we gave it a thought. In the United States many of the States have fire marshals that look into the cause of every fire, prosecute incendiarism, and order the pulling down of buildings that are a fire menace. They also keep a list of people who have had fires, and few insurance companies there are who will insure the property of a man who has had fires of a suspicious origin. In Canada, the only Province having a fire marshal is Manitoba. It is worth while to remember that a really good fire marshal is a splendid investment for any province.

Weeds on Canadian Farms

A Serious Menace—Their Habits and Characteristics

The word is often clalled as a plant out of place. The term is perhaps most commonly applied to those plants which are useless and objectionable. Some cultivated plants may become pests when they grow where they are not wanted. There are a great many objections to weeds, the chief of which are the following:—

(1) They take up space which should be devoted to useful plants among which they grow, and tend to deprive the latter of light and air. A few weeds, such as bind weed, wind round or climb up the stems or cereals, or other crops, often pulling them to the ground.

(2) They absorb large amounts of water and fertilizing constituents which are needed for the nourishment of the cultivated crop.

(3) They are a source of loss in that they necessitate more labor being spent in cleaning operations.

(4) The presence of weed seeds in samples of grain and in clover and grass seeds reduces the market value of these.

(5) Some weeds are parisitic upon useful plants. An example of this is the dodder which lives upon the juice of the clover plants to which they attach themselves.

(6) Some weeds are poisonous to stock; others give an objectionable odor to milk when they are consumed by dairy cows.

(7) Many weeds are objectionable in that they harbor insects, fungi and insect pests which often find their way to cultivated crops.

HABITS AND CHARACTERISTICS OF WEEDS.

A study of the life history of weeds in respect to their habits of growth, time of seeding and distribution, is necessary if we are to apply effective remedies for their destruction or their control.

WEED CLASSIFICATION.

Annual weeds, such as wild mustard, chick weed or grounded, germinate readily and grow very rapidly, often smothering crops by sheer numbers. They are very productive, single plants producing many hundreds of seeds in some persons. Usually they germinate in spring and die in autumn.

Biennials take two seasons to complete their life cycle. Their seeds germinate and grow into leafy plants during the first season. In the second season the buds of the plant develop into long stems which bear the flowers and seeds. After the seeds are produced and ripened the plant dies.

The perennial weeds are capable of growing for many seasons during which time they can produce many crops of seeds. Most of this group have underground root stocks which extend to great depths in the soil and are hard to kill, examples are, blackweed canada grass, and perennial sow thistle. The perennials are extensively spread by these underground stocks or by which buds are present. Small pieces of the root stock may be carried to some distance and grow into individuals as strong as the parents from which they have been derived.

HAD TO TAKE THE BOTTLE AWAY FROM HIM

A pleasant-faced little woman was buying something for the baby in a drug store, and happened to notice a bottle on the show case.

"Did you sell my jim a bottle of that stuff?"

"I certainly did, and hope it helped him."

"Help him? Why he just helps himself three times. I had to complain about my nursing—said it wasn't as good as it used to be, and that I knew it by the only taken about half that bottle when I had to hide it or there wouldn't have been a thing in the house for the children to eat. He simply cleaned up everything in sight at the table. Only the stuff is all right—I can recommend it—and he even thinks my nursing has improved."

She had complained that he was overworked—didn't get enough exercise—had no appetite—was getting a bit cranky, and didn't relish and enjoy his meals. The druggist told him to take Nyal's Digestive Tonic and forget his troubles. Jim dropped in just to say that he has a great capacity for work these days—was accomplish twice as much as before.

"Why, the people—just a little off color—take one spoonful after each meal. If you try this remedy we know you will be pleased. Nyal Remedies are absolutely failures to be the best medicine values offered. 18

Announcement!

June the 1st.

To successfully compete with the Mail Order Houses we have decided to fall in line with the merchants of our neighboring towns by adopting the cash system, beginning with the first day of June. Believing that we can better ourselves and save money to our customers in the form of lower prices.

Remember the man who can pay cash for goods or whatever merchandise he may make can always secure a better bargain than the man who begs on credit. It, therefore, will be a great saving if everyones could manage, by rigid economy if necessary, to pay cash for everything they buy. It will pay a high rate of interest on everything purchased.

All produce treated as cash.

Falling In at Simpsey's

(By Theodore Goodridge Roberts)

The Rev. Dorsley Newkirk was wheeling his car up-grade in the woods of New Hampshire. Though the hard road was behind him he was not in a hurry. His mind—broad and active—was occupied with the sermon he had to preach on the following Sunday, and the question of just how much of the wonder of God to include.

Now the Rev. Dorsley Newkirk was very much in favor of including as much of the wonder of God in his sermons as possible. He was a man of liberal views and boasted himself a modern. He was not afraid of the word "evolution," and he was not afraid of the word "hell." He was not afraid to be familiar with the astronomical discoveries of millions of miles of fiery space and the leakage of the big balloon. He knew that the earth is round and moves about its shallow path around the sun.

It was seven and the five hours' journey had reached the point where the electric cars took hold of it. Newkirk was in a hurry to get home for tea at a certain time, and he was not.

Suddenly a loaded cane down a small side road popped across his path, and instantly but the Newkirks did not find it a safe and sane proposition. Mr. Newkirk put on all the brakes, but the car, cold and stern as the stern of the cause it was dragged in a far rush and two Newkirks and one middle abbreviated to nothing the feelings and bendings of the middle pole of canoe in her cradle behind.

Mr. Newkirk sat with his back to correct his wife's feeling the back of the canoe. He too had an air—unless under the influence of strong drink—of him. He smoked an excellent cigar from boyhood—the keenest form of his self but he wished the love of the canoe—left dorm on if he might. He liked open canoe fixed tender fore and aft, and he wished that it had been the latter form of his craft.

The air-cushions danced merrily away down the racing stream, followed by a small leather bag, the waterproof depository of choice tobacco, and a letter—even ten in wish it was—to collect food, all ready to be eaten, had been stowed by the cook that very morning.

"Now, that's too bad!" said Joe, he a weather-beaten and artificial looking man of forty, who had accompanied the canoe-car in the baggage-car. "Rather bad that, sir!"

"It is unfortunate certainly," said Mrs. Newkirk.

Mr. Newkirk did not say anything just then. He was busy looking from a thicket of a deer-headed stag out of his mouth with the index finger of his right hand.

The dude cleaned to the right, and then to the left, dropping low behind a thicket.

"There we're gone at fall in at Simpsey's, at Bill Simpsey's," he said. "Well I call that luck! There ain't another canoe on Moose-Leg Lake to-day—you can bet the old canoe slap in front of Bill's door."

A short-tempered though black mud, black, and—maybe—ashen, with moss-piled craters brought them to the top of a hill, and they saw a valley and a lake below. In the middle of the clearing stood a log house and a barn like unto others of its kind, but they saw from the rusty stovepipe that a fire was in the roof of the shack.

"Tish Joes a not the fruit—put her up, ye bin bet on that!" said Joe.

At this moment, out of its answer to the remark, the door opened, and a man—a big man—came out. He was followed by a naked boy apparently of either sex of four years old, and by a woman of the Newkirks had seen once again at the annual meeting of the Ladies' Aid Society.

"Bless my soul! The children!" exclaimed Mr. Newkirk.

"Four cents—cried Joe. "I guess Luther ran in riskily at the back of but shucks! very minute you'll see all their heads out somehow!"

"I think we had better ask leave first," said Mrs. Newkirk.

"That's right—" he stammered. "What about a goose on me? There ain't another house of any kind what—ever—for miles and miles! Why, the nearest place to stable a canoe like mine would be full of water up to a moose's ears!"

"True," retorted Mr. Newkirk. "We are much in need of it indeed—but I'll see you presently, another time."

The three continued their advance with a certain hesitation. Mr. Newkirk had left his collar and tie at home, and had on a flannel shirt, a pair of old trousers, and a soft cap. Mrs. Newkirk had on a soft summer dress of white linen, and her hat had suffered some at the hands of the overhanging branches of the bush road.

"Bless me, how you do look!" said Mrs. Simpsey, in reply. "My pole hasn't seen you, we got speed into the drink. Tish Ann at the whole outfit goes down—Simpsey stream—shed with Peter Hawkins' stream."

"Sakes alive! To don't tell me!" exclaimed Mrs. Newkirk.

By this time the groups were face to face. Mrs. Simpsey put out a hard, red hand and grasped Mrs. Newkirk's soft one.

"Happy to meet ye, ma'am," she said. "Mother has the party over a thousand feet." And yer man, too—Simpsey's the name, and I always call him Bill, for short. Simpsey in my talk ye wouldn't handle him, but he's a good man for a far from the settlement at all."

"Thank you, you are very kind," said Mrs. Dorsley Newkirk.

They pressed forward at a good pace, for already the wind was stirring the cold open their safer-soaked a cooking. Mrs. Simpsey was in front. Then came Mr. Simpsey grabbing a couple of rods of rotten timber for Smith's Power, as he had to be used the next day—Mr. Newkirk not on an air-cushion, for the cold—and the stern of the canoe. She

COUNCIL

A special meeting of Council was held on Monday evening to transact the business which should have come before the regular meeting on Tuesday night of last week when no meeting was held owing to the majority of the Council being absent from town.

Councillors Emery, Lee, Logan and Bird were present, and the Mayor.

A letter from the Canada West Townsite Co. was read stating that they were in a position to install and operate electric plants for the capacity of 100 h.p. for municipalities which did not wish to put such a plant in themselves. Such undertaking by them for any municipality being conditioned upon them getting a franchise. On motion of R. O. Bird, steps will be immediately taken to ascertain further particulars from this company in re-card to their proposition.

The Canada West Townsite Co. wrote stating that they would co-operate with the town in the matter of the establishment of parks, and that if they could be notified of where there were wooded areas in Tofield Park and Tofield Heights, they would indicate to be withheld from sale such lots if not already sold, and cooperate with the town in the development and beautifying such areas for park purposes. The communication was turned over to the standing committee having the matter in hand.

W. H. Neal wrote stating that the lot in the cemetery were too small for family use, and to allow the erection of monuments upon the plots, and asking that the town undertake the care of the cemetery and collect from owners of plots within it a proper charge for the work done. This was referred to the Health & Property Committee.

The U.T.P. engineer wrote stating that a track track would be made along the north side of the new freight unloading track, and that trucks would not be supposed to go between this track and the the main line.

Bingham & Barrett wrote urging upon Council to protest against the closing of the Government road allowance across the G.T.P. yards on account of their not petitioning in a crossing at King Street. Council felt that the agreement already made with the G.T.P. in this question, which allowed the G.T.P. to build the Queen Street crossing and put in a freight siding and platform north of the main line, in lieu of the Government road allowance crossing which they wanted to close. The G.T.P., now complying with the conditions imposed upon them by Council, the Council could not see its way clear to causing any more friction in the matter.

Chris. Sutter wrote giving the particulars in connection with the loss of his horse on Main Street some time ago, stating that Mr. Hall was willing to give him one-half the cost of the horse, and asking Council to put up the other half. Mr. Sutter claimed that the accident was caused by negligence on the town's part in allowing figure jaggers on Main Street contrary to its own by-laws. The latter was referred to the town solicitor for report.

Current accounts were passed.

The Public Works Committee reported that E. P. Rowe had signed the contract and specifications for the big ditch, and that the work was to be completed by July 1st.

It was recommended that workmen on this ditch be paid union prevailing rectified time checks from the contractor. Adopted.

The building of crossings on 3rd Street North to St. Andrew's Church and on North crossing of King Street on 2nd Avenue, and a culvert on the road on the northwest corner of the town be put in. Adopted.

The Fire Water and Light Committee reported writing to the Provincial Health Department with reference to its jurisdiction in the matter of municipal water systems. To Crafts & Lee with regard to a proposition from them for the already supply of water, and that Committee had ordered an examination of the spring out near Mr. Hunt's. The Committee also reported that they approved the bylaws and regulations of the Fire Brigade, in so far as they did not conflict with the provisions of Municipal By-Law No. 63.

Mr. McMullen reported examining the spring at Mr. Hunt's, stating that he thought a plentiful supply of water could be secured, if there were an excavation about 30 x 40 put in and about 10 or more feet deep. There was a good gravel and sand bottom, and there appeared to be abundance of water. Industrial and Civic Advancement Committee reported making provision for the entertainment of the reserve native of Toronto Saturday Night, and instructed the secretary to take up the matter of the publication of a Tofield booklet in connection with the Canadian West Townsite Co.

TOFIELD DAIRY

All patrons are hereby notified that from June 1st until further notice, milk from our tuberculin tested herd of Dairy Cows will be delivered at the price of 16 quarts for $1.00 instead of 14 quarts as formerly.

T. A. PORTER,
11-12 Prop.

Keeping His Hand In

The hanger of the Calgary Industrial Exhibition, June 28th to July 5th, is being distributed. The illustration depicts a cowboy, whose occupation has presumably been cut off by the encroachment of the prairie grower, "keeping his hand in" by roping a sheaf of wheat from among several shown on the opposite side of a barbed wire fence. The delight of the cowboy in the success of his achievement is equalled by the seeming exhistance of the inanimate sheaf to be drawn towards its natural enemy, and by the terror of the horse at witnessing the frivolous nature of its rider's employment.

Anyone wishing a copy of the hanger can have one mailed by writing to E. L. Richardson, Manager, Calgary Industrial Exhibition, Calgary, Alta.

Here Again on June 15th

M. Mecklenburg, A M., the Edmonton eye specialist will again be at the Queen's Hotel, Tofield on Saturday June 15th. If your eyes are troubling you in any way do not fail to consult him. Mr. Mecklenburg devotes his whole time skill and energy to the proper fitting of spectacles and eyeglasses, he has no side lines.

FARMINGTON

Practically all the farmers in this district are through their spring seeding work. All the early grown grain is well above ground and sprouting vigorously. Crop indications are perfect.

Stirrett Bros., who have been greatly delayed in their spring work owing to having a large number of their horses ill are now in the thick of it. Messrs. Campbell and Trelvid are helping them through the campaign. The plows, harrows, and seeders are following each other around the fields. In all, Stirrett Bros. will put in 250 acres of crops.

Fletcher Bros. have in over 200 acres of crop.

Campbell and Trelvid have finished seeding.

Stirrett Bros. have a splendid field of fall wheat which has come through the winter well. It was sown with a nurse crop of green feed about June 1st last. The fall wheat sown on summer fallow without any nurse crop was killed out.

Hull and McBeth are starting out with their steam engine and Van Slyke breaking plows on several big jobs.

Local and General News

A. Micklebore of Spirited did business in town last Saturday.

M. W. Urquhart made a business trip to the capitol on Monday.

Miss Wierzba of the Tofield School staff spent the week end in the Capital.

Dr. Jas. L. Hammond, W. P. Strong and M. C. Hammond spent Monday in Edmonton on business.

Peter Logan was a visitor at the old home for the week-end with his wife and infant son.

On Monday his infant son was baptized by the Rev. J. Mason, receiving the name of William Frederick.

Mrs. A. J. H. McCauley gave a very enjoyable little party last Friday evening in honor of her guest Miss Burbe of Yorkton, Saskatchewan.

Rev. Wiggins from Castor has been appointed to the pastorage of the Methodist Church of Tofield. Rev. Wiggins comes with good recommendations, and will take up the work the last Sunday in June.

A. L. Rastly, editor of the Bawlf Sun, was a Tofield visitor between trains on Saturday, coming up to meet Miss Rastly and the children, who were returning from a visit in the States

Miss Tina Burke of Yorkton, Sask., a sister of Miss Laura Burke, of the Tofield School staff, left on Saturday morning for the East after a ten days visit to Mr. and Mrs. A. J. H. McCauley. She will spend some time in Saskatoon before returning to her home at Yorkton.

It is now well known that not more than one case of rheumatism in ten requires any internal treatment whatever. All that is needed is a free application of Chamberlain's Liniment and massaging the parts at each application. Try it and see how quickly it will relieve the pain and soreness. Sold by all dealers.

Take Cue from Manitoba

A movement has been started among the old-timers in Saskatchewan to ask the Dominion Government for a grant of land to the original settlers, following out the precedent established in Manitoba.

Hail Insurance

Last Sunday there was slight falls of hail as many points between Edmonton and Winnipeg. Farmers will be wise to be forewarned. We cannot afford to be without protection of our crops, especially this year.

Wilbur Wright, Noted American Aviator, Dead

Wilbur Wright, probably the best known air man in the world, died at his home in Dayton, Ohio, last Thursday from an attack of typhoid fever. The late aviator was born near Millville, Ind., on the 6th of April, 1867. Since 1903 he has been with his brother Orville, devoting much of his time to heavier-than-air flying machines, which have been patented by the Wright Bros. in many leading countries of the world. He made numerous wonderful flights in the United States and abroad, and sold a machine to the United States Government for $30,000. He was awarded the gold medal by the French Academy of Science in 1909 and also many others. He was unmarried.

Dominion Day Sports at Tofield

On Monday, July 1st, the 16th annual Dominion Day Celebration of Tofield and surrounding district will be held on the Tofield Agricultural Society's Exhibition Grounds. The Sports Committee are preparing a program of baseball and football tournaments, athletic events, basketball, pony and horse races and farmer's horse races. There will be fun-providing events every minute of the day. The Tofield Citizens' Band will provide the music and give a band concert in the evening. Prizes will be given for the largest load of visitors from outside a radius of six miles, also for the best farmer's turnout.

AT THE Churches

CHURCH OF ENGLAND

Sunday, June 9th.—First Sunday after Trinity.
3 p.m. Service in St. James' Church, Logan.
7.30 p.m. Service in Bellamy's Hall, Tofield.

A hearty welcome is extended to strangers and non-church goers.

JAMES MASON,
Incumbent.

PRESBYTERIAN

Campaign of Evangelism

An Evangelistic Campaign will be held under the auspices of the General Assembly's Committee on Evangelism. The meetings which will commence Sabbath 16th June in St. Andrew's Church, will be height with singing. The speakers will be the best that are in the Presbyterian Ministery. A special invitation is extended to all the churches to co-operate in this important work.

New Time Table in Effect on the G.T.P.

A new time card went into effect on the G.T.P. last Monday, June 3.

On the main line between Edmonton and Winnipeg time is reduced by two hours. The passenger train on the Tofield-Calgary branch leaves Mirror half an hour earlier than present schedule, and arrives at Mirror fifteen minutes earlier in the evening.

Train No 12 leaves Edmonton at 5.30 p.m., arriving at Tofield at 7.15 p.m. and Mirror at 10.40 p.m.

Train No. 11 leaves Mirror at 6.30 a.m., leaves Tofield at 9.40 a.m., and arrives in Edmonton at 11.20 a.m.

Leaves Winnipeg at 6 p.m. (central time); leaves Tofield at 7.30 a.m. (mountain time); arrives in Edmonton 9 p.m. Leaves Edmonton at 9 a.m.; arrives in Tofield 10.35 p.m.; arrives in Winnipeg 2 p.m.

The service between Edmonton and Edson will remain as at present, which, in a train leaving at 6.30 a.m. and arriving at Edmonton at 10.20 p.m. daily except Sunday.

Canadian Money in Palestine

Bills sent from there to Dry-Farming Congress at Lethbridge.

Lethbridge, Alta., June 2.—That Canadian money circulates in Palestine may be surprising to people of this country, but the receipt by mail by Mr. John T. Burns, Executive Secretary-Treasurer of the International Dry-Farming Congress, of two $1 bills of the Dominion of Canada from the Jewish Agricultural Experiment Station Hall, Palestine, Turkey, is proof of the fact.

The bills were sent as a subscription to the publications of the Dry-Farming Congress, which has a large number of interested patrons throughout Northern Africa, where the modern scientific methods of farming are being adopted in an effort to revive the great granaries of the old world, which in the time of Christ, was considered the most important industry

WITH THE Boy Scouts "BE PREPARED"

There will be a parade of the scouts this (Thursday) evening at 7.30 on the old football grounds, just north of the skating rink. A full attendance is requested.

BORN.—At Tofield, Alta., on Monday June 3, to Rev. A. M. and Mrs. McColl, a daughter.

Ships 10,000 Head of Cattle Into Alberta

Ten Thousand Head of the Fattest, Roughest, Longest Horned Cattle of Old Mexico are on Their Way to Alberta.

The cattle were bought nearly three months ago by Gordon, Ironsides and Fares, of Carsdston, and will be shipped to the Blood Indian Reserve in Southern Alberta. Although shipment was promised almost immediately by President Madero, the trouble he has had with the insurgents has kept the cattle king bust, and it was not until last week that word was received that 4000 of the long-horned steers had been shipped from El Paso, Texas, the point at which delivery was to be made. The animals were brought to El Paso guarded by Mexican rurales or mounted police and a strong detachment of regular soldiers, and were immediately shipped on four trains routed by way of the Soo railroad and over the C. P. R. to Carsdston, where they will be unloaded.

When the long-horns are unloaded they will be mixed with a large herd of Alberta range steers to prevent them from stampeding, as the animals are fat and are restless to be the most dangerous cattle in the world. A special band of cowboys and vaqueros from Mexico will accompany the herd to Alberta and some of the men will be engaged to stay here to herd the cattle.

This is the first shipment of genuine steers that has ever been made to Alberta, and some of the animals have been on hoof as part of the supply column of the Mexican regulars since the first insurrection some time ago.

In all 10,000 head of steers will be brought here in two trains.

Sow Nothing to Compare With Tofield and District

R. N. Whillans, editor of the STANDARD, returned Monday evening from Winnipeg over the G.T.P. He reports crop conditions excellent along the whole line throughout the three provinces. Farmers in Manitoba are a little behind in their work compared with those in Saskatchewan and Alberta, the spring season being wet and cold in Manitoba being the cause of the condition. Throughout Saskatchewan and Alberta, along the line of the G.T.P., general rains occurred last week-end which have been of immense value to the growing crops. Seeding for a harvest has been completed for a fortnight and all fields show signs of rapid germination and a healthy growth.

Slight showers of rain fell in Winnipeg, Portage la Prairie and other places on Sunday afternoon, but no damage can be done at this early stage.

Immense areas are being put in to flax in Saskatchewan and Manitoba.

The G.T.P. is fixing up their station grounds at terminal points along the line.

Mr. Whillans took particular pains to notice carefully the appearance and general conditions in each and all of the towns and points along the line between Tofield and Winnipeg, and when making the trip he, on his return, stated that there was no wonder that Tofield was so well spoken of by travelers and others who are in a position to know and estimate the values and prospects of each and every town to the west. Tofield compares very favorably indeed with any and all others along the line.

Somers Sylvan Cream

Makes the skin like velvet and keeps it so. Cures chaps in a night. Softens and heals like magic and there is nothing about it you can find fault with, no grease or stickiness, it is absorbed instantly. No other lotion has so large a local sale

Big Ditch Construction Progressing

E. P. Rowe contractor on the municipal ditch through the south portion of the town is making good progress, and indications point to the benefits to be derived from the construction of this drainage scheme taking form in the very near future.

Building Notes

Good progress is being made on the construction of the new Anglican Church at the corner of 7th Avenue and King Street. All the frame work and first covering is on.

A. C. Phillips is rushing the construction of his new residence at the corner of 6th Avenue and King Street.

S. Nicholson's new residence on 4th Avenue East is assuming form. The outside is receiving a residential street very rapidly.

J. C. Chapman is building an attractive bungalow south of the Exhibition Grounds.

Walter Bellamy has had his theatre building added and finished on the exterior.

When your child has whooping cough be careful to keep the cough loose and expectoration easy by giving Chamberlain's Cough remedy as may be required. This remedy will also liquify the tough mucus and make it easier to expectorate. It has been used successfully in many epidemics and is safe and sure. For sale by all dealers.

TOFIELD, ALBERTA, THURSDAY JUNE 6, 1912

The Force of Example

A police court judge a few days ago, in rather a dramatic manner, set an unique object lesson before two youths charged with attempted burglary.

Among the waiting prisoners, the judge recognized an "old timer" arrested for begging in this particular instance, though he had spent many years of his life in gaol for serious crimes. The judge asked him out of his experience, to tell the young prisoners whether crookedness paid.

"I've been at it 30 years," the old man answered, "and there's nothing to it. I've let many opportunities to five right go by, and have brought only misery and unhappiness on myself. I have never known anybody that made a real success of stealing what belonged to other people."

This is a trite way of saying that honesty is the best policy, yet the truth of the maxim was likely to appeal to the boys, coming from a miserable old man, selfconfessed failure, as it had never done before. They needed to see the reverse side of the get-rich quick existance they had embarked upon and the experience of the judge enabled him to present it to them in a very forceful manner. Prison sentences are supposed to impress on the culprit the fact that the way of the transgressor is hard. In general, the individual knows in a more or less indefinite way that if he transgresses the law he will have to pay. But it needs the object lesson sometimes to make him realize how heavy the payment must be.

Wisconsin Bars Canadian Exhibits

Canada has been barred from making an exhibit at the Wisconsin State Exhibition this year the state immigration authorities having protested against Canada being allowed to make a showing. They declare that Canadian immigration literature is false and misleading, and that this has been discovered by people who have been induced to go from Wisconsin to Canada and have returned poorer and wiser.

The immigration authorities at Ottawa state that there is no foundation for the charges against their literature, but say that the State of Wisconsin objects to losing good citizens at the rate they have been moving to Canada for the past five years. Wisconsin is not the first state to refuse Canada space in which to make a display of its products, though a few years ago they used to urge Canada to come and gave free all the space desired.

However, Canada has always been on hand when the crowd collected to see the [illegible] Other provinces are represented. Other members of the delegation include the chairman or managing directors of many of the leading industrial concerns of Great Britain.

The party will arrive on June 8 at Quebec, and from that point will begin their tour of the Dominion. The delegates will travel from coast to coast seeing all that there is to be seen and observing all along the route what openings there are for the development of British trade and the location of British industries in Canada.

HERE AND THERE

BY THE WAY.

A boy in Norfolk, Virginia, ran away from home because an aviator. Never mind he may drop on the family some day.

For a man who has been sitting in the cool shades of the opposition for a few months, Sir Wilfrid Laurier is a most enthusiastic and optimistic person.

Scientist state that in 50 years blondes will be extinct; we do not agree with them, as long as women prefer the latter and the dying screen [illegible] then will be blondes.

[illegible] Taft and ex-president Roosevelt are said change hanging [illegible] over the proud political [illegible] Taking each one at the estimate of the other, it is difficult to see how either one is a fit and proper person to be the candidate of a great party.

Col. Roosevelt has added the State of New Jersey to his [illegible] Next to still [illegible] he is regretting [illegible] of gulf, tennis and big game shooting must be very flat [illegible] when compared to [illegible] campaigning.

The latest lured Canadian exhibitor is the Wisconsin State Fair. Milwaukee because its own Aborn is forced to [illegible] to magnate across the border. Although not the only [illegible] in one of the biggest compliments Wisconsin could pay Canada.

Down in Mexico Jaw they are [illegible] up to clock in a new way, and as the people are valued [illegible] to say that it is all a put up job by Moose Jaw men to make their wives believe that they get home before midnight. The membership with the clock is apparently a no new thing for Moose Jaw men.

The lord mayor of London forces considerable trouble as to what he is to do with the ostrich feathers that fond females suffer. He says quite enough money has already been subscribed to relieve all distress, but donations are still coming in. Might keep a few [illegible] for the ships that are still on top of the Atlantic.

Smith's Falls News: "The wife of Archibald mislaid on West Virginia has been married three times. Her maiden name was Partridge. Her first husband was named Robin, her second Sparrow, and the present one Quail. They are now two little Robins, one little Sparrow and three little Quails in the family." Supposing she surprises her present husband and marries again, a man by the name of Hogg. What then brother?

Letters to the Editor

NOTE. The Editor does not necessarily concur with the views of correspondents published under this head.

Holden, May 23, '12.

Editor Standard:—

Dear Sir,—Upon my arrival in Holden to-day to attend the meeting of Holden Local Union No. 59, United Farmers of Alberta, I was very much grieved to learn that I may have caused Dr. Goodwin of Vermeville a lot of embarrassment. Will you be good enough to allow me, to state that the error was entirely mine? I unconsciously left out the words "prospective candidate." I had never before to-day met or spoke to Dr. Goodwin, neither has there been any politics of any nature between us.

Our Local is neutral in politics; Each age of our lives has its joys. Old people should be happy, and they will be if Chamberlain's Tablets are taken to strengthen the digestion and keep the bowels regular. These tablets are mild and gentle in their action, and especially suitable for people of middle age and older. For sale by all dealers.

Announcement!

June the 1st.

To successfully compete with the Mail Order Houses we have decided to fall in line with the modern method of our neighboring towns by adopting the cash system, beginning with the first day of June. Believing that we can better ourselves and save money to our customers in the form of lower prices.

Remember the man who can pay cash for goods or whatever purchases he may make can always secure a better bargain than the man who buys on credit. It, therefore, will be a great saving if everyone could manage, by rigid economy if necessary, to pay cash for everything they buy. It will pay a high rate of interest on everything purchased.

All positions treated as cash.

A. HORTE & SONS,

GENERAL MERCHANTS,

KINGMAN. - ALTA.

LUMBER

WE sell it and are in the business for the dollars, but we like to see our customers make a few while we are at it, and can assure you that it is to your interest to buy from us.

We have the quantity, the quality speaks for itself, and prices are right, a look over our stock will convince you that it will pay you to buy from us.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion Land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any Agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties: Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

Ten Miles of Steel per Day

The railway lines of the Grand Trunk Pacific in western Canada are being increased about 10 miles in length each day at the present time and, with the arrival in less than a week of two more pioneers, this rate of progress will be doubled which means that, with the pioneers working steadily night and day, the company will build 120 miles of track in a week. Telegraph lines are being kept well up with the construction.

A sprained ankle may as a rule be cured in from three or four days by applying Chamberlain's Liniment and observing the directions with such bottle. For sale by all dealers.

Raising Flax For its Fibre

Modern Inventions promise to make Alberta a Bonanza Flax Growing Province.

The Canadian Board of Control of the International Dry-Farming Congress in its discussion of Tofield, will discuss ... the growing of flax for its fibre should be taken up in Alberta, and points out that it can be made a veritable bonanza with the ... most of linen mills, which is most ... in this section because of the ... ments of the home markets.

There being abundant water power in the province for ... and motor engineers ... of ... for a sheep engine for ... and water for retting in the ... of flax fibre into fabric ... linen, there is everything requisite as natural raw material right at hand. Thus, right here in Alberta, all kinds of linen goods can be produced to sell within a few miles of the place where the cotton goods—a great boon to farmers.

The growing of flax for seed ... been very successful, and many ... the progressive dry-farms in ... Lethbridge and vicinity ... season began the putting in of a large crop. It is not too late yet for flax can be sown up to the 15th of June, although the earlier the sooner.

For many centuries nations world have been consumed in getting flax ready for spinning, and a further ... or five weeks have been necessary ... which to bleach the linen ... product for the market. By a new process raw flax can now be converted into perfectly white linen fibre ready for spinning in one day. Sound straw will yield 17 per cent of spinning fibre, 600 lbs per ton on the market. By harvesting at the proper time good fibre can be produced, and a fair crop of seed can be obtained at the same time ... the mechanical operation of removing the seed without ... injuring the fibre for linen production being practised in the United States.

The new process for converting flax straw into linen within the short space of a day has passed beyond the experimental stage, and capital invested in this direction would be a far better method business than a financial stake in ... gold or other mines where ... mining requires millions and then ... the outcome from a financial standpoint is always, or nearly so, an ... finite quantity and the duration of the hole a mighty uncertain one.

Flax is a hardy plant to grow ... with an abundance of water it is a certain result produced, and the ... various uses to which the straw and seed can be put place it beyond the stage of the uncertain.

Bulls Bring High Prices at Lacombe

The annual sale of pure-bred bulls held at Lacombe last week was one of the most successful ever held in the province. The sale which was the fourth annual under the auspices of the Alberta Cattle Breeders' Association, and the Alberta Department of Agriculture, consisted of 37 animals, comprising 1 Aberdeen Angus, 12 Holsteins, 6 Herfords and 25 shorthorns. The ages of the animals, with one or two exceptions, were all under about two years. The demand greatly exceeded the supply and 50 more head could easily have been disposed of. The prices ran all the way from $185 to $235.

Forest Fires Raging in St. John's, N.B.

Advices from the interior of the Province of New Brunswick say that thousands of square miles of country has been swept by forest fires. Many trains are held up and the telegraph lines burned. Those small villages have been wiped out of existence and considerable ... reported telegraphic communication

PASTURE TO LET

Pasture close to town; let for horses and cattle, arrangements ... immediately upon application to ... Chas. Armour, Lethbridge P.O. Lethbridge Farming Co., Ltd. Lethbridge

Fame Spreading World Wide

Alberta being Extensively advertised through the United States Consular Service.

That Alberta is being advertised all over the world is evidenced by the reports that come from all sources, and the latest proof is the issuance of a statement in the Daily Consular and Trade Reports issued by the United States Department of Commerce. These reports are sent to all quarters of the world, and are widely read by the manufacturers and exporters every where, and the bringing of the International Dry-Farming Congress, to be held at Lethbridge next fall, ... to the attention of these people will mean much to Alberta in the way of publicity.

The Consular Report of April 30 says of the Congress:

The Seventh International Dry-Farming Congress is to be held at ... bridge, Alberta, Canada, Oct. 21 to 26th next. During the same ... there will be an interesting exposition of dry farmed products, farm machinery, and labor saving ... for the home and farm establishment. There will also be held at the same time the Second Annual ... of the International Congress of Farm Women and the ... Annual Conference of the Agricultural College and Experiment Stations. There will be a ... sold, tillage and ... on crops and breed... ing, conference on agricultural forestry (or forestry as ... relation to the farm), dairy in which to exhibit the best ... dairying, can ... sanitary ... and one on ... correspondence for further information.

The report was sent by Consul General John G. Foster of Ottawa, and was prepared by Consular Agent W. R. Dobbin of Lethbridge.

A Warning to Potato Growers

A note of warning has been sounded from Ottawa in regard to a very dangerous potato disease that has been brought to Canada in tubers imported from Europe during the present year. The disease which is known as Potato Canker, was recently discovered in an imported shipment. To warn Canadian farmers against the danger of introducing imported seed, the Dominion Entomologist has issued a leaflet known as "Farmers' Circular No. 1," prepared by Mr. H. T. Gussow, in the Dominion Botanist.

Attention is called to provisions under the Destructive Insect and Pest Act, which show that to use or sell for seed potatoes imported from Europe is illegal. Copies of this Farmers' Circular may be obtained by applying to the Publications Branch, Department of Agriculture, Ottawa, Ont.

Many Scotchmen Westward Bound

London, June 3. Government returns of the United Kingdom for the month of April last show that the following went to Canada:—From England, 20,163, from Scotland, 5,537, from Ireland 1,234; and from Wales, 1,242—total 27,276.

During the same month the total immigration to overseas countries was about 160,621, and of this 116,28 to the United States so that Canada absorbed more than half the total emigration.

While Scotland's population is only one-eighth that of England, emigration from there is twice as ... as that from England.

COUNCIL

Council met in regular session last Tuesday evening. There was only a quorum present, Councillors Emsley, Younie and Logan being absent.

The by-law providing for the peace, order and good government of the municipality was taken up and put through its first and second readings. This by-law is based upon the authority given in the new Towns' Act, and includes many of the clauses of the Criminal Code which come under this head, and also penalties imposed under law by law will go to the town instead of being sent to the provincial treasury as has been done heretofore. This by-law will come up for its third reading at next regular meeting of Council.

The by-law providing for the apportionment of the cost of construction of wooden sidewalks between the town at large and the properties along the frontage of which the improvements pass and which provides for an equal division of such cost between the two, received its first reading and will come up again at the next meeting.

The agreements between the town, on the first part, and the Chief of Police and Town Solicitor respectively, on the other parts, were read and approved and entered into.

The Health and Property Committee reported through the Secretary that they recommended that a caretaker for the cemetery be appointed, and that fixed charges be made for the care of private cemetery plots. Mr. [illegible] was recommended for this job. The matter was left with the Committee to be finally dealt with and for arrangements with Mr. John Wilson to be made. Mr. Wilson will be paid by the town direct, and the charges be collected from the owners.

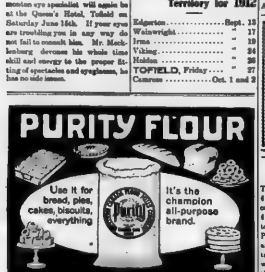
The subject of the letter of Mr. C. Sutter, which came up at last meeting of Council relative to the loss of a horse on Main Street and which was referred to the solicitor, was dealt with by the solicitor, who reported that the town was not liable in the matter, and the secretary was instructed to write Mr. Sutter accordingly.

The secretary reported that work on the ditch was progressing. Almost $500 worth of work had already been completed, and $381 had been paid out in wages.

As the result of inquiries on the part of councillors, it came out that a team has been purchased for the town and will be delivered at once and after a supply of feed has been put in. The streets will be cleaned up at once, likewise the alleys and back lanes. It is also intended that by the use of this team all private back yards will be cleaned once a week, including manure deposits, and a charge for the latter will be imposed. An inquiry re the iron receptacles ordered from Ross Bros. elicited the information that no word had been received from them as to when they would be sent. The secretary was instructed to write them to rush them along.

Here Again on June 15th

M. Mechlenburg, A. M., the Edmonton eye specialist will again be at the Queen's Hotel, Tofield on Saturday June 15th. If your eyes are troubling you in any way do not fail to consult him. Mr. Mechlenburg devotes his whole time skill and energy to the proper fitting of spectacles and eyeglasses, he has no side issues.



Sold by RICHARDSON & RUDD, Tofield

Farming Requires Brains

Success in Dry-Farming is not for the shiftless or indolent. All farming requires brains to make it profitable. It involves hard work and plenty of it. Dry-farming is largely a matter of conserving the moisture from year to year. Not this alone but prevent insurpmable difficulties. By proper management a tilled field can be made a reservoir through the accumulation of moisture beneath the surface.

The moisture which falls as rain or snow must be made to penetrate its surface, and when once impressed its escape by evaporation must be prevented. Tillage is the means by which both these objects may be attained—breaking up the soil in the first place by deep plowing in order that the water may sink into it, and stirring the surface so that a mulch of loose powdered earth may keep the channels of evaporation closed.

G.T.P. Winnipeg-Regina Through Pass. Service

The Grand Trunk Pacific announces that a through passenger service between Regina and Winnipeg will be put on by that company next month. It is also stated that particulars with regard to the new Regina station will be made public in the near future. A sub-station on the north side of the city will soon be a necessity but no decision as to location has been reached as yet.

Circuses Touring Canada

Evidence of an increased measure of prosperity in Canada is to be found in the invasion of the country by circuses. Usually not more than two of "The Greatest Shows on Earth" find their way into the Dominion in one season but during this and the next, no less than four are routed over the Grand Trunk Pacific Railway. Of these only the largest, Ringling Bros., of international fame, will visit Montreal. The others are Sanger's Greater European Show, Howe's Great London Show, and the Mighty Haag's Show, which will confine their attentions to Ontario.

Steps to Prevent the Smuggling of Horses

The Customs Department at Ottawa will take steps to more strictly enforce the collection of duties on horses imported into Canada from the United States. Many complaints have been received as to smuggling and under-valuation of horses brought into the country and orders will be issued with the object of preventing both these practices in the future. Most of the complaints have come from Western Canada.

There is no real need of anyone being troubled with constipation. Chamberlain's Tablets will cause an agreeable movement of the bowels without any unpleasant effect. Give them a trial. For sale by all dealers.

The World's News

Told in Pithy Paragraphs

One man was burned to death and $25,000 loss was sustained in a fire that destroyed Lindsberg Restaurant and the Moose Hotel and badly damaged the Drug Store and Opera House at Monmouth, Man., last week.

John Dempsey, supposed to be the oldest member of the Masonic Order, died at Neepawa, Man., last week. He was 96 years of age, and had been a member of the ancient craft for 76 years.

A bill to enable women to become barristers, solicitors or parliamentary agents has been issued in the British Parliament.

The Chateau Laurier, the G.T.P. new two million dollar hotel and the new million dollar Central Station, were opened at Ottawa last Saturday.

There's Millions In It

Dry-Farming will add vast sum to the Income of Farmers of the Country.

According to a report submitted to the International Dry-Farming Congress, whose headquarters are at Lethbridge, Alberta, there are nearly 30,000,000 acres of land in the western United States now under cultivation by dry-farming methods. Colorado heads the list with over 4,000,000 acres and 12,000,000 acres devoted to crop production without irrigation. Kansas, Nebraska, the Dakotas, Montana and Texas have each more than 2,000,000 acres.

The report says further: "While the rainfall in Minnesota, Wisconsin, Iowa, Illinois, Missouri and Indiana is ordinarily sufficient to produce good crops one year with another, it is known, from personal experience and observation, that it is possible almost anywhere to increase the yield of crops by following dry-farming methods. A wide spread adoption of such methods would mean adding millions of dollars to the incomes of farmers throughout the central portion of this country."—Geo Bevins, Madison, Wisconsin.

Docks Are Outlined

Ottawa, June 8.—Carrying out his policy of "full steam ahead" on the Hudson Bay Railroad, Hon. Frank Cochrane, minister of railways and canals has signalled F. D. Mann, a well known Canadian engineer, to lay out the harbor docks and terminals for the Hudson Bay Railway. Mr. Mann is an expert harbor engineer and has been connected with the engineering staff of the C.N.R. for several years. He has had charge of the terminal work of the C.N.R. His most important work has been the planning and completing of Port Arthur harbor.

Local and General News

Big Dance in Bellamy's Hall on Monday evening, July 1st.

Mr. and Mrs. T. P. Newbiggings expect last Thursday in Edmonton.

H. W. Warner of Edmonton was in town on a short visit last Tuesday.

G. H. Bowdray and John Harper of Wainwright were Tofield visitors on Friday.

And the town flag still flies, if you are blessed with good eyesight perhaps, you can see it.

Mr. and Mrs. Malcolm McCallum of East Denver Lake were visitors to Tofield this week.

J. Lee, Sr., is building a large addition to the rear of his warehouse at corner of Main and 2nd Avenue.

Mr. Hunt, manager of the Dominion Bank, Strathcona, spent Sunday in Tofield, the guest of Mr. and Mrs. R. G. Bird.

Tofield Lodge, No. 43, I.O.O.F., meets on Friday evening. Degree work will be put on. All members requested to be present.

R. G. Bird leaves this week on a trip to Branchridge, Que., via Montreal, Quebec route. He will be away nearly three weeks.

R. G. Bird is again extending his warehouse accommodation by building an addition at the rear of his present store on the lot adjoining.

Walter Bellamy sold out his butcher business last Saturday to a new firm, Messrs. Holsten & Lott, whose announcement appears on back page.

A couple of Edmontonians were down to Tofield last Saturday looking over the situation for the location of a brick plant. Mr. Nichol son took them in charge, showing them the sights.

There is no real need of anyone being troubled with constipation. Chamberlain's Tablets will cause an agreeable movement of the bowels without any unpleasant effect. Give them a trial. For sale by all dealers.

The Alberta Methodist Conference met last week in Edmonton. Encouraging reports were received showing progressive work in all fields. Rev. Mr. Wiggins, one of the lost men in the Conference, is coming to Tofield to take the local field, lately vacated by Rev. Mr. Bowes.

Each age of our lives has its joys. Old people should be happy, and they will be if Chamberlain's Tablets are taken to strengthen the digestion and keep the bowels regular. These tablets are mild and gentle in their action, and especially suitable for people of middle age and older. For sale by all dealers.

A very exciting game of baseball was played on Tuesday evening between the Nobevics and the Presidents, otherwise the Beavers and Athletics. The game was a closely contested one, the Nobevics getting the long end of a 8-7 score. J. Ward 36 scores knocked the ball center in fanlike fashion. Should any of the big league scouts happen along this way and see Wardie in action we would be sure to lose him, we don't think.

Don't miss the two nights engagement of the Eckhardt Company, Canada's leading popular priced attraction, at Bellamy's Hall, starting Friday, June 21. This Company are by no means strangers here, as they played a previous engagement about a year ago, at which time they made many friends with their excellent production "Are You a Mason."

The Eckhardt engagement premiers local theatre goers the dramatic treat of many months. Prices, 25c and 50c.

Big Dance in Bellamy's Hall on Monday evening, July 1st.

Drillers Strike Another Flow

Best Flow of Natural Gas Struck Yet At Depth of 977 Feet

Tofielder's Hopes High for Rich Flow Deeper Down

Tofielders' hopes for a great strike of natural gas were raised high last Saturday when another splendid flow was struck by the well drillers at a depth of 977 feet, just 3 feet higher the point where they have had all the trouble of the last two months through the shoe on the rod of the casing buckling.

The flow struck on Saturday morning is the best yet. The drillers estimate it to be about 300,000 cubic feet per day. When ignited at the top of the casing a flame bursts forth about 12 feet in height. The open was quickly covered through the lines, and crews went up through the day to see the sight. Drilling was proceeded with by the contractors and good progress made during the afternoon, a depth of 994 feet being reached by evening.

At night contractor Nelser fitted up gas-piping from the well, which conveyed the gas some distance from the wreck, and lighted the gas, which made an illumination visible for several miles around the town. Farmers living two miles out state that they could see it from within a short distance from their homes.

Only a small portion of the flow could be turned on, as the full flow blew out the flame. The gas was allowed to burn throughout the night and all day Sunday. At midnight on Sunday the big solar street light was fitted up near the well and allowed to illuminate the well surroundings. This is a 40-candle power affair, and a fair amount of gas was available to keep the lamp going at full capacity from the leakage only through the valves when the supply was shut off.

The amount of gas struck in this flow is more than sufficient to supply all the families in Tofield at present besides the lighting of the streets. But drilling will be continued to a depth of 1200 feet, provided an abundant supply be not struck before that depth is reached. The flow struck at the 700 feet level is estimated by the drillers to be sufficient to light all the streets of the town. The indications, therefore, are sufficient to feel assured that a big flow will be secured from the greater depth. Experts are frank in stating that the chances are splendid for a plentiful supply of gas being struck at no great distance from the present level. The drilling now being done is recognized to be in a natural gas strata.

Pratt's Condition Powders, the greatest tonic known for horses, cattle, sheep and hogs. For sale by Geo. B. Brace.

Want the Cement Duty Suspended

The Boards of Trades, Builders' Associations, City and Municipal Councils of all the large cities in the western provinces have taken up the question during the past week of the tremendous shortage in cement for building purposes of all kinds, and have made representations to the Government at Ottawa, to have the import duty on this article suspended for four months. The condition, the building boom has reached in the Canadian Cement Merger, of which Sir Max Aitken is the successful builder

The officials of the Cement Trust argue that they are in a position to furnish cement to all their consumers, but cannot do so owing to the shortage. The builders, on the other hand, scoff at this statement and say that the Trust, having things all their own way in Canada, have put the price of cement at a prohibitive figure and refrained from manufacturing all that is necessary. There is no doubt about the necessity and desirability of the granting of the petitions from the West by the authorities at Ottawa.

The Order of Owls

The Order of Owls, a four degree secret and benefit society are at present organizing in Tofield.

The Order was founded Nov. 20, 1904, and has branches in Alaska, Mexico, Cuba, New Zealand, Australia, South Africa, Canada, United States, and nearly all European countries.

The Order has a membership of nearly one million, and provides and pays to its sick members $6 per week for three months in each year, and $100 is paid on the death of each member.

The Order also provides homes for the widows and orphans of the deceased members, and at the present time the Right Hon. Earl Cadogan is petitioning Parliament to lay aside certain tracts of land for the use of Owl members only, where homes will be built for the benefit and use of its widows and orphans and invalid members.

The entrance fee is $5, and the dues 50c per month.

Any other information may be obtained by applying to

Dominion Day Celebration, July 1

All Roads lead to Tofield. Monday, July 1, will be the Great Trek Day. Celebration on Exhibition Grounds will be best all-round enjoyable People's Day. Something for everybody to take an interest in.

If anything like fair weather prevails on Monday, July 1, the 18th Annual Celebration of Canada's Great Holiday in the TOFIELD District will be the biggest attended and most successful function of its kind yet held in the community. The committee in charge of the arrangements for this year are determined to make this the People's Day for the entire district and have so mapped out their programme. A careful survey of the list of events as it appears below will reveal something of interest to every lover of sport, and will afford a day of relaxation and pleasure to all who will put away the implements of labor for this one day and come to this great gathering, where they can meet neighbors and friends, cultivate new acquaintances, discuss affairs of every day interest, take a part in or as a spectator of the events of the day,—not only make the day a day of pleasure for themselves, but join in the spirit of the occasion and make the day one of general goodfellowship and rejoicing. Everybody welcome—bar none! Come, and let's get acquainted! This is Everybody's Day!

TOFIELD, ALBERTA, THURSDAY JUNE 13, 1912

Protect The Public

SEVERAL serious auto accidents have recently taken place in Edmonton at crowded street crosses and crossings. Two lives have been lost and others have been rendered in a precarious condition. Alderman May of the city council thinks that certain regulations should be put in force which will control all traffic at these busy corners. We see where Mr. May is right and that the puny efforts of the Capital to belittle his ideas in this matter are unworthy of the approval of all good and progressive citizens. If the writer of the Capital article would only get out of his village rut and take cognizance of the up to-date methods used in the modern metropolis for the preservation of the safety of the public he would not expose his ignorance by passing out such a foolish article to the public. Edmonton's public will demand the putting into effect of regulations at crowded street crossings which will protect the public safety.

o o o

Our Duty as Public Minded Citizens

THE bad fire at Wainwright a few days ago which destroyed the best portion of the heart of the town, but which, we are glad to say, has not similarly affected the adventurous spirit of the business men who suffered the losses, is another object lesson for our own municipal fathers who have been entrusted withe management of our civic affairs and the protection of our interests. The Wainwright fire is an incident, the exact repetition of what has occured on two occasions in this town. Just two little chemical engines, the capacity of which is sadly limited when it comes to fighting a conflagration.

It certainly must grieve any public minded citizen of Tofield who has the welfare of the municipality at heart to realize that three years have passed since our first bad fire, since the agitation first arose for an adequate fire protection and that today we stand infinitely worse off than we did then for were we to have another conflagration the losses would most likely be far greater. The one essential is water and the means to use it when the need arises.

Fire protection walls are another necessity. It is some what of a relief to know that this matter has been up before council. But, the query is, will they become a matter of fact, a realization.

The water question, in spite of the fact that as yet we have no supply at first hand for use if the need arises, is an old subject. One has to treat it gingerly because of the fact that it is such an old cheatnut. Yet the fact remains that it is the essential not only for fire protection or even domestic use, but is an important essential when the consideration of the location of industries here in topic. We cannot afford to treat the matter lightly, no matter how flippant the remarks of some who think they know the whole thing. The agitating may be all right in its place, but in this matter action is what is necessary.

It seems to us that it would be a most desirable thing to gather in concave representatives of all the vested interests in and about Tofield who would be vitally interested in this matter. The town, and each of the various companies who are more or less heavily interested and who would most naturally desire to see things go ahead in the march of progress in a way mutually beneficial to all. Get together and have a serious heart to heart talk about the matters so closely affecting the future development of our town. In thus getting together we will have the benefit of those whose experience will undoubtedly have been longer then ours and the product of which discussion will be the shaping of a policy commensurate with our status and with which all parties interested will be in sympathy. Our own interests and the future of our town depends largely upon the manner in which we go about our development.

o o o

Vegreville's Agressive Policy.

The Town of Vegreville has before it for consideration from debenture by-laws totaling $60,200, distributed as follows:—$75,000 for the construction of a combined system of waterworks and sewerage; $3,000 for the acquiring of lands for park purposes; $1,500 to provide for street construction; and $700 to provide a grant to the Board of Trade. The by-laws are to take effect from the 5th of July 1912 if accorded the necessary majority vote of the burgesses on voting day, which falls on July 2nd, 1912.

Vegreville has started out on an aggressive policy of development which spirit is to be admired. We cannot refrain from commending the actions of the Council, with Mayor A. H. Goodwin, at its head, in desiring to go as a committee of the whole to Camrose and Wetaskiwin to examine the water, sewage and light plants at those places, and to obtain all information possible relative to those systems. Any Council of any Municipality who takes this method of obtaining valuable light and information is certainly adopting right tactics—a policy which stands out in great contrast to that of others who fumble around in the dark aiming at nothing in particular and hitting nothing.

Brother Horton Peeved

We note from last week's Vegreville Observer that it is still suffering from an attack of acute nostalgia in which things were brought into proper light before the electors, owing to a mistake made by a party who has since come forward manfully and acknowledged his error. We are glad to see the Observer take its proper attitude to the Holden Herald man, who printed the bills "according to copy." The STANDARD was also glad that now that matters have sifted themselves out, Dr. Goodwin has been cleared of any suspicion of in connection with the publicity campaign for the Holden meeting through which he was placed in a questionable light. It has now been shown that he was not a party to the matter. It is certainly regrettable that such a statement regarding his candidacy should have been allowed to be spread broadcast throughout the country. Explanations were in order, and as a result of the publicity given the matter, these have been given to the public.

The Observer in its last spasm of fulsomness on the matter bitterly attacks the Standard for its part in getting this affair set right before the people, charges it with falsehood, etc., etc. It reminds us of the old story about the boy and the wolf. Possibly it accuses the Observer. If so, we would prefer to see the Observer continue in its hilarity.

DOES YOUR STOMACH NEED HELP OCCASIONALLY?

Sustained and Artificial Aids Incorporated by Specialists

"You've often noticed how nervously healthy children eat their food, and how slowly they digest meals that would give a good many of us "growing pains," a horrible attack of indigestion.

"Now you continue to get occasional attacks of indigestion without trying to locate the real cause of the trouble.

"In the case of healthy, growing children, through the fresh air and the exercise activity, race or game, the digestive processes are vitalized and "digestion" is the result. But as we "grow up" digestive capacity that we have, and nature properly prepares the food for easy digestion. That is the way Nature intends it to be done, and if we lived right we would crave and enjoy our food just as much as any child.

For years you perhaps have been treating indigestion the wrong way. By producing proper conditions the food reaches the period of digestion, just the way Nyal's Dianetic Tonic acts. It works on the unnecessary salivatory processes, assists the secretory, so that food digests naturally—not artificially.

"The moment you have indigestion pain, but gives you what is far better, a natural appetite for food that you digest and assimilate. That's what rekindle the tissues and puts real flesh on your bones.

"If you try this remedy we know you will be pleased. Nyal Dianetone is sincerely believed to be the best medicinal tribute offered. 12

Possibly the manner in which the Standard went about securing light on the subject for the electors was a little crude for some and it hurt. The Observer charges the Standard with the deliberate intention of damaging Dr. Goodwin's chances for the Liberal nomination. The public will not look on it in this light. The Standard pointed out the error, the evidence of which was before it in the poster issued to the public. The public already knew that Dr Goodwin had been no aspirant for political honors for some time,—then this statement comes out that he is the Liberal candidate. The most natural assumption is that one person concerned knows all about the matter. It certainly is up to any candidate to manage his campaign. Unfortunately, in the case it does seem that the worthy doctor was not directly responsible. The wrong was done, however, and it was in full justice to the elector that the most publicity should be given to its correction to place him in the proper light. Rushing things up like the Observer evidently has it is not the best policy to pursue with the public.

Announcement!

June the 1st.

To successfully compete with the Mail Order Houses we have decided to fall in line with the merchants of our neighboring towns by adopting the cash system, beginning with the first day of June. Believing that we can better ourselves and save money to our customers in the form of lower prices.

Remember the man who can pay cash for goods or whatever purchases he may make can always secure a better bargain than the man who buys on credit. It, therefore, will be a great saving if everyone could manage, by right economy if necessary, to pay cash for everything they buy. It will pay a high rate of interest on everything purchased.

All produce treated as cash.

I still have a number of A 1 Seeders and Land Packers. Get 'em Quick.

J. LEE, Sr., Main St.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

ANY person who is the sole head of a family, or any male 18 years old, may homestead a quarter section of available Dominion Land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties.—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price $3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the three years required for homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right may, under certain conditions, obtain a purchased homestead in certain districts. Price $3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth $300.00.

W. W. CORY,

Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

Another College For Weyburn

Weyburn, Sask., June 10.—The development of Weyburn into an important educational centre received a fresh impetus from the decision of the Baptist denomination to establish a college here within the next year or two. Building will be commenced in the near future, the land, about 20 acres to the north of Kyanton Park, having already been donated by Mr. Wilfred Lemoux for the purpose. This announcement follows very closely upon the establishment by the Free Methodists of their children's seminary here, site of which was secured. These institutions, together with a $75,000 collegiate, are expected to give Weyburn a high rank among the educational centres of the province, offering facilities for instruction from primary grade to academic degree. Weyburn's two public schools now take care of an attendance between them of nearly 600 pupils.

Some Virtues of the Hog

They multiply ten times as rapidly as horses, seven times as rapidly as cattle and five times as rapidly as sheep. They produce a maximum of gain five weight on 25 per cent less feed than do cattle or sheep, and in proportion to their live weight yield a 50 per cent heavier dressed carcass. Of a given weight of dressed pork and beef, there is needed 3 cents more cash to buy the hog carcass, and one pound of pork will sustain a man at board labor 26 per cent longer than will a like amount of beef or mutton.

There is no kind of meat that lends itself to curing purposes as well as does pork. For this reason it is the staple meat on the farm. It has been used increasingly for pork to supply his own family, and most Alberta farmers will find a few hogs handy things to have around when a note comes due. The dairy cow to meet running expenses and the hog to lift the mortgage is a combination hard to beat on any farm.

When your child has whooping cough be careful to keep the cough loose and expectoration easy by giving Chamberlain's Cough remedy as may be required. This remedy will also liquify the tough mucus and make it easier to expectorate. It has been used successfully in many epidemics and is safe and sure. For sale by all dealers.

Calgary Industrial Exhibition, June 28

The Chicago papers of May 31st announce that at the aviation meet at Cicero on the 30th of May Jimmy Ward, who is to make two flights daily at the Calgary Industrial Exhibition, June 28 to July 5, paid an unexpected visit to a Chicago

Curtis machine. Operating Pilot. He flew in 30 miles from the amusement park where he is exhibiting, and returned after a half hour's rest. During the journey he reached an altitude of 8,500 feet. He is giving very successful flights at Riverside Park, Chicago, and visitors to the Calgary Industrial Exhibition may look forward with pleasure to witnessing his flights during the Calgary Fair.

o o o

The Honorable Richard McBride, premier of British Columbia, has accepted the invitation of the Calgary Industrial Exhibition to officially open the Exhibition on Saturday, June 29th.

o o o

Among the judges appointed for the Fair who have already accepted invitations to act are the following:—Prof. W. R. Richards of Fargo, N.D., Percheron, Belgians and Suffolk Punch; Wm. McKillop, Napinka, Man., Clydes and Shires; Capt. Robson, London, Ont., Shorthorns; Prof. Jarvis, Grimsby, Ont., Poultry.

Uplift in Realty Values

Lethbridge, Alberta, June 10.—Prosperity on every side is the impression gathered by the tourist visitor to Southern Alberta in these days, and the number of such visitors increases from month to month as the date for the approaching Dry-Farming Congress draws nearer. It is the educational aspect of the Congress, however, that is now being specially emphasized by the promoters, and, as pointed out by the executive secretary John T. Burns, it is precisely in this feature which is found its contribute in the most important degree to the future prosperity of Western Canada along industrial and commercial lines. It is believed that Lethbridge's numerous high schools will be the means to accommodate the throngs of delegates who have signified their intention of attending the Congress, but already preparations are in hand for enlarging the present facilities for taking care of the visitors. A notable feature of the present influx of outsiders into Lethbridge is the almost universal interest being shown in local and suburban properties, especially farm lands, and real estate dealers report an increasing number of enquiries for improved acreage property, with many important sales to newcomers who will cultivate inland farming and market garden operations on a large scale. At the present time a very large proportion of enquiries being received from outside points comes from the States of the Central West.

The Town of Hustle

Kind friends, have you heard of the Town of Hustle,
Where the people make things go?
Where the man-of-the-minute scents the air.
And workers there aren't slow?
It lies on the valley Get-there-yet
In the land of joy and pride;
The home of the people who'll do it now,
Where the sick-to-its all abide.
The town is young and full of hope,
And grows with the flight of years.
It is flanked with sunshine and optimists bright:
Its streets are straight and the men go right,
And they'll get there without the tears.

"The Studebaker Hopeful."

It is now well known that on more than one occasion of rheumatism no one requires any internal treatment whatever. All that is needed is a free application of Chamberlain's Liniment and massaging the parts at each application. Try it and see how quickly it will relieve the pain and soreness. Sold by all dealers.

Provincial Treasurer Greenfield has announced that the Government will not grant any more liquor licenses in the province.

Unusual success in the business of Tofield was evidenced the first of the week when R. O. Bird had to send another car of coals and another of salt and lime. The goes to show that the Tofield district is making progress.

Proceedings were taken in the Supreme Court of Alberta by the Attorney-General's department to restrain the Canadian Northern Railway Company from constructing a line of railway from Edmonton to Calgary via Red Deer without first obtaining the consent of the Board of Railway Commissioners.

It is said Tofield is building a large watchtower just north of his present building on Main Street.

WANTED—Every boy in and around Tofield to come in and look over our new lines of hats. R. O. Bird

Tie in Baseball Game at Bardo

Bardo Nine took Tofield baseball to the woodwork to their tune in a game played on the ground on July 1st. Friday afternoon. They have a team which, with a lot of good practice, should make them a good opponent for clubs when they enter the district series of games next year, and before the season is over. In the game on Saturday noted above, it must be said that Tofield were not up to their usual form, while Bardo's team of pitching throughout was excellent. Fielding was also a feature of the game, and a number of fast plays were pulled off by both teams. Tofield's battery, Bird and Mitchell, were in good form

TOFIELD, ALBERTA, THURSDAY JUNE 28, 1912

Tofielders and farmers in the district will view with pleas ure and satisfaction the progress of the government telephone service extension throughout the district which is going on at present

o o o

Speak about crops to the farmers these days and one is sure to meet that ever present ready smile where pleasant thoughts reflect themselves on the open countenance of the crop miser. Sunshine and showers have alternated during the past fortnight each providing abundant and necessary forces to send the young grain plant up and the little roots down. Nature has dealt kindly with all vegetation during the past month and all plant life is in that condition which indicates a big and bountiful harvest in 1912.

o o o

We notice that George H. Perley, minister without portfolio is guiding the Canadian ship of state in the temporary absence of the Rt. Hon. R. L. Borden. Incidentally it might be mentioned that the above fact contributes a curious anomaly in connection with one of the main arguments of the party then in opposition during the last federal election campaign. Who will not remember the American invasion campaign cry which was used effectually in connection with the reciprocity deal. Now, not a few of our readers and people throughout the country will be interested to learn that the man who is temporarily in command at Ottawa as Premier Borden's 1st Lieutenant is a man United States born and bred, who did not come to Canada until he had reached the years of manhood. Is he any the worse for that?

Facts Won't Down

Edmonton, Alberta, June 17. . . . Touring Western Canada in the interest of a firm of British capitalists, H. J. Logan, K.C., of Amherst, N.S., while stopping over at this point said: "The phenomenal wave of development which is sweeping over the Prairie Provinces is one of the most impressive features of Canadian development today. I have visited Saskatoon and other western cities, and in every city prosperity and growth are manifested. The present settled policy of this province must give the British investor increased confidence in the Canadian West." And this statement is strikingly confirmed by J. F. Cogswell of the Natural Resources Department of the C.P.R., who says: The American boycott of news of the Dominion's development is bound to fail, because statistics of the growth of the west are so phenomenal that their news value cannot be ignored. American papers may refuse to publish our immigration stories, but they can't suppress the statistics; and, in fact, there is to-day a very strong demand for them. Meanwhile from all of the Central Western States and even from as far south as Oklahoma and Texas reports now at hand indicate that the great trek northward has only just started, and this summer even American college boys—future professional men, capitalists and statesmen—will gain their first acquaintance with the resources and possibilities of the Canadian West, telling side by side with the sons of the soil in the harvest fields for the purpose of earning the required wherewithall for the attainment of their college degrees. That these college boys on their return home will become walking and talking advertisements for Alberta and the West is generally regarded as a matter of course.

Meals at All Hours

MA WAT - Prop.

YOU MAY NOT BE A BEER DYSPEPTIC

But Do You Enjoy Your Meals as You Should?

Don't you feel after a reasonably hearty meal as if you were a little more than full? Don't you feel quite a little bit heavy and not quite comfortable?

Then, too, you do not often approach a meal with the zest of earlier years; you feel as though your appetite needed a little coaxing. Simply a natural result of the less nutrient life we lead. If you will but take Nyal's Dyspepsia Tablets, and eat your meals slowly and chew your food well, we wouldn't worry about our dyspepsia.

If we succeed in this, the next and surest thing to do is to take Nyal's Digestive Tonic. It has a most wonderful effect upon the digestive organs. Nyal's Dyspepsia Tablets. They're fine. Let us tell you about Dyspepsia—but you don't need them.

Try a dose of Nyal's Digestive Tonic after a meal and see how well it acts. Suppose you become like Nyal's Dyspepsia Tablets. They're fine. Let us tell you about Dyspepsia—but you don't need them.

Try a dose of Nyal's Digestive Tonic after a meal and see how well it acts. Suppose you become like Nyal's Dyspepsia Tablets. They're fine. Let us tell you about Dyspepsia—but you don't need them.

Announcement!

June the 1st.

To successfully compete with the Mail Order Houses we have decided to fall in line with the merchants of our neighboring towns by adopting the cash system, beginning with the first day of June. Believing that we can better ourselves and save money to our customers in the form of lower prices.

Remember the man who can pay cash for goods or whatever purchases he may make can always secure a better bargain than the man who buys on credit. It, therefore, will be a great saving if everyone could manage, by rigid economy if necessary, to pay cash for everything they buy. It will pay a high rate of interest on everything purchased.

All produce treated as cash.

THE KEY TO YESTERDAY

By CHARLES NEVILLE BUCK

Copyright 1923

[By W. J. Watt & Company]

taken into the family on the same basis as the host.

"Hi, Jake!" with a temple dedicated to hospitality Mrs. Horton its delightful personality seemed to be all the somewhat pretentious name, but it had been Horton House since Mrs. Washington's stage vanished along the turnpike and the picturesque little village of Rock and Pebble. She had been the "mistress" for the slaves for it would no more do to be Negroes than to banish the ripened old female servitude to replace the silver laden mahogany sideboard with less ornate furniture. Her self-reliance was added to from time to time, until it had become a combination and composite of various eras but the same old spirit seemed to be there.

Jake Hetherton had lived in that he had happened, though for a time I was not sure.

Now if I hadn't been born with four aces and covered with lucky pox marks and several sets of sidekicks to help me through grammar school I'd have been a fairly tongue that won't articulate a word I can understand without the aid of a fifteen interpreter. I would never dare to go back to the treasure hunting business because I'm afraid I'd be starting out to find the pirate, Captain Kidd, buried some place where I had already been and dug up the swag myself. Besides, I'm not built for that sort of thing. I'm too much of a coward. I'm afraid of the dark, afraid of ghosts, afraid of the ocean, afraid of the jungle and afraid of the desert. I'm afraid of everything except the truth and I'm afraid of that, too, when it's against me.

I had been born with four aces and a couple of jokers up my sleeve, but I was not aware of it. I was just a poor, scared little boy, and I'm not ashamed to admit it. I was afraid of my own shadow, and I'm afraid I always will be

Substantial Industrial Development

June 17.—Many new enquiries are now negotiating for the establishment of branch houses or manufacturing plants in Calgary. Important deals are pending for sale of the industrial quarter, and real estate men report a steady demand for good business properties in all parts of the city. Among the large transactions just recorded are sales of two acreage lots on Eighth Ave. for $30,000 and $30,000 respectively. The frontage of 20 feet has just been sold for $60,000, which is an advance of $20,000 over the price at which it was offered last year. Montreale building and construction work is keeping pace with the [illegible] at Regarding the proposed exchange of cement [illegible] are now at hand [illegible] is soon, and, in the opinion of the Board of Trade, this will be sufficient for immediate [illegible]

Government Ownership of Terminal Elevators

Hon. Robert Rogers, Minister of the Interior and Hon. Dr. Roche, Minister of Inland Revenue, guests of honor at a banquet in Regina June 12, at a gathering of Conservatives from all parts of the province.

Hon. Mr. Rogers made several important announcements as to Cabinet policy. The principal one was that the Government had decided on an annual policy of government ownership of terminal elevators at Fort William and Port Arthur. Having already secured [illegible] a vote at the head of the lakes for terminal purposes upon which to [illegible] will be called at once. A [illegible] commission has been appointed [illegible] which has full and complete control [illegible] of the elevators.

The Government has already secured 42 acres, and before the close of navigation this year we expect to have a splendid public owned elevator ready for operation.

Hon. Mr. Rogers also announced important changes in the Lumber Inland regulations which will help to relieve the burden upon the [illegible] settlers of the west. A homesteader will no longer be assessed for [illegible] cleared [illegible] A law is to be introduced [illegible] which is considered will [illegible] and [illegible] could build the required [illegible] regulations with [illegible] necessary, and to encourage the stock industry where cattle raising is followed the coal [illegible] fees will not be required. These announcements were greeted with prolonged cheers.

It is now well known that [illegible] more than one [illegible] the [illegible] who requires any material to [illegible] All [illegible] Lee application [illegible] Lumbered and [illegible] to [illegible] parts of each application. To [illegible] at once [illegible] will relieve the [illegible] and [illegible] dealers.

Free Trade Still Afar

Hon. Geo. E. Foster regards Imperial Commission as Important Move.

London, June 20.—Hon. Geo. E. Foster, Minister of Trade and Commerce of Canada, visited at Liverpool to-day. In an interview Mr. Foster said that it organized the imperial Trade Commission as a most important move. He regretted the final step of Canada's transport [illegible] "I have no hesitation in saying," he continued, "that [illegible]

MY MOTHER'S CANDLE

RAINFALL AND CONSUMPTION

HAVE YOU A PAINFUL CORN?

WHEAT, BARLEY OATS, FLAX

Owing to so much unfavorable weather, many farmers over Western Canada have suffered at least part of their crop touched by frost or otherwise water damaged. However, through the large shortage in feed, seed, barley, fodder, potatoes and vegetables, by the unusual hard and drought of last summer in the United States, Eastern Canada and Western Europe, there will be a steady demand, at good prices for all the grain Western Canada has raised, no matter what its quality may be.

We mark variety in quality means it impossible for those best experienced to judge the exact value of each shipment, therefore it is impossible for us to make more in need of the services of the banking after selling of his grain, than he does its owners.

Farmers you will therefore do well to consign your grain to us, and we will see that it reaches destination in good shape. We have storage for several thousand bushels of grain at Fort William or Port Arthur, to be handled in such a way that you get every cent there is in it. We have been established for a number of years, and have a reputation for square dealing. Write us for our advance payments on shipping bills for cars shipped. We never keep the grain on our own account, but act as your agents in selling it to the best advantage for your account; and we charge you a fixed commission of 1½ per bushel.

We have made a specialty of the work for many years and are well known to the trade. Our facilities for marketing your grain are unexcelled, and we have the confidence of the trade. Our reputation for honest treatment, liberal advances, prompt returns, interest, and promptness in making settlements.

We invite correspondence from all interested and if you will write us for our weekly market letter, which contains information of importance to every farmer, we will be pleased to mail it to you. Remember we are always glad to hear from you, and will be pleased to answer any inquiries you may make.

TOFIELD, ALBERTA, THURSDAY JUNE 27, 1912

Tofield has struck it rich! The Tofield District has been demonstrated to be one of the best gas fields in the west. What Tofield will be in the near future not the wild est dreams of fancy can realize. The striking of one of the richest flows of gas in the west Thursday means a tremendous lot to Tofield. The natural resources developed and made available by the discovery of gas in one municipal well means everything in the development of our other visible natural resources. The problem of the manufacture of brick of unquestioned superiority to any heretofore manufactured in Central Alberta at a cost which cannot be competed against successfully in Edmonton or any other point in this part of the province has now been solved to an utter nicety. The fact that under our big coal deposits is an unlimited quantity of shale which has been demonstrated to be of that nature which produces the best of cement associated with the fact of our having at our disposal all the gas needed for fuel holds out the prospect of a golden future for the manufacturers of this article here in large quantities.

Our Resources

The strike of gas at Tofield will have a far reaching effect, throughout the province and the west. The creation of manufacturing industries in the field of market these having the handicap over eastern manufacturers of cheapened cost of production will prove a lasting benefit to every consumer in city or country throughout the west. Tofield has won out and no persons are more heartily glad than the Tofielders themselves

The Gopher Tail Competion

Great interest is being aroused among the boys and girls in the Big Gopher Tail Competion created by the Tofield Agricultural Society as one important branch in connection with their Fall Fair on Sept. 27, next. Thirty Dollars divided into five prizes, $10-$8, $6, $4 and $2 will allow a large number to enter the contest. The Society has another good and helpful word for the boys which will prove them the assurance that every boy that does not win one of the above prizes stands an even chance to win another good prize. It is this—J. W. Morton offers a five dollar cash prize, special, to the boy who has the number closest to that drawn from a box on Fair Day. The numbers 0 to 9 consecutively will be placed in a box. Five will be drawn out one after the other. Thus the first number might be 5, the second 6 and the third 1, the number will then read 561. The boy having the number closest to the number thus drawn out will receive the Morton Special Five Dollar Prize. Any number from 012 to 987 may thus win the prize

It has been intimated to the Secretary that other special prizes in this competition may be offered. The boys will undoubtedly receive all the encouragement possible to make a clean sweep of the gopher tail competition in the Tofield District and earn the good prizes offered.

To those boys who may feel like entering the competition for the gopher tail prize on July 1st the announcement of the local gopher tail contest on July 1st will be

MANY OLD FOLKS WOULD FEEL YOUNG AGAIN

If They Paid Attention to The Kidneys

Because you feel tired, have backache, pains in the region of your kidneys, should be filled with confidence and hope when told that Doan's Kidney Pills will relieve you.

You perhaps have had to forego the social affair or entertainment, even, because you had backache or kidney trouble. Don't take chances with any but well-known remedies. Why not use one of recognized merit and standing? Why not use Doan's Kidney Pills, a remedy that has been successfully used in thousands of cases for over four years? Why not use a remedy that has been used in the Old Country for over forty years? Why not use a remedy that has been used in Canada for over twenty years? Why not use a remedy that has been used in Tofield for over two years?

Don't be prejudiced, keep an open mind, but profit from the experience of others. Read the following statement of a Tofield resident:

Mrs. Fiona Rose Campbell has proven a great benefit to me. It is not patent medicine, but just such a prescription as your doctor would have prepared for you.

The remedy is one we are proud to recommend. It is always our best interest to secure best value for our customers.

Sold by C. E. JAMESON, Tofield.

Announcement!

June the 1st.

To successfully compete with the Mail Order Houses we have decided to fall in line with the merchants of our neighboring towns by adopting the cash system, beginning with the first day of June. Believing that we can better ourselves and save money to our customers in the form of lower prices.

Remember the man who can pay cash for goods or whatever purchases he may make can always secure a better bargain than the man who buys on credit. It, therefore, will be a great saving if everyone could manage, by rigid economy if necessary, to pay cash for everything they buy. It will pay a high rate of interest on everything purchased.

All produce treated as cash.

That Reminds Me

THIN, PALE WOMEN
WITH PALE CHEEKS

Now Rapidly Learning the Way to Health and Vigor by the Use of Dr. Hamilton's Pills

The best way to correct weakness of girlhood is to use a tonic and blood builder. Your troubles are caused by poor blood. Mrs. Sarah A. Dempsey, Lakeville, Ont., says: "I was thin, pale and weak. Hamilton's Pills. I didn't know what it was to enjoy a good meal for months. My stomach was soon battened me, was tired, tired and nervous. I simply hoped to round my system with Dr. Hamilton's Pills, and have been robust and vigorous ever since."

You may do the same.

Dr. Hamilton's Pills

When Nostrils are Plugged Your Catarrh is Bad

BY ACTING TODAY YOU CAN QUICKLY CURE CATARRH AND AVOID BRONCHITIS, PERHAPS CONSUMPTION

Hyomei—Inhale and Breathe Cure Is Extraordinarily Quick, Sure, Every Complete Cure

Catarrh cures by permanently removing the germs of catarrh disease from the nose, throat and lungs. Hyomei (pronounced High-o-me) is the only way to do this. Breathe it through the inhaler and it kills the germs.

Hyomei is a healing, soothing, antiseptic air, which you breathe

R. M. Wigg's new palace car Mechanic engages are not full as usual and push out [illegible] in his new charge last Sunday.

Beaver Lake . . . East . . .

D. J. McCallum of Mundare who has been over a deal of country in his auto, says the crops in this district are the best he has seen. All the same unless we get considerable rain they'll be below the average when cut

The cut-worm has done a good deal of harm this year. we hear of fields absolutely cleaned out both east and west of the lake. Gophers too, are pesky things! In the language of Mickey Free, "May the devil fly away wid them."

D J McCallum and D McAllister, both of Mundare, have purchased autos and go over to Edmonton at thirty miles an hour. When out driving we keep our eyes open for a speed cop, but so far we've only seen one. Ted Aikman ought to have the job as he is starting on his motors. He used to have to spit and hike to Banff and the coast or pass in his checks. We felt all broken up and went around like a farmer who had been visited by a frost or hail storm Monday last when Tom Ryan was called to his lonely wilderness. We wrote a tender obituary notice for the Standard to prepare our feelings, and when Tom's successor appeared we felt like swatting him

It is now well known that on more than one occasion the Journal has been prepared to make important announcement. All that is needed is a free application of Chamberlain's liniment and massaging the parts at each application. Try it and see how quickly it will relieve the pain and soreness. Sold by all dealers.

good and hard for daring to profane Tom a sanctuary. After a while we got used to seeing him there. He was civil and obliging and we felt as the weeks dragged by that he might in time get to be an improvement on Tom. So things went on till the other day we went to the station for an Eaton parcel (this is confidential) when whom should we see helping J D McAllister haul oranges on his good but old Tom, fat and hearty and acting as though he owned the place. And the beggar never went to the coast at all, not even a smell of the Banff hot springs, he had been rusticating round on the ranch near Viporville all the time admiring fractious cows and shooting gophers with Mr Jackson's old single Quick. We feel that we've a grouch against Tom that time alone can heal.

Local and General News

Rev. C. F. Washburn, of Bowden, Alta. was in town on Monday.

Ernie Dugald was down from Edmonton for the first.

W. T. Whillans, of Edmonton, spent the week end in town.

W. A. Neher made a business trip to Edmonton on Wednesday.

Miss Grace Thompson left on Monday evening for Edmonton.

Mrs. Van Benkirk is the guest of her sister, Mrs. W. Hopgood.

A date will be set shortly for the proposed July 1st Celebration.

R. O. Bird returned last Thursday evening from a trip to Ontario and eastern points.

E. Dugaud, of Bradstreets, Edmonton, was a visitor to Tofield on Monday.

Mr. Hohl, Silverleaf and family moved out to the farm this week for the summer.

Alex. Stuart K. C., of Edmonton, was a visitor to Tofield a few days ago.

W Bellamy, Syd. Carter, Ray Lott and Art Hosier spent Tuesday in the Capital on business.

The Methodist Ladies Aid met at the residence of Mrs. Cole on Friday afternoon at three o'clock.

Bill Norlervey, Morris Mahaffey and Jack Moore were up to the city on Wednesday.

Barker Higns are putting in a plate glass front on their sign shop. H. G. Hird is furnishing the plate glass.

W. A. Elder, who has been superintending progress on the gas well for the past six weeks returned to Calgary yesterday.

Miss F. McKerly of London, England, is spending a few days in Tofield, the guest of Rev. A. R. and Mrs. McColl.

Maxwell & McKenzie, engineers of Camrose, have been appointed to take charge of the gas and water propositions for Tofield.

Mrs. W. D. Campbell, of North Vancouver, is the guest of her daughter, Mrs. A. M. McCall at the Manse.

The Canada West Townsite Co., Ltd., has purchased the north 30 acres of the Tofield farm at $100 per acre.

Miss Sholl, of the Tofield about staff, left last Friday evening to spend her vacation at her home in Carstairs, Alta.

J. J. Montgomery, of Driscoll & Knight, Edmonton, has purchased the east 80 acres of the Jacobs farm one mile north, at $100 per acre.

Edward Brien, barrister of Edmonton and town solicitor for Tofield, was down to attend the council meeting on Tuesday evening

The Bishop of Calgary has promised to attend and dedicate Holy Trinity Church on Thursday, July 18th. There will be a garden Party in the evening.

Byerley is always serious and often a dangerous disease, but it can be cured. Chamberlain's Colic, Cholera and Diarrhoea Remedy has cured it even when malignant and epidemic. For sale by all dealers.

R.B. Hopkins has taken over Bellamy's hall and will manage it himself. He intends putting in the very latest thing in a moving picture machine and will light up the front of the building. His plans are to show moving pictures to the public after the first of August.

The Hibbs-Bush Company Ltd., of Edmonton are opening an office in Tofield on Main St. next door to H. G. Bird's Hardware. They are putting on Hill Crest subdivision, this was the McCauley quarter which was sold this week and which lies half within the town limits on the West side.

Great Real Estate Activity

Tofield Realty Soars—Many Properties Change Hands

As an aftermath of the now famous Gas strike by Tofield Municipality a couple of weeks ago the real estate business has assumed large proportions. Investors prospection, that is properties situated within the town limits, has sprung into a healthy demand and much of it has turned over several times, each succeeding time at figures sharply in advance of preceding sales. A large number from the east quarters have come in daily and made investments. Farm property values have jumped to astonishing figures, many sales being recorded, the purchases being made by outside investors for acreage and subdivision purposes.

A. J. H. McCauley reports a rush of business in lands property, he handling this sum of business almost exclusively. As an illustration of the rise in values the sum of the N. E. corner of Main and 5th avenues sold originally at $600, turned over at $1,000 and was again traded at $1,200. Mr. McCauley made the sale of C. C. Harrison's 80 acres adjoining the town limits on the north side at $160 per acre. The purchasers, it is reported, have turned this over at $200 per acre.

Mr. McCauley sold the N. E. ¼ of 2-51-19, Leif of which is within the corporation at $75 cash per acre, the purchasers being Edmonton people.

The Canada West Townsite Co. have received Mrs Richter's farm, N. E. of 8-51-18 adjoining Tofield Heights on the N. E. corner.

Mr. McCauley sold the N. E. ¼ 33-49-16 6 miles south of town, to Sheerit Bros., Farmington, at $20 per acre. This quarter was held by Mrs. J. B. Harpe formerly of Tofield now of Killam.

W. Lee sold two blocks in C. & E. subdivision. Prices have doubled in value in this subdivision which is within the town, within the past week. Mr. Lee has transacted a heavy business in inside property this week. Mr. Lee states most emphatically that he has more faith in inside property than in outside.

O. L. Pugh reports a quarter of activity all over the town. In G. T. P., C. & L., Tofield Park, Tofield Heights and Rossdale—all inside property. He is doing very little in outside stuff. Tofield Park property, he reports, has been very active. Prices have advanced in this section from $125 to $150 per lot. Tofield Heights is also particular healthy buying.

Offer $2,000 Towards A Local Hospital

Dr. Jas. L. Hammond is in receipt of a letter from Miss Mary Ard. MacKenzie, Lady Superintendent of the Victorian Order of Nurses, Ottawa, stating that the trustees of the Lady Minto Hospital fund are prepared to make a grant of $2,000 toward the erection and maintenance of a hospital in Tofield, provided $3,000 is raised locally.

Thinks Townsite is Ideal

H. Mayer, of Edmonton, is a constant visitor to Tofield these days. Mr. Mayer who is interested in Tofield thinks that Tofield Townsite is ideal—rising from the railway to the centre of town thence overlooking Beaver Lake, one of the finest expanses of water in the west. For a farming country it cannot be beaten. For the manufacture of brick the clays here are of the best quality. For opportunities for manufacturers the town and district with its coal and other natural resources and now with its natural gas certainly offers the best of advantages for both farmer and industrial man.

CROP REPORTS

Never Better in Tofield District—Wheat and Oats in Short Blade—Hay Crop Will be Good

Crop prospects in the Tofield District were never better at this time of the year. The copious rain falls of last Friday, Saturday and Sunday, spoiling the Dominion Day celebration, means the saving of dollars in the pockets of the farmers of the community. The standing crops were beginning to take on a parched look in spots and while they were not greatly suffering as a whole, the abundant supply of moisture fallen last week and is sufficient to carry them through to maturity. T. A. Mercer, of Rarde, in the Standard office this week stated that if we could get another drop till after harvest the crops will come through famously. Wheat is averaging two feet in height and is heading out. Oats are averaging 20 inches in height and are in the shot blade. The hay crop is going to be a bountiful one, even on the uplands.

Development of Natural Resources

Tofield will advance with great strides as a result of the striking of natural gas. As an immediate result the problem of the installation of a gas distribution system becomes immediate. The council this week considers a debenture bylaw to raise $25,000 to provide for such a system and if any surplus remains to utilize, this if thought advisable in putting down another gas well. This bylaw will be submitted to the votes of ratepayers simultaneously with other bylaws under which it is proposed to raise funds to provide for permanent local improvements.

Upon the adoption of the gas bylaw work will be commenced and pressed to completion which will employ a considerable force of men. We look mainly, it is proposed to lay the load from the Station to a point near the school via Main st. and Cookson Ave., four inch mains will be put in on 2nd., 3rd., 4th., 5th., and 6th. avenues east, 3rd avenue west and on 1st., 2nd., and 3rd. streets together with service mains to the lots of resident property owners who desire the gas. The mains 6 inch piping has to come from Pittsburg, Penn., and will be ordered from there. It is probable, therefore, that the desires of the ratepayers on the bylaw should be made at as early a date as is possible.

Fire Protection

Council is also submitting an $8,000 bylaw to provide additional fire protection. It is designed to build council-st. water tanks underground at various central points throughout town and put down a well at each tank from which to fill tanks to buy a fire engine, preferably steam, which can be utilized to do the pumping to fill the tanks; and to purchase 1,800 to 2,000 feet of hose. By this scheme it is thought that as good a system of protection as can be given the citizens is being secured.

N.B. Above plan was changed by council Tuesday night by adopting it engineers $25,000 proposal now pending—Ed.

Saturday—

The opportunity for securing an excellent acreage for industrial sites and other purposes came before council at last Friday night's special meeting when J. W. Cookson, owner of N. W. 36-50-19 which is immediately south-east of town, wrote offering the town the first chance to purchase the same at $150 per acre cash for the whole property or that portion of the property lying north of the G.T.P. consisting of forty acres, more or less, at $200 per acre cash. The matter was left over till next Tuesday night's regular meeting for consideration.

Will Purchase Sites Industrial Purposes

J. W. Cookson's Farm of 120 Acres to be Purchased for $150 Gas and Water Systems to be Installed—Council Adopts Agressive Policy

Council unanimously decided last Tuesday evening to purchase the J. W. Cookson farm for industrial sites purposes. The price asked is $150 per acre cash. As Hon. Chas. Stewart, Minister of Municipalities, was in town on Tuesday and being interviewed on the subject expressed approval of the project considering the bright prospects of the town's future, stating that he thought the extension of the town's credit so borrowing power under the circumstances of the 1912 assessment being out before the recent sharp advance in realty values would be readily acceded to by the provincial authorities. Town Solicitor Brien was instructed to interview the Hon. Minister and the Attorney general with regard to this matter.

The Public Works Committee reported recommending the adoption of the report of Messrs. Maxwell & McKenzie, of Camrose, engineers, re gas distribution system. This report was accepted and Maxwell as well as the payment of current accounts.

TOFIELD, ALBERTA, THURSDAY JULY 4, 1912

TOFIELDERS feel no small degree of disappointment that weather conditions surrounding the 1st of July precluded holding the contemplated Dominion Day Celebration. There were not lacking indications that this was going to have been the best holiday yet celebrated in Tofield's history and hundreds in town and out as well as at the Capital waited eagerly for a sign from the weather man that fine weather would prevail. Tofielders are good Canadians and celebrate the National Holiday well. This should be encouraged and the movement given loyal support. It is understood that the Sports and Races are only postponed until Wednesday, July 10

Dominion Day

WHILE the heavy rainfall last Friday, Saturday and Sunday was unfortunate insofar as the Dominion Day Celebration was concerned, there is no question that it was of material help in bringing along the crops properly. Farmers welcomed the rain with smiles. Good crops are now assured. It has been stated by several farmers that they now have enough moisture to see them through harvest. Be this as it may, warm dry weather is sure to follow during summer and what with the showers we are sure to have the crop conditions for 1912 are surely very bright.

Rainfall Welcome

IN the week just past developments directly in connection with Congress on the Tofield Gas Well have necessarily been few. The fact is wholly confirmed that that Tofield has gas in paying quantities—a fact which is wholly satisfying to Tofield and its bunch of live boosters. Remark has been made by several visitors anent the absence of hilarity amongst the Tofielders over the great discovery. Regarding this it might appropriately be said that Tofielders while realizing to a more or less extent the great possibilities opening up for the town have chosen to keep cool and heads level, conservatively, yet aggressively plan for the immediate future development of the town and its resources on sound and progressive lines.

Tofield's Present and Future

Council will have the hearty endorsation of the citizens in its plan to install gas distribution and water systems. The town fathers too are wise in taking hold of the proposition secure d. W. Cookson's farm adjacent to and cornering the A to the South-east of the town for civic purposes. Too many towns and cities do not seize their opportunity in this respect at as early a stage in the game as they should. By securing this property as desirable and convenient for this purpose Tofield is wise.

While the undertaking may for the time being strain our purse strings or the towns credit, Tofielders have the fact before them that this year's assessment has been raised unfortunately too soon to reap the advantage of recent development. We have, however the assurance of the Hon. Chas. Stewart, Minister of Municipalities, who sees the wisdom of this progressive town securing the Cookson farm for its industrial sites purposes, that he will approve the exercising of town's limit of borrowing power under the last Assessment to provide the funds with which to secure this very valuable asset. Next years assessment will probably more than treble that of this year

Tofield has daily, since the strike assumed a larger prominence and importance in the minds of the public mind, the calm, cool judgement of the financier, and the speculator, takes this view.—We are on the verge of a tremendous development, all we need is that calm, cool judgement of the financier, to keep out of the pitfalls which others have fallen into and build up one of soundest and most progressive centres of population and industry in the province.

Canada to Join In Celebrating Peace Centenary

Ottawa, June 8.—Canada is to unite with Great Britain and the United States in joining two years from now in the proposed celebration of the hundred years of peace between the two great branches of the English-speaking people.

Hon. W. T. White, minister of finance, who was at this meeting to organize for the project, spoke ing on behalf of the Government.

expressed his pleasure at seeing so many prominent and distinguished citizens of Canada present, and to express the interest and sympathy of the Government with the object of celebrating the 100th anniversary of peace between Great Britain and the United States, the two great branches of the English-speaking people of the world.

Other Occasion

"It will be a great, a unique occasion, although I am happy to say that not one year later Great Britain and France will be able to celebrate a like occasion.

"One hundred years of peace between two great nations is certainly a striking event in the history of the world. Philosophically, rationally speaking, one would assume that peace should be a natural condition of mankind, but the lesson of the past is all to the contrary. The history of civilization is largely the history of war, and the history of the great nations one of almost incessant strife. The last 100 years have proved no exception to the rule. Since the signing of the Treaty of Ghent, while there have been minor causes of irritation between the two nations, nothing has ever existed of sufficient importance to constitute cause for war. On the contrary, there has been an increasing sentiment of good feeling.

Could Keep Peace of World

"So far as I can see, no possible conflict can possibly arise between Great Britain and the United States. On the contrary, there is everything to draw them together in conjunction to bring about the peace of the world. I venture to say, without exception, of all the nations, that the United States and Great Britain together could keep the peace of the world. Both being interested chiefly in production and commerce and all the arts of peace, their interests are decidedly opposed to war, which is wholly destructive. I believe the future will see an increasing perception of this fact on the part of both nations and a natural drawing together for the purpose of making permanent the peaceful conditions under which both can best realize their ideals."

NOT A HAIR FALLS FROM A HEALTHY SCALP

Falling hair, or hair that is dry or brittle, is a sure sign that the scalp is in poor condition. Keep the scalp in a healthy condition by the use of Rexall "93" Hair Tonic, and you will not only have luxuriant growth of hair, but you will be free from dandruff, and all scalp troubles.

Just what people neglect their hair, and scalp, is surprising, and startling, when a large per cent. of the people in the world are troubled with some form of hair or scalp disease. Rexall "93" Hair Tonic is a hair tonic that is not intended to remain on the shelf, but to be used.

That Reminds Me

Tommy: Here's the new cook gone—no, no!

Subscriber: I don't know. She didn't leave her address.

Clifton: How would you like to be a presidential possibility?

Dalton Penniless: Why man, who do you take me for—a sucker?

Brown: Do you ever bring in the unexpected in your stories?

Green: Haven't any children. I live with the mother-in-law.

Mr. Isaacs: I want to tell you that my daughter's husband is to blame for his failure.

Mr. Cohen: But I thought you said he was a successful man.

Mr. Isaacs: Successful? Yes, but he's been successful in the wrong business.

Mrs. Flatbush: Mrs. Gotham is going to have a dinner party and I'm going to wear my new gown. Do you think it will be all right?

Mr. Flatbush: Why, certainly, my dear. I'm sure that the dinner will be all right.

Mrs. Flatbush: Why, what do you mean?

Mr. Flatbush: Nothing, only I'm sure that the dinner will be all right.

Mrs. Flatbush: Well, I'm glad you think so.

Mr. Flatbush: Yes, I'm glad, too.

Mrs. Flatbush: Why?

Mr. Flatbush: Because I'm not invited.

Mr. Hamlet: Have you ever been behind the scenes?

Miss Ophelia: Why, I've been behind a dozen of them.

Mr. Hamlet: Indeed! Then you must be the girl I've been looking for all my life.

Mr. Hamlet: Will you be my wife?

Miss Ophelia: Why, this is so sudden!

Mr. Hamlet: Not at all. I've been behind a dozen of them

A WORD TO YOU!

The eyes of the West are on TOFIELD—Thousands are wishing they were here to grasp its opportunities—Are you Awake? An abundant supply of NATURAL GAS is the lodestone which has attracted industries to hundreds of small towns and made wonderful cities of them. TOFIELD will be no exception.

This is the Beginning of a Great Industry

What are you going to do about it? Grasp the opportunity which fortune has brought to your door and become independent, or wish that you had?

How Fortunes are Made

Nearly all of the great substantial fortunes in the world today have started in real estate investments—Investments made at the right time, however small. Never has a town had a more rosy outlook than Tofield today. It has transportation, 3 coal mines, brick clay of various kinds, a wonderfully rich surrounding agricultural country, and the town overlooks a magnificent lake—Beaver Lake—18 miles long and 12 miles wide, only one mile from *EUCLID PARK.*

TOFIELD HAS NATURAL GAS

The great mother vein running diagonally across this vast West country has been tapped and no power on earth can retard its flow. Nothing can retard the growth of Tofield. What more can be asked? What more would you wish?

EUCLID PARK

is right in the town of Tofield—two blocks from the school, a few moments walk from main street and overlooking the beautiful Beaver Lake—the grandest body of water in Alberta.

Are You Prepared for the Afternoon?

As a man grows older his hinges creak, and his teeth fall out and his eyes are weak; and he has pains in his side and back, and all his innards are out of whack; his limbs are feeble, and his feet are cold—it's a bitter thing when a man grows old! When a man grows old he is prone to tell you of the joyous days when the world wagged well; when he was younger the skies were fair, and peace and virture were everywhere, and maids were lovely and men were bold; such dreams will come as a man grows old! As a man grows older he sighs and croons of sweeter zephyrs and brighter moons, of nobler rivers and larger seas and finer sunsets and higher trees; the past has glories he'd fain unfold, as a man grows old, as a man grows old! Oh let him go on his weary way, and tell the tale of an ancient day! It's all that's left when this life is sere, and the wind is blank and the night is near! These tales and visions, so often told, are all that's left as a man grows old! WALT MASON.

Magnet for Industries

Medicine Hat, Alta., June 17.—R. H. Knight, civil engineer, while stopping here in the interest of Edmonton investors, said, "I am specially impressed with the large number of new industries that are now locating in Medicine Hat, although the surprising feature is that this opportunity was not taken advantage of three or four years ago. With the development that is now going ahead in Western Canada, with the central location of the city, together with Nature's use of gas for lighting, fuel and power, Medicine Hat cannot help but become a great manufacturing centre—in fact, within ten years I expect to see Medicine Hat the third largest city in Western Canada." As pointed out by another well-known engineer a few days ago, the range for prices of gas in other cities of Dominion, both east and west, from all the way from $1 to $1.75 per thousand cubic feet. In Medicine Hat the price for manufacturing purposes is 5 cents per thousand cubic feet, while for domestic use the price is 12½ cents per thousand cubic feet. Among the industries that have recently taken advantage of the city's offer of free gas, new plants locating in Medicine Hat are the Alberta Clay Products Co., employing 300 men; Alberta Iron Rolling Mills Co., employing 100 men; Alberta Foundry and Machine Co., employing 50 men; Medicine Hat Milling Co., employing 75 men; Burns Construction Co., with 80 men; Medicine Hat Porcelain Manufacturing Co., with 55 men. Besides free gas for five years, these new plants will have Spear Lens Pacificus, Free Water for Fire Protection, and Electricity and Water for Power Purposes at cost. The number of buildings permits now going on record at the building inspector's office is about ten times the number for the corresponding period of a year ago.

Buy it now. Chamberlain's Colic, Cholera and Diarrhoea Remedy is almost certain to be needed before the summer is over. Buy it here and be prepared for such an emergency. For sale by all dealers.

DIED AT 103 YEARS

Lived Under Six Sovereigns and Attended Mass Under Seven Popes

Pierre Parette de St. Amour, one hundred and three years of age, who lived under six British sovereigns, and attended mass under seven Popes of Rome died at the Grey Nun's Asylum Montreal. The venerable French Canadian died peacefully, saying a few words before he died, "It would not take a very hard blow to put an end to me here."

The old man a unique figure among the inmates of the house, was born at Ste. Sophie in 1809. He had lived therefore in the reigns of George third, George fourth, William fourth, Victoria, Edward seventh and George fifth. The seventh was Pope of Rome when he was born. Amour was the right of duel. He died in 1826 and since that date Leo twelfth, Pius eighth, Gregory sixteenth, Pius ninth, Leo thirteenth and Pius tenth have successively the affairs of the Roman Catholic Church.

For the greater part of his life, Mr. St. Amour lived at St. Jerome, and it was not until two years ago at the age of one hundred and one, that he became an inmate of the Grey Nun's Asylum. With him from St. Jerome came the companion and associate of his old age in the person of Pierre Desjardins himself at that time, himself nine years old, whose self-imposed duty it became to render the numerous small services which extreme old age demands, to his old friend.

Pierre Parette one hundred and one years old was yesterday breakfasting as usual, and looking around the corridors of the big building, his head turned and kept to his one-diamond eyes. Three days ago he was stricken with cholera as more painful than eighty and ninety year old inmates of the institution, were seen oldsters only company and lamentations came into half of him is dead.

The old man could neither read nor write, but he was a keen debater in a small way, and a very logical reasoner. When the Duke of Connaught visited Montreal and paid his self-ist visit to the Grey Nunnery the dead man and his century old companion were at the head of the line which stood up to greet their Royal Highness and the Governor-General, beating at their extreme age, greeted them cheerfully, and shook their hands. The latter must needs a proforma impressibility as the two old men had they have had of returning to it in grateful manner above.

THE LAST WILD PIGEON

A Lone Bird in the Cincinnati Zoological Gardens

One lone passenger pigeon, the last survivor of the species so far as is known, lives at the Zoological garden in Cincinnati. She is eighteen years old. With her death will end the last chapter of human greed and desire to kill which has so paraled and which is almost incredible.

Less than fifty years ago the number of passenger or wild pigeons was estimated at billions. All eastern North America abounded in these beautiful and harmless birds. The flight they would cover in a day was enormous. When the Dehs of Connaught visited Montreal and paid his self-ist visit to the Grey Nunnery the dead man and his century old companion were at the head of the line which stood up to greet their Royal Highness and the Governor-General, beating at their extreme age, greeted them cheerfully, and shook their hands. The latter must needs a profound impressibility as the two old men had they have had of returning to it in grateful manner above.

DISTINGUISHED COAL-HEAVERS

The learned English judge who recently set himself to hard essays in order to test a case submitted for his judgment was, after all, only copying the excellent example set by Judge Jeffreys, who on one occasion travelled specially to Bethnal to investigate the conditions under which quarrying was done to help him decide a lawsuit. He visited the yards and packed them himself with both hands. Mr. Justice Warrington of Bethnal has also tolled as hard as any coal-heaver. A few years ago some eighteen tons of coal were to be delivered at his residence, and all the members of the household were ordered to assemble in the square to help in the work. His lordship, thereupon took off his coat, shouldered a sack and worked vigorously with the rest.

NORTHERN ONTARIO

It is reported that further explorations of the James Bay shore of Ontario, as well as the Moose River estuary and the James Bay shore, will be undertaken next spring under the direction of the Transcontinental Railway Commission.

PORT ARTHUR, ONT.

The Canadian Northern Railway Company erecting a new steel dock. This dock will be about 500 feet long, and will be arranged so that several boats can unload at the same time.

THE SALMON PACK

The pack of all kinds of salmon in British Columbia for the season 1911 was 1,000,000 cases, but for short of 1910, and 670 thousand cases. The total pack of salmon in the Fraser River was estimated approximately three hundred cases.

GRAIN

Since the Act of September, 1911, to the present time we have been entrusted with the largest business we have ever had in handling and shipping of grain either by farmers in their own cars or by shipping direct to us. Our facilities for handling grain are unsurpassed by the desire to handle your consignments promptly. If you have not already done so, write us for shipping instructions and market information. Our Mr. Thompson is now in the country and will be pleased to call on any farmer who has grain to ship. If you have not already received a copy of our booklet, "Facts for Shippers," write us for one. It will be sent you free of charge. Remember that we are always in the market for your grain and will be pleased to have your business.

Richardson & Rudd,

TO FIELD

Woodlawn

Owing to the heavy rain on Friday evening last, a large number of people were kept away from the concert; consequently, the program which promised to be an extra good one, was only run off in part. Probably the entertainment could be arranged for a date after the vacation.

The road running west from the post office has been greatly improved and credit is due to the councillor for undertaking this improvement which had been needed for some considerable time.

Walter Bellamy intends fencing his place and running in a bunch of cattle and horses. This is the kind of farmer we like to see as we have the finest pasture land in the world.

Everyone in this district had looked forward to a big time in Tofield on July 1st, which was, unfortunately marred by the inclement weather.

There will be a good crop of berries this year, as not your small-fruits are ready for canning time.

William Ingram has taken a position, as engineer, at the Tofield Coal mine.

WHO'S WHO IN CANADA

GEORGE F. JOHNSTON.
Advocates Trade with So. America

GEORGE FRANKLIN JOHNSTON

Mr. George F. Johnston is a good representative of the Canadian who comes of Scottish-English stock.

Born at Otford, Grenville County, Ontario, in 1862, Mr. Johnston received his primary education at Merrickville, afterwards studying at Smith's and affiliated educational institutions.

Having a professional bent, he at first took up actual teaching, which has been the starting point of so many widely known men in the Dominion, but owing to throat trouble he was compelled to give up the work.

At the age of twenty-seven Mr. Johnston entered the service of the Sun Life Insurance Company, where the rise was rapid, and in a few years he was the manager of foreign agencies, and later acted as superintendent of agencies, in this latter capacity having entire charge of the business of the company outside the principal offices. After ten years spent with the Sun Life he was appointed general manager of the New York Life Insurance Company in Canada, and was subsequently promoted to the position of supervisor of agencies for that company in the Dominion and the States of New York, New Jersey, Connecticut and Rhode Island with head quarters at Montreal.

At a later date Mr. Johnston entered into partnership with Messrs. J. W. McConnell and H. J. Allison, a firm which carries on an extensive business in financial promotings in Montreal Montreal Street Railway, Montreal Light, Heat and Power Consolidated, Lindsay, Ont., are some of the recent issues handled by the firm. Mr. Johnston made a trip abroad recently in connection with British Columbia lumber propositions. His experience has been wide, he has travelled through all of the republics of South America and speaks Spanish fluently. He is, therefore, in a peculiarly good position to recommend the formation of a trade commission for the fostering of trade with South America, as these countries a project which he has recently very strongly advocated.

Public Notice

Public Notice is hereby given that it is the intenti n of the Council of the Town of Tofield to undertake a local improvement the laying of one maina and catcrals in the said town in the following streets viz:—A six inch double flow on main street from Railway avenue to Sixth avenue, a six inch single line on Main street from Cookson avenue to Sixth avenue, a four inch single line on Second avenue from Queens street to King street, a four inch single line on third avenue from Alberta street to Dominion street, a four inch single line on Fourth avenue from Queens street to Dominion street, a four inch single line on Fifth avenue from Main street to Dominion street, a four inch single line on Cookson avenue from Seventh street to First street, a four inch single line on third street from Cookson avenue to Logan avenue, a four inch single line on fourth street from Cookson avenue to Logan avenue, a four inch single line on Fifth street from Cookson avenue to Morton avenue. The town at large to pay one half the cost of constructing that part of the said gas mains and laterals which is abutted on by property liable to special assessment for local improvements and the whole cost of constructing that part of opposite streets and lane laterals and exempt properties; and the ratepayers having property fronting or abutting on the said local improvements to bear the remainder of the cost of constructing the same.

A bylaw authorizing the council to undertake the said work will be submitted to the ratepayers for approval unless a petition signed by the majority of the owners of the lands to be affected in the case of such local improvement representing at least one-half in value thereof, petition the council against the undertaking of the said local improvement within two weeks after the 13th day of July, A. D. 1912.

Dated at Tofield, this third day of July, A. D. 1912.

Main Street Property Sells at $120.00 Per Foot

If all reports be true Tofield is to have another new Hotel, and that at not a very long time hence. A business deal took place last Monday in which the property for the hotel site was secured. This property is the double corner on Main Street opposite the Queen's and which is now occupied by John Lee, Implements and Vehicles, Wm. Lee, Real Estate, Etc, and Ralph Davison, Tailor. The double corner has a frontage of 50 feet on Main Street. The price was $6000, or a rate per foot frontage of $120. J. D. Hannah, Manager of the King Edward Hotel, Viking, and who was formerly in charge of the Queen's Hotel at Tofield is figuring in the deal as the purchaser. It has been known for some time that Jim Hannan would like to get back to Tofield and open up a new hotel. He is known by all the travellers as a good hotel man and is popular as such and besides has a strong following of friends in Tofield. Backed by strong capital there does not appear to be any doubt that his latest venture in Tofield will be rapidly pushed to success.

It is understood that the new hotel will be a three story building of attractive design and will be of brick construction J. D. Kennedy of the Tofield Properties Co. negotiated the deal.

Vegreville's Council Visit the Gas Well

Mayor Ath. Gowdwin and council of Vegreville and several other citizens of that progressive town visited Tofield last week while en route to Camrose and Wetaskiwin to inspect, on a committee of the whole, on behalf of their own municipality, the water and sewage systems of those towns preparatory to inaugurating water and sewage systems for Vegreville. They called in at Tofield to take in our natural gas fireworks display and to visit the works. En route they visited the well and all voyage of scepticism was annelled as they stood around the roaring pipe as the gas blood through the valves at 400 pounds pressure to the square inch. It fairly filled them with enthusiasm and all determined to go home and do likewise.

On Monday the party returned via Tofield, accidently their cars getting stuck in the muddy road leading from the West into town. They reported very favorably of the water and sewer system in vogue in Camrose and stated that Messrs Maxwell and McKenzie, engineers of that town were employed to draft the system for Vegreville. Maxwell & McKenzie were appointed to take charge of the gas distribution and water systems of Tofield at last regular council meeting.

The Leduc Representative says: "A syndicate of local capitalists are buying up considerable land in Tofield and vicinity, so they feel certain that the discovery of natural gas is bound to make Tofield one of the leading manufacturing centres in the west."

There was an error in type setting last week, as error of omission, Mr. J. D. Kennedy, real estate broker, was unintentionally done injustice in the matter of reposing some of the several large sales of property in and about Tofield. Mr. Kennedy has been one of the most active agents in the real estate business and during the past couple of weeks has put through some large deals. He put through the sale of Bills' Woods south 80 acres at $150 per acre also Mrs. Bickner's 160 acres on the N. E. 5-51-18 immediately N. E. of Tofield Heights at $140 per acre, then being purchased for subdivision purposes. He has handled several blocks in inside stuff and reports a lively activity in all sections of town.

Men of Money Visit Tofield

Representatives of capital from Winnipeg, Minneapolis, Seattle and other points have been in Tofield during the past few days making observations and endeavoring to secure options on choice inside property and many cases making purchases. Among those visiting Tofield and investing here are C. P. Hardy, H. F. Plater, J. F. Stiles, W. G. Lowny and John Brunette, all of Ledue, who brought and are well pleased. J. C. Chadwick, T. J. Duey, E. Arbvard and J. W. Woods of Edmonton; Charles Brady, of Memphis, Texas; Mr. Edwards and R. C. Ross, of Winnipeg, the former representing the C. P. R. and C. Lain, of Seattle, representing a Seattle syndicate In all of these cases purchases were made with the exception of Mr. Brady and he is returning for a closer inspection with the view of large purchases.

Town Park Assured

Council held a special meeting on Monday afternoon and approved of that part of the Kindell Park subdivision which lies within the town limits. The offer of the Sage-Appleton Co., handling this estate, of 10 lots in block 13 free for park purposes, and the balance of the block 20 lots at half price, $100 each, payable one-fourth cash after next year's town assessment is out, balance in 6 and 12 months, was accepted, thus assuring a splendidly located park for the town overlooking the lake.

Tofield is Being Widely Advertised

Publicity regarding Tofield's rich gas strike is going abroad through far reaching channels. The Bridgewater, South Dakota, Tribune has the following interesting paragraph for its many readers "Hon. Neber sends us a copy of the Tofield, Alberta, Standard, containing an account of a rich gas find struck by his brother, after a constant drilling of just one year. The strike will make Tofield famous, the paper says, and the eyes of thousands of investors are already turned on the Tofield country. It is a municipal well and will furnish light, heat and power for that city. George's brother, W. A. Neber is responsible for this strike, and the Neber family are correspondingly happy."

Married

At the Methodist Parsonage, Tofield, on Thursday evening, July 4th, Mr. Leslie Herbert Archer, Editor of the Ryley Times, to Miss Eva Mare Strong of Kentville, Nova Scotia.

Central Alberta's Gas City After Big Industries

The advantages of Central Alberta's Big Gas City for the location of manufacturing industries and the possibilities for great development of its natural resources available for manufacturing purposes will be places before the manufacturers of Canada closely in an agressive publicity campaign to be initiated immediately by the publicity department of Tofield's municipal council. At a special meeting of council held yesterday afternoon, it was decided to use a liberal space for this purpose in leading newspapers and periodicals in Edmonton, Calgary, Saskatoon, Winnipeg, Hamilton, Toronto, and other points with the view to interesting the location of industries.

Tofield's Big Gas Gusher continues to pour forth tremendous volumes natural gas for consuming amount required within the municipality for domestic purposes for many years to come. The municipality looking to the future is now preparing for heavy demands upon it for cheap fuel and light by making arrangements for the putting down of a second gas well and have already secured the site on the east, ers outskirts of the town for this purpose.

Manufacturers will be assured an abundance of cheap Fuel and light as well as good fire protection. The town is now taking up the latter problem, and plans are being laid for the immediate construction of the first unit of a permanent water system.

Tofield's streets are illuminated nightly with natural gas. This is the only town in the three western provinces outside of Medicine Hat, which possesses its own or even at present has this municipally owned utility

Winnipeg Fair

$16.40, Tofield to Winnipeg and return, to Winnipeg Fair. Good going till July 29th., returning until July 23rd. Join the crowd.

Wm. Thompson, last Saturday reported his wheat nearly in the field head. It stands over 30 inches high.

Pete Axe brought in a sample of spring wheat last Saturday morning. It was in head and was about 48 inches tall.

Mr. Lowering, president of the Canada West Townsite Co., was a visitor to Tofield last Saturday.

W. Barrett, of Round Hill was a business visitor to Tofield last Saturday and reported a bad storm as occurring in that section last Friday. It did very little damage.

THE KEY TO YESTERDAY

By CHARLES NEVILLE BUCK

(Copyright 1916)

[By W. J. Watt & Company]

CHAPTER I

The fear of common sense made the founding of the artist colony at Topfield inevitable. The artist is averse from his manner of life to the need for letting the traveller in the direction where he may find settled habits. The Sound avenue northward, North, Sound, and Main, had not yet begun to form the right angle which they now make in the village of Topfield.

Old Hen Chaney Peckham insisted that the Sound avenue road was built with fishing in mind.

His diplomacy was of the narrow sort that sees and has but one end in view. Of making the protecting passage of the harbor's mouth a matter of public concern he took every one of those entitled to a voice in municipal affairs.

Batson and Redman had the night before, in the privacy of the office of the Palace through a narrow door at the rear. The American hotel proprietor passed hastily between files of preserved newspapers, but he learned that his excellency, el Presidente, had not yet finished breakfast, had certainly not desired his excellency, el ministro, to wait upon him in the antipatio prior and in the sunroom.

In the suave presence of the dictator Batson made a cheerful mad rogue. If either it smoked-red while he listened to the tale of the Yankee's wrongs. If he had struck through intermediary with a word of sympathy for the bride of the bridegroom and holders of portfolios, he had made information to the chief executive. Yet, in appraising his visit to Topfield when confronted at last with a presentiment that the dictator had not been the author of the plot, he was by no means sure. Carter had been a guest of the Palace for a week before the Batson visit.

It was informed that some one, I can not yet say who, bearing ill will toward the United States, had made an attempt on the life of the President. The President was shocked and indignant.

A quarter of an hour later the news reached the Santa Elena Hotel. Batson smirked and Batson walking on air—bound at his side. He had the definite destination. Nothing mattered. After a long silence, Redman demanded:

"Aren't you taking a rather risking in the Puerto Pita?"

"I don't know."

"Have you another person, known at last by Redman?"

Take that from me. Get at once in touch with the American Legation and keep in touch." Stand on your guard behavior. You may as I may still be it." He interrupted himself abruptly with the question: Have you been keeping posted on South American affairs of late?"

I don't know who is President of Bolivia."

"Well, I'll tip you off. The only men who are worth while down there are about the 1200-odd in gold that left the country the same time you did" Batson winced over this addition with the last revolution. Time is a great remedy for wounds, but he was not yet interested that to-day's probably for the last of his life. "The only men I'm sorry for, my dear old boy, is the Americans who have gone down there on the strength of profits."

Batson was interested in the machinery of the Palace was not in motion. A dozen officials, including his host, and Alonzo Perez, were waiting to be presented to Redman. "The minister's wife," Batson explained, "is a Bolivian, and while the final performance was on I had to keep her company. Her husband was still cramped under the wreckage of the palace. I'll tell you about it later."

Suddenly, the trap-like had a feeling of a pressure at his elbow, and, turning, he found himself confronted by a tall, bearded man with the complacent visage of a Spanish grandee.

"Mr. Batson?"

"Yes."

"Mr. Redman?"

"Yes."

"I am Don Jacinto Alvarez, Minister from the City of Elba sailed early this afternoon, and he did not know that you were in port. I am sorry, Mr. Dawson on board, was at this moment, I believe, in the cabin of the launch. The water only twenty-four hours away.

"Oh, I'll see him," Batson replied. "I have just been after that afternoon. Redman, will you be kind enough to look after the launch for me?"

"Certainly."

"Then, if you please, Don Jacinto, I will be at your service."

"Pleased to meet you, Mr. Redman," the minister said, as the two walked away. "I have heard much of you from my friend Batson."

"Thanks," Redman replied, but this time he was not looking at the minister. He was looking at the launch, which was just then backing away from the dock. He could see Robert Batson, and he could see Dawson, the latter standing at the edge of the cut, curiously watching the departure.

"Mr. Redman," Don Jacinto continued, "I am a bachelor myself, and I have no sympathy with those who would make war against women and children. Therefore, I am glad to say that the attempt on the life of the President was not directed against any one in particular. It was a bomb thrown into the room, and, since you have journeyed with us from Topfield, and since I presume you journeyed, I regard your evidence as important. Will you kindly tell me what you know of the matter?"

Redman was looking at the launch as it passed the end of the dock. Batson was standing in

R. W. WHILLANS, - - Manager and Editor

TOFIELD, ALBERTA, THURSDAY JULY 11, 1912

TOFIELD is really at the beginning of things, is really only beginning to make history. The march of progress and development will from now on be more rapid. We can congratulate ourselves that the foundation for the building of our future have been well and truly laid. The development which has taken place within the municipality as well as without, will now take a spurt and Tofield go forward as one of the recognized important main centres of population, industry and commerce.

Tofield Coming Into Her Own

Evidences of this are not lacking. The striking of an abundant supply of gas has been the touching of the spring which opens the door to the zone of wider possibilities. Real Estate activity is but one result of our town jumping into prominence before the world. Investors see the prospects of a bright future ahead and have come from far and near to sow now what they will a short time hence reap manifold.

The Town Council has acted wisely in securing a quarter section adjoining the town for Industrial Sites. In securing a block in Euliel Park sub-division, the Ukalta estate, they will have the wide embarcation of the citizens and in preparing for larger markets and greater possibilities by purchasing 10 lots in Tofield Heights as the site for gas well No. 2 which they contemplate putting down immediately if the people will sanction the by-law authorizing the same. they have acted with perspecuity and zeal. That representatives of capital and industry have been visiting Tofield in increasing numbers is another evidence of that development which lies before us. When captains of industry are interested and come to look over the ground, are favorably impressed and come to the point of deciding to locate in Tofield, then is our future, industrially speaking, assured. Tofield aspires to be a hive of industry. It is then up to us to keep the ball rolling, each one doing his share, willingly and enthusiastically to push forward the wheels of progress.

THE STANDARD must really apologize to it's readers for the congested state of it's pages this week. It has been literally overwhelmed with advertising. The Standard is sincerely gratified at this evidence of the regard with which it is held as an advertising medium. People know a good thing when they see it, and the Standard does not have to run "dead" ads or carry ads over from one page to another to fill up it's columns. Our readers know that advertising in the Standard pays. that is why eight pages are not enough and ten will be the next step.

Edmonton Exhibition

Great preparations have been made for this year's Exhibition, to be held in Edmonton August 12 to 17. The directors have erected a new Manufactorers' building and a new Machinery hall, and are adding extra space to the grounds to accommodate exhibitors of farm machinery. $20,000 has been added to the prize list this year, making a total of $45,000 in prizes and purses to be competed for. New classes have been made for fine arts, photography, women's work, and school children's work. The facilities for loading and unloading stock have been greatly improved by extending the present spur line along the eastern side of the grounds and providing new unloading platforms for horses, sheep and swine. The entries will all be catalogued this year, and for this purpose it is necessary that all entries should be received not later than the 29th of July.

Freight Derailed

Owing to a small washout a freight was derailed Sunday night delaying No. 11 passenger from Mirror which was cancelled. The track was cleared for traffic late on Monday night.

As a rule the most ignorant people know it all—at least they think they do.

Anglican Church Garden Party

Don't forget it! On Thursday next, 18th. There will be ice-cream, candies, cakes, tea and coffee, with music by the band, Solos, Duets etc. by local friends. This will commence immediately after the Service in church at 7.30. Everybody invited

Hot Publicity

The Publicity Commissioner of Moose Jaw had 50,000 post cards sent out, on which was printed the wish that poverty might be consigned to regions other than Moose Jaw. The cards were sent to Moose Jaw. There is a limit to the expression of contempt for poverty even as an abstraction, but if Moose Jaw has lost 50,000 cards it has gained five fold in advertising.

THE BEST THING IN THE WORLD

A Good Appetite

Some hungry, laughing-loving folks are able to eat and digest almost anything. Life contains no dark days for them—their digestive organs keep on performing their functions, their bodies are building all possible tissue, and they are happy. Others have a perpetually empty stomach, but the trouble is that few of us could qualify for their class—

Not because we are strong dyspeptics—not because we are troubled with various attacks of indigestion, but—

Because we get off color occasionally—our food, whatsoever appearance of it may be, does not appeal to us in the old way, we have to force ourselves to eat, simply stimulate a disordered stomach and exercise in the open air, or Nyal's Dyspepsia Tablets.

This specific remedy will tone up the stomach, give you an appetite, ward off indigestion and Dyspepsia. If the disorder has developed into either of these troubles, better ask your druggist for Nyal's Dyspepsia Tablets—they're the best for a confirmed dyspeptic.

Keep a bottle handy—if off color, out of sorts condition, you want Nyal's Dyspepsia Tonic. It cures does brace up the tired stomach quickly, making you feel fit and fine.

Keep a bottle on hand for your children, too—appetizer days.

This remedy is one we are proud to recommend. It is always our best interest to secure best value for our customers.

Sold by C. E. JAMESON, Tofield.

Sheep Diseases Caused by Dogs

Gid or Staddy

By W. T. RITCH.

This is caused by hydatids on the brain, these being the cystic form of the tapeworm of the dog and look like watery bladders, varying in size between a bean and a hen's egg. Yearlings are most liable to it than older sheep, and although invariably fatal it is fortunately not infectious. The best antibodies have now come to the conclusion that Gid cannot exist without the presence of dogs to harbor the fully developed creature which is expelled in the faeces or herbage, and then swallowed by the sheep. All dogs are liable to tapeworms, even those carefully fed and well kept, while those careless by feel are always more or less affected. During the summer months, dogs are able to rid themselves of tapeworms before their own health is seriously affected, and at this season the risk of sheep swallowing those numerous discharged tapeworms is greatest.

The early symptoms of Gid can only be detected by a keen and experienced shepherd, but the disease soon becomes apparent to the casual observer. The affected animal moves round and round in a circle is very dull, separates from its fellows and generally holds its head high in the air. It is most distressing ailment to watch, not to mention the excruciating pain endured by the sheep.

There is no cure for fully developed Gid except trephining and the operation and treatment can fully be left to the average sheep. If the animal is slaughter as soon as the symptoms are observed, the carcase may be safely be used for food, but the head should always be burned and not buried. When the disease is far advanced the carcase is unfit for food.

It will therefore be seen that in addition to worrying sheep, all dogs are a constant source of danger in any farming district, particularly those in which sheep are kept.

Note—It requires an expert to distinguish between the symptoms of Gid and Indigestion. The latter is usually "hove commonly during the winter months than in the former. When sheep that have been several almost certain to be found before the summer is over. Buy it now and be prepared for such an emergency. For sale by all dealers.

Estray

On the premises of the undersigned N.E. 14-50-19 W. 4, one black ox about five years old, white under belly and on tip of tail, long horns, horns on left hind foot, no visible brand, since June 25th, 1912

TOFIELD, ALBERTA, THURSDAY JULY 11, 1912

TOFIELD is really at the beginning of things, is really only beginning to make history. The march of progress and development will from now on be more rapid. We can congratulate ourselves that the foundation for the building of our future have been well and truly laid. The development which has taken place within the municipality as well as without, will now take a spurt and Tofield go forward as one of the recognized important main centres of population, industry and commerce.

Tofield Coming Into Her Own

Residences of this are not taking. The striking of an abundant supply of gas has been the touching of the spring which opens the door to the zone of wider possibilities. Real Estate activity is but one result of our town jumping into prominence before the world. Investors see the prospects of a bright future ahead and have come from far and near to sow now what they will a short time hence reap manifold.

The Town Council has acted wisely in securing a quarter section adjoining the town for Industrial Sites. In securing a block in Kulki Park sub-division, the Gludu estate, they will have the wide endorsation of the citizens and in preparing for larger markets and greater possibilities by purchasing 10 lots in Tofield Heights as the site for gas well No. 2 which they contemplate putting down immediately if the people will sanction the by-law authorizing the same. they have acted with perspecuity and zeal. That representatives of capital and industry have been visiting Tofield in increasing numbers is another evidence of that development which lies before us. Whose captains of industry are interested and come to look over the ground, are favorably impressed and come to the point of deciding to locate in Tofield, than is our future, industrially speaking, assured. Tofield aspires to be a hive of industry. It is then up to us to keep the ball rolling, each one doing his share, willingly and enthusiastically to push forward the wheels of progress.

THE STANDARD must really apologize to it's readers for the congested state of it's pages this week. It has been literally overwhelmed with advertising. The Standard is sincerely gratified at this evidence of the regard with which it is held as an advertising medium. People know a good thing when they see it, and the Standard does not have to run "dead" ads or carry ads over from one page to another to fill up it's columns. Our readers know that advertising in the Standard pays, that is why eight pages are not enough and ten will be the next step.

Edmonton Exhibition

Great preparations have been made for this year's Exhibition, to be held in Edmonton August 12 to 17. The directors have erected a new Manufacturers' building and a new Machinery hall, and are adding extra space to the grounds to accommodate exhibitors of farm machinery. $20,000 has been added to the prize list this year, making a total of $45,000 in prizes and purses to be competed for. New classes have been made for fine arts, photography, women's work, and school children's work. The facilities for loading and unloading stock have been greatly improved by extending the present spur line along the eastern side of the grounds and providing new unloading platforms for horses, sheep and swine. The entries will all be catalogued this year, and for this purpose it is necessary that all entries should be received not later than the 20th of July.

Freight Derailed

Owing to a small washout a freight was derailed Sunday night delaying No. 11 passenger from Mirror which was cancelled. The track was cleared for traffic late on Monday night.

As a rule the most ignorant people know it all—at least they think they do.

Anglican Church Garden Party

Don't forget it! On Thursday next, 18th. There will be ice-cream, candies, cakes, tea and coffee, with music by the band, Solos, Duets etc. by local friends. This will commence immediately after the service in church at 7.30. Everybody invited

Hot Publicity

The Publicity Commissioner of Moose Jaw had 50,000 post cards sent out, on which was printed the wish that poverty might be consigned to regions other than those of the waste basket—and which contained an invitation to reside in Moose Jaw. The cards were confiscated. There is a limit to the expression of contempt for poverty even on an Advt.-mention. But if Moose Jaw has lost 50,000 cards it has gained five fold in advertising.

THE BEST THING IN THE WORLD

A Gramophone must Never Refuse

Some happy, laughter-loving fellow was able to rent and digest almost anything. His sensitive set dark days for them—their digestive organs keep on performing their functions, their bodies assimilating all possible nourishment.

Of course they are a supremely contented lot, but the trouble is they lose on model quality for their clientele—not because they are troubled with serious attacks of indigestion, but—because we get all sorts of complaints from our local, wholesome and nourishing as it may be, does not appeal to us in the old way. There are only two more cures for such gloomy stomach disorders as plenty of work and exercise in the open air, or Dyspepsia Tablets.

This specific Dyspepsia will tone up the stomach, give you an appetite, ward off indigestion and dyspepsia. If the latter has developed into either of these troubles, better get druggist for Hyal's Dyspepsia Tablets—they've done for a confirmed dyspeptic.

But for the ordinary off-color, out of sorts condition, you want Hyal's Dandelion Tonic. It sure does brace up the digestive organs, making you hungry for food.

Keep a bottle on hand for your kidneys, on specific days.

This remedy is one we are proud to recommend. It is always our best interest to supply best value for our customers.

Sold by C. S. JAMIESON, Tofield.

Nyal's DANDELION TONIC

Use our cash everyday element.

Here Again on July 20th

M. Mecklenburg, A. M., the Edmonton eye specialist will again be at the Queen's Hotel, Tofield on Saturday July 20th. If your eyes are troubling you in any way do not fail to consult him. Mr. Mecklenburg devotes his whole time skill and energy to the proper fitting of spectacles and eyeglasses, he has no side issue.

During the summer months mothers of young children should watch for any unnatural looseness of the bowels. When giving prompt attention at this time serious troubles may be avoided. Chamberlain's Colic, Cholera and Diarrhoea Remedy can always be depended upon. For sale by all dealers.

Sheep Diseases Caused by Dogs

Gid or Staddy

By W. T. BITCH.

This is caused by hydatids on the brain, these being the cystic form of the tapeworm of the dog and look like watery bladders, varying in size between a bean and a hen's egg. Yearlings are more liable to it than older sheep, and although incurably fatal it is fortunately not infectious. The best authorities have now come to the conclusion that Gid cannot exist, without the presence of dogs to harbour the fully developed cestuare which is expelled in the faeces of herbage, and then swallowed by the sheep. All dogs are liable to tapeworms, even those carefully fed and well kept, while those carelessly fed are always more or less obnoxious. During the summer months, dogs are able to rid themselves of tapeworms before their own health is seriously affected, and at this season the risk of sheep swallowing those numerous discharged tapeworms is greatest.

The early symptoms of Gid can only be detected by a keen and experienced shepherd, but the disease soon becomes apparent to the casual observer. The affected animal moves round and round in a circle in very dull, separates from its fellows and generally holds its head high in the air. It is most distressing ailment to watch, not to mention the excruciating pain endured by the sheep.

There is no cure for fully developed Gid except trephining and thequarttion and treatment cost fully the price of a dozen sheep. If the animal is slaughter as soon as the symptoms are observed, the carcase may be safely be used for food, but the head should always be burned and not buried. When the disease is far advanced the carcase is unfit for food.

It will therefore be seen that in addition to worrying sheep, all dogs are a constant source of danger in any farming district, particularly those in which sheep are kept.

Note—It remains an expert to distinguish between the symptoms of Gid and Indigestion. The latter is vastly more common during the winter months than is the former. When sheep that have been covered weeks on dry feeds "lose no space" it is a good plan to apply them with some kind of succulent feed. If that is not obtainable then feed containing a small quantity of Epsom salts should be supplied. The flock will be benefited by the change of food even through the trouble proves to be Gid and should it be indigestion they will generally be cured.

For sureness of the muscles, whether induced by violent exercise or injury, there is nothing better than Chamberlain's Liniment. This liniment also relieves rheum atic pains. For sale by all dealers

That Reminds Me

Rabbi: (to old Mannon) How's a little green umbar.

Mannon: Keep away from it, dear. It may be just as dangerous as a ripe one.

"They started in a queerly pleasure way to read 'Lawful Languages'."

"Well?"

"Next they are interested in a book that tells how to build a $1,000 house."

"Well?"

"Well, then they read the ads and she doesn't wonder that May 'chloe' with so much whom, and the ads make it the crop can be rope as early in the season."

Mr Calley—I thought both your girls played the piano?

Mrs Calley—Sometime does, but Carrie nevery could stand to make others an happy.

Lashyer: Your honour I ask the discretion of the court on the ground that the warrant fails to state that he hit John Jones with malice aforethought.

Magistrate: That must make a great deal of difference to the man who doesn't know what he hit him with. The case is dismissed.

The young lady in love is the wet saw she overheard her father say that an ass was a fool. "Oh, papa," she said, "I am so glad you have spoken, for I have never been sure before that there were such animals. The question is now settled and I know that I am not the only fool in the family."

A medical whose sales do not corres pond with the lofty nature of his vocation has books usually got was walking in the street when he met a friend who was in a hurry. "Hello, doctor," he brought out, "I am glad to see you. I have a bad cold and my throat is very sore. Can you send me something?" "Certainly," replied the doctor, "I'll send you a bottle of ink."

"I generally get busy upon myself and my superior gives much stronger." enjoyed my summer vacation," said the tutu happen and upon surrounded and the sleepy father of my boss was replaced by a bright, rosy rather, which proves that a strong medicine was at work. In a few months Dr. Hamilton's Pills brought me from a condition of absolute pallor to robust health."

"Why is it," asked the lecturer's wife, "that the lecturer's subject is always the subject that office men are interested in?" "Because," replied the man who has been asked to speak, "they pay for it, and we don't get dollars at the Canadian Chautauqua Congress, Kingston, Ont.

"Jones is a fool, Burke." "What makes you think that?" "Well, a big lot of people subscribed for Burke's Peerage for him. The department was utterly helpless."

"Why do you call your dog 'Nitro'?" "Because, being lazily, he'll explode if you touch him."

"Now, Johnny, you can't play on the piano," explained Binks, whereupon Johnny replied: "I'm not going to play to enjoy myself at the expense of the party of the second part."

That Reminds Me

Lashyer (very bored): Look the discretion of the court on the ground that the warrant fails to state that he hit John Jones with malice aforethought.

Magistrate: That must make a great deal of difference to the man who doesn't know what he hit him with. The case is dismissed.

The young lady in love is the wet saw she overheard her father say that an ass was a fool. "Oh, papa," she said, "I am so glad you have spoken, for I have never been sure before that there were such animals. The question is now settled and I know that I am not the only fool in the family."

A medical whose sales do not correspond with the lofty nature of his vocation has books usually got was walking in the street when he met a friend who was in a hurry. "Hello, doctor," he brought out, "I am glad to see you. I have a bad cold and my throat is very sore. Can you send me something?" "Certainly," replied the doctor, "I'll send you a bottle of ink."

A MOTHER'S CARES DESTRUCTIVE TO HEALTH

ANAEMIA, BAD BLOOD, HEAD-ACHES, AND LASSITUDE VERY COMMON

Mrs. Wilhmen's Lemur Given Advice That Every Mother Can Well Follow

From her home in Verdun where she was born and married, Mrs. Wilhmen, 1 Mannon avenue, says: "For years I was pale and weak, and looking in vain for relief. A constant sufferer from indigestion, I had frequent headaches and dizzy spells, and was so nervous that the slightest noise made me start and jump. I was always tired out, and the aches and pains seemed to be more than I could bear. I was under the doctor's care for a long time, but got no relief. I was advised to try Dodd's Kidney Pills, and after using a few boxes I felt much better. I continued using them, and was completely restored to health. I am now the mother of a fine healthy baby girl, and I owe my present good health entirely to Dodd's Kidney Pills."

Mrs. Wilhmen's case is only one of thousands. Anaemia, bad blood, headaches, and lassitude are very common troubles with women. They are the result of poor blood, and Dodd's Kidney Pills make rich, red blood. That is why they cure all these troubles. Mothers should remember that Dodd's Kidney Pills are the best medicine for them to use, because they are the best blood maker.

With the Horses

HITCHING HORSES TANDEM

Not many years ago, when horses were cheap, and when the cost of their keep was not considered, hitching into one team, and under the care of one teamster, of only three horses was considered a good day's work. Putting them abreast was, of course, out of the question, for there were stretched out nine span in front of the driver. To drive a team like this, there would usually be four leaders and two behind the wheel horses, by a "tooll" or short tongue, the team was hitched to the wagon, and the load was off. Soon, however, the heavy loads began to be called for, and the long team of nine horses was found to be unwieldy, and to require too much room on the road with heavy loads.

It is found that heavy or mixed-ride work is done, for those long teams of three abreast, more easily and with every horse, over roads that would bog down a smaller team, and the teamster to travel with a light wagon and load, and to turn around in a small space, as on a six-horse, or, better, with the six-horse hitch, with the six horses hitched tandem, that is, one behind the other, to the end of the tongue—he "off" leader is guided by a rein in the hand of the driver, the "near" leader is guided by a line fastened to the shoulder of the "off" leader, except when on the road with heavy loads.

If the "near" leader or mixed-ride work is done, for those long teams of three abreast, more easily and with every horse, over roads that would bog down a smaller team, and the teamster to travel with a light wagon and load, and to turn around in a small space, as on a six-horse, or, better, with the six-horse hitch, with the six horses hitched tandem, that is, one behind the other, to the end of the tongue—he "off" leader is guided by a rein in the hand of the driver, the "near" leader is guided by a line fastened to the shoulder of the "off" leader, except when on the road with heavy loads.

If the "near" leader or mixed-ride work is done, for those long teams of three abreast, more easily and with every horse, over roads that would bog down a smaller team, and the teamster to travel with a light wagon and load, and to turn around in a small space, as on a six-horse, or, better, with the six-horse hitch, with the six horses hitched tandem, that is, one behind the other, to the end of the tongue—he "off" leader is guided by a rein in the hand of the driver, the "near" leader is guided by a line fastened to the shoulder of the "off" leader, except when on the road with heavy loads.

RINGING THROUGH QUEBEC PROVINCE

ANOTHER MARVELLOUS CURE BY DODD'S KIDNEY PILLS

Ladies Can't Backache Had Developed Into Bright's Disease. Any Form of Ailment Were His Portion—Dodd's Kidney Pills Cured Him.

St. Tite, Champ Co., Que. (Special.)—The news of another victory won by the same of the old Canadian Kidney Pills comes from St. Tite, a thriving town of Quebec province. Mr. Joseph Lavigne, a well known resident of the place, is the man who has won the victory, and his own words is as follows:

"For years I suffered from Backache, stiffness of the joints and Rheumatic pains. My condition was such that I could not get a night's rest on account of the pains in my leg and knee. I had terrible pains in the region of the bladder. My kidneys were troublesome, I was always tired out and had no pleasure in life.

"Finally, I decided to try Dodd's Kidney Pills and the effect was marvellous. My knees cured me completely. My backs, neglected, disappeared like magic. The one sure way to escape its tortures is to use the Back before it first starts with Dodd's Kidney Pills.

How to Treat Sprains and Strains

After Two Days' Suffering Mr. Quinn Says Nothing Cures Like Nerviline

Thousands Recommend "Nerviline"

One of the most cost-distressing accidents that can befall one is a bad ankle sprain, and I did just what hundreds of "Nerviline" either, I could have cursed myself, as exercise caused a world of pain and many agonizing nights of sleeplessness. Then, before I knew it, I tumbled from a boy left to the bare floor and sprained my right ankle badly. The swelling rapidly and caused excruciating pains. It was impossible for me to put my foot to the floor, and I had to lie there in suffering.

When I got Nerviline relief came quickly. I had also the swelling reduced till pain, and gave me wonderful comfort.

"If can recommend Nerviline for sprains, bruises, swellings, muscular pains, and sore back. I have proved it and know what I am saying.

"Each what it ought some day soon and you will find Nerviline the best friend you've had for an accident emergency. Just get not stop exactly opposite the hurted. Nerviline is the kind of liniment that is used by thousands and thousands of families, and is the only one I ever found that would relieve my pain."

Nerviline is the master, healing liniment for bruises, sprains, strains, lumbago, sciatica, neuralgia, and all pains. Nerviline is the liniment that killed the boy, for one side of this stimulus was shaved. Lieutenant Jones prepared a heap of wet cotton and discharged the pistol into the heap. Had he fired into a heap of wood, the bullet would have flattened and been worthless. The cotton stopped it without so much as a scratch for the whirling bullet quickly unwound and, unwounded, fell to the floor. Jones put on a new shell and fired it through it, stopping it dead in the air. The bullet was picked up, unwound, and examined. One side of it was shaved. Other shots were made with results. The cylinder of the pistol was examined and found to be perfect, and not stray exactly opposite the barrel. Another shot was given to the Lieutenant and he jumped from the chair with a yell.

In the end the prisoner confessed that the shots were a fake. A hasty commission was appointed to examine into the case, and the prisoner was sent to an asylum.

In the case of Policeman B's last life, too, who shot a Brooklyn lad named Jones, the bullet was found to have been fired from a distance of four inches, and not five as was first stated. Besides, the shot having been fired from the rear, it was clear that the policeman was not in front of his father's grocery store. The store was open at the time, and the shot was fired from the rear of the store. Defence's case in and accused Pinker of perjury. Another trial was then started, which resulted in Dillon's being found guilty of perjury. Dillon's case was that he had tried to arrest Jones, who had been shot while in the act of breaking into the store. Jones became the boy attacked him with a knife.

The case of Thomas Barnes, a Brooklyn police rather who was electrocuted at Sing Sing, is another instance of the fallibility of ballistic evidence. Lennard, had been concerned in the murder of Lessner, for which crime he was later pardoned by President Roosevelt. Lennard had been shot in the head by Barnes, who had been sent to Lennard's boarding house in Brooklyn, rang the door-bell, and when Lennard opened the door began firing at him. Five shots were fired, only one of which took effect—the shot which took effect. This was a shot fired from the rear, and it was impossible for Barnes to have fired it. Lennard died when he heard of Lessner's dishonesty he was compelled to secure lodgings with him. Lessner was a gambler, and Lennard, being mild, and hard words followed. A quarrel ensued, during which Lessner, to protect himself, he said, and in the fight it went off.

Sneakers Over the Eyes Mean Frontal Catarrh

APT TO GET INTO HARD, CAUSING DISAPPEARING OF THE NOSE, INTO LUNGS AND END IN CONSUMPTION

You Can Cure Catarrh in Any Stage by Breathing the Hyomei Treatment Fumes of Counterfeiters, and Have a Free Trial

Mr. Vivi Bernell, a young gentleman who has lived for years in Brockville, has received relief from his sufferer. The disease spread through his system like a plague, and he says: "Small size, as a child," said Mr. Bernell, "I was always subject to colds, and the slightest exposure to the weather would bring on a cold."

"I grew pale and emaciated, lost all desire for food, and got into such a dreadful condition that my friends said that I hatrth was fairly eating me up.

"Every organ of my body seemed affected, and the doctor said 'twas the first stage of consumption. He advised Catarrhozone and I labeled it 'em into use. In a few every few hours, and was restored in a few days by a wonderful cure.

"Catarrhozone pleased me and the boys, and I have used it frequently since, and took Peruvian Tablets after each meal to build up my system. I have been troubled with Catarrh for years, and the doctor says no remedy but Catarrhozone could work such wonders.

"Everyone in town knows I was just about dead with catarrh, and my cure is as a miracle to them. Catarrhozone is no. It is a pleasure to recommend Catarrhozone."

Two months' treatment, large size, price $1, and a complete inhaler, $1 extra, all reliable dealers or the Catarrhozone Co., Buffalo, N.Y., and Kingston, Ont.

Beware of dangerous substitutes and imitations for "Catarrhozone."

Yard Assured for Tofield

The deal was finally closed yesterday morning July 10th whereby Alex. Kellner sold his farm S. E. 36-50-19 to Fisher & Clarke, brick manufacturers who have decided to locate in Tofield. The option was taken on the Kellner farm early last week and yesterday Mr. Fisher returned from Edmonton where the firm is locating a plant, and closed the deal. The Kellner farm is located immediately southeast of the town and is touched on the south-east corner by the G. T. P. The new firm intend erecting a plant here at an early date and making the best quality of pressed brick in large quantities.

Kingman

A. Hoete visited Tofield on Tuesday.

O. Bjorgum is building a new barn which is a fine acquisition to his farm.

Kingman school District will shortly be organized and a school likely be erected at Kingman.

A. Kortzman, section foreman who has been away for some time on a trip has returned and resumed his old job.

Our Postmaster Mr. Rognoss was married recently to Miss J. N. Johnson. Their many friend's wish them bon voyage through life's journey.

Mr. Lars Johnson's little girl has been very ill. They took her to Tofield Tuesday for a skilled medical treatment. Mr. Johnson himself is recovering from a recent illness.

Carl Bjerkvet, blacksmith intends to build a residence in the village shortly.

Public Notice

Public Notice is hereby given that it is the intention of the Council of the Town of Tofield to undertake a local improvement the laying of gas mains and cateras in the said town in the following streets viz:—A six inch double line on main street from Railway avenue to Sixth avenue, a six inch single line on Main street from Sixth avenue to Sixth avenue, a four inch single line on Second avenue from Queens street to King street, a four inch single line on Fifth avenue from Queens street to Dominion street, a four inch single line on Fourth avenue from Queens street to Dominion street, a four inch single line on Fifth avenue from Queen street to Dominion street, a four inch single line on Sixth avenue from Main street to Dominion street, a four inch single line on Cookson avenue from Seventh street to First street, a four inch single line on third street from Cookson avenue to Logan avenue, a four inch single line on fourth street from Cookson avenue to Logan avenue, a four inch single line on Fifth street from Cookson avenue to Morton avenue, a four inch single line on Seventh street from Cookson avenue to Adams avenue, a four inch single line on Seventh avenue from Main street to King street, a four inch single line on First street from Cookson avenue to Morton avenue. The town at large to pay one half the cost of constructing that part of the said gas mains and laterals which is abutted on by property liable to special assessment for local improvements and the whole cost of constructing that part of opposite streets and lane intersections and exempt properties; and the ratepayers having property fronting or abutting on the said local improvements to bear the remainder of the cost of construction the same.

A bylaw authorizing the council to undertake the said work will be submitted to the ratepayers for approval unless a petition signed by the majority of the owners of the lands to be affected in the case of such local improvements representing at least one-half in value thereof, petition the council against the undertaking of the said local improvement within two weeks after the 11th day of July, A. D. 1912.

Dated at Tofield, this third day of July, A. D. 1912.

Sports Again Deferred

Owing to the numerous quantities of rain during the first week of this month the grounds were in such a condition that the deferred annual sports had again to be postponed. A large number of people however, drove in from the country and rather than turn their teams down without entertainment of any sort the committe got up an impromptu program for the afternoon. The citizens Band was requisitioned a baseball match arranged between Tofield and Ryley which was held on the old football field between Sixth and Seventh avenues east, south of the park. A goodly crowd was in attendance. In the evening a pleasant hop was held in the pavilion on the exhibition grounds which was enjoyed by all. The baseball match resulted in a score of 12—4 in favor of Tofield.

Local and General News

R. O. Bird was a visitor to Edmonton last week.

Chris. Hammond returned last week from a trip to Calgary.

Keep in mind Holy Trinity Church garden party to-night.

Jas Howick, Sr., left for Glasgow, Scotland on Monday.

Operator W. Campbell has released day operator Legallis, who has been removed to Daisy.

Miss Burke left on Sunday morning for a months' vacation with friends at Yorkton, Sask.

Weather permitting the picnic will be held near St. James Church Logan, on Thursday the 25th. Everybody welcome.

Mr. Webb is taking charge of H. O. Bird's tin shop. He is one of the best in his line especially good on furnace work and heating plants.

Mr. Hopkins, of Edmonton, who has leased Bellamy's Hall is putting in a first-class picture machine apparatus and will have it installed within the next fortnight.

T. W. Jacobs is a somewhat unwilling patient these days. He has to endure an enforced vacation from work owing to having his right arm temporarily out of commission.

Mrs. C. H. Cross, writing from Norwood, Ont., to her husband here states that the weather is simply unbearable the thermometer registering 86 degrees in the shade, day and night.

Dysentry is always serious and often a dangerous disease, but it can be cured. Chamberlain's Colic, Cholic and Diarrhoea remedy has cured it even when malignant and epidemic. For sale by all dealers

J. A. Young, B. A., is on the Provincial Board of Examiners, Educational Department, this year and most of his time during summer vacation is necessarily taken up in the performance of his duties as Edmonton in this connection.

Mr. and Mrs. W. H. Webb, of Clinton, Ont., arrived in Tofield the fore part of the week where they expect to make their future home. They will be remembered as being here a few months last year.

On July 12 the Tofield baseball nine and a crowd of supporters, amongst whom a number of wearers of the orange ribbon were prominent, went over to Hortonburg to celebrate the glorious twelfth with their Hortonburg friends. They report having had a most enjoyable time. The baseball match between Hortonburg and Tofield resulted in a score of 12 to 4 in favor of the Gen City nine. Their genial host from over the Beaver Hills entertained at the depot when time for departure came and gave the Tofielders a hearty send off.

J. A. Young, B. A., returned on Tuesday morning from the Capital having temporarily been from his duties as one of the provincial examiners in connection with the Department of Education, owing to ill health.

Mr. C. H. Huestis, field secretary of the Lord's Day Alliance, of Red Deer, will speak at 8.30, in the Methodist Church, on Friday evening. On matters in connection with that organization and it's work. All are cordially invited.

Albert Roberge claims to be the champion lather of Alberta. He certainly can go some when it comes to lathing. He states his record is 310 yards in 7 hours. This was accomplished in the Strathcona armoury recently.

Gibbs-Dash & Co., Ltd., real estate, of Edmonton, whose advertisement appears in this issue, have opened an office on Main street just north of R. O. Bird's hardware store. They are handling Hillcrest and Beaverhill subdivisions as well as general real estate.

W. H. Neal was a visitor to Edmonton last Monday.

Miss Mason, of Tacoma, is the guest of Mrs. J. A. Young.

J. W. Cookson left for Winnipeg last Monday morning on a short visit to that humming metropolis.

Mrs. W. Hopgood returned from a visit to Winnipeg last Monday morning.

Government steamboiler inspector, Fraser, visited Tofield and vicinity last Monday.

Mrs. J. W. Morton went to the Capital last Monday for a short visit.

Mrs. Lobb, who is just a short time east from Scotland, has accepted the position of stenographer at R. O. Bird's store.

Weather permitting the picnic will be held near St. James Church Logan, on Thursday the 25th. Everybody welcome.

Mr. and Mrs. R. O. Bird returned on Tuesday from a visit to Calgary.

Mrs. Hodges and her husband, of Islay, were guests last week of her mother, Mrs. D. Francis.

Sam Reitel and C. Moon, of Logan, were visitors to Tofield last Monday.

Mrs. Chas. Roberge and son, Albert were in Tofield on a business trip on Monday.

Tyrko Thor, of Rose Creek, was a business visitor in town this week.

Train agent Loomis has arrived to take charge of the mixed run train between Tofield and Mirror.

It is now up to every Tofielder to get his shoulder to the wheel and push.

Miss Martha Ingram left Tuesday for London, Ont., on an extended visit.

Rain has delayed the resumption of track laying operations on the branch. Them will begin again immediately.

Hal Francis got back last week from Graham Island, B. C. and reports that his father and brothers like their new place of abode very much.

Al. Roberge, the world's champion lather is in Tofield again for the summer and will be in a position to handle all lathing to be done in town.

Binty day tourists tickets on sale at G. T. P. depot for points in Ontario, good for stopovers at intermediate points within the final limit.

The G. T. P. is grading for two new sidings for the east end of their yards to Queen street. Part of the steel and ties are already on hand.

M. W. Urquhart, general merchant, has sold his store and Main street property at a good figure and will go out of general business. A new firm will occupy the store.

For soreness of the muscles, whether induced by violent exercise or injury, there is nothing better than Chamberlain's Liniment. This liniment also relieves rheumatic pains. For sale by all dealers.

Mr. C. H. Huestis, field secretary of the Lord's Day Alliance, of Red Deer, will speak at 8.30, in the Methodist Church, on Friday evening. On matters in connection with that organization and it's work. All are cordially invited.

W. C. T. U.

The Women's Christian Temperance Union had a very pleasant meeting on Thursday last at the home of Mrs. R. O. Bird. One pleasing feature being the reception of a new member, Mrs. Wiggins, who has been actively engaged in W. C. T. work for some time in other places. The hour was spent in talking over different phases of temperance work and discussing different ways of making the monthly meetings pleasant and profitable. A social time was spent at the close but not cake being dispensed by the hostess. Next meeting to be held at the home of Mrs. Whillans "Glen-Nook Cottages" second Thursday in August.

Winnipeg Fair

$18.40, Tofield to Winnipeg and return, to Winnipeg Fair. Good going till July 19th, returning until July 23rd. Join the crowd.

J. C. Morrison Dead

Viciously Attacked by Stallion Dies from His Injuries

John C. Morrison, a well-known old-timer around Tofield and Beaver Lake, came to his death last Friday evening as the result of a tragic occurrance a couple of days previously. He was at once out on his regular route with his pure-bred Clydesdale stallion when the animal attacked him viciously seizing him in the fleshy part of the right leg below the thigh and shaking him to and fro as a dog would shake a rat. The unfortunate man was but lead ineffectively to retain hold of the land rein and also to grasp the horse's nostrils and shutting off his wind until he dropped. Walker, Morrison's partner was near at hand at the time of the accident and securing help took the victim of the accident to Young's residence nearby. Doctors were hastily sent for to Ryley and Tofield but the sufferer died from shock on Friday evening. The funeral was held on Saturday interment being made in Ryley. Deceased was an esteemed and much respected man throughout the entire Beaver Lake district. An old time settler at the north-east end of Beaver Lake, he and Walker had jointly conducted a stock ranch there for the past 18 years. He was closely connected with one of the old time trading families prominent in Ontario politics. While a quiet and retiring man he was well thought of by all who knew him. He was postmaster at Ridgeate for many years, occupying that position up till the time of his death. He will be missed by many.

It is just a year ago that Mr. Morrison almost lost his life from the effects of a savage kick in the abdomen from the same animal. The accident happened at Mr. Sendikaus' and at the time it was thought improbable that he could pull through. To the surprise and gratification of his many friends he did pull through. Keen regret will be felt over his sad accident arising from the same source should have been the means of his recent death.

He was about 68 years of age.

N. B.—Just as we go to press a full obituary of the late Mr. Morrison reached us. This will appear in our order as next week. Ed.

Another Land Deal

Another large land deal was put through last week whereby D. Warner, of Edmonton, purchased a five hundred eighty acre farm from Stewart A. Hall. Land adjoins Beaver Lake and is on line between town and lake. Price understood to be forty-five thousand dollars. Hinch has splendid beach safe along lakeshore. Warner will develop summering resort, splendid hunting and bathing.

Moose Jaw Council Objects to Subdividing

Moose Jaw, Sask., July 16.—The application to the Moose Jaw city council last night to approve the marketing of three new subdivisions brought forth pointed remarks from the members and action was deferred. Mayor Mayberry said the subdivision business was getting to be something of a boomerang that would in time return to hurt Canadian cities and that there was much bad color attaching to the Canadian west in London's financial circles, because of the indiscriminate selling of realty.

A bylaw has already been passed by the city and approved by the provincial public work department compelling realty dealers to submit plans for subdivisions to the city council for approval.

Henry Fraser, of Edmonton, was a visitor to Tofield yesterday.

M. E. King, of Miller & Richard, Winnipeg, was a business visitor to Tofield yesterday.

Tofield council will in all probability make a standing offer of free gas for fuel, etc., to all industrial concerns for a period of five years.

Nora Hebditch, special correspondent of the Edmonton Bulletin was in Tofield this week preparing a special publicity article on Tofield.

Industrial Concerns Have Eyes on Tofield

That industrial concerns have their eye on Tofield with a view to locating their plants here is evident from the mass of correspondence on the Secretary's desk daily containing inquiries as to size, terms on same, free lanes, cost as to gas and water etc. At council meeting Tuesday night applications were received from the Pioneer Brick and Tile Co., for gas at 1 cent per thousand cubic feet for fuel to burn their products, and from W. F. Morton who is seeking to locate a machine shop for a free site or free lease for a stated time of years a fixed assessment, water at cost and gas at 2 cents per thousand cubic feet. Their propositions were referred to the Public Works and Property Committe for consideration and report.

A proposition from Dr. Hammond was placed before council relative to the establishment of a tropical here. The Victorian Order of Nurses offer $2,000 grant to a local branch of the order, who will have control of the building. The matter was asked to provide $2,000 by debenture and the outer rural municipalities and industrial concerns panies $1,000. The town owns the hospital site. Council was asked to pass favorably on the proposition in which case the local branch would go ahead and form plans for the early construction of the hospital. The institution will be run under the supervision of the V. O. and may at any time in the future become a strictly municipal undertaking upon the amount of the V. O. grant being repaid. The matter was referred to the above named committees for report.

The G. T. P. wrote asking that the road allowance diagonally crossing their yards east of the depot be now closed and the property deeded over to them. This will be done when their part of the agreement is carried out to satisfaction of the council.

The recommendation of the Board of Trade for the appointment of H. C. Coleman of Moose Jaw, as Publicity and Industrial Commissioner was received and the Secretary instructed to write him for information as to salary expected and the amount necessary to carry on a proper aggressive campaign.

THE KEY TO YESTERDAY

By CHARLES NEVILLE BUCK

Copyright 1916

(By W. J. Watt & Company)

CHAPTER XII Continued

...fragrance to adobe walls, and the ...ed to him that he plunged at a step into ...ld hatred of luxury, poverty and hopeless...ssness. There was a confused vista of ...ms in retreat, the sound of hurrying ...ts, and a sudden summons. He ...ed, dropped to bed, thrust his head in ...s fist, then seemed to sink into ...ivion. When he opened his eyes he ...s looking at the sun on the prairies ...ough the open door of a tent. There ...s a delicious sensation of sweeping ...m in full flight.

CHAPTER XIII.

The journey of the fugitive tenderfoot, their meal tarrying at bay for pursuit, and finally their precipitate headlong, their disorganized stampede reported only a diminishing fire and the bayonets point there were all inclination of a sudden squall that swept violently through the narrow street, to leave it again empty and quiet. It was the abrupt escape for the grotesque shape of the conventional, the undisguised ...ve existence of sudden death and helplessness, leaving the survivors with ...t two terrors overwhelmed. Perhaps it was almost strange for some of the stalwart Texans, who had fought their ...st fierce spaces of the plains and ...ountains, to find themselves in the ...ading force clung to their positions ...ainst the unexpected onslaught with ...e despondence of men for whom surrender ...ld be a welcome relief from the ...ense.

Into the canyon-like street where the ...ttery of combat had heaped up walls ...d a sudden quiet and burned itself ...t came the victors of the day. They ...ossed the ditch at a walk, just in ...me to see the last desperate struggle ...d the swift, merciless incidents of the ...ttack's forerunner.

Vegas and Richardson had already ...ndered. Everywhere, the insistent ...ands of the victors were obeyed, and ...ere still debating every block of the ...reet, but the fight was practically over ...n their side the revolutionists were ...ompletely routed. The Mexican army ...ad vanished on hearing a bare ...ortation, and the Texans, in their ...elf-reassumed surprise and partial ...ntoxication of victory, were in no ...ood humor. And the hill had failed. A pro...ound silence had fallen upon the ...ttle-ground. Then, from the citadel ...ame a flag of truce, and the ...ombardment ceased. Richardson ...ent out to meet the messenger, and ...ame back with the terms of surrender.

But the nerves strest in which Richardson had been living for the past week ...ould not be kept up and dash to high ...ay, which would mean painfully, and shift his ...ttention to the commissary department. ...ere he found a confusion of orders, ...ounds dressed and discrete shifting ...ver the whole field. Then, when the ...ad rules here instead of in mere con...ands, he found himself in the midst of ...ne of the most grotesque in the ...ntire history of the war. It was late ...nto the afternoon, but the great tri...mphal dinner which the victors had ...ntended beforehand was at last ready ...o be served, and so he was ventured ...long the sidewalks.

Late in the afternoon, Richardson ...ached to the swapping of mutilitary, ...ome dressed in uniforms, some in ...ivilian, and all field-priest were brought ...o bear upon Richardson, Vegas, and ...hing that Saxon had undertaken to ...ring about preserved all open civility.

Word reached the 10th leaders ...hat the Mexican army had left the ...apers requesting an armistice for the ...urpose of burying their dead and ...ounded, and the answer of the Americans ...as the immediate beginning of the ...ombardment. The reservists ...ommanders grasped at the opportunity ...o which they had followed Richardson ...ighting, raised a breathing space, and ...o relieve their men of the terrible ...train of the morning. Those ...ho lay disabled in the streets ...

Then, as the afternoon wore ...ome of the bolder civilians ventured forth in ...earch for wives and children, and ...ere caught in the streets between the ...ombardment and the cessation of ...ostilities. For the hour, at least, all men ...ere brothers, and the ...ffering of mercies to strange, who might not long ...

Among those who followed Richardson ...ho followed up the victorious ...ttack was Howard Sedman. ...e had come to the front with ...ichardson, and had been ...ssigned and destitute. His ...ffering was ...ere declared, he must be ...ere more ...ere was really further ...ld him into ...ere was ...ere ...ere ...ere

TOFIELD, ALBERTA, THURSDAY JULY 18, 1912

THE Farmers of Saskatchewan spoke in no uncertain manner last week on the question of wider markets and freer trade. The general trend of events and conditions in the west during the past twelve months reflecting the province has not at all changed the mind of the farmer regarding the injection of wider markets and lower tariff, but rather confirmed him in his opinions.

The West's, A National Need

The effect this growing determination in the minds of Canada's Western people must surely be that the manufacturers of Eastern Canada will see the folly of expecting to hold a long distance control of the western trade. The recent trip throughout the west gave them abundant opportunity to see that the U. S. manufacturer in farm implements particularly, was to the ascendency over the Canadian Manufacturer. There is a splendid chance for Canadian Manufacturers to retain the western markets, but it is only through getting in on the ground floor, right near in the west with their factories and producing the goods as close as possible to the almost unlimited market. Western towns offer splendid opportunities to manufacturing industries and the needs of the country demand that these should receive attention.

ooo

If Teddy Tell the Truth, What?

Roosevelt, who is leading a third party in the U. S. Presidential election, the Progressives, says that no honest Republican will vote for Taft. If they do and TAft is elected, what then? According to Teddy most Republicans will be dishonest.

Camrose Aspires Gas Fame

Vegreville, Castor and Other Towns Will Endeavor to Follow Tofield's Lead.

...ures that the ...ven to ...rich dea... ...ndowed ... and ... recommendation ... and by recent... ...ertain ... towns in ... dignity ... convinced ... enthusiasm ... that a franchise ... granted a local syndicate for the supplying of natural gas. The Camrosians are seeking with a strong will to emulate Tofield's example in securing natural gas.

Vegreville, our sister town to the north, on the C. N. R., is also seriously contemplating going after gas. Castor is another municipality aspiring for natural gas fame, others are following suit and Tofield leads Them All. Tofield has the Real Thing.

It is proposed to hold a school picnic on or about the 1st of August, preparations will be made as soon as possible.

If the rain holds over for awhile the hay crop will be the best that oldest inhabitant has known yet.

Wild strawberries are cumming in plentiful in this district and are of a larger variety than usual.

Miss May Ingram, who until recently was at the Wainright Hotel, has taken a place in the dining room at the Queen's Hotel Tofield.

Young prairie chickens and partridge are to be seen in numerous quantities this year and the sporting season will be provided with same.

Scott Government returned to Power. Overwhelming Majority

Liberals have 61 Majority, Conservatives have 6 Seats.

The elections in Saskatchewan last week resulted in an overwhelming vote in favor of the Scott (Liberal) government. Every support-

...porter of the government in the last house goes back to his seat most of them with majorities that run into the hundreds. The opposition vote only do some, viz: Lumsden, Moosejaw, Prince Albert City, North Qu'Appelle and Maple Creek. Monday's report shows Scott to have a land of 61 seats. Wider markets was a leading cry of the Liberal party during the campaign preceding the election.

Woodlawn

Mr. S. Ingram, of Edmonton, is the guest of his sister, Mrs. I. Ingram, for a few days.

Miss Cole returned from Edmonton on Saturday after a week's stay with her parents. Miss Doyle accompanied her from Tofield.

School started on Monday last with a fair attendance. The vacation was cut short owing to the school only being run during the summer months.

Stanley Day is making extensive improvements on his farm, having under construction a number of fine buildings.

Mr. J. A. Shaw, of Edmonton, is bringing his family down on his farm for a week's stay during the High School vacation.

Write today for free catalog and learn how you can earn lucrative Barber's wages. Thousands desired for Coast to Coast Barber Shops. Don't delay, as it will be your loss if you do not write us immediately.

MOLER BARBER COLLEGE
Milwaukee Ave. First Door West of Main St., Winnipeg

MODERN MAGIC

Electric is Especially a barber's servant—as it is every other kind of the modern artisan's. Indeed with gaining an electric hand of the "Hair Cut" is more and precisely not very. His Majesty—Mr. Client—the greatest with him in the world—and the one who needs it most—insists on it. If the shaft breaks it can cut him. If the shaft breaks it can cut him. If the shaft breaks it can cut him

...OSS CREEK

July 13th, 1912

A large number of Ross Creekers attended the sports at Chipman on the 12th and they returned with the following prizes.

Ludwig Damberger, 1 mile foot race, 1st.

Ludwig Damberger, ½ mile foot race, 1st

Miss Damberger, 100 yard dash, 1st

Melvin Hopf, 100 yard dash 2nd.

They also took first in the relay race and 2nd in the results race. Joe Marr and Max Page, of Chipman, taking 1st. Joe was heard to say that he knew who could handle the swells.

2nd in the ladies' race Mrs Grover Van Roskirk getting that.

There was a lively time at the football games four teams contesting for the cups. The Fort and Lamont played in the morning coming off at a tie score 1—1. They played another 20 minutes but no score was made. Ross Creek and Chipman played in the evening no score being made on either side. These games are to be played off a little later on, one game to be played on Ross Creek grounds as the picnic which will be held June July the 27th

The farmers here are just as well pleased with their crops as Tofield is with their gas.

There is a great deal of breaking being done here now most of the farmers being busy at it are getting the brush out of the way.

Miss Mary Bailey, formerly of Ross Creek, now of Edmonton, paid a week end visit at her sister's, Mrs. J. Malcolm.

The Ross Creek people were rather out of humor with the weather on July 1st and 10th as a large number intended going to Tofield on those days to take in the sports. July 15th, 1912

Local and General News

J. W. Somers paid a visit to the capital last week end.

Hyley held a very successful sports day on the 12th.

Rev. H. E. Gordon was a visitor to Tofield last week.

Charlesworth & Lee shipped a carload of logs this week to Vancouver

Rev. C. F. Washburn spent Saturday night in town on his way east on a six weeks vacation trip.

If you need horses come to Red Ribbon Sale, Camrose, Friday, July 26th.

Miss Eleanor Bassett, who has been visiting friends in town for two weeks returned to her home in Edmonton last evening.

A meeting of the Ladies' Aid, of the Presbyterian Church will be held in the church, on Friday afternoon, July 26, at 3 o'clock.

Geo. Bruce, of Round Hill, was a visitor to Tofield last week end, coming to visit Mr. Edward Prudens.

Miss Adams left last Thursday evening for White Lake, South Dakota to remain there several months with his folks.

Miss Bundy, of Leduc, who has been the guest of Mrs. (Rev.) Mason during the past week left yesterday for home.

J. W. Morton's quarter section south-west of town was sold last Saturday at $1100 per acre. J. B. Kennedy, of the Tofield Properties Co. negotiated the deal.

Dysentery is always serious and often a dangerous disease, but it can be cured. Chamberlain's Colic, Cholera and Diarrhoea remedy has cured it even when malignant and epidemic. For sale by all dealers

Jas. Peaden, of Lower Slave Lake, was a visitor to Tofield a few days ago coming in to his brother Edward Prudes, who has been ill for several months. Mr. Jas. Peaden on time homesteaded the farm since owned by J. C. Phillips.

Mrs. Geo Cockson went to Edmonton last week to the hospital where she underwent a surgical operation on Saturday afternoon. She came through successfully and is doing well. She will not be able to leave the hospital for several weeks.

The funeral of the late, Bella Tommy Kirkpatrick took place on Tuesday afternoon from the home of the little one's parents on 5th avenue west, to Tofield cemetery. Rev. A. M. McCall conducted the obsequies. A number were in attendance.

Messrs Martin and Beckie, of Calgary, the former of whom is president of the Northwest Drilling Co., and the latter who is associated with him in the business, were visitors to Tofield last Friday. This company are drilling three wells at Bear Island and one at Medicine Hat.

The 3rd Annual Exhibition.

The third annual exhibition and live stock show of the Tofield Agricultural Society will be held on the Society's Exhibition grounds, on Friday, September 27, 1912 Preparations are being made to hold the biggest and most successful show yet. Year by year sees the show growing beyond all proportions of the preceeding year. Last year the prizes given totalled over three times the amount awarded the previous year. The prizes are now being printed and in a few days will be ready for intending exhibitors. The Dominion Celebration Committee met a few days ago and decided that under the circumstances it was not advisable to hold the deferred sports and to hand over the money collected to the Agricultural Society for the Fair. It is understood that the Society will put on a programme of sports and races similar to last year.

Gopher Tail Competition

The boys and girls of the Tofield district are taking a keen interest in the Tofield Agricultural Society's gopher tail competition which is now on and which comes to a close on Fair Day, September 27. The thirty dollars being up as prizes divided into 10, 6, 4, 4 and 2 dollar amounts is attracting keen attention and many boys are daily out on a still hunt after the pesky gopher. Word comes to the Standard that north in the Ross Creek section the boys are doing their duty. Out in the eastern section several are busy, north, southeast and southwest the slaughter is being carried on. Keep-a-going boys there's many more gophers left. Their tails handed in intact(w)is representing the many guns to their long rest will be a splendid and effective emblem. The money may be yours. Besides the $31. a special by J. W. Horton of $5.00 is offered to be drawn for. Yours may be the lucky number. Keep going.

BUSINESS LOCALS

Gas fixtures of all kinds.—R. O. Bird.

Sherwin Williams paint still stands the test and is going faster than ever Sold by R. O. Bird.

Horses, Mares, Geldings, young mount and broken will be sold at Red Ribbon Sale, Camrose, tomorrow this is your chance to buy.

In furnishing up your new house remember that we have in stock just the kind of furniture you need to make home a pleasure. R. O. Bird.

A dance is being held in Bellamy's Hall to-morrow night.

W. R. Lister returned from a visit to the Capital last Monday

W. A. Nebor returned from his home in Edmonton to resume operations on the well.

Mr and Mrs. Ralph Davison have moved to 3rd street north where they have taken up residence in H. W. Nauman's dwelling house.

Miss Pearl Turner, of Winnipeg, arrived this week on a prolonged visit to her father, C. J. Turner, of C. B. Bruce, hardware.

John Nebor, who has been at Edmonton the last month enjoying the Exhibition shows and spending his money, returned on Tuesday to don his overalls.

It is understood that F. A. Hall this week purchased lots 7 and 8 in block 38 for residence purposes. It is probable that the residence will be erected during the present season.

Mayor Letourneau and councillors Emery, Urquhart and Logan, accompanied by the secretary left early in the week for Calgary and Medicine Hat where they will investigate the natural gas distribution systems and inquire into the matter of service and rates for domestic and industrial purposes.

Dedicatory Services

Holy Trinity Church, Tofield

The dedication of Holy Trinity Church, the new place of worship of the local Anglican parish took place last Thursday evening. Rev. Bishop Pinkham, of Calgary, happened to be in town for the purpose of the special dedicatory service and to perform the ceremony. A goodly attendance crowded the church, all the congregations in town being represented.

After the ceremony the Ladies' Aid dispensed luncheon, sweet meats and ice cream in booths on the green while the band performed several evolutions. Despite the threatening weather a pleasant evening was spent.

New Potatoes

Thos. Porter last Thursday brought into the Standard office a sample of his new potatoes which are certainly worthy of mention. Some of them were 4½ inches long which at this time of year is a splendid size. They are a white potater, imported from the Old Country three years ago and are the Duke of York variety and were grown by Mrs. J. W. Coolman.

Nuisance Grounds Again.

Dear Sir:—

Nothing has been done to improve the condition of the nuisance ground, the smell from which is almost unbearable to the annoyance of people who have occasion to use the road west of town. Has the town sufficient funds to spare a few dollars to run a fence along the side of the road and also to run a scraper a few rods south into the centre of the grounds so that refuse would be dumped some considerable distance from the road. This improvement would prevent many citizens being taxed in some permanent unloaded right on the road allowance and put the grounds in somewhat of a sanitary condition. Trusting that this letter will draw the authorities attention and thanking you for the space given.

Yours truly,
A RATEPAYER

J. D. Kennedy last Saturday sold the Main street lot just south of the bank to S. A. Hall at $100 per foot frontage or $3000 for the lot. This price is the highest figure yet realized for local property in Tofield. S. A. Hall was the purchaser.

Another Convict Makes Escape

Edmonton penitentiary has another escape added to its record. Last Monday afternoon Isadore Laframbiose, a French halfbreed, made a daring get-away almost under the eyes of the guard, who stood only a few yards away on a knoll of ground. On asking permission to go and get a drink and getting the desired leave he went to the mouth of the coal mine and disappeared. Only two minutes elapsed till the suspicion arising as to his non-appearance caused a hue and cry to be raised. Search revealed the fact that he had made off down the river. A posse is scouring the country after him.

Lord's Day Alliance

A meeting of the Lord's Day Alliance was held in the Methodist Church last Friday evening. Rev. Chas. H. Hastain, field secretary for Alberta and B. C., addressed the meeting explaining the kind of work being done and the manner in which it is done. A local organization was perfected and the following officers were elected:—Rev. R. Williams, president; W. P. Storeng, sec.-treas. also a lay representative to be appointed by Rev. Mason, of the Anglican Church.

Tofield Fair, September 27.

Drillers Resume Operations on Well

The drillers in charge of the town gas well expect to begin operations towards the completion of the well according to contract at the end of this week By this time, it is thought, the cement had placed at the bottom of the piping will have hardened sufficiently to prevent any further running of water from the upper strata down the outside of the casing into the hole and thus to allow the drilling out of the cement through the last into the gas strata below.

The finishing operations in connection with a gas well are of such nature as to necessitate the most careful handling and as one difficulty which is to be contended with in this well is the soaking out of the water, which comes down from a higher level, extreme care must be taken in its completion. The operations will be watched with keen interest by all interested.

OBITUARY

Mr and Mrs. T. J. Kirkpatrick suffered the loss of their infant child, a fine little lad of two years, last Monday morning, the little fellow succumbing to a fatal attack of summer complaint with complications. Interment was made in Tofield cemetery. The sympathy of a large circle of friends is extended to the bereaved young couple.

CHICAGO SPELT A DOZEN WAYS

"Few people know that Chicago has been in early different counters of Illinois," said County Treasurer Thomas Brent, who has served with the County of Cook, January 13, 1921. Illinois then being a Territory, September 14, 1818.

"Chicago was first spelled on the following occasions: Jeremiah Edwards in 1814. Crawford, 1818, Clark, after the Territory was admitted as a State, in 1819. Pike, 1821, Fulton, 1823. Peoria, 1825, under the jurisdiction of which it existed until it was created as the County of Cook, January 13, 1831.

"Chicago was spelled that form in more than a dozen ways. Father Marquette, the first white explorer to visit the site of Chicago, in 1673, spelled it Chicagou, and in 1700 St. Cosme called it Chicagoua. That form was used by Charlevoix in 1721, by Pinkerton, Chicago and Chicago, he being the first to use the form the surveyor-general by which it finally was settled upon as the correct spelling in 1121. In the Greenville treaty it received it its present form.

"In an old deed filed away among the archives of the Chicago Historical Society, as applied to the river or creek" (1776). It plainly written Chicagou.

The word was the Indian word for garlic, which either and signified "strong" or "strong, mighty, powerful, courageous."

"In 1218 a chief bore the name Chicagou under name one of the Illinois tribes, while in 1790 a half-breed bore the name of Chicagou. Other spellings which it has been known by are Chicagoua, Chicagoa, Chicagoua, Chicagoua, Chicagoua

R. N. WHILLANS. - - Manager and Editor

TOFIELD, ALBERTA, THURSDAY JULY 25, 1912

WE notice that the Grain Growers Grain Association, of Manitoba, are arranging to issue the system of government grain elevators of that province. In view of the fact that this year's crop has every appearance of putting last year's output far in the shade and that it has been said that another blockade in transportation of our grain crops to lakehead is in sight, it might be apropos to suggest that the farmers' organizations of not only Manitoba but Saskatchewan and Alberta should have an independent official of their own to act in the capacity of car distributor so that a remedy may be found in the alleged un just inequality in the distribution of cars over the West. If the farmers, through their orgnizations want to get the best possible service from the transportatio n systems it is up to them to put officials on the watch to detect the flaws in those systems. The issue is now on the U. G. G. A. to do all possible in removing any possibility of a repetition of last years disgraceful conditions in regard to the moving out of our grain crops.

Present a Grain Blockade

THE worthy Mayor and Town Fathers, Emery, Logan and Urquhart are travelling in state this week—and with their secretary too. What do you know about that? Some class, isn't it?

Never mind, nothing is too good for the Irish—no we mean Tofield. It's information they're after. They're going to ship it tuck in a box car. All jokes aside. It's a commendable mission, their seeking for knowledge. Our legislators are getting down to proper level when they quit this floundering around in the dark and get out and see what other municipalities have been and are doing. That's what takes the bumptiousness out of them. The future success of the town depends very largely indeed on the manner in which the foundations are laid. If Tofield is going to become a thriving little city of no mean proportions, and we all have this faith firmly planted within our breasts, then it behooves us to lay the foundation on a sound basis. In doing so, it is now timely to see and note the doings of others, their shortcomings, their lessons and their successes should have and could have been done before, but, as it may, the present actions of council in going to Calgary and Medicine Hat to study conditions relative to the utilities is most commendable and it is to be trusted that their experience will not only be productive of good in this case but will enable them to profit by the practice of comparison.

A Wise Move

Dairy Industry In Tofield District

The farmers and dairymen of the Tofield district have the opportunity of securing a promising and lucrative trade before them through the winter months in the supplying of good clean milk to the Capital. We understand that the Edmonton City Dairy are now corresponding with a number of their present patrons throughout the district with a view to enlisting their co-operation in this scheme. Selling milk is more profitable than either shipping cream or making butter and there should be no difficulty in working up a profitable industry in this respect in this district. There is no branch of the farming industry which will give such good results for the money invested when one considers the steady and substantial income created from this source. All those who have milking herds should prepare properly constructed stabling accomodation for their cows which afford plenty of light and is comfortable, free from draughts and which should be whitewashed throughout the interior. The winter season can be made a profitable one for all those who have the enterpries and the energy to make it so.

Tofield Fair, September 27.

Joy Riders Loose

The quiet hours of midnight on one occasion last week in the business sections of the town were disturbed rather rudely by an exhibition of rowdyism on the part of some who ought to know better. Quite a number of citizens who live or occupy apartments in the vicinity complained bitterly of the nuisance. It is regrettable that these conditions should exist in any community. Law-abiding citizens and those who have the town's welfare at heart should recognize the fact that we daily have numerous strangers within our gates and it is up to us to prevent any undesirable impression being given about our town, by maintaining that proper respect of our institutions for good order and government which continues decency requires us to pay.

THE KEY TO YESTERDAY

By CHARLES NEVILLE BUCK

Copyright 1916 [illegible] By W. J. Watt & Company

CHAPTER XIV (Continued)

"What became of the—poor girl?" Dayne's voice got the unnatural, very low sound.

"Oh—Miss Paris! Whether she had her consent for pranks and jaunts—I don't know. Anyway, she left Mrs. Hardy's house and went to live with a friend. Then she went to Europe with her father. Then she came back and went to live with her father. Then she went to Europe with her father. Then she came back and went to live with her father. Then she went to Europe with her father. Then she came back and went to live with her father

Baseball

Tofield Wins Championship G. U. P.

Record Crowd in Attendance.

Oh but it was an swelden. It took their breath away and left them speechless.

It just happened—that's all. There's not to reason why—that's but to do and die—that's all.

What the Buffaloon thought of it is a conundrum. Oh, the woeful suddenness of it. Like Lochinvar of old who stole another's bride, so the Gas City nine beat Thursday stole down to Wainwright and swiped all the Buffalotown's baseball glory in one fell stroke. The Gas boys

"Walked right in and turned around and walked right out again."

And with them they brought back the scalps of the buffalo fans.

To the surprise of the Tofielders, when they got to Wainwright to enjoy a little friendly intercourse with the local team at baseball, they found that village plastered with posters bearing the following legend:

Baseball

The best game of the season

Tofield vs. Wainright

For championship of G. T. P. R.C., etc., etc.

Come. Come. Come

Note the championship, would run. Well the Tofielders just never let on. At the depot they chased into motors and were whirled over to the grounds where a vast throng awaited the spectacle of the slaughter of the Gas City innocents. The would-be butchers were there and the slaughter began. They had just as long to play as No. 1 train coming west was to carry the boys home, so both sides settled down to the "affairs d'honeur." Waugh, waugh. It was delightful, don't you know. The game was finished just as No. 1 pulled into sight and here down to the depot. One cheer for the new pleased Buffaloon, a distant, very, reply—and our boys climbed into the motors and caught the train just in the nick of time. Waving a fond goodbye in cold blooded nonchalance to their hosts as the car pros pulled out bearing the cherished and coveted baseball Championship of the G. T. P. away from Wainwright. The score was 3—2 in favor of the visitors.

Tofield Fair, September 27.

Semi-ready Suits

at $15 and $20

It pays to go somewhere when you get a good Clothes and save by so doing both and especially at "Zep's Store" here in Tofield. Its Gentlemen's Furnishers, Hatters, Shoemen, for both ourselves and you. "Do it" is our motto and it is better.

AT THE

PRESBYTERIAN

Rev. A. M. McCall will preach on Sunday morning at 11 o'clock taking as his subject to the children, "Sermons on Stones." The sermon will be on "More forgiveness, much love." In the evening at 7.30 the subject of address will be "The Trial of Jesus."

Woodlawn

The course of the Ketchanest Creek has been diverted during road improvements at the bridge near Mr. Hunt's and this has caused flooding of meadows in this district, which looks serious for haying prospects. A petition signed by the farmers, who own and lease land for haying, where the creek is overflowing, is being sent to the Department of Public Works, with the hope that the obstruction will be removed.

W. Reed, J. Day, S. Day and R. Cuthbert with C. Plants in charge are working on the road 1 mile east of P. Lee.

Walter Powell and wife, of Tofield were looking over homstead prospects here recently. Mr. and Mrs. Lincoln accompanied them.

Carl and Otto Anderson, of Pretty Hill, spent last week on their homesteads making preparations for haying.

The frost on Saturday night cut off the tops of the potato plants in some gardens and also spoilt prospects of early beans.

The continued heavy rain is making the roads almost impassable in some places. In the future more attention should be paid to ditching.

The school picnic is postponed indefinitely

For sorenesss of the muscles, whether induced by violent exercise or injury, there is nothing better than Chamberlain's Liniment. This liniment also relieves rheumatic pains. For sale by all dealers.

North Half Latimer Block — Tofield

Local and General News

Tofield Fair, September 27.

Several sand-cement block dwellings are to be built in Beaverhill Park during the next two months.

Messrs. Harvey, Browne and Blaney, of Edmonton, who visited Tofield a few days ago were so impressed with Tofield, its vicinity and its prospects that they purchased a big interest in Hillcrest subdivisions.

Messrs. V. P. Bond and S. G. Adams, of the Bond-Adams Real Estate Co., of Calgary, were visitors to Tofield last week and were delighted with all the evidences of industrial and commercial activity in Tofield and vicinity.

Mr. and Mrs. Dan. Cameron of Ottawa were the guests of Hev. R. Williams and Mrs. Williams over last week end. Mrs. Cameron is a niece of Rev. Mr. Williams. This is the Cameron's first visit to the west and it is to be one of annual interest to them. They left on Monday enroute to the coast via, C.P.R.

Mr. I. E. Carmack, of Mooseparkbeach, Ont., with Otis Arnold is to install a cement brick plant in Tofield at once, visited Viking on the 27th inst, and signed a contract to make 280,000 brick for the new hotel, in which contract he is bound to be on hand ready to make brick by August 25th.

Mr. and Mrs. M. D. Stutsman, who are amongst those of our many new Canada from Nebraska and who have come in large numbers to the Tofield district of Sunny Alberta, were made the proud possessors of another booming baby girl on true Albertan. Mr. and Mrs. Stutsman are enthusiastic boosters of Alberta's many resources in the Tofield district in particular.

Messrs. R. B. Harvey and C. R. Browne, officials of one of the Dan McMurray Gas and Oil Companies, and C. Hessey, of Edmonton, visited Tofield last week and succeeded in secured the services of W.A. Nelser to show them around. They intended to stay a day only but a visit to Beaver Lake as set them going that they forgot all about taking the train back, they were so delighted with the country round about and the town of Tofield itself. Fishing boating and bathing in the limpid waters of the lake was too pleasant holidaying to be cut short they returned reluctantly to Edmonton on Sunday evening but decided to return in a few days with their wives and camp out at the lake for a few weeks. Mr. C. R. Finlay and Mrs. Finlay, of the Gibbs-Dash Co., will also go into camp at the lake at the same time.

Jas Maurer and D. E. Stutsman left yesterday morning for Milford, Nebraska, on a short trip during which they will be photographed and enthusiastically boosting for Alberta and the Tofield district in particular. Mr. Stutsman is 62 years of age on the 17th of next month and Mr. Maurer is past the sixty year mark but despite their years they are full of grit and energy and are determined to make Alberta their home. Sunny Alberta's genial climate attracts young and old and sometimes the older ones lead the race. Mr. Stutsman took back a sample of oats from the growing crop measuring 5 feet 6 inches and Mr. Stutsman a goodly sample of Barley. Mr. Stutsman goes back to sell his farm in Nebraska and return to Tofield district.

A vast amount of ill health is due to impaired digestion. When the stomach fails to perform its function properly the whole system becomes deranged. A few doses of Chamberlain's Tablets at all you need. They will strengthen your digestion, invigorate your liver, and regulate your bowels, entirely doing away with that miserable feeling due to faulty digestion. Try it. Many others have been permanently cured—why not you? For sale by—all dealers.

The Town Fathers On a Trip Abroad

A Report for Our Readers of the Trip to Calgary and Medicine Hat Last Week of the Council Committee by the Secretary Mr. Nicholson, at our Request—Ed.

The Mayor and Councillors Young, Logan, Keary and Urquhart accompanied by the Secretary went to Calgary and Medicine Hat last week in quest of information. Others may or may not think the members of the council knew a great deal, but when it becomes a matter of assuming control of a gas business of the magnitude that the business in Tofield is likely to assume, and that without previous experience, the Council was unanimous in the opinion that more knowledge was necessary. Medicine Hat has a thoroughly satisfactory Municipal plant. Calgary has one of the largest and most up to date gas companies in the world. It was decided that all the members who could get away should visit these places. Accordingly a start was made on Monday July 22. The midnight train was boarded and Calgary reached in good time for breakfast. The first visit was to the head of The North Western Gas, Light and Fuel Co. The President Mr. Coste, showed as much courtesy and was as willing to impart information as though he represented a million dollar concern. This Company received its franchise and began operations in April. The drilling of several wells was laid, several small towns along the way were supplied with gas, 20 miles of mains in the City were laid as well as an immense amount of small pipes to supply 2000 individuals more, and gas was turned in 90 days from the time work was begun.

The town council had an hour to learn from the head of such a firm as this, and good use was made of the time. After answering all questions asked and volunteering much information. Mr. Coste handed the deputation over to his Superintendent, Mr. Hubbard who took them to the stores where all kinds of appliances for gas fighting, heating and cooking were seen. And then the Superintendent secured two autos and took all parties to various parts of the city and explained the working of all parts of their plant. As Mr. Coste had assured the deputation that their company had learned by experience that it pays better to contract for the drilling of their wells rather than to buy outfits and employ drillers. The first visit after Calgary was to the office of the North West Drilling Company, a very strong company that is at the present time doing all drilling for the Gas Company. After a short time spent with Mr Martin, the president, and having made arrangements to meet him in Medicine Hat where the Company is drilling a well, the members of the council boarded the afternoon train for the Hat and arrived there in the early evening.

Wednesday morning with Mr. Martin, who arrived on the early morning train, the North West Drilling Co's plant was visited. Though drilling was started only last Monday morning the well was down over 325 feet, and would in several feet further during the short time spent there. The plant is the very best money can buy, and what the council learned there will return the town of Tofield large dividends when more wells are drilled here. The balance of the forenoon was spent with Mr. Clyde, the City Gas Superintendent, and the questions put and answered were legion. The deputation then broke up into sections and considerable work was done in interviewing different civic departments, members of the city council and others including representatives of two or three manufacturing concerns, one of which was almost certainly secured for Tofield. Two more began negotiations. Later in the afternoon a visit was made to the city power plant after which the Chairman of the Finance Committee and the secretary put in a hard hour's work with the Medicine Hat Industrial Bureau, probably the best in the country, going carefully to publicity methods and procedure.

A return to Calgary was made on the night train and all but Mr. Young and the secretary started for home on the early morning train. Those remained behind to enter into agreements (subject to future ratification) for the purchase of gas pipes and other material, and for the drilling of more wells.

This was done, and considerable publicity work, in time to catch the afternoon train for the north.

Three very busy days were spent, and it is safe to say that more information of value to the town was collected than was ever collected in the same time before. The summer for another will was not actually let, but arrangements were made that provide for such a contract, and, as soon as the town is ready, for several wells. Studying the experience of others made it quite plain that the development to be expected will not long be met by even two or three wells. Tofield may safely take it for granted that a gas well will not only transform our town into a city, but also pay a large share of the cost of running a city, making the tax rate of the future very small.

Sand Cement, Brick and Block Factory.

Locating in Tofield

One of the first brick manufacturing plants to locate in Tofield is that of Messrs. Carmack and Arnold, two gentlemen hailint from Mooseyalla. Mr. Carmack came down from Edmonton last Monday week and looked over the prospects for a suitable location with the result that he at once decided that Tofield was the spot to make their fortune and on Saturday he returned with his partner.

The new firm will use the lake sand a clear water washed article which cement will make a fine brick or block which improves with age. They are shipping a plant immediately from Mooseparkbeach and will set up and operate immediately upon arrival which will be in a few weeks.

Carroll & McDonald have disposed of fifteen quarter sections of C. P. R. land in the vicinity of Tofield during the past few weeks. C. P. R. land is good buying those days. The terms are excellent and prices reasonable.

Richard Graham, who owns a ranch in Rose Creek section, has been spending some time in Edmonton, Calgary and other points and returned a few days ago. He states that great interest is centered upon Tofield everywhere he has been and Tofield is surely booming up as a coming most important industrial and commercial point.

A Jas Hall, of Tangy, Kilsheenie, Campbelltown, Scotland, and Miss Hall, arrived last week from land of brown heather and shaggy wood and are guests of his son, Stewart A. Hall and Mrs. Hall, of Lakeside. Mr. Hall is quite pleased with Tofield's development since his visit here two years ago. He will spend several weeks here with his son.

$25.000.00 For Publicity

Tofieldites Initiate Enthusiastic Campaign to Secure Capital and Industries

Tofield, with its natural gas and varied natural resources, will decked up into a shrieking city if its enthusiastic boosters have their way. This morning a meeting of money-raising stalwarts was held in the town hall where a good hour's hot heart talk was had, the outcome of which was the formation of an industrial bureau and the appointing of a special committee authorized to inaugurate a campaign to raise twenty-five thousand dollars with which to carry on an active policy in securing industry and capital to locate in Tofield. What with our natural gas which we have in large quantities and saw a hundred and forty acres adjoining 4 by freight yards, the former which the town offers free to the manufacturers for five years and at a small figure thereafter and the latter which the town has for giving manufacturers sites at cost, and the giving of water at cost, Tofield will undoubtedly grow fast as a manufacturing centre. They are already heading this way.

George Nelser, one time j ruiter, sometimes cook and lieuman at the gas well, returned on Wednesday from a short visit to Edmonton, he says the cost of living has gone up so much that a turkey has to change a quarter several times a day.

Council

What the Town Fathers did on Tuesday Night

The regular meeting of the council was held last Tuesday evening all except councillor Urquhart being present.

A communication from the town of Leduc asking co-operation in the organization of a union of Alberta municipalities with a view to securing amendments to the Towns Act was read and filed. The letter from Leduc cited the clause in the clause and the bonus prohibition clause as unsatisfactory To Tofield both these clauses are satisfactory as we have had the single tax straight for years and are unalterably opposed to bonusing.

Current accounts aggregating $6300 were passed.

The ratepayers of 4th avenue petitioned for the withdrawal of their petition for a plank sidewalk on condition that they get a cement walk this or next year. The petition was accepted

Councillor Young gave a brief outline of the council's trip to Calgary and Medicine Hat, stating concisely what they had seen, heard and learned

The secretary was instructed the Attorney General and Hon. Mr. Stewart asking increase of borrowing powers by ten per cent.

The nuisance grounds nuisance came up for discussion and a by-law was called for ordering all parties depasiting loads of refuse, etc. on the grounds to place same at a distance from the public road of several rods. Penalty will be imposed for infraction of this by-law.

THE KEY TO YESTERDAY

By CHARLES NEVILLE BUCK

(Copyright 1916)

(By W. J. Watt & Company)

CHAPTER XIX. (continued)

"I will go in. Now for a while—and then—home. He had fallen into a passive state of resigning their affairs. His thinking disformed in the darkness. Loud hereself help her. She sat quiet upon his direction and waited for him to speak.

It seemed minutes to her that she looked up again.

"But I want you to stay. I want you to do everything you can for both of them. His pacing and for the first time spoken with an effort. And I do want that I don't want you to speak of me. I don't want you to try to explain him.

He will understand my definitions Flavia."

Dorothy's head was turned with a little nod of assent.

"I do understand, she said. And he will ask you anything he should not—anything that he has not the right to ask.

CHAPTER XX.

When he turned back a day later from the turmoil of the station, from the strenuous hour of watching trains leaving the opportunities in the fresh, unbreathed air of the open and London all all, saying good-bye to Dorothy with a morning of unusual loneliness, Marston found himself irritably out of measure with the quick step of Lieut. Mrs. Hurton and the civil service of the war to the Lord. He was left behind to wash treads almost it seemed to him that he was left behind in the world. Somehow or other he hope in the lives of these people now should still be quiet. The great wave of "progress" would not for a little while sweep over his quiet corner slopes and white beaches and quieting cupboards and the place of which he felt at peace. Every soothing influence that nature could offer that would not be much, but it would be something.

As for himself, he felt the isolation of Paris was a desert; a man may become lonely in the streets and on high mountains. In that come to know and hate his own self to outside but the best note of aloofness of after-talk, so he felt. He was not sure that he was ready for one face or a word of others there, whose small cosmos lies in utmost and unbroken unit in the midst of a giant city that moves about its indifferent way in the time of disasters. In the hotel there was the chatter of the guests. His own table was pestled by men and women whose lives seemed to revolve around the shape of the fee de la Patt, or whose literature was the confession of the guide-book. He felt that everyone was looking at him curiously, and that with a certain resentment and protest against the whole stage setting of things he had been suddenly transported to the Hotel Astaire, where the life about him was the mimic life of the free pertentious quiet of the Astor.

After his dejeuner he sat for a little attempting to read a book of Dorothy's he had told Marston that he would never again speak of Lucia Marston, but he realized how hard it would be to keep [illegible] [illegible] [illegible]

TOFIELD, ALBERTA, THURSDAY AUGUST 1, 1912

THREE of the most prominent steamship lines plying between the ports of Europe and Canada have announced that they cannot book any more passengers until late in September. For over a month ahead every possible berth is taken on the main lines and even places in the steerage are selling at a premium. The rush to the Canadian west, where free lands and first-class positions are offered to those who are willing to work, has been the cause of attracting thousands of settlers and from present indications the tide of immigration will not be stemmed until practically all the fertile lands in the last best west have been taken up.

Rush to Canadian West is Unabated

Railway construction, topping thousands upon thousands of acres, the building permits of an hundred cities and towns which are springing up like mushrooms following a rain, have proven to the dwellers of the old world that a land of opportunities is open to them and thousandsare taking advantage of the offer.

WHEN a town is alive it is not only because it has live business men but also because it has business men who pull together, who do not pull apart, who are willing to get in the way and block the wheels of progress, who invest wisely and are not carried away by the fads and fancy of others. There are many such towns in the west, and that is our cause of their development.

THE wise man carefully counts the costs before he starts in on any business enterprise, and if he can see no money in it, if he is a wise man, he lets it severely alone. Will it pay? That is the question any man should ask before engaging in any line of business. No man can successfully conduct a business at a loss to spite his neighbor.

Weeds of Alberta

Bulletin No. 1 of the Weed and Seed Branch of the Department of Agricultural, Edmonton is available for distribution, and any farmer may obtain a copy free by writing the department. It is an illustrated work on common weeds of Alberta giving brief descriptions and well executed drawings of the weeds found commonly on our farms, particularly those classed as "noxious" under the noxious weed act, besides which is given the best and latest methods for eradicating each weed under the different systems of farming followed. The bulletin has been prepared by Angus McKenzy, B.S.A., and C. E. Fawn, B.S.A., of the Department of Agricultural staff, both of whom have made a scientific study of the weeds of Alberta and the most practicable methods of controlling and eradicating the same. Particularly valuable are the methods outlined for getting rid of weeds, the methods advised being those followed by the most successful farmers and advocated by the weed experts and inspectors of the Department. Every farmer in Alberta should have a copy of this bulletin from the Department of Agricultural, Edmonton. It is free to everyone. Write for it.

Greatest Wheat Crop in History of Western Canada.

Winnipeg, July 25—That this year's will be the biggest crop ever grown in Western Canada is the prediction made by farmers from all sections of the prairie provinces by crop experts, by heads of elevator companies, and farmer's organizations and provincial department of agricultural. Not only will the total yield be the largest, but judging by present conditions the yield per acre will outstrip all previous performances.

The C. P. R. authorizes the statement that the harvest of various crops will take place during the following periods—barley, commence August 1, completed August 20; fall wheat, August 10 to 25; spring wheat, August 15 to September 10; flax, August 25 to September 15. This will put all grain in stock by the middle of September, fully three weeks ahead of the ordinary season.

Tofield-Calgary Branch Almost Completed

With grade work on the Calgary to Tofield branch of the Grand Trunk Pacific completed into the Carbon City and with the track laying gangs close on the heels of the grading outfits all that will prevent the contractors from running trains into Calgary by the end of next month will be the completion of their bridges. Already the cement pier works are on and so fast is the track laid the C. P. R. crews will haul the structural steel to the bridge sites and the erection of a bridge will be long time followed by the most successful farmers and advocated by the weed experts and inspectors of the Department. Every farmer in Alberta should have a copy of this bulletin from the Department of Agricultural, Edmonton. It is free to everyone. Write for it.

Seventy-Year-Old Will Settle in District

John Maurer, of Mollord, Neb., arrived in Tofield district a couple of weeks ago to visit a number of his old time friends who had moved up here a year and two years ago. Not unfavorably his sight, he has seen between sixty and seventy summers ride swiftly past, he was so delighted with conditions here that he purchased a half section in 19-18. He does not want to be bored nor out of the race for honors occurring from rapidly increasing farm values in this district.

Pen Picture of a Canadian Editor

The Ottawa Free Press reporter who got off the following in his story of the recent meeting of the Canadian Press Association in that city probably should be able to get a job on any paper in the Dominion now:

"As from time to time at this convention and from the proceedings, it is possible to draw a composite mental picture of a Canadian editor. He is a man over the average in height, usually clean shaven, with a youthful cast of face. He has a keen alert look, a quickness in action, only equalled by his keenness of vision. He is inquisitive of nature, but under the "cover of glory" shyness, which it could take long to do it properly.

"He is a man of wit, "I haven't time to spend hours a day breaking my back." Then he is a man of his word as a rule, and is soon of Ryal's Hinderers with the ability to keep his appointments. He is a man of the strict code and ethics of his profession, and abides by them. He is a man of the strictest honor, and he cannot accept the jubilant advice to "collar fools gladly." In pursuance manner motives he is governed to himself and to others seems people and him a trusted. He speaks in true and often, but his formal country is of the practical and non-sensational kind. His notes keep speeches and involved explanations, hence his own speech is brief.

In this a correct composite picture of a Canadian editor? was asked of the C. P. A.

"Yes," he added, "only you should say in addition that he usually succeeds in marrying one of the most beautiful and talented girls in the country. As for the editor, don't believe it," he continued, look at the ladies along with our party, the wives, mothers and sisters of the editors of Canada, and the most skeptical will be convinced.—Western Editor

Rural Delivery Popular.

Ottawa, July 25—The Canadian people are catching onto the advantages of the system of rural delivery. Many applications are being received by the Post Office Department, especially from Ontario. There are now 800 rural mail routes, 250 of them having been added in the past year. The greater number of applications come from Ontario where most of the routes are now located. Twenty-five thousand delivery boxes have been created.

Must Provide Lots in New Townsites

Calgary, July 25—"When a railroad company moves a station it must not only provide similar lots to the new townsite for property owners in the old one, but must also either remove the residences and buildings or compensate the owners from loss," says an order issued today by the Dominion Railway Commission in the case of the town of Whitlaw vs. the Canadian Pacific Railway.

PROSPERITY OF HAIR DEALERS A BAD SIGN

It's a question whether the trade in what is supposed to pass as living human hair was ever as brisk as it is right now. Quantity is demanded in the quotations, and quality is a supplemental artificiality of a suppressed sensuality, and soon there is bound to be a reaction. The clothes-shop investigations keep the hand hot, doing up the "fakers" and "cheap jacks" in clothing and falls not worse than ever.

The fact is that the men at this convention and from the proceedings, it is possible to draw a composite mental picture of a Canadian editor. He is a man over the average in height, usually clean shaven, with a youthful cast of face. He has a keen alert look, a quickness in action, only equalled by his inquisitiveness of vision. He is inquisitive of nature, but under the "cover of glory" shyness, which it could take long to do it properly.

"He is a man of wit, "I haven't time to spend hours a day breaking my back." Then he is a man of his word as a rule, and is soon of Ryal's Hinderers with the ability to keep his appointments. He is a man of the strict code and ethics of his profession, and abides by them. He is a man of the strictest honor, and he cannot accept the jubilant advice to "collar fools gladly." In pursuance manner motives he is governed to himself and to others seems people and him a trusted. He speaks in true and often, but his formal country is of the practical and non-sensational kind. His notes keep speeches and involved explanations, hence his own speech is brief.

In this a correct composite picture of a Canadian editor? was asked of the C. P. A.

"Yes," he added, "only you should say in addition that he usually succeeds in marrying one of the most beautiful and talented girls in the country. As for the editor, don't believe it," he continued, look at the ladies along with our party, the wives, mothers and sisters of the editors of Canada, and the most skeptical will be convinced.—Western Editor

City Newsboy In Montreal

The Montreal Herald of July 13, contains the following:—

Having been pinched in the tenement recesses of the palace of His Majesty the Czar of Russia in an attempt to secure that monarch's autograph, and spending six months in a Siberian prison for his rash action, are only a few of the adventures which have overtaken Jake Pittsie Ryan the Edmonton newsboy, in his tramp through every country in the world.

Pittsie has done some tall "hoofing" since he set out from Edmonton in 1905 to earn a prize of $25,000 by walking around the world and supporting himself by selling newspapers. Averaging 43 miles a day in his first tour, he covered 42,000 miles in 55 months, reaching Edmonton with autographs of every sovereign in the world with the exception of the Czar of Russia.

Pittsie has the travel fever. He was in Edmonton only two years when he got business men interested again and initiated a $20,000 race around the world. This time committees had to start absolutely six hours, and on returning to their enterprising home town must show 500 bona fide simoleons in Canadian money.

The race has been on since April 26 and Pittsie is the only man left. He has tramped through all the chief cities in eastern Canada, with an occasional drop into the United States and is now in Montreal for a week, trying to raise $160 to set across the big pond. And for once in his life Pittsie is a bad dancer. Montreal may be a good place in which to sell papers, but even so it will have to go some to net this ambitious cosmopolitan the necessary profit in a week. So Pittsie can only use small contributions that local philanthropists can well spare, because, be it understood, he is perfectly at liberty to accept an occasional largesse.

The of Keeping New Citizens

How often a stranger comes among us, remains for a while and departs to some other town for one reason or another. We do not mean to take as much interest as we should in the new arrivals. They come and go as they see fit, and nobody cares a rap, apparently how they are getting along.—Windsor Record.

The Windsor Record comments with admirable point and good sense upon a weakness which is evidently a feature of more than one Canadian town. We are usually too indifferent to the stranger within our gates. We either chill him with neglect or take and unbeatity activity in separating him from his worldly possessions. If he survives the neglect or the separation process he may become a good citizen, but it is much better, morally and commercially, to give the newcomer a little kindly business encouragement and neighborly sympathy. Give the new merchant a little patronage, take a little interest in him and his affairs and make him feel heartily welcome to town. Give him a chance to make good and to prosper. Don't stand aside and watch his struggles for existance as though he were a subject of no interest.

If he comes as a resident only, pay him a little courteous attention and explain local conditions to him.

The way to build up a town or a country is to help the newcomer, the homeseek and struggling newcomer, to feel at home and to prosper. His welfare is yours, not only because he help to bring business to the town, but because he is your brother man.

"Were all medicines as meritorious as Chamberlain's Colic, Cholera and Diarrhoea Remedy the world would be much better off and the percentage of suffering greatly decreased," writes Lindsay Hecht, of Temple, Ind. For sale by All dealers.

Will Explore Northern Wilds

Frederick K. Vreeland, of Mountclair, N. J., and William P. Patterson, of Millburn, N. J., are expected in Edmonton in a few days on a trip into the extreme northern parts of Alberta and British Columbia in the interests of the Smithsonian Institute, of Washington, D. C. Their purpose is to determine the northern limits of the habitat of the big horn sheep of the Rocky Mountains; to ascertain if in the northern part of British Columbia the big horn and the Stone sheep occupy the same territory; and to capture specimens of both varieties, as also of white goat, mountain caribou and brown bear. They expect to be some three months and will travel to the end of steel on the Grand Trunk Pacific at the Fraser River. From this point they will proceed in canoes by way of the Crooked River to the Parsnip River. When the head waters of that stream are reached the explorers will make a portage to the head waters of the Peace River and there re-outfit. The two naturalists will explore the mountain wilds on both sides of the Peace River, shooting such specimens as they desire and photographing the country. They expect to get many photographs of wild life in its native haunts. The Canadian law which forbids the exportation of mountain sheep and goats and caribou has been withdrawn at the request of the Smithsonian Institute. Mr. Vreeland hunted mountain sheep and goats in the Canadian Rockies several years ago and one of the finest specimens of mountain goat to be found in America now adorns the walls of the Montclair Athletic Club.

Be a Booster

Do you know there's lots o' people
Settlin' round in every town,
Growin' like a lovely chickens,
Knockin' every good thing down?
Don't you let that kind o' ossite,
'Cause they ain't no room on earth,
You just be a booster rooster,
Crow and boost for all your worth.

If your town needs boostin' boost 'em.

Don't hold back and wait to see
If some other fellow's willin'—
Boil right in, this country's free.
No one's got a mortgage on it,
It's just yours as much as his,
If your town is slip on boosters,
You get in the boostin' biz.

If things just don't seem to suit you,
And the world seems kinder wrong,
What's the matter with a-boostin'
Just to help the thing along.
'Cause if things should stop again
We'd be in a sorry plight;
You just keep that horn a blowin'
Boost 'er up with all your might.

If you know some fellow's failin,
Just forget 'em, 'cause you have
That some fellow's got some good points
There's the one's you want to show.
'Cast your leaven out on the waters
They'll come back" 's a saying true
Mebbe, too they'll come back "buttered,"
When some fellow boosts for you.
—Exchange

Ferry for Athabaska River

The Department of Interior has purchased a ferry from the Grand Trunk Pacific contractors for use on the Athabaska River to maintain and keep open travel through Jasper Park as a public convenience. A report received at Grand Trunk headquarters for the month of June shows that during that period 66 steamers have touched at the Grand Trunk Pacific port of Prince Rupert in British Columbia and that 53 have left it, making a daily average of two arrivals and as many departures. The tonnage General in Council has ordered the establishment of the port as a shipping office

"I was cured of diarrhoea by one dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy," writes M. E. Gebhardt, Oriole, Pa. There is nothing better. For sale by—all dealers.

Public Auction

Notice

NOTICE to parents, guardians and pupils. The regulations of Provincial Board of Health provide

Section 39.—Any parent, parent or guardian, being a bona fide resident of any city, town or village, who is unable to bear the expense of being vaccinated or revaccinated, or of having his children vaccinated or revaccinated, may apply to the local board for free vaccination and shall be entitled to such free vaccination if the local board, the Medical Officer of Health, provided the claim of inability to bear the expense is satisfactory to the local board.

Section 62.—No pupil shall be admitted to any school unless and until he produces evidence of successful vaccination.

Section 251. Any person violating any of the provisions of these regulations shall on summary conviction before a Justice of the Peace or a Police Magistrate be liable to a penalty of not more than fifty dollars ($50.00) and costs.

In accordance with above section all pupils will be required to produce to the principal of the school a certificate of vaccination when ordered re-opens on Monday, August 19, 1912.

Tofield School District No. 1929

Chairman

EASY FISHING IN THIS CLASS

In Filling the Trade Thus Started the Original Grocery Is Here Obliging to the Boo Who Supplies the Goods.

Visitors in Bertie are evasive concerning baskets full of crabs' claws. The claws are cooked, and people who know of the existence of the crustacean, apparently, if he is a crawfish, of his kind?

As a matter of fact, the crabfish has no part in the business. There are claws from a salt water fish, which lives along the shores of Morocco, Spain, and Portugal. Little crab, with its one little claw, has a cave for a home, and, like all the finny denizens of the other sea, he greatly keeps his wife about inside the impregnable stronghold. But the crabfish himself and making a brave show with his big claw.

When the tide runs out, the crab fishers prowl along the beach in search for crab holes. Either the crab is deathless or he never comes back, he may forever, and thus showing therefore are few crabs, so he is still at home, and the size of the claw may indicate the size of the householder. In one case the fisherman may find a claw as large as his own fist, and in the other case a claw no bigger than a tiny. So the pincers are sent home as liberty trophies, and the crab keeps on the questionable tenure of the whole affair to the last of known.

It is fair to conclude that the crab is "mandate" about the loss of his claw, and that the experience of the hard-working fisherman, who prefers white bread to brown, is a safe guide to follow in selecting a food for daily consumption. The conclusion is borne out by certain conditions of the crab's life. The "mandate" bread is not supported by facts.

WHAT OUR TEETH SAY ABOUT US

Claim Is Made that the Human Teeth Give Fairly Straight Indication of Character and Temperament.

Among the duties which we owe to our persons, there is none more imperative than proper care of the teeth. A person having a clean, white set of teeth will certainly exude charm other than one who has not, so nice teeth have a moral advantage as well as a physical, and the physical advantage is great, for nothing so invites disease as decay.

Many a digestive trouble arises from bad teeth which are unable to perform their duty properly of masticating the food, and they are responsible for most cases of bad breath, which is a disposition on these grounds, and no assurance to the unfortunate possessor of it.

The foundation of a good or bad set of teeth is usually laid in childhood, and it should be the duty of every parent to see that the children are started in the world with as good teeth as nature has given them. Bad teeth are easier to work on than, but a few precautions in early life will prevent much misery and expense later on.

Dentists, who have made a study of the human teeth, claim that the temperament is indicated by the teeth, and probably it is, as no two people have teeth exactly alike. Very white, short, pointed teeth, like a squirrel's are said to indicate a nervous disposition and a sensitive temperament, while strong, even teeth, with square corners, are a sign of a long-lived person. Other signs are numerous, and might contain an interesting key to character study.

Friendship of Books

To fail in love with a good book is one of the greatest events that can befall us. It is to have a new friend to be by our side always, who will take us into his wider and calmer air, and will take to his wider and calmer air of rare and great talk, self-starred, the Europeans he pit per cent. Every book has its own face, Salgota, who has not twice a day and twice a night, a new face, different from any previously and the best medicine on earth.

The World's Tobacco

The world's consumption of tobacco amounts to 20,000,000 pounds annually. The United States makes the greatest proportion of this "weed," the rates being given at 2,500,000; Cuba comes next with 2,000,000; then India with 1,750,000; Great Britain follows with 1,500,000; Brazil, 1,000,000; Holland and Belgium, 750,000; Germany, 700,000; Japan, 1,750,000. The consumption in Germany, 4,000,000; the United States, Great Britain, and Japan, 2,000,000, and 2,000,000, respectively

Knowledge hath two pillars—learning and discretion. The one without the other, without his true eyes or discretion and learning is like a man blind—apt to do no good, yet able to do much. — T. Adams.

One of the most common ailments that hard working people are afflicted with is lame back. Apply Chamberlain's Liniment twice a day and massage the parts thoroughly at each application, and you will get quick relief. For sale by—all dealers.

Mr. W. S. Hannah, a farmer living near Flemington, Pa., says he has used Chamberlain's Colic, Cholera and Diarrhoea Remedy in his family for fourteen years, and that he has found it to be an excellent remedy, and takes pleasure in recommending it. For sale by—all dealers.

WHITE BREAD VERSUS BROWN

Scientific Investigation Supports the Claim That White Bread Is of Higher Nutritive Value and More Readily Digested

The nutritive value and digestibility of bread are subjects which have exercised the minds of scientists from the earliest period (says "The Hospital," London, Eng.) Hippocrates imagined that unfermented bread was necessarily bad bread. Galen supported the view of Hippocrates that bread which contained flecks of wheat gave rise to calculi. Celsius had stones on the brain, for he only "fine bread"; Carnelius Agrippa, famous in gastronomic history for his attachment to the dietetic rules of the school of Salerno, suggested that the world would be blessed and one day would be rendered free from the evils of chemotherapy commenced by Albertus Magnus. "The Corpus Juris," but it is only since the times of Liebig, when we learned to estimate the true value of an article of diet by judging it how far it fulfills the nutritive requirements of an ideal diet, that we are in a position to differentiate between good and good bread.

Between 1840 and Brunton in 1899, experimenting with samples of the best white bread and a wheat-meal bread, found so consistently as it was possible to find that the latter bread is more easily digestible than the former, and that the nutritive value of the former is greater. Subsequently more precise and elaborate experiments carried out by Atwater and Bryant in 1900 confirmed in more scientific manner the result of known.

Knowledge hath two pillars—learning and discretion. The one without the other, without his true eyes or discretion and learning is like a man blind—apt to do no good, yet able to do much. — T. Adams.

MAN HAS TOOLS UP TO DATE

Business Desire for Novelty Causes Him to Follow Example of Beaver, and Make Dams.

It is recorded of Jabesten, the son of Ahab, who reigned twelve years over Israel, that he "cut out the image of Baal that his father had made." In doing this he was an exemplary of what has been going on to various places for centuries. Taking Baal the page of history — that is, Baal for instance — we find that occasionally to earlier and earlier times the investigator and student (if) we go back to the primal ancestor, Adamite Man, we find him scantily clothed himself in the other of animals when he could get them. He had his tools, suitable in his stage of development. The idols and what their purpose up to a certain time Then men got wiser and wiser. It was not fashion. It was not the mere caprice of the moment. It was the desire for the example of Jehovah, who, when rules, "Let there be a firmament in the midst of the waters, and let it divide the waters from the waters." Jehovah also

Motoring Through Three Provinces.

Ernie Rogers Accompanied by Uncle Touring from Macgregor, Man. to Tofield, Alta.

The non appearance of Ernie Rogers of the Reliance Store, one day last week led to some enquiries as to the reason. Some would have it that a honeymoon trip interfered with the homecoming and while he father asserted the idea as preposterous for as for the time longer completely convinced Alvard to Harry the homecoming, however, asserted that the trip home by rail was off as he had purchased an F. M. F. automobile and was setting out across country from Macgregor Man. to Tofield, Alberta, accompanied by his uncle, Harry Rogers of the former place whose guest he had been during part of the last two weeks. Both Ernie and his uncle are experts with motors and will undoubtedly come through O. K. although it is a safe conjecture that with all the rain we have had the going will be tough in many places. Their arrival is awaited with interest.

New Sand-Cement Brick Plant

Secures Good Contract

Will Make 200,000 For New Hotel

The Standard is pleased to announce to its readers that Messrs. Carmack and Aralund, manufacturers of sand cement brick and building blocks, have secured the contract to supply 200,000 brick for the Royal Alexandra Hotel to be erected at the corner of 50th street and 2nd avenue. That the factory is taking shape quickly and surely is amply proven by the the fact that Mr Carmack, of the new firm, last Saturday at Viking signed a contract with J. D Hannan, the manager of the new hotel, to supply 200,000 brick for the new edifice. Furthermore, the contract specifies that the machinery of the new brick manufactory is to be on the ground ready to make brick by August 25th. Tofielders will thus realize that both the proprietors of the new hotel and the sand cement brick and block factory mean business and that within a few short weeks the wheels of industry in Tofield will be largely augmented and humming to the tune of activity and busy development.

ROSS CREEK

The football boys were rather disappointed in the fact the Chipman boys did not come out Saturday last. They offered as an excuse that some of the boys were absent for the day. They refused to set a day when we could play it on and also refused to come to any terms whatever. The junior Chipman team came out and played the home junior team so as to have a big game.

Mr. John MacPherson has one of the best stands of oats in the country while Mr. Crawford Baptist has the best wheat.

Tofield-Calgary Passenger Service

Edmonton, July 30 – During the coming fall the passenger service between Tofield and Calgary will be opened providing a new route for passengers between Edmonton and Calgary. According to W. P. Hinton, chief passenger agent for the company in a few days the time service will be extended 54 miles Mirror to Trochu, tri-weekly service being put on for the present. The line will then be in operation from Tofield southerly a distance of 121 miles.

Crop Prospect Bright

Warm smoking weather has succeeded the wet days of the last few weeks. There is every indication of a dry season for a period at least and the crops will now come along at an amazing speed. Fall and spring wheat and barley are looking out well and cutting will commence before the next fortnight is over if old Sol sticks to it and gives us bright warm days. Never before has the crop prospect in this section of Alberta been so bright. Hugh Mitchell informs us that he has 100 acres of oats which promises a yield of going 100 bushels to the acre. Farmers should see to it that they secure their home supply early as reports seem to indicate that there is a shortage in the supply this year.

P. G. E. R. Bond Issue

It is stated on good authority that the issue of bonds for the construction of the Pacific Great Eastern which will connect the G. T. P. with Vancouver is to be made through Farr & Bain. These have been guaranteed by the Provincial Government but until the prospectus as prepared in London has been approved by it no details of the debenture rate or term can be made public. Mr. P. Welch, vice president of the company states that before next autumn they will have a force of 4,000 men engaged in grading and that the whole line will be completed in two years time.

In addition to the horses mention ed in J.W. Morton's Auction Sale ad, on another page, the following will be sold, 5 milch cows and 2 breed mares.

Local and General News

W. G. Dayh of Edmonton spent a couple of days in town last week.

To Editor and Leader paid a short visit to the city last week.

Mrs. Arthur McMillan was a visitor to Edmonton last week.

Mrs. W. Hoggard returned last Saturday from a visit to the Capital.

Miss Mildred Shortreh is visiting friends at Wahsmuns this week.

Miss Vera Bickner is spending a week in Edmonton visiting friends.

Edward Price, barrister of Edmonton, was in town on Tuesday and Wednesday.

S. D. Mills, formerly of Tofield now of Wainwright, spent a few days in town last week.

J. W. Kiernan, of Athelmeau Landing, was a visitor to Tofield last week.

R. R. Williams of Edmonton, was a guest of friends in town a few days ago.

Prof. Hodgson, of the Dominion Geological staff, was a visitor to Tofield this week.

T. P. Newlanding, formerly with M. W Urquhart & Co., has accepted a position on the office staff of R. O. Bird.

Mr. and Mrs. J. E. Whitaker were in town a few days enjoying a well earned holiday from their ranch in Spirited district.

Miss Culton, of Nesbitt-Wells Co., Edmonton, is spending a couple of weeks vacation in Tofield, the guest of Miss Amy Morton.

Civic auditor, Kinsdell, is in town this week on his regular quarterly trip of inspection and auditing of the municipal books and accounts.

J. S. Johnston our new family butcher, went to Edmonton on Monday to see about bringing over his late Ledge equipment of horses and vehicles which he will use in connection with his business here.

Dr. J. W. Mc Queen, dentist, will be in Tofield, Ladimer Block, for the practice of his profession, on Monday August 19 th and will remain until Wednesday following.

W. H. Stephens of Daville until recently forest ranger in charge of Cooking Lake forest reserve was on a visitor to Tofield this week. Mr. Stephens resigned a short time ago, resignation to take effect on Sept. 1st. inst.

Many friends of Clive Richards, the dough musician as he is jovially called, will be interested in his venture this week upon the sea of matrimony. They wish him a cheery "bon voyage."

The large circle of friends of Mr. Ralph Davison are relieved and overjoyed to know that s n is progressing steadily towards recovery from a recent very severe illness which happily was of short duration.

The bright warm weather of the past week had a marked effect upon the growing crops. Many days will not elapse now until we have the merry singing of the binders as they start out to harvest the best last bumper crop yet raised in the district.

W. I. Crafts, of Crafts, Lee & Gallinger, Edmonton, brought his brother, of Minneapolis, down from the Capital a few days ago for a visit and showed him how we were doing things at Tofield. His brother-in-law was delighted at the state of busy developments on every hand.

U. A. Trout returned last week and from a trip to Medicine Hat bringing with him two cars of horses which he had purchased so far as Strathmore. On Monday morning he went to Edmonton and will bring the herd to Beaver Lake overland via the old bush line trail. Mr. Trout has some fine horses in this bunch.

OBITUARY

Miss Della Bartoose, Bardo's sweet singer, is no more. Death has taken her away and a dark pall of grief and sorrow has been cast, not only upon the Bartoose home, but, over a host friends near and far. All who knew her loved her, not only for her sweet singing, but for her warm heart and her gentle christian character.

What made this event doubly sad was that the deceased, if she had lived, was to have been married this month to Gunder Brooks, a well-known Bardo young man, who now lives in Edmonton.

Miss Bartoose had been ailing for some weeks, but none thought it very serious. Last Wednesday afternoon, while attending the wedding of Miss Alma Johnson, at Kinsman, she was taken seriously ill. Dr. Kennett, of Kinsman, and later, Dr. Stewart, of Camrose, was called in. It was found that she suffered from appendicitis and that the only chance to save her life was an operation, but she was sinking very fast. A most drooping like a broken flower, some one said of her. Early on Friday morning she was taken to the hospital at Camrose, but it was found that the sufferer was too far gone and an operation would be useless. At 11 o'clock Thursday forenoon, August 1st, she quietly passed away. The body was embalmed in Camrose and brought home on Friday. The funeral took place on Sunday, the 4th, at the Bardo church and such a funeral was never seen here before. A throng, fully 800 people filled the church to its utmost capacity, and the procession from the Bartoose home appeared for sight, the church hall began toiling and continued until the pall bearers reached the steps of the church, preceded by the casket, borne on the shoulders of six young men, all dressed in white and bearing beautiful floral wreaths. The coffin was borne slowly and solemnly up the aisle while Mr. Bower at the organ played the sweet strains of a piece of music a favorite of Miss Bartoose. The church was profusely and beautifully decorated with flowers, contributed by the young people's society, just as for a wedding. Many beautiful and costly floral designs were placed on and around the coffin, conspicuous among these was the beautiful wreath with the inscription "At my father's."

The Rev. Carlson, from Camrose, Rev. B. M. Gordon, from Ryley, the aged Rev. Grierson, from Bardo, and the Rev. Jotham, of Kingman, all took part in the service. The procession around the coffin took almost half an hour to pass during which time the Bardo band outside played the Rock Hill funeral march, the mournful strains were wafted in through the open windows, soft and subdued. The boys certainly never played better. After all had had a last look at the feature of the bereaved parents, the coffin was borne slowly and solemnly out to the strains of the "Dead March of Saul" played by Mr. Bower.

The funeral procession then moved slowly along to the cemetery preceded by the school children. As the funeral cortege entered the cemetery the band played "Nearer My Good to Thee" after the last sad rites at the grave, which was literally covered with beautiful wreaths of flowers, the band again played the "Last Tribute."

Yes, the whole funeral was a manifest tribute to the memory of Della Bartoose. She was given a funeral like a queen.

All felt the loss and all were there to show by their presence, the touch of a hand or a spoken word, that deep love they had for the department and the profound sympathy they extended to the bereaved.

Special Excursion Train to Edmonton Next Wed., Aug. 17.

What ho! Everybody will be all aboard for Edmonton Fair next Wednesday. The G. T. P. are putting on a special excursion train from Mirror to Edmonton. It will leave the G. T. P. depot at Tofield at 8.30 a. m. and arrive at the Fair Grounds, Edmonton, at 10.10 a. m.. Returning it will leave the fair grounds at 10 p. m. thus giving the Tofielders and all countrymiente a full day at the fair. Tofielders should turn out en masse and make Tofield day at Edmonton a Big Tofield Day.

$7,000 Harvesters Needed For West

Edmonton, Alta., Aug. 7—Fifty-seven thousand five hundred harvest hands, in addition to those now on the ground, will be required in the prairie provinces to gather this year's crops. This is 11,000 more than were required last year. It is estimated that the wheat crop alone will be 230,000,000 bushels. Most of the extra help will come from eastern Canada and the United States. The maximum will be sent into the fields between August 10 and 15 and the cutting should be in full swing about August 20. This program will put all grains, including oats, barley and flax in stack by September 15 in fully three weeks ahead of previous seasons. Hundreds of thousands of acres of land have been added to the wheat area in Alberta and neighboring provinces in the last 12 months and as many more devoted to mixed farming, dairying, hog and poultry raising.

MARRIED at Tofield, Alberta, on Thursday, August 1st., 1912 by the Rev. Jas. Mason of Holy Trinity Church, John Battersby Bindloss of Fortintosh, Alta., to Miss Drusilla Beacock, of Sheffield England.

MARRIED at Tofield, Alta., on Saturday August 3rd., 1912, by Rev. Jas. Mason of Holy Trinity Church, Geo. J. Felton, of Mirror Alta., to Miss Ida Nelson of Camrose Alta.

Industrial Bureau Enthusiastically Endorsed

Citizens Hold Enthusiastic Meeting in Bellamy's Hall on Saturday Last

At a mass meeting of progressive citizens held in Bellamy's Hall, last Saturday afternoon, the movement initiated a few days previously by the appointment of an active industrial campaign and in connection with it to employ an expert industrial commissioner was heartily endorsed. Mr. W. G. White, assistant industrial commissioner of Medicine Hat, was present at the invitation of the provisional committee and with a number of local men addressed the meeting. Mr. White showed himself to be in complete touch with the gas situation, ours corresponding very closely with that of Medicine Hat, and gave many practical hints of the importance of an active industrial campaign and how it should be carried on. The action of the provisional committee was enthusiastically supported and it was decided to proceed with the campaign to raise the necessary funds and to engage Mr. White as industrial commissioner if possible. It is expected that the services of Mr. White will be secured within a few days and the campaign to draw industry and Capital Tofield ward instituted without delay.

Work Commenced on Public Utilities

Initial Steps Towards Construction of Gas and Water Systems Taken

The initial steps towards the early construction of Tofield's gas and water systems were taken last week and by council in response to a mandate from the citizens in the form of a petition signed by practically every resident ratepayer in the town asking that the commissioners of the work look upon no longer than absolutely necessary and in which every ratepayer signing pledged himself to support the by-law authorizing the expenditure. Council thereupon gave instructions to Messrs Maxwell & McKenzie, the engineers, to begin their preliminary work, under the requisite quantities of piping for the mains of both systems and to proceed with the putting in of water wells.

The contract of drilling the wells was let to Handy Bros., contractors drilling at Bowden, Alta. Lots 8 and 9 block 19 G. T. P. on which were purchased for the site of the big reservoir.

The committee marks a new epoch in the history of Tofield and will be doubly interesting to all Tofielders, particularly all those who have seen since the early period of the town's existence. Mr. Dennis strong ans, of Maxwell & McKenzie staff engineers, came on the job last Monday and is outlining the necessary levels of streets and preparing the plans of the new systems.

Vaccination For Typhoid

Moose Jaw, Sask., July 30 - "Get vaccinated" is a local slogan just now. But not for smallpox this time. The typhoid season is again with the prairie cities, and the new vaccine treatment is getting such a boost in the local press that many are applying to the city hospital for inoculation. The C. P. R. employes have nearly all been treated with the exception of some of the foreign element, who stubbornly refuse to show their arm.

Three thousand inoculations have arrived from Toronto Therapeutical department of Immunology, and this will be administered free to applicants. There are ten cases of typhoid in the city at present. The health department is carrying on a vigorous campaign in favor of the vaccine.

5 Years' Rheumatism Really Cured

Your Case Isn't Likely to be Worse, and Can be Cured Quickly by Nerviline

Here is the Proof

"After having an enjoyable rest at Carrollton for years I lost it my duty to suffer persistently what pain and painful perspiration has done for me."

"I suffered intensely from rheumatism and knew not what it was to have a moment's ease."

"A friend insisted on my using Nerviline. I had no surprise a tiger-like subduing of this powerful liniment upon me and relieved the still worse in my joints. I continued to use Nerviline and was permanently cured. I am now perfectly well, and for three years have had no rheumatism at all. I have many families who have to be cured in a manner similar to mine. I would be glad to answer letters concerning my case when Nerviline has effected a full cure."—Mrs. Jas. Hamilton, Dundas and Ontario. I call Nerviline my Life Saver and would not be without it."

Nerviline is sold on sale at a shop in every town in Canada. Large family size bottle 50 cents. Trial size 25 cents. Refuse substitutes or imitations. Nerviline is a home appliance which is used by physicians in the treatment of this important system. Public Hospitals use it. Nerviline forms an important part of the royal outfit in the Royal Northwest Mounted Police. Dominion Government has adopted Nerviline as a standard remedy. Nerviline attends the home-love of hundreds of families. Nerviline is the friend of the important in today. Nerviline is the friend of the unfortunate. Nerviline is the friend of the sufferer. Nerviline has legitimate claims to being genuine.

An Entrancing Portal

It Is Entered on the Wings of Fancy

By F. A. MITCHEL

"Why don't you marry, John? It seems to me a man twenty-eight years old, with a good business, ought to be married."

"Simply! What do you take me for? Do you know what matrimony means?"

The two friends, John Morton and Edward Taylor, had walked home together from business and had dropped in at Taylor's house. The latter had begun his pipe while they were discussing the subject, whereupon they were partaking of a little refreshment. Taylor, who had married a year before, was fond of his wife and home and was inclined to be somewhat dictatorial to his friend, who was a bachelor.

"Matrimony means," he said, "that you will have to give up your bachelor habits and settle down to a steady life. You will have to be home at a reasonable hour instead of spending your evenings at your club. You will have to take your wife out occasionally instead of going to the theater with a chum. You will have to—"

"Stop! I can't stand any more. I'm not going to be married. I'm not ready for it. I'm not going to be married for years to come. I'm not going to be married at all if I can help it. I'm going to live my own life and do as I please. I'm not going to be bossed around by a woman. I'm not going to—"

"Hello, John! I didn't know you were here. Why don't you take off your hat and coat and stay to supper?"

John looked up to see Taylor's wife standing in the doorway. She was a pretty little woman, and John thought he had never seen her look prettier than she did at that moment. She was dressed in a pink gown, and her cheeks were flushed with pleasure at seeing her husband's friend.

"Why, I didn't know you were here, Mrs. Taylor," he said, rising and bowing. "I'm afraid I'm intruding."

"Not at all. Edward will be glad to have you stay to supper, I'm sure. Won't you, Edward?"

"Of course I will. John, take off your hat and coat and stay. Sit down and make yourself at home. Dinner will be ready in a few minutes."

John sat down and looked at Taylor's wife as she left the room. He thought he had never seen her look so pretty. Her pink gown was very becoming to her, and her cheeks were flushed with pleasure at seeing her husband's friend. John thought that Taylor was a lucky fellow to have such a pretty wife.

"Well, John, what do you think of her?" asked Taylor, with a knowing look.

"I think she is very pretty indeed," said John, with a sigh.

"I'm glad you think so. Now, John, I'm sure you will be glad you married when you get to know Mabel. She is a dear little girl, and I'm sure you will like her. Now, you must stay to supper and spend the evening with us. Mabel will be glad to have you stay, and I'm sure you will enjoy yourself."

"I'm afraid I'm intruding," said John, with a sigh.

"Not at all

STANDARD PRESS, Limited,

R. N. WHILLANS, Manager and Editor

TOFIELD, ALBERTA, THURSDAY AUGUST 8, 1912

HE has achieved success who has lived well, laughed often and loved much; who has gained the respect of intelligent men, and the love of little children, who has filled his niche and accomplished his task who has left the world better than he found it, whether by an improved poppy, a perfect palace or a rescued SUCCESS soul; who has never lacked appreciation of earth's beauty, or failed to express it; who has always looked for the best in others and given the best he had; whose life was an inspiration; whose memory a benediction.

ALL of Bardo section and the communities surrounding are in the week in deep gloom over the sudden demise of Miss Delia Bartness, a talented young lady just budding into womanhood. The great throng that crowded the church at Bardo on the occasion of the funeral last Monday, each face shrouded in melancholy testified to that realization of great loss and deep sympathy with the bereaved family and relatives. Miss Bartness' life was a success. Her attainments in music and song were not reserved to selfish ends. These coupled with a gentle disposition and christian character were freely given for the benefit of those about her. In the church and Sunday school as well as in a large circle of close friends where she was a leader she will be sadly missed. She was one whom her many young friends could earnestly emulate to their good. The world, in the sphere in which she moved, was the better for her having lived. She has gone to her reward. Her friends will rejoice because of it while they and the bereaved ones left to mourn will feel her loss keenly. Hers was a life of success, was sought to be glad of it. The Standard extends to the bereaved ones the entire community profound sympathy.

THE farmers of the Tofield District look with lamenable satisfaction upon the bright prospects of an abundant and bumper crop. In every section of the district the fields show splendid standing crops in full head and the grain filling out rapidly. Many fields indicate yields of from 60 to 100 bushels of oats per acre, wheat from 25 to 35 bushels per acre and approaching maturity. Fine weather favoring us for the next few weeks will put the crops well past the danger stage and the Tofield District will harvest the best crop in it's history.

THIS week marks another epoch in Tofield's bright history as a municipality. Acting unanimitately upon the unanimous mandate of the citizens in their petition of last week, council at once gave the necessary instructions to the engineers and work has commenced upon the installation of Tofield's municipally owned and controlled water systems.

That there are wideawake citizens within the community each equally zealous in promoting the towns interests is quite evident. Tofield is moving along nicely upon conservative lines. The fruits of our early labors will not be long a coming. A steady and healthy growth in population has already begun. Capital has begun to flow in. Industrial concerns are finding their way to Tofieldward. The tide is just beginning to flow. It is with a feeling of considerable satisfaction that we discern the opening of a bright and active future.

Excessive Speed Cause of Wreck

London, July 30.—Excessive speed caused the loss of the Titanic in the opinion of Lord Mersey who is chairman of the English commission of inquiry into the disaster made his report public today.

The arrangements for launching and manning great liners' lifeboats were improper, insufficient and inadequate, his lordship said that though the best drill itself was good as was the discipline at the time of the wreck, more lives would have been saved had the organization been better.

The charge that Sir Cosmo Duff Gordon bribed the crew of his lifeboat to row away from the drowning people was held to be unfounded.

The court finds also that proper watch was not kept, that the ship's boats were properly manned but that arrangements for manning them were insufficient, that the Leyland liner California might have reached the Titanic if she had attempted to do so, that the trunk followed by the Titanic was transmitted safe with proper vigilance and that there was no discrimination against third class passengers in saving of life. The court of enquiry overrules J. Bruce Ismay, chairman and managing director of the White Star line, as well as Sir Cosmo Duff Gordon from any charges of improper.

House Refuses to Abrogate Reciprocity

Washington, July 30.—The house today refused by a vote of 127 to 107 to agree to the senate's amendment to the entire tax bill providing for the repeal of the Canadian reciprocity act.

Brazeau Taker East.....

Should there be no frost until the end of August, this locality will reap one of the best crops ever had. Appearances indicate that some wheat will be cut before the end of the 15th. In the report of the stop of the Edmonton business men at Hamilton, J. D. McAllister is given credit for two fine samples of flax and Marquis wheat; no others were mentioned. As a matter of fact there were also shown fine samples of wheat from Mr. A. R. Moody's farm, cut in from Mr. Moody's crop on Mr. Reed's farm, and potatoes and flowers from Mr. Olsen's.

Miss Jessie E. Binnie and Hilda Ada are visiting friends at Killam.

W. J. McKay, Jas. Thomson and Charlie Campbell, of Edmonton, are putting up a frame house with concrete basement on J. B. Steel's farm. It is twenty years since the "pioneer" house was erected and it is likely to do duty as a granary for many years to come.

Billy McKay showed off his impending moustache some time ago. Then he improved his looks and Hilda bit, but that doesn't bother Billy at all. He laughs too when a real acquaintance, like by on the street, not recognizing him. Coming down to Mondore recently, situation also but happy in a man, who should come in at the Fort last Henry Battine, of Clapham. Squatting down beside Billy after taking a sharp look at him, he pulled out a paper and began to read. Billy chuckled to himself at this, and being very fond of a joke he quietly reached over behind him down over his knee and lambasted him good and plenty. Henry squirmed and struggled and swore but Billy whacked away. He did n't let up until he was an weak from laughing that he had to. When Beldon found out who had been taking so much liberty with him, he laughed too, loud and long, thus showing that he was quite sane, and hereby hangs a tale.

"One infallible test" said Dr. Hammond to Eli Perkins "is to get a good joke on a man—a real good one—and if he laughs at it, is it a sure sign that his mind is evenly balanced. An insane man never laughs at joke on himself."

"Later on," said Eli "I met Sam Cox at the Fifth Avenue hotel and told him about Hammond's theory."

"Let's go over to Madison Square" said Sam "and try it on George Francis Train.'

"Good" I said, and we were soon in the garden talking to the great George Francis, who sat on a bench surrounded by an immense crowd of children. Train is a vegetarian, was soon talking on his favorite subject.

"Yes" he said, "I am a vegetarian, vegetables give me health, they give me smile," he said. Then he held up his clenched fist and gradually opened it to show the flow of red blood in the palm.

"See" said Train, "that blood and nice cream from a vegetable diet."

"Yes" said Cox, "you are right, George. I notice that all the strong animals eat vegetables. There is the sturdy lion, he lives on vegetables, and the leopard and tiger too, that's that makes them strong. But sheep and geese I've on most that is what makes them so weak, and——

"I don't want to talk to a darn fool", interrupted Train, and he strode off in a huff.

Then we knew George Francis was insane.

Later on I met Chauncey Depew in a street car. Remembering the doctor's test I held up to the World and exclaimed.

I saw there's a washout on the N. Y. Central."

"A what?"

"A washout."

"A dangerous washout?"

"A bit very."

"How large is it," he said.

"Oh, ten shirts and four pair of socks" but Depew's genial laugh drowned the sentence.

"Perfectly sane," I said to myself.

Our friend E. D. of the Observer is now of the opinion that we've all sour on this side, except him self, perhaps he's right.

Aug. 4. '12

Mistakes of Editors

It is said to be an inexcusable outrage for a newspaper editor to make the slightest mistake in a statement of any sort, while professional persons, upon whose certainty of knowledge and on whose statements in regard thereto, life and death or the most important interest depend, make the most serious errors without incurring the slightest criticism, much less blame. Take the judge on the bench, whose statements are set aside and annulled by higher courts almost every day, and the judge whose judgement is reversed does not suffer in the least in public and professional estimation.

In the same way the physician who makes a wrong diagnosis of his patient's disease, administers treatment that results in death instead of cure, has none of the confidence of his patrons in his skill, and he may kill any number of persons on certificates given without incurring the slightest reprehension.

These are curious facts sure the New Orleans Picayune, but they are mentioned, not by way of censuring editorial mistakes, for there is no censure for them. It is because every individual firmly believes that he could conduct newspapers better than those who are charged with the work, while no supposed normal person would undertake to manage the functions of the judge or physician.

The only objection in a three cent Cent is that some factory is sure to make a cigar bad enough to fit in to poke.—Washington Star.

In this age of high living it is a little different to see just what the nutriments will melt as for these new half cent pieces.—Washington Post.

As a byproduct the coinage of three cent pieces may increase church collections, while the half cent piece may make nipping a fine art.—New York Tribune.

In Pursuit of Beauty

By CLARISSA MACKIE

Dan Forsythe rode recently along the boulevard of Montmorency with Miss Lucy Cyclone. From the rise of ground at the southern side of Auteuil the road descends in a long line half of the reach house that stood Lilac hillsides.

Even on Dan rode slowly along the boundary he saw a horseman in the distance and recognized him as Fortun. The latter was approaching the line from the rear, reach at as easy pace and, as Dan thought, with all the confidence of a newly accepted lover who knows that his sweetheart is waiting for him.

Rather than have his secret discovered—and even upon loyal foot in the ratio cousin, even though the popularities be commonplace enough—Dan hurriedly reined the cotrowned trees and the road descended among the woods where he soon he stood. He climbed it. Through he was not sure that the rusty horse came to a standstill on the summit, he thought it prudent to ride his escaped quarry. Then he pounded his horse's flanks with his heels.

Dan looked down and saw something that made him stop short and that caused his heart, leaving his face white as

A pretty sort gray felt hat with a long white feather lay in the road where was trampled in the grass. A little gray glove lay near by.

Those had belonged to Kitty Kinkie

Where was Kitty Kinkinen now? Never once had Dan Forsythe an absolutely simple and unpresentcious. This was modest of a white frock from bottom to the way down the front. Between the two edges was a broad collar and cuffs head embroidered in black wool ratine enlivened with touches of pink. Under the waistline Lucie Aner made a Chamberlain. The dear mind of the Chamberlain is a pink sash. It is the child of Noble of his cognomen

WHAT VOTES HAVE NOT DONE.

Women Without Ballots Have Been Good at Municipal Housekeeping.

"Men for generations have prated about what the ballot meant do," says Anna Steeves Richardson in McClure's Magazine. "Women, have written it sentiment and professional men, armed with the ballot, have not been able to keep either clean and healthful nor to put an unmenacing end to disease.

"In the refined quarters or effectively policed districts of the cities of men, have become, like crapulent, perverted and unsanitary as the slums. Clubs, taverns, streets, dirty and often dangerous, are the places to which the ballot will discover that she must follow man to keep him decent. Municipal servants take the household kitchen and bathroom for orders of the day.

"All these she may even have to rely on her absence and tackle the work in the slums. Then she will be called a reformer or the fighter fractions—in spectacles, and unsexed. Yet the fact remains, however, the streetcar will follow the ballot, and that it is quite as picturesque and genetic, though less thrilling, to see housewives dragging the hot backward and downstairs, than to see the same nothing over her city, are or finally."

Sashes and Streamers.

A charming sash is the only touch of liberty suits that felt some distance from the waistline may be worn and fastened with a short little bow. The sash streamers or the fighter fractions—in spectacles, and unsexed. Yet the fact remains, however, the streetcar will follow the ballot, and that it is quite as picturesque and genetic, though less thrilling, to see housewives dragging the hot backward and downstairs, than to see the same nothing over her city, are or finally."

Dan tried and stamped to roll himself out of reach of his vicious hoofs, and then scrambled to his feet with the little bloodshot eyes she had scrambled it had been made by the wearer. Dan had climbed up somewhere; he had lost his hat, and his face was so discovered her retreat.

As the fever passed he began to wonder how he got hat and glasses into the ground, and he could not remember what would be her own fate if she lost not had the correspondence with her.

"I am so glad you came," she smiled at him. "I was afraid you would not, and then he added rather awkwardly, for he had known Kitty only two days, "I was so surprised it seems one came to rescue me." Then he remembered that Fortun rid ing toward your house.

"Oh, no he was!" she said quickly. "He was riding to meet me."

"Oh, then, catch me!" she screamed as she ran.

Dan lifted his strong arms and caught her. She was not a bit afraid, and even for them to stand there in that could not be seen from the road. Kitty Cyclone was losing his wind now, and this time the fairies, straining eleven in his throat as he sprang forward, leap on long, and caught her in his arms. Her long locks dropped over his face, and he kissed her lips, many hair touched his lips. His eyes tightened and he did not see even to object.

It was very wonderful.

"Why," he whispered boldly, "do you ride so fast?"

Kitty's chest—yes, the rosy cheek of tonight's Kitty Kinkinen—came closer, closer and nested against his own.

"Oh, Dan; you are such a shy coach!" she answered.

A little later, while her sweet eyes were hidden on Dan's broad shoulder, Dan's receiver spat forth a letter that burst itself in your Dorothy heart. And Dan was there to comfort Kitty, for

"DON'T BE AFRAID, MISS DOTTY LILLIE," SAID HE.

as the cried Cyclone excitedly discovered that the horse had run away and was being borne like a black whirlwind.

Dan flew across the road and overtook the mare with lightening threat that a middle was acted as Fortun had done. That sweet one of two things—either Dorothy had heard from the reach before his interview and recognized—or Fortun had written her, and she had answered to be in pursuit of him—he had thrown Kitty and her letter had been where, how or dying.

Fortun's mare stood and torn over the plain for twenty miles before Dan could overtake her. Dan remembered that he had swerved to the right almost instantly after he had left the road. Fortun, with the letter in his pocket, still ahead of him, and there was no pursuit until all was lost.

Hilary was the gardener, and he answered to be in pursuit of him—or

BY-LAW NO. 74, OF THE TOWN OF TOFIELD.

A By law to provide for the digging of a ditch in the town of Tofield according to a plan prepared for the Council by R. F. Mitchell, Esquire, and to authorize the issuing of debentures of the said Town to the amount of One Thousand Dollars ($1000.00) for the purpose of raising the sum required therefor

WHEREAS the Council of the Town of Tofield considers it desirable to dig a ditch according to plans drawn for the said Council by R. F. Mitchell, Esquire, for the purpose of draining part of Tofield Heights Subdivision, Rosedale Subdivision and Government Road

AND WHEREAS the estimated cost of constructing the said ditch is $1000.00.

AND WHEREAS it is expedient to borrow on the credit of the Municipality the said sum of $1000.00.

AND WHEREAS the amount of the whole rateable property of the Town of Tofield, according to the last revised assessment roll is $(623918.00).

AND WHEREAS the amount of the existing debenture debt of the Town is $(62751.61), none of which sum is for local improvement debts secured by special assessments.

AND WHEREAS the total amount to be raised annually during each of the said ten years for payment of the said debt, together with interest thereon at the rate of 6 per cent per annum, payable annually is Five Hundred and Thirty-five Dollars and Eighty-seven Cents ($535.87).

AND WHEREAS the rateable property in the Town according to the last revised assessment roll is $(623918.00).

AND WHEREAS the amount of the existing debenture debt of the Town is $(62751.61), and whereas none of the principal or interest of the existing debentures debt is in arrear.

THEREFORE the Municipal Council of the Town of Tofield enacts as follows:-

(1) The said debt and debentures hereinafter mentioned, shall bear interest at the rate of six per cent per annum, payable yearly. The debentures shall be dated on the day of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal amounts in each of the ten years next succeeding the said date, such amounts being made up of the aggregate sum due each year on account of principal and interest.

(2) Each of the said debentures shall be signed by the Mayor of the said Town, or by some other person authorized by by-law to sign the same, and shall be countersigned by the Treasurer, who shall attach thereto the corporate seal of the Town.

(3). During the ten years next succeeding the date of the issue of the debentures to be issued as aforesaid there shall be annually raised by special rate on all the rateable property in the said Town, the sum of ($535.87) for the purpose of paying the debentures falling due in each of the said years, respectively.

(4) Every debenture to be issued hereunder shall contain a provision to the following effect:-

This debenture or any interest therein shall not, after certificate of ownership has been endorsed thereon by the Treasurer of the Town, be transferable except by entry by the Secretary-Treasurer in the Debenture Register of the Town.

(5). The votes of the burgesses of the said Town shall be taken on the by-law at the following time and place, that is to say: at the Town Hall on Friday, the Thirtieth day of August, next, commencing at the hour of ten o'clock in the forenoon and continuing till seven o'clock in the afternoon of the same day, by the following returning officer, namely, Samuel Nicholson, Secretary-Treasurer of the Town.

(6). On the twenty-ninth day of August, 1912, the Mayor of the said Town shall attend at the Council Chamber at ten o'clock in the forenoon to appoint persons to attend at the polling place aforesaid, and at the final summing up of the votes by the returning officer, on behalf of the persons interested in and promoting or opposing the passing of this by-law, respectively.

(7) The returning officer shall attend at his office in the Town Hall on the fourth day of August, 1912, to sum up the number of votes for and against this by-law.

(8) The vote of the burgesses shall be taken on the by-law at the following time and place, that is to say: at the Town Hall on Friday, the thirtieth day of August, 1912, commencing at the hour of ten o'clock in the forenoon, and continuing till seven o'clock in the afternoon of the same day, by the following returning officer, namely: Samuel Nicholson, Secretary-Treasurer of the Town.

(9). On the twenty-ninth day of August, 1912, the Mayor of the said Town shall attend at the Council Chamber at ten o'clock in the forenoon to appoint persons to attend at the polling place aforesaid, and at the final summing up of the votes by the returning officer, on behalf of the persons interested in and promoting or opposing the passing of this by-law, respectively.

(10). The returning officer shall attend at his office in the Town Hall on the fourth day of August, 1912, to sum up the number of votes for and against this by-law.

(11). This by-law shall take effect on the day of the final passing thereof.

Dated at the Town Hall in the Town of Tofield, this sixth day of August, A. D. 1912.

J. O. LETOURNEAU, Mayor.

S. NICHOLSON, Secretary-Treasurer

NOTICE

Public notice is hereby given that the above is a true copy of a proposed by-law which will be finally passed by the Council of the Town of Tofield in the event of the assent of the burgesses being obtained thereto, within four weeks of the voting thereon, and upon the due and proper passing of which by-law, the proceeds of the said debentures to be applied for the purpose aforesaid, and no other purpose;

AND WHEREAS the said indebtedness is to be spread over a period of ten years;

AND WHEREAS the total amount of the existing debenture debt of the Town is $(62751.61), none of which sum is for local improvement debts secured by special assessments.

AND WHEREAS the amount of the whole rateable property of the Town of Tofield, according to the last revised assessment roll is $(623918.00).

AND WHEREAS the annual amount to be raised annually during each period of ten years for payment of the said debt, together with interest thereon at the rate of 6 per cent per annum, payable annually is Five Hundred and Thirty-five Dollars and Eighty-seven Cents ($535.87).

AND WHEREAS the rateable property in the Town according to the last revised assessment roll is $(623918.00).

AND WHEREAS the amount of the existing debenture debt of the Town is $(62751.61), and whereas none of the said Town in the said debt is in arrear.

THEREFORE the Municipal Council of the Town of Tofield enacts as follows:-

(1) The said debt and debentures hereinafter mentioned, shall bear interest at the rate of six per cent per annum, payable yearly. The debentures shall be dated on the day of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal amounts in each of the ten years next succeeding the said date, such amounts being made up of the aggregate sum due each year on account of principal and interest.

(2) Each of the said debentures shall be signed by the Mayor of the said Town, or by some other person authorized by by-law to sign the same, and shall be countersigned by the Treasurer, who shall attach thereto the corporate seal of the Town.

(3). During the ten years next succeeding the date of the issue of the debentures to be issued as aforesaid there shall be annually raised by special rate on all the rateable property in the said Town, the sum of ($535.87) for the purpose of paying the debentures falling due in each of the said years, respectively.

(4) Every debenture to be issued hereunder shall contain a provision to the following effect:-

This debenture or any interest therein shall not, after certificate of ownership has been endorsed thereon by the Secretary-Treasurer of this Town, be transferable except by entry by the Secretary-Treasurer in the Debenture Register of the Town.

(5). The votes of the burgesses of this Town be taken on the by-law at the following time and place, that is to say: at the Town Hall on Friday, the thirtieth day of August, 1912, commencing at ten o'clock in the forenoon and continuing till seven o'clock in the afternoon of the same day, by the following returning officer, namely: Samuel Nicholson, Secretary-Treasurer of the Town.

(6). On the twenty-ninth day of August, 1912, the Mayor of the said Town shall attend at the Council Chamber at ten o'clock in the forenoon to appoint persons to attend at the polling place aforesaid, and at the final summing up of the votes by the returning officer, on behalf of the persons interested in and promoting or opposing the passing of this by-law, respectively.

(7) The returning officer shall attend at his office in the Town Hall on the fourth day of August, 1912, to sum up the number of votes for and against this by-law.

(8). The vote of the burgesses shall be taken on the by-law at the following time and place, that is to say: at the Town Hall on Friday, the thirtieth day of August, 1912, commencing at ten o'clock in the forenoon, and continuing till seven o'clock in the afternoon of the same day, by the following returning officer, namely: Samuel Nicholson, Secretary-Treasurer of the Town.

(9). On the twenty-ninth day of August, 1912, the Mayor of the said Town shall attend at the Council Chamber at ten o'clock in the forenoon to appoint persons to attend at the polling place aforesaid, and at the final summing up of the votes by the returning officer, on behalf of the persons interested in and promoting or opposing the passing of this by-law, respectively.

(10). The returning officer shall attend at his office in the Town Hall on the fourth day of August, 1912, to sum up the number of votes for and against this by-law.

(11). This by-law shall take effect on the day of the final passing thereof.

Dated at the Town Hall in the Town of Tofield, this sixth day of August, A. D. 1912.

J. O. LETOURNEAU, Mayor.

S. NICHOLSON, Secretary-Treasurer.

NOTICE

Public notice is hereby given that the above is a true copy of a proposed by-law which has been introduced and which will be finally passed by the Council of the Town of Tofield, in the event of the assent of the burgesses being obtained thereto, within four weeks of the voting thereon, and upon the due and proper passing of which by-law, the proceeds of the said debentures to be applied for the purpose aforesaid, and no other purpose;

AND WHEREAS the said indebtedness is to be spread over a period of ten years;

AND WHEREAS the total amount of the existing debenture debt of the Town is $(62751.61), none of which sum is for local improvement debts secured by special assessments.

AND WHEREAS the amount of the whole rateable property of the Town of Tofield, according to the last revised assessment roll is $(623918.00).

AND WHEREAS the annual amount to be raised annually during each period of ten years for payment of the said debt, together with interest thereon at the rate of 6 per cent per annum, payable annually is Five Hundred and Thirty-five Dollars and Eighty-seven Cents ($535.87).

AND WHEREAS the rateable property in the Town according to the last revised assessment roll is $(623918.00).

AND WHEREAS the amount of the existing debenture debt of the Town is $(62751.61), and whereas none of the said Town in the said debt is in arrear.

THEREFORE the Municipal Council of the Town of Tofield enacts as follows:-

(1) The said debt and debentures hereinafter mentioned, shall bear interest at the rate of six per cent per annum, payable yearly. The debentures shall be dated on the day of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal amounts in each of the ten years next succeeding the said date, such amounts being made up of the aggregate sum due each year on account of principal and interest.

(2) Each of the said debentures shall be signed by the Mayor of the said Town, or by some other person authorized by by-law to sign the same, and shall be countersigned by the Treasurer, who shall attach thereto the corporate seal of the Town.

(3). During the ten years next succeeding the date of the issue of the debentures to be issued as aforesaid there shall be annually raised by special rate on all the rateable property in the said Town, the sum of ($535.87) for the purpose of paying the debentures falling due in each of the said years, respectively.

(4) Every debenture to be issued hereunder shall contain a provision to the following effect:-

This debenture or any interest therein shall not, after certificate of ownership has been endorsed thereon by the Secretary-Treasurer of this Town, be transferable except by entry by the Secretary-Treasurer in the Debenture Register of the Town.

(5). The votes of the burgesses of this Town be taken on the by-law at the following time and place, that is to say: at the Town Hall on Friday, the thirtieth day of August, 1912, commencing at the hour of ten o'clock in the forenoon and continuing till seven o'clock in the afternoon of the same day, by the following returning officer, namely: Samuel Nicholson, Secretary-Treasurer of the Town.

(6). On the twenty-ninth day of August, 1912, the Mayor of the said Town shall attend at the Council Chamber at ten o'clock in the forenoon to appoint persons to attend at the polling place aforesaid, and at the final summing up of the votes by the returning officer, on behalf of the persons interested in and promoting or opposing the passing of this by-law, respectively.

(7) The returning officer shall attend at his office in the Town Hall on the fourth day of August, 1912, to sum up the number of votes for and against this by-law.

(8). The vote of the burgesses shall be taken on the by-law at the following time and place, that is to say: at the Town Hall on Friday, the thirtieth day of August, 1912, commencing at ten o'clock in the forenoon and continuing till seven o'clock in the afternoon of the same day, by the following returning officer, namely: Samuel Nicholson, Secretary-Treasurer of the Town.

(9). On the twenty-ninth day of August, 1912, the Mayor of the said Town shall attend at the Council Chamber at ten o'clock in the forenoon to appoint persons to attend at the polling place aforesaid, and at the final summing up of the votes by the returning officer, on behalf of the persons interested in and promoting or opposing the passing of this by-law, respectively.

(10). The returning officer shall attend at his office in the Town Hall on the fourth day of August, 1912, to sum up the number of votes for and against this by-law.

(11). This by-law shall take effect on the day of the final passing thereof.

Dated at the Town Hall in the Town of Tofield, this sixth day of August, A. D. 1912.

J. O. LETOURNEAU, Mayor.

S. NICHOLSON, Secretary-Treasurer.

NOTICE

Public notice is hereby given that the above is a true copy of a proposed by-law which has been introduced and which will be finally passed by the Council of the Town of Tofield, in the event of the assent of the burgesses being obtained thereto, within four weeks of the voting thereon, and upon the due and proper passing of which by-law, the proceeds of the said debentures to be applied for the purpose aforesaid, and no other purpose;

AND WHEREAS the said indebtedness is to be spread over a period of ten years;

AND WHEREAS the total amount of the existing debenture debt of the Town is $(62751.61), none of which sum is for local improvement debts secured by special assessments.

AND WHEREAS the amount of the whole rateable property of the Town of Tofield, according to the last revised assessment roll is $(623918.00).

AND WHEREAS the annual amount to be raised annually during each period of ten years for payment of the said debt, together with interest thereon at the rate of six per cent per annum, payable annually, is ($5,743.94).

AND WHEREAS the rateable property in the Town according to the last revised assessment roll is ($623,918.00).

AND WHEREAS the amount of the existing debenture debt of the Town is $(62751.61), none of which sum is for local improvement debts secured by special assessments.

THEREFORE the Municipal Council of the Town of Tofield enacts as follows:-

1. The sum of $43,000.00 shall be expended by the Council of the Town of Tofield, for the purpose of constructing waterworks system in the Town according to plans and specifications prepared for the Council by Messrs. Maxwell and McKenzie, for the purposes of fire protection and the supplying of water to individuals and corporations either within or without the Town limits, for domestic, manufacturing or other purposes, and for acquiring such lands, plant and equipment, and for undertaking the construction of reservoirs, tanks, the laying of mains, digging wells, and the performing of all other work necessary there for, and in acquiring all lands required therefor.

2. The said debt and the debentures issued therefor, shall bear interest at the rate of six per cent. per annum, payable yearly. The debentures shall be dated on the day of the issue thereof, and shall be payable at the Merchants Bank of Canada in the said Town of Tofield, in equal amounts in each of the twenty years next succeeding the said date, such amounts being made up of the aggregate sum due each year on account of principal and interest.

3. Each of the said debentures shall be signed by the Mayor of the said Town, or by some other person authorized by by-law to sign the same, and shall be countersigned by the Treasurer, who shall attach thereto the corporate seal of the Town.

4. During the twenty years next succeeding the date of the issue of the debentures to be issued as aforesaid there shall be annually raised by special rate on all the rateable property in the said Town, the sum of ($3,440.00) for the purpose of paying the debentures falling due in each of the said years, respectively.

5. Every debenture to be issued hereunder shall contain a provision to the following effect:-

This debenture or any interest therein shall not after certificate of ownership has been endorsed thereon by the Secretary-Treasurer of this Town, be transferable except by entry by the Secretary-Treasurer in the Debenture Register of the Town.

6. The votes of the burgesses of the said Town shall be taken on the by-law at the following time and place, that is to say: at the Town Hall on Friday the thirtieth day of August, 1912, commencing at ten o'clock in the forenoon, and continuing till seven o'clock in the afternoon of the same day, by the following returning officer, namely: Samuel Nicholson, Secretary-Treasurer of the Town.

WOES OF A HOBO.

Checkers' Imagination Loses Him a Job.

AN UNGRATEFUL PLUTOCRAT.

He Isn't Appreciative When Checkers Presents a Worn, and So the Latter Goes in Search of "Sore Thing" Poker Game.

By H. QUAD.
(Copyright, 1911, by Associated Literary Press.)

I HAD been waiting for a freight for a week when he beckoned me out to the box and said:

"Checkers, according to the plans you've been telling slightly, you have hired six men in the last five years."

"Seven, sir," I corrected.

"Oh, yes, seven. Um-h. Let's see now. Had eleven brothers."

"And three sisters."

"You've turned over passenger trains from construction?"

"Four a night, sir."

"And three others from being held up?"

"Just so."

"And been in eleven different jails."

"Eleven in the number."

"And you've been in Africa, India, South and North and Central America?"

"Just so."

"And you've shot three and three, captured broken and shacks and been a devil of a feller?"

"Correct, sir."

"And now you're going to an island in the south sea to be a king."

"Right about, sir. But what of all that?"

"I'll tell you what of it. You are an infernal liar, but my wife overhears your yarns for truth and insists upon

"YOU MUST STOP TO ATE DOWN OR IT WOULD CHOKE."

you as a guest. Last night, after you had crowed lying and gone to bed, she said that you were a grander hero than she had ever read or heard of."

"Well?"

Taking the Chesnuts.

"You've got to go. If you are a hero then it becomes me not a grandreiver. I am going to have my wife nothing to run off to the sea to be a queen, and that will be the result if you stay on. I'm a man that don't take chances."

"I cannot see curse critters," I said after a bit.

"No, sir, sah, but they are!" he replied.

"I should never think of sleeping with your wife on, as you say, my life before that I were going to. I can't help being a born liar."

"I know you can't, but I'll pay you well and you can pay along. I hadn't anything else to do this winter, and I'm not going to."

"Johnny" caused the stoker, for here was a chance for a crowd pleaser.

"Well, as he did," garnered Johnny from the cab.

"Johnny" caused the stoker, for here was a chance for a crowd pleaser.

"Well, as he did," garnered Johnny from the cab.

"Johnny" caused his mother from the ground.

"Oh by," winked the boy, "I said—"

"John," said the fireman severely, "envy your mother."

And Johnny left crying as he went, "I was only going to say that he had a crazy notion on."—Ladies' Home Journal.

KEEP A PET SNAKE.

Then You Won't Need a Cat or a Dog to Keep Down the Rats at Home.

It has been suggested by a Pretoria correspondent that snakes should be kept in the house instead of an cat or dog for the purpose of keeping rats at a distance away.

It is not new, for in the days of the Romans many pretty tales have by the Roman many pretty tales have by the Roman writers concerning this purpose. Since those early times however the snake has been somewhat neglected by the rat or dog, and the modern snake is not, it is true, nothing but specimens of learning for anyone to be curious, learned, and harmless. The rat, however, is not to be trusted. The rat, however, is not to be trusted. The rat, however, is not to be trusted

The Care of Cream For Buttermaking

It is a recognized fact that the price received for butter is very largely influenced by its quality and this is the greatest measure determined by the care given the cream from which it is made. This matter is recognized by the Department of Agriculture at Ottawa as being of vital importance to the creamery patrons and buttermakers of Canada; consequently there has been prepared by the chief of the Dairy Division, under the direction of the Dairy Commissioner, a bulletin on "The Care of Cream for Buttermaking. It commences with the health and feeding of the cows and follows the subject through the various stages of milking, separating, storing and delivering of cream, each section being dealt with from the standpoint of the man on the job rather than the official in an office. The results of experiments conducted on farms and creameries are given to show the advantages of separating a rich cream properly and cooling and storing it, as well as the making of frequent deliveries. The bulletin says:—"Keeping the cream longer than two days at the farms has, no doubt, much to do with the old cream flavor so common in gathered cream butter, and we can scarcely expect to have this defect remedied so long as cream is gathered less than three times each week.

The bulletin, which is No. 32 of the Dairy and cold storage series, concludes with a summary of important points for patrons, creamery owners and buttermakers. Sufficient copies have been issued to supply each creamery with a copy for each patron. Requests for supplies for this purpose should be sent to the Dairy and Cold Storage Commissioner, while individual copies may be received from the Publications Branch of the Department of Agriculture at Ottawa. This bulletin is issued by authority of the Hon. Martin Burrell, Minister of Agriculture.

Duke to Open New Parliament Buildings

Edmonton, Aug. 7—When the Duke of Connaught, governor-general of the Dominion of Canada, arrives in Edmonton the morning of September 3, the new parliament building, erected at a cost of $1,500,00 will be in readiness for occupancy. His Royal Highness will remain in Edmonton until the night of September 4th. One of the functions in his honor will be the governor's ball, for which invitations will be issued in a few days. Mayor George R. Armstrong is arranging for street decorations. Edmonton will be in gala attire during the governor's stay and the representative of the Crown will be received and entertained by officials of the city and province. The Duke will make a short stay at Red Deer on September 5, arriving at Calgary the same afternoon, going thence to Gleichen on September 7 to officialy open the irrigation works near that town. Afterwards he will visit Macleod, Lethbridge, Medicine Hat and tour British Columbia.

Local and General News

How the grain ruslers.

Soon the farmers will be rustling to gather in the harvest.

Fall wheat cutting this week at Stirrett Bros.

G. A. Trost starts harvesting this week. He has a fine crop.

Miss Vonah Bichner is visiting friends in the Capital

G. A. Trost and family will move to Edmonton shortly.

Mr. Wood, Mrs. Hopgood's father, is unwell at her home.

W. Powell is building a residence on 8th avenue east.

J.D. Kennedy and S.A. Hall are off on a holiday trip to the coast.

Mrs. R. Logan and Mrs. Fiendlie are spending a holiday at Banff.

Robert Logan left the other day on a trip to Vancouver.

Miss Isobel Whillems is the guest of Miss Margaret Gehl at the Capital.

Born on Saturday, August 10th, at Tofield, to Mr. and Mrs. N. H. Smith, a son.

Guy Orsen is building a residence on 2nd ave. east a few doors east of Dr. Hammond's.

Mrs. McKiernan of Strathcona was the guest last week of her daughter, Mrs. L. Abbott.

Mr. Henry Wood of Lakeshore was a visitor to Tofield on Monday.

Mrs. Cushing of Calgary was the guest of her sister, Mrs. L. Abbott, last week.

R. Sherbeck and family moved out on their farm northwest of town last Friday.

Mrs. J. W. Morton went to Edmonton on Monday. She is entertaining some fine specimens of her fancy work at the Edmonton fair

Constable A. Moores, of the R. N. W. M. P., now stationed at Edmonton detachment, was the guest of Miss Tofield last week.

The contract for the drilling of gas well No. 2 was let last week by Cantrell to the Northwest Drilling Co. of Calgary.

Miss Mildred Sherbeck is the guest of her uncle, A. C. Fraser, of Edmonton, at Whitemore lead creek and this week.

Mrs. Hammond, of Edmonton, came down to Tofield last week on a short visit to her sons, the doctor and Crispen.

Mr. Davis, of Medicine Hat, was a visitor to Tofield last week. Together with his partner he is boating a foundry and machine shop at Tofield.

Mr. White has just returned from Tofield, and is most enthusiastic over its outlook. The village, for that's what it practically is yet, has leases, stocks for lawn cotta and brick work, mitts for glass in a boundance, coal, two big mines, being already worked a developed agricultural country surrounding, one gas well, and two to be drilled. Besides that they have two beautiful lakes, one 20 minutes walk from the Court House and another seven miles away.

The cross there are excellent, by ways. The bar is so high it hides the cattle.—Medicine Hat News.

Anthony Kallal, Jerseyville, Ill., arrived in Tofield last Sunday morning. Mr. Anthony visited Tofield a year ago and was so well pleased that he could not stay away.

In spite of occasional showers during the past two weeks, good progress has been made by the farmers in haying. Hay is plentiful this season even though the lowlands are pretty wet.

W.T. Saunders late of Leduc has become a Tofielder having purchased two acres from W.F. Wood just north of the latter's residence north of town. Mr. Saunders will run a market garden. He is building a residence etc. at once.

Bessie Rees, of Brooks, to whom was awarded the contract of putting down the water wells in Tofield for the water system arrived last week and at once got busy. They are drilling this week on block 19.

Mrs. Geo. Cushman, who has been in the hospital at Edmonton for the past few weeks, where she underwent an operation, has so far recovered as to be able to leave the hospital and is temporarily staying with friends prior to leaving for home.

J. D. Hannan and family, of Vulcan, will shortly move to Tofield to reside. They have taken rooms in the Reliance Block pending the completion of construction of the New Royal Alexandra Hotel of which Mr. Hannan is one of the proprietors.

Mr. and Mrs. A. Bartness wishes hereby sincerely to thank all those who aided and showed their sympathy to their daughter, Della during her illness and also to the many friends who assembled last Monday to pay her the last tribute.

Mr. White, Tofield's New Industrial Commissioner

Secretary of the Bat's Bureau Leaving the City—Gives an Outline of the Blessings Which Have Been Bestowed on Centre he will in Future Boost

Industrial Bureau Secretary W. G. White will leave in a week or so for Tofield, Alberta, where he will take over the position of Industrial Commissioner.

Medicine Hat is taking a good man. He has done some wonderful work for the Hat; and had he stayed there is no doubt but what he would have done better. Perhaps his best effort was on the little booklet he compiled for the bureau, and which is now contained in almost all even American and the British fakes. It is one of the best advertising freelances ever sent out of a city and by far the best sent out of the Hat.

Dr. Terwilleger is attending the sessions of the Canadian Medical Association which is meeting this week at Edmonton.

W.C. Swift left last Monday on a trip to Vancouver in company with his father who has been visiting him for some time

Large crowds from Tofield and vicinity purpose going to Edmonton on Wednesday's special G.T.P. excursion train to take in the Fair.

Mrs R. N. Whillans and daughter Miss Jean, went to Edmonton last Monday evening to spend a few days.

Jens Mc Mullen, late of Cooking Bros., Edmonton, has taken a position on the City Hall staff in Tofield and assumed his new duties last Monday morning.

Miss Gertie Emery has been visiting her uncle at Walmwright, Writing home, she reports a severe lambstorm in that section a few days ago.

Tofield Lodge No. 63, I. O. O. F. meets next Friday evening at 8.30 p.m. Visiting Bros cordially welcome. The business degree will be put on.

J. W McQueen dentist, of Wainwright, will be at Kaineyo next Monday, Tuesday and Wednesday for the practice of his profession.

Bessie Rees, of Brooks, Alta. arrived last Friday with their well drilling machine and at once set to work drilling water wells for the new water system about to be installed.

Train Agent Loomis' residence on 3rd ave. east, east of A.A. Harrison's house is rapidly approaching completion. This is quite an attractive building of cottage design.

Telephone Construction Being Rapidly Pushed

Hello Girls at Tofield Central Getting Busier Every Day. Three New Long Distance Lines Erected. Two New Rural Lines. 100 New Phones.

Telephone construction in the Tofield district has been active during this season so far and indications point to considerable further activity during the next two months. The statement made through the Standard last spring that Tofield will be one of the best telephoned towns in the province this fall bids fair to be carried out to the letter. Not only has there been a double long distance copper line erected from Edmonton to Tofield. It has been extended east east to Viking and this was opened for business a few days ago. Tofield now becomes the calling station through which business arising from all points east and west on the G. T. P. east of Edmonton must pass and be handled.

A third long distance copper line is being erected from Tofield to Vegreville. This is carried east on the poles of the present line to a point two miles north of Ryley from whence it runs northeast to Vegreville. It will be only a short time when this line will be open for business. All business arising from the C. N. R. for the G. T. P. and south Alberta will then pass through the Tofield office.

A fourth long distance copper line is being constructed through the country traversed by the Tofield-Calmar branch of the G. T. P. and will be completed very soon from Tofield through Kingman, Camrose and other points along this line as well, but this will not be in to Calgary this year.

Next to the extensions of Tofield's telephonic facilities limited to the long distance lines being constructed out from here. A third gang is now busy putting in 100 additional rural phones. Two new rural lines take the greater part of these, one towards Kingman and another west past A. W. Hunt's to Yagar's while several new phones are being put in on the existing rural lines down Banks and Grand Forks way.

Already the business at Tofield central has exceeded the capacity of our operator. On Monday morning last two operators were put on, each relieving the other in shifts covering the day.

The progress of telephone construction in the Tofield district only reflects the progress and development going on so rapidly in all other lines. As has been said very appropriately, Tofield district is only at the awakening of a bright and prosperous future ahead.

R. N. WHILLANS, Manager and Editor

TOFIELD, ALBERTA, THURSDAY AUGUST 15, 1912

W. G. WHITE, late secretary of the Industrial Bureau of Medicine Hat, and who has been secured by Tofield's Industrial Bureau as it commissioner, was again a visitor to Tofield last week end. He will assume his duties here on next Monday, having to return to the Hat in the meantime to arrange fully the business of the Industrial Bureau there to date.

That Mr. White is just such a man as Tofield has been looking for since the idea of our Industrial Bureau was conceived no doubt, rests in the minds of the Industrial Committee who attracted from the Medicine Hat papers published on the see columns in this issue tell clearly of his success there and the esteem in which he held by those in whose interests he has been laboring. To fielders will undoubtedly stand as one man behind Mr. White who has already proved himself a capable official. The News of the Hat, has the following to say of Mr. White, which will be of much interest to our readers.

Secretary White of the Industrial Bureau, has resigned. He goes to Tofield as their industrial commissioner It is Tofield's gain and Medicine Hat's loss. Mr. White was a good man, and one that will be hard to replace.

Mr. White will put the working of the Industrial Bureau in fine before he leaves. Who will carry on the work? Will it be carried on after he departs with the same zeal with which he carried it on? It is of vital importance that such they should be the case. Medicine Hat's industrial exhibition is in reality just launched. There are, however, some serious obstacles to be overcome before the fight can be won successfully.

Here the News intends to indulge in a few plain statements of what it believes to be facts. They are made in the hope that they may goad the citizens on to carry on the good work as in the past.

We understand that the Industrial Bureau is nearing the end of its finances. In other words they have or elected practically all the money that they possibly can. More money is necessary to carry on the work and it is also lately necessary that the work be carried on.

From what Mr. White says, Toff Ad will, who it gets going, break into a field which Medicine Hat in the past has enjoyed undisturbed. He states this honestly, after giving full consideration to their only ask and all they want from us is very considerable benefit to accrue to us by the adoption for some time past.

THE new epoch in Toff Ad's history is setting out under auspicious circumstances. Every day seems progress made. The engineers are getting further along each day in laying out the gas and water works systems. The well drillers are making progress on the upper well. The industrial Bureau is encouraging prospects, points for the organization of a farmers' co-operative, which will be bringing in of capital as it enlarges. Industrial commissioner Mr. White, has also a job on hand at the present time, which will no doubt only do him some good things which will materially benefit us in Tofield's immediate hereafter. Even Old Sol and Jupiter Pluvius appear to have made their peace and are working together on a more abundant harvest than has hitherto delighted the farmers eye. Council has let the contract for the drilling of gas well No. 2. A third gas well is in prospect. Building activity is growing. New comers are arriving by the dozen and score. Strangers galore are upon our streets. Business is picking up. All these and many others are signs of the times, signs that point to a bright future. There is to be no let up in the good work. Let us all as citizens, unite with one accord in keeping the bright side foremost, in together loyally boosting and in extending the glad hand of welcome to every newcomer. We have everything to be proud of and can energetically and willingly share in the fruits of the future with all who come to assist in the development of our young city of

---

With reference to the above we would say we are pleased and gratified to inform its readers that the efforts of the Industrial Bureau recently formed have already borne their first fruits. The securing of the Tofield Foundry and Machine Shops through Industrial Commissioner White, is a fact, which will please and gratify every citizen. Mr. White brought in Messrs Davis and Aldridge last Saturday with the result that on Monday their decision was made and the Tofield Foundry and Machine Shops will be established immediately. The new concern will

Alix Business Men Visit Tofield

A delegation from the Board of Trade of Alix, Alta., visited Tofield last Monday to see the Tofield industry proposition and glean all the information possible about the cost of putting down a gas well. They interviewed the Mayor who gave to them the benefit of the city and turned their otter to the secretary of the council to get the desired information. Mr. Nicholson showed them over the gas works and gave them the facts as to cost etc. The party were well pleased with what they saw. As to whether Alix would put down a gas well they did not commit themselves, stating merely that they would have to report to their fellow townsmen. The delegation consisted of Messrs. C. Woolgar, J. H. Williamson, A. W. Lee, J. R. Mackie, J. E. Reid and M. J. King.

Transportation Facilities Increase Population.

A striking example of the effect of transportation facilities upon population as well as of the remarkable development of western towns is afforded in the case of the settlement of Trochu, situated at mile 121 on the Tofield Calgary branch of the Grand Trunk Pacific Railway. A tri-weekly passenger service from Tofield was inaugurated by the G. T. P. to this point about a year ago, and the growth and steady advance of the population has risen to 1,000 souls and is rapidly increasing. For years settlers had been obliged to freight in their supplies a distance of 45 miles. Blood has now been laid beyond Trochu to Swalwell at mile 141 and that only 60 miles remains to be completed before Calgary is reached.

Prepare Roads for Winter

A little attention given the Fall road now may save the necessity of drifting over rough roads all winter. Bush, and even small ones, will at this time of the year easily work into bad mud holes and leave the road in very bad shape for the winter. It will be well to fill up the centre of the road and have the sides graded so that the water may run from the centre places where water can stand in road ditch or road scraper can be used to good advantage in filling the centre of the road. There will be no difference in the road when crowned and when flat, but a big difference in the ease of hauling over the top, especially in fall and spring.

"Home-sickers" for the Dairy

Prof. W. A. Henry's dairy experiments go to show that the crossing of cream before churning increases the yield of butter from fifteen to twenty per cent, over the yield from sweet cream, if both are churned in the same way.

Cattle are not the best things in the world to use about the churn. Usually more or less than will come from the milk of the cows at the time. And what they will make for the spraying every morning!

Don't forget the Tofield Fair September 27th.

Beaver Lake

CONSIGNMENT WILL CONTINUE

One of the first public men to announce themselves with the Co-operative Township in Housing Movement was Sir Henry Pellatt, who has a scheme for 1,000 Henry Virtue cottages in Canada that will be inaugurated at a cost of $1,000,000 each. It is, therefore, appropriate that he is returning to England for his public welcome as the first Governor-General of Canada has promised to attend a dinner that are arranging in his honour at the Holborn Restaurant, London, on November 7th. The Duke of Connaught will continue his work for co-partnership in the Dominion. Viscount Hewlett, the son of Lord Cheylesmore, is also an enthusiast on housing reform.

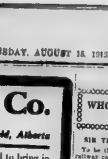
WHO'S WHO IN CANADA



SIR THOMAS SHAUGHNESSY, K.C.V.O.
Ruling Spirit of Canadian Pacific

Thomas G. Shaughnessy, President of the Canadian Pacific Railway has direct controlling and more, he is a Bruton worker, a man of energy and enthusiasm, a keen business mind that owns Carolan knots of difficulty with ease, and a prodigious memory that is always ready on the instant. He was born in Milwaukee, Wis., on the 20th January, in 1853, and after taking the usual courses in the public schools and little supplementary something down Southern Europe, he returned to Chicago, and was ready at sixteen to begin the battle of life. Entering the Railway service as a rooding in his first position in the purchasing department of the Milwaukee and St. Paul road, it was not long before it was recognized he had a good business head and he was given an abundance of work with constant purpose and undaunted determination he rapidly rose. He was put forward until in 1879 at the age of twenty-six he was appointed assistant to the general manager of the road. In 1882 he entered Canadian railroading in the capacity of General Purchasing Agent of the Canadian Pacific Company and from that time on his promotion was very rapid. He was soon appointed to the post of Assistant General Manager, later becoming assistant to the President, in 1891 he was made Vice-President and General Manager, and in 1898 when Sir William Van Horne retired from the presidency of the Railway Mr. Shaughnessy was unanimously elected to fill the vacancy.

Mr. Shaughnessy became Sir Thomas in 1901 when King Edward VII conferred upon him the honour of K.C.V.O.

JAMES DAVIDSON
Contractor and Manufacturer, Ottawa

Contractor Davidson has been one of Ottawa's most representative citizens since 1898. He was born in Scotland and came to Canada when elected controller, heading the vote in that year. Subsequently he was elected mayor of Ottawa, which office he has since held continuously, with the exception of two years. He is also a director of the Bank of Ottawa, and has been for many years a member of the Ottawa Board of Trade. He is also president of the Ottawa Electric Railway Company, and is interested in many other enterprises. He is a member of the Rideau Club, Ottawa Hunt Club, Ottawa Golf Club, Ottawa Canoe Club, Ottawa Country Club, Rideau Boat Club, Ottawa Automobile Club, Ottawa Electric Railway Athletic Association, Ottawa Amateur Athletic Association, Ottawa Rowing Club, Ottawa Ski Club, Ottawa Snowshoe Club, Ottawa Curling Club, Ottawa Motor Boat

BY-LAW NO. 74, OF THE TOWN OF TOFIELD.

A By-Law to provide for the digging of additional trenches on Block 11 for the purpose of interring bodies therein.

Whereas it is necessary to provide for such interments; Be it therefore enacted by the Municipal Council of the Town of Tofield, in the Province of Alberta, as follows:

1. That the Cemetery Committee be and they are hereby authorized to cause to be dug additional trenches on Block 11 for the purpose of interring bodies therein.

2. That this By-Law shall take effect on the day of the final passing thereof.

Read a first time this 16th day of August, A. D. 1915.

J. O. LETOURNEAU, Mayor.

S. NICHOLSON, Secretary-Treasurer.

Read a second time this 16th day of August, A. D. 1915.

BY-LAW NO 76 OF THE TOWN OF TOFIELD

A By-law to provide for the installation of a water system in the Town of Tofield, for fire protection, domestic use, and for manufacturing purposes.

Whereas it is considered necessary by the Council to install a waterworks system in the Town of Tofield according to plans and specifications prepared for the Council by Messrs. Marwell and McKenzie, for the purposes of fire protection and the supplying of water to individuals and corporations either within or without the Town limits, for domestic, manufacturing or other purposes, and for acquiring therefor all necessary plant and equipment, and for undertaking the construction of reservoirs, tanks, the laying of mains, digging wells, and the performing of all other work necessary thereto, and in securing all lands required thereby.

And Whereas, the said debt and the debentures issued therefor, shall bear interest at the rate of six per cent per annum payable yearly.

The debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

And Whereas, it will be necessary to raise annually during the said period of twenty years the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years by a special rate sufficient therefor over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

And Whereas, the amount of the whole rateable property of the said Town according to the last revised assessment roll is $1,200,000.00.

And Whereas, the amount of the existing debenture debt of the said Town is $75,000.00, none of which principal or interest is in arrears.

And Whereas, it is the intention of the Council to issue debentures to the amount of $50,000.00 for the purposes aforesaid.

Therefore the Municipal Council of the Town of Tofield enacts as follows:

1. That the sum of $50,000.00 be expended by the Council of the Town of Tofield in and about the construction of reservoirs, tanks, the laying of mains, digging wells, and the performing of all other work necessary thereto, and in securing all lands required thereby.

2. That for the purpose aforesaid there shall be issued debentures to the amount of $50,000.00 in sums of not less than $100.00 each, within the period of twenty years from the date of the issue thereof, and bearing interest at the rate of six per cent per annum, payable yearly.

3. That the said debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

4. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town, according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

5. The said debt and the debentures issued therefor, shall bear interest at the rate of six per cent per annum payable yearly.

6. The debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada in the said Town of Tofield in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

7. That the sum of $2,000.00 shall be expended by the Council of the Town of Tofield in and about the construction of reservoirs, tanks, the laying of mains, digging wells, and the performing of all other work necessary thereto, and in securing all lands required thereby.

8. That for the purpose aforesaid there shall be issued debentures to the amount of $2,000.00 in sums of not less than $100.00 each within the period of twenty years from the date of the issue thereof, and bearing interest at the rate of six per cent per annum payable yearly.

9. That the said debt and the debentures issued therefor, shall bear interest at the rate of six per cent per annum payable yearly.

10. That the said debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

11. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

12. The said debt and the debentures issued therefor, shall bear interest at the rate of six per cent per annum payable yearly.

13. The debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

14. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

15. That the said debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

16. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

17. That the said debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

18. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

19. That the said debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

20. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

21. That the said debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

22. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

23. That the said debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

24. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

25. That the said debentures shall be issued within twenty years from the date of the issue thereof, and shall be payable at the Merchants Bank of Canada, in the said Town of Tofield, in equal annual instalments of principal and interest so that the aggregate amount of the yearly payments shall be as nearly as may be equal during the currency of the said debentures.

26. That during the said period of twenty years there shall be raised annually by a special rate on all the rateable property in the said Town according to the last revised assessment roll of the said Town, the sum of $2,000.00 for the payment of the said debt, together with interest thereon as aforesaid, and also the sum of $1,000.00 for the maintenance of the said waterworks system, making in all the sum of $3,000.00 to be raised annually during the said period of twenty years for paying the said debt, together with interest thereon as aforesaid, and also for the maintenance of the said waterworks system, which said sum of $3,000.00 shall be over and above all other rates to be imposed and levied on all the rateable property in the said Town according to the last revised assessment roll of the said Town.

86. That during the said period

Tofield Secures New Foundry & Machine Shop

Important Industry of Far Reaching Influence to Build at Once.

One of the first important industries to locate in Tofield and one which will be of medium value, is only to the town and district, but to all of Central Alberta as well, is the Tofield Foundry and Machine Shops. This firm has obtained a ten acre site on Tofield Industrial area north of the Main line of the G. T. P. and as an indicative of what the public may safely assume the company to be the fact that the latter has asked for a reservation of several acres in addition, is significant

The gentlemen interested in the company are Messrs. John E. Davis and J. Gordon Jobb. Mr. Davis is of the Alberta Foundry & Machine Company, of Medicine Hat, and Mr. Jobb has been associated with him for a number of years. The latter is the chief engineer of the local firm.

The new Foundry and Machine Shops will be on Industrial area, north of the main line and will proceed to build at an early date. From the first they will employ ten men and in the foundry section will be prepared to tackle anything in grey iron castings from the smallest to the largest, from pounds up to tons.

This company anticipating as they do, the rapid future expansion of their business have requested the council to set aside a few additional acres as they keenly realize that it will be but a short time until the plant will have been brought up to a busy pay roll.

The Alberta Foundry and Machine Co. started in with a medium sized plant at Medicine Hat a few years ago and it was within a year after that they were forced to more than double capacity. Such will undoubtedly be the experience of the local firm, as the field for their endeavour in this business is practically unlimited.

To-fields will appreciate the truth of the above statements more deeply when it is realized what the location of shops such as these means. It means that all articles in connection with machinery, no matter what they may be, may be replaced quickly by the new firm. For the town, iron standards for lamp posts, fittings for gas mains and pipes, water pipes and thousands of other like things will be manufactured right here in Tofield and distributed far and wide. It means that every manufacturer who locates at Tofield will have the facilities at his hand for the provision at once of repairs.

Council Pass By-laws

Municipal Auditor Criticizes Civic Book-keeping Methods

Council held a session on Tuesday evening of last week at which solicitor Price was present and all of council excepting Councillor Emery present. The debenture by-laws providing for $1000 for drainage; $5000 for a hospital; $25,000 for waterworks; $15,000 for gas works and $21,000 for the purchase industrial sites were passed provisionally. A few current accounts were passed.

At the close of the above proceedings civic auditor, Kinnaird, addressed the council stating that while the general affairs of the town were on a healthy state the manner of keeping the municipal accounts badly needed some change. If not it would lead to great confusion and would get the town in to trouble with the bankers. There was no cost of the deficit at the bank if council took the necessary steps to pass certain by-laws authorizing a bank loan on the strength of outstanding taxes, etc., which are used as current revenue.

W. C. T. U.

A very interesting meeting of the Womens' Christian Temperance Union was held last Thursday afternoon at the home of Mrs. R. Whitlaw. Ten ladies were present one new member added to the roll. Several items relating to special work were discussed and also a few general workings were added to the program. Refreshments were served at the close and the ladies spent a short time in social chat. Next meeting to be held the second Thursday in September at the home of Mrs. McColl, Presbyterian Manse.

Of Special Interest to Farmers.

Binder twine is no drug on the market this season. I have already sold thousands of pounds this season. On Monday I had only 400 pounds left and this is rapidly going. If your order is not in see it promptly and quickly. Forewarned is forearmed. Do not delay. Get your twine now.—John Lee, dealer.

Jos McQuarrie, of Blair, Neb., was a visitor to Tofield last Saturday and Monday. He owns property at Wetaskiwin, Bashamel and other places. He tahen was he of Tofield's bright prospects that he purchased a two acre plot from W. P. Wood north of town upon which he will later build a residence.

Seed Prizes

Prizes Offered by the Canadian Seed Growers' Association For Selected Seed

Official notice is given by the Canadian Seed Growers' Association that substantial prizes in the form of cash and special trophies, are offered for seed grown in the provinces and exhibited at the next Annual Winter Fair or Provincial Seed Exhibition. The date of this Exhibition will be made public later.

In addition to regular prizes offered to members of the Association, special cash prizes are offered to boys and girls between 12 and 18 years of age, for Exhibits of Spring Wheat and White Oats. A correspondent prize in the form of a beautiful gold medal donated by Dr. Jas. W. Robertson, is also offered to the boy or girl having the best Exhibit of oat in the meritime Provinces Quebec and Ontario and wheat in each of the Provinces of Manitoba, Saskatchewan and Alberta. Each of these Exhibits is to consist of a sheaf which must be at least 6 inches in diameter at the band, and a gallon of threshed grain. The plants for this sheaf should be selected by hand from the field before the crop is cut.

Those proposing to compete for these prizes should arrange at once to make the necessary selections and should also write to secretary, Canadian Seed Growers' Association, Ottawa, Ont., and obtain a copy of the prize list rules and special arrangements regarding transportation of exhibits.

Few in your chance boys and girls, even if you don't happen to win a prize the experience you will gain increase your chances next time.

Steel For Completion of Bigger-Calgary Branch.

Several hundred carloads of steel rail have just been brought into the Bigger district of Saskatchewan for use by the Grand Trunk Pacific construction parties in the completion of the Bigger - Calgary branch by which the officials of the company predict is destined in a few months time to become one of the most important in this section of the west; tapping as it does 250 miles of rich farming country in addition to the extensive producing coal region 50 miles south-west of Bigger.

The many friends of Mrs. Fraser, mother of Mrs. R. Sherlock, will be pained to learn of an accident which befell her while visiting her brother at Winnipeg, from the effects of which—a fall—she is temporarily confined to bed and at for the time being without the complete use of her right arm.

Ernie Rogers Returns, Sans Motor, Sans Wife

Ernie Rogers, of the Reliance Store, returned to his old stamping ground last Monday evening—but not in his car. With an unusual twinkle of his eye he remarked that he left it at Niven, Man., in care of his wife, that same car had to look after it. His friends don't believe a word of it. The truth is that owing to the continued heavy rains the roads were so bad that he reached an acreage, not a motor car to get across country and fearing that he would lose his job back in Tofield if he didn't get a hustle on and not having the 'phone he took the next best method and returned via the G. T. P. He motored through a considerable portion of Manitoba and got as far as Niven. The roads were so bad there that further navigation was impossible for the present. His friends are glad to see him back even minus the motor car and —the lady.

Personal and Local Items

Henry Wood started harvesting early this week.

S. A. Hall and J. D. Kennedy returned last week from the coast.

Mrs. Faralis returned last week end from a holiday trip to Banff.

Robert Logan and Wm. Logan were visiting the coast last week.

Chas. Sampson, of Rose Creek, was a visitor to Tofield last Monday.

Messrs. W. J. White and D. B. Dowling, of Ottawa, were visitors to town yesterday.

Mrs. J. H. Johnston after spending four days in Tofield returned to Lacombe last Monday.

Mr. Sherman, of the New West Farmer, of Camping was a business visitor to Tofield this week.

John Hackett, of Rose Creek, was a business visitor to Tofield last Monday.

E. A. Swallian of Webster, South Dakota, spend a couple of days in town last week.

Leland commenced for the fall term last Monday morning with a record attendance.

Jas. McConnell reported on Monday that he would be harvesting this week.

Wm. Thomson reports that both oats and wheat on his farm are almost ready for cutting.

Rev. A. M. McColl, of St. Andrew's Presbyterian church, conducted services last Sunday in Holden and Bruce.

Harvesting in the Rose Creek district starts this week. Messrs. Bellman and Johnson start this week on their farms.

Mrs. John Lee returned last week from a two months visit to her old home, McLaren's Depot Ontario.

Miss Mildred Sherlock returned last week from spending a brief but very pleasant holiday at Lake Wabamun.

Rev. John Black, of Holden, occupied the pulpit in St. Andrew's church on Sunday morning. Rev. A. M. McColl preaching at Holden.

Mrs. C. H. Cross returned last week from Norwood, Ont., where she spent the past 8 weeks visiting her mother.

Mrs. J. H. Leller left last Wednesday morning on a two months visit to her son D. A. Leller, of Moosomin, Sask.

H. S. Rudd and Dawson Manners spent Sunday in the Wandering section and incidentally were guests of Mr. Warren Bond.

M. Pakowski, a Pole, was apprehended last Monday morning on a charge of vagrancy and after a hearing was committed to Fort Saskatchewan for further examination.

Mrs. Jas. Ward, of Wainwright, was the guest over the week end of Mr. and Mrs. R. E. Emery after spending a day or two at the Fair.

Emmet Davidson who suffered a bad accident while riding a racing horse in Edmonton last week is at home and convalescent. He is suffering from a broken collar bone.

Miss Isabel Williams underwent an operation for appendicitis last Thursday at the Misericordia Hospital Edmonton, and by last reports is making speedy progress towards recovery.

The Standard is informed that the marriage took place in Edmonton last week of two well known Tofieldites, Bon Wilkman and Miss Lily Henderson. They returned from the Capital last Saturday evening.

Mr. Carroll, of Carroll & McDonald, general agents for C. P. R. land is, last Monday reports in the Standard that he has sold six quarter sections of C. P. R. lands in the Tofield district since last Friday.

C. W. Liddle, of Hosmer, Tofield was in town on Monday.

T. W. Jacobs returned from a pleasure trip to the U. S. a few days ago.

Get ready for the Tofield Fair, September 27.

Miss Majorie Innes, of Edmonton is visiting Miss Mary Francis for a week.

Sam Bean, has struck a flow of water in the first Municipal water well at a depth of 183 feet. They will put down another well within a few rods of this one.

E. P. Fisher, of Rock Bands, was a visitor to Tofield last Monday. Mr Fisher stated to the Standard that he had in about 300 acres of oats and barley and that a large portion of this will be ready for harvesting this week.

W. P. Strong, of R. C. Bird's hardware, left on Monday morning for a three weeks' sojo-rn at the coast for his health. He will visit Vancouver, Victoria, Seattle and Tacoma. Mr. Strong's health has been none too good of late and a change of air will undoubtedly do him much good.

Messrs Robt St. John and Walter Barnes, two gentlemen from Uxbridge, Ontario spent a couple of days in town last week, they are on a tour of the west, for the purpose of making investments, they were greatly pleased with Tofield and before leaving invested in property here.

Emmet Davidson met with a bad accident last Wednesday afternoon at the Edmonton Fair while riding one of his fathers horses in the third heat of the half mile race. His horse and another collided and threw them. In the tumble Emmet was thrown sustaining a fractured collar bone and internal injuries. He was taken to the hospital where he is progressing favorably.

J. W. Bonser, [illegible] known as 'Wardie', has joined the Ungava land boom and will immediately move over his stock of dress goods from his old stand across the street. The new premises will be thoroughly renovated and repainted. These being much larger than the old stand, Mr. Rogers will not only be enabled to display his attractive ware to better advantage but will carry a much larger stock and of more range. More about this latter. Watch for advertising soon.

The Plants was in town on Monday. To the Standard he reports good progress being made on the road leading south from Tofield two miles and not one in Mr. Plants has been in charge of a government road gang for the past few weeks and has been at work on this stretch of road. The road over the big slough will be put in good condition, the slough partly drained, five culverts put in, four of which are steel, and the road well ballasted. This will be part of the trunk road being built by the government from Edmonton through to Lacombe and the province.

J. D. Yorke, of Camrose, Kansas, and his brother, J. R. Yorke, of Harvey, Kansas, spent a week with their brother, H. L. Yorke, of Rock Bands, Tofield district, leaving for home last Thursday. They were very much pleased with every thing they saw in Alberta, and, while they do not intend as yet to leave Kansas for Alberta they expressed every satisfaction with the evidences of progress and development in the land of their brother's adoption. During the week spent here they visited many old friends among those being J. L. Stauffer, Mr. Maurer, the Hahns, Swartzes, Strohms and Steinmans. They go back, boosters for Alberta. They expect to again visit the Tofield district another year.

Cards of Thanks

The family relatives of the late John Clarke Wood desire through the columns of the Standard to express their appreciation and gratitude for the services so kindly rendered by friends during his fatal illness and their bereavement.

200 Tofielders Visit Edmonton

Tofielders up held the honor and traditions of the town to when they do a thing, do it well. Last Wednesday on the occasion of the special excursion to Edmonton to take in Alberta's Great Provincial Fair. Notwithstanding the early hour 8.30 a. m. Over 200 citizens of town and district assembled on the platform at the depot to await the arrival of the special from Mercer bound for the Capital.

Early in the day the chosen spot away had a clear field to the Red who outdid himself in glory The day was perfect. All report having a most enjoyable day. The special returned shortly after midnight. Everybody is delighted with the G. T. P. for having provided by the special train service the facilities for taking a full day's outing at the Fair. Travelling passenger agent Tilley deserves a vote of thanks for having taken the matter in hand and carrying it through.

The Fair at Edmonton was over-rated to be desired. Number and class of exhibits exceeded all previous years records. The races and attractions were good. Especially pleasing of mention is the remarkable Princess of Timmins, Princess Victoria and the military tattoo in the evening. The crowds enjoyed these immensely.

A Calgary Bootblack Inherits Large Fortune

Alex McLaren a young Scotch man, who has been earning a living in Calgary shining shoes has been advised by a firm of Vancouver lawyers that he is heir to a fourtune of $100,000, and will leave for the Coast in a few days to become possessed of his legacy.

United S'ates Will Have Large Exhibit

The United States department of agriculture has asked for three thousand square feet of floor space, with will space for an exhibit at the Dry Farming Congress at Lethbridge. It is the intention of the directors to place the exhibits of the Dominion Government and that of the U. S. side by side if at all possible.

OBITUARY

The death took place at 6 p. m. Monday, August 19, 1912, of John Charles Wood, at the residence of his daughter, Mrs. Wm. Hopgood, on his 86th year of his age. Deceased had been a sufferer from a malignant internal disease for many years and only returned from Vancouver, B. C., a couple of weeks ago. He was born in 1826 at Brighton, England, and first came to Canada some forty years ago. He took up land at Rose Creek where he followed farming and resided about Considerably. He leaves a widow and child, being twice married. Of the first family of eight four survive. There are Gen. Wood, of Rose Creek, Mrs. Wm. Hopgood, Mrs. Van Buskirk, of Rose Creek, and Harry Wood.

The funeral took place on Tuesday afternoon at 2.30 o'clock, interment being made in Tofield cemetery and the obsequies being conducted by Rev. A. M. McColl and R. Whitlaw.

Civic Holiday

I hereby declare Friday, the 23rd day of August a Civic Holiday for the Town of Tofield.

J. G. LEIGH BREAU,
Aug 19, 1912 — Mayor

Immigration is Heavy From U.S.

C.P.R. Publicity Man Says Many Thousand Americans are Coming in

John Cuppwell, of the Canadian Pacific Irrigation company, publicity branch, who was in Edmonton a short time ago, expressed the opinion that this year's crop will be the greatest that Western Canada ever garnered. There is not a district in Alberta that does not send word of specially heavy yields in many districts where threshing is already underway about 5 per cent over forty bushels to the acre is the rule. Early deliveries of wheat at the elevators show a uniformly high grade.

Kirby season predictions were for an immigration to Canada from the United States of 200,000. The present record bids fair to beat even that figure. More British are coming according to the government statistics, than have ever before entered the country. The same may be said of the settlers coming from other countries. On the whole, this will be the greatest season of upbuilding that the Canadian West has experienced.

Aged General Passes Away

William Booth, Veteran Leader of the Salvation Army, Dies Near London

London August 20. The Rev. William Booth, general and commander-in-chief of the Salvation Army, passed away at 10.15 o'clock this morning. The veteran Salvation Army leader was accompanied by several members of his family when the end came.

The medical staff had held a consultation on Sunday and it was decided the resources of the physician's combined, which for a week past, it is now admitted, was useless.

Twelve weeks ago general Booth underwent an operation for the removal of a cataract on his left eye. For two days after the operation his friends predicted the loss of the general's sight. Then, however, ample poisoning set in, and from that time with the exception of rallies, the patient's health steadily declined. The general recognized that the end was near and often spoke of his work as being finished.

Calgary, Aug 18 Joe Lamar, a member in the employ of the Stampede management was thrown by an outlaw here late Saturday afternoon. Lamar's back was broken. He died on the way to the hospital.

"MABON" STEPS DOWN

HE RESIGNS THE LEADERSHIP OF SOUTH WALES MINERS

MABON, M.P.

William Abraham, M.P., the Veteran Welsh Labor Leader, is Now Secretary Years Old and Aims Twenty Five Years at the Head of Workers He Forgets in Office Will Keep Place as Honorary Executive

William Abraham, M.P., who has resigned the secretaryship of the South Wales Miners' Federation, after having held the office for twenty-five years, is one of the most remarkable men connected with the labor movement in the United Kingdom. He has had a long and interesting career in connection with the Parliamentary Committee of the Trades Union Congress, and has been returned to the House of Commons at the last three general elections as member for the Rhondda division of Glamorganshire. He is a native of Ystradyfodwg, in the Rhondda Valley, and is the son of a miner. He was born on the 13th of February, 1842, and is therefore in his seventy-first year. He began work in the mines when he was ten years of age, and worked as a miner for twenty years. He was a member of the Ystradyfodwg Local Board for many years, and was also a member of the Glamorgan County Council. He was elected to the Parliamentary Committee of the Trades Union Congress in 1874, and has been a member of that body ever since. He was elected president of the Congress in 1885, and has been returned to the House of Commons as member for the Rhondda division at the last three general elections. He is a Nonconformist, and a total abstainer. He is a Liberal in politics, and has been a strong supporter of Mr. Gladstone's Home Rule policy. He is a member of the Royal Commission on Labor, and has been a member of the Royal Commission on Coal Supply. He is a member of the Welsh Land Commission, and has been a member of the Royal Commission on Land in Wales and Monmouthshire. He is a member of the Royal Commission on Mines, and has been a member of the Royal Commission on Coal Supply. He is a member of the Welsh Land Commission, and has been a member of the Royal Commission on Land in Wales and Monmouthshire. He is a member of the Royal Commission on Mines, and has been a member of the Royal Commission on Coal Supply.

CANADA'S PREMIERS.

There Have Been Eight in the Past Forty-Five Years.

Canada holds the record for Confederation reigns among the chief executives of the Parliamentary Provinces who have been the successors men at the head of affairs. Not only has the national history focused it, but the provinces have been the scene of interesting battles in rotating power.

Prince Edward Island has had seven premiers in the forty-five years, Nova Scotia and Manitoba five each, New Brunswick four, Ontario three, Quebec three, British Columbia three, and the Territories two. Of the eight premiers of the Dominion who have held office during the forty-five years, Laurier has been the longest in office, with a total of nearly fifteen years. Macdonald is second with a little more than nine years, and Mackenzie third with five years and a half. Abbott, Thompson, Bowell and Tupper each held office for a little more than a year, and Sir Charles Tupper and Sir Mackenzie Bowell, Conservatives, each held office for a little more than a year.

Sir Charles Tupper, Bart., Conservative, was premier from May 21 to July 8, 1896.

Sir Wilfrid Laurier, Liberal, 1896 to 1911.

Right Hon. R. L. Borden, Conservative, 1911.

It is interesting to note that five of the eight premiers have been born in the Province of Nova Scotia—Sir Wilfrid Laurier and Sir Richard Cartwright in Quebec, and Sir John A. Macdonald in Ontario. Mr. Thompson was born in Nova Scotia, Mr. Abbott in Quebec, Sir Mackenzie Bowell and Sir Alexander Mackenzie in Ontario, while Right Hon. Sir Mackenzie Bowell was born in Ontario.

Sir Charles Tupper was the only premier who ever had a Federal election polling office for twenty-four hours, and that was in Nova Scotia, the issue Unionism and the West Indies not getting a Federal election. Sir Wilfrid Laurier, the last Government leader, the last, Kevin Mackenzie, Bowell and Tupper and Sir Charles Tupper and Sir Mackenzie Bowell, Conservatives, and Sir Wilfrid Laurier and Sir Richard Cartwright, Liberals, have been members of the Dominion Parliament for more than forty years. Sir Wilfrid Laurier has served in the House of Commons for forty-five years, and has been the leader of the Liberal party for thirty-two years.

Sir Wilfrid Laurier was the first premier to be defeated in a general election. He was defeated in 1911, when Sir Robert Borden was returned to power.

Sir John A. Macdonald was the first premier to die in office. He died on June 6, 1891.

Sir John Thompson died suddenly at Windsor Castle, England, on December 12, 1894.

Sir Mackenzie Bowell, Conservative, 1894 to 1896.

Sir Charles Tupper, Bart., Conservative, May 21 to July 8, 1896.

Sir Wilfrid Laurier, Liberal, 1896 to 1911.

Right Hon. R. L. Borden, Conservative, 1911.

It is interesting to note that five of the eight premiers have been born in the Province of Nova Scotia—Sir Wilfrid Laurier and Sir Richard Cartwright in Quebec, and Sir John A. Macdonald in Ontario. Mr. Thompson was born in Nova Scotia, Mr. Abbott in Quebec, Sir Mackenzie Bowell and Sir Alexander Mackenzie in Ontario, while Right Hon. Sir Mackenzie Bowell was born in Ontario.

Sir Charles Tupper was the only premier who ever had a Federal election polling office for twenty-four hours, and that was in Nova Scotia, the issue Unionism and the West Indies not getting a Federal election. Sir Wilfrid Laurier, the last Government leader, the last, Kevin Mackenzie, Bowell and Tupper and Sir Mackenzie Bowell, Conservatives, and Sir Wilfrid Laurier and Sir Richard Cartwright, Liberals, have been members of the Dominion Parliament for more than forty years. Sir Wilfrid Laurier has served in the House of Commons for forty-five years, and has been the leader of the Liberal party for thirty-two years.

Sir Wilfrid Laurier was the first premier to be defeated in a general election. He was defeated in 1911, when Sir Robert Borden was returned to power.

Sir John A. Macdonald was the first premier to die in office. He died on June 6, 1891.

Sir John Thompson died suddenly at Windsor Castle, England, on December 12, 1894.

THE DEAN OF ETIQUETTE.

J. R. Dougall Has Fought Hard For Mi. Conventions.

Be sure of a Canadian are men ultimately make and spend money, and whose grandest ambition is to social development is to help the country, that is a valued to learn to an eminent Canadian who, though now seventy years of age, has probably never decided the energies of a single day rather than spend it saving one's time and of others.

What a whatever manner of man is that of brought to this strenuous Canada, where the rush and hurry of life is the order of the day, and the poet and the dreamer are left behind.

A gentleman of leisure has been found working men in the Rue St. Lambert, in the Lachine Locks, a veteran editor and president of the Montreal Witness, and the doyen of Canadian journalists.

A life of unremitting toil has been, and still is, but toil devoted to the highest ideals and for the noblest purposes. Self honestly, not a single action, however small, has been performed in the course of the world a little better than it found it. John Dougall has all his life been a member of public opinion. He is many a time and oft in the past few a like a voice crying in the wilderness, but his words have not fallen on deaf ears, and he has called many a good work into existence.

Journalism is something not his best love, and that is why he has been so successful. He has been a newspaper man from the start. He was born in Montreal, and his father founded the Montreal Witness and the Daily Witness. He was educated in Montreal and Edinburgh, and when he returned to Montreal he found the paper was not doing well. He determined to make it a success, and he has done so. He developed the supply.

He has made the Witness as the Canadian Newspaper. The Witness was the first penny newspaper in the country, and it was also the first to be published on Sunday. It was the first to be published on Saturday. It was the first to be published on Monday. It was the first to be published on Tuesday. It was the first to be published on Wednesday. It was the first to be published on Thursday. It was the first to be published on Friday.

OUR FRENCH "VARSITY

LAVAL IS A PLACE OF VAST HISTORIC INTEREST.

The Ancient University in Quebec, Among Other Canada's First Positions, is the Stronghold of French Tradition and French Language in the Dominion — It Is Strong Clerical.

Under the scholastic precincts of any great seat of learning there seems to lower a warm of historic interest. Such is the case with Laval, the French-Canadian University of Quebec, says The Montreal Star.

Over the past few weeks, Dean Royal Highwoman, The Duke of Connaught and Princess Patricia have been found in the city, and their presence and the occasion was made the subject of addresses by the governing of an Honorary Degree upon the Governor General.

The city of Quebec, the cockpit alternately of history and tradition in the new world, has the greater part of its interest in the University of Laval, the University par excellence of French Canada.

The University is on a rise behind the busy, noisy, up, new town on the lower level, and from its windows the panorama of ancient built and modern commerce, of the old and the new, of contemplative her centuries and trade is, in its way, unique. Here the young men and maidens in its service and the old men and women are living away into the dense forests, and the old men and women are living away into the dense forests, and the old men and women are living away into the dense forests,

TOFIELD, ALBERTA, THURSDAY AUGUST 22, 1912

CANADIANS as a whole will feel a spirit of pleasure in the decision of Hon Mr Borden to pay a visit to Germany before he returns to Canada.

Being without an invitation and without an errand, he could, of course, only go as a private visitor But that sort of thing is well understood, and he will no doubt receive many courtesies as a minister of King George His visit will be understood to be an expression of Canadian and British good will and, if we mistake not, that good will will be very heartily reciprocated. There is no saying what untold good such appreciation may be fruitful of or what untold harm they may ward off This visit will do Mr. Borden great good in Canada, where all intelligent people look on the hysterically cultivated idea of a difference with Germany with horror.

Premier to visit Germany

Crop Prospects Best Yet

Voting Day Friday Next Week

THE crop prospects in the Tofield district in particular and as well throughout Alberta generally is such as to create a feeling of gratification and elation amongst the farmers and in all business circles. Never before have general conditions been so good. Speaking of what comes more directly under our observation—the crops of the Tofield district—these might really be said to be the best ever seen in this section of Alberta. Notwithstanding the almost more than abundant supply of moisture that has been apportioned to this district ever since the seed was put in the ground, the crops have not suffered from any set back and today a bumper harvest is upon us. Wheat, oats and barley are all well filled out, plump and on the verge of maturity. In many sections harvesting has begun. Two weeks will see the crops so far advanced as to be completely past the danger stage and in fact the major portion of crop in stock. No frost has been reported from any section and there has been no damage from hail. There is therefore every reason for farmer and business man to be well satisfied with the season's conditions thus far.

TOFIELDERS should not forget that their votes are required Friday of next week; viz. August 30th, at the poll on the by laws which are now being submitted to the ratepayers for approval or otherwise. The ditch by-law for $1000 provides for a permanent improvement of lasting benefit to the town. The $4000 Hospital by-law provides for a utility which is an absolute necessity and which will be a blessing to the community. The water by law should need no boosting. All intelligent ratepayers will unhesitatingly endorse the Council's efforts to solve this question in a manner within the means capacity to handle the proposition. The Gas by law has the support of every citizen and the Industrial Sites by law is a clear second. The voting day is next Friday, the 30th inst It behooves every ratepayer on the list to get out and exercise his franchise.

Sir Wilfred Laurier to Tour West in Fall

OTTAWA, Aug. 19. An informal meeting of the Dominion Liberal caucus was held in Sir Wilfred Laurier's office at the house of commons today, at which arrangements were made for the autumn tour of Sir Wilfred

Sir Wilfred will leave Ottawa, August 27, and will proceed to the coast to attend the forestry convention at Victoria on September 4. He will also visit other important cities in British Columbia, and on his return trip will visit the principal cities of Alberta, Regina, Saskatoon and Manitoba. The end tour completion of the estimated crop yield of 1912 for the districts of Alberta south of the Main range. Sir Wilfred expects to be home in the west for about a day. On his return he will very leisurely take a short rest, and then proceed on a tour of new and old Ontario, about the middle of October The dates of the latter tour will be arranged by Chief Whip Pardee and Hon. Charles Murphy, the task of choosing the points of visit being a difficult one owing to the numerous invitations which have been received.

17,000 Cars Needed in Southern Alberta

The Associated Boards of Trade of Southern Alberta, have completed an estimate of the estimated crop yield of 1912 for the districts of Alberta south of the Main range. Sir Wilfred expects to be home in the west for about a day. On his return he will very leisurely take a short rest, and then proceed on a tour of new and old Ontario, about the middle of October The dates of the latter tour will be arranged by Chief Whip Pardee and Hon. Charles Murphy, the task of choosing the points of visit being a difficult one owing to the numerous invitations which have been received.

Children want Homes

The department of neglected children at Edmonton, are anxious to find homes for a number of infants varying in age from two months to one year

Two little girls, healthy and attractive, are in need of the loving care of a mother, and are seeking homes. Gracie, a Protestant aged three months, is a little beauty and worthy of the best home in Alberta.

Mary, also a Protestant child aged three and a half months, who has the most beautiful violet eyes and a winning smile, is in need of a good Protestant home.

Millie is a bright little girl of two months with all the charms of a healthy happy baby.

Johnny, aged four months, is a husky rosing voter and promises to be a good looking boy. This boy would be a prize winner at any baby show.

Randolph, a six months lad, is laughing for a father and mother to take care of him. He is also a Protestant boy.

In addition to this group of infants, there are two little girls aged two years and a little girl aged thirteen years, who are seeking for homes among Protestant families.

A little girl of eleven, a really beautiful child, wants a good Roman Catholic home and another girl aged ten and a half. Annie, who is the making of a lovely woman is also for a Roman Catholic home.

There is no desire to receive applications from people who wish to get a child for service only; people who are interested in the children, and desire to give a child a good start in life, are those sought as foster parents.

Anyone anxious to adopt into their home any of the above children, with the understanding that the child be treated in the same way as if it were one of the family, will receive a prompt reply to a letter addressed to the Superintendent of Neglected Children, Edmonton.

Wheat Plant Expert to Tour the West.

Ottawa, Ont., Aug. 20.—L. H. Newman, the plant breeding expert of the Canadian Seed Growers' association, affiliated with the department of agricultural, left for an extended tour of the west, today. The particular object of his visit is to arrange for more extensive cultivation of different grades of wheat produced from the breeding of the seed plants. The marquis which won a $1,000 prize as best wheat in the world, was the result of such breeding, and this is one of the grades it is desired to encourage. Mr. Newman will deliver a series of lectures and will attend the dry farming congress at Lethbridge in October.

Harvesting in Full Swing

Batteries of cutting machines are extended in far-flung lines in the southern part of the province of Alberta, and, according to Duncan Marshall, Minister of Agriculture, who has just returned to Edmonton from a tour of inspection, the harvest will be in full away in a few days throughout the province. Wheat, barley, oats and other grains and alfalfa and timothy are from two to three weeks ahead of last year, and it is expected that the returns will be proportionately larger. Ten thousand men will be required to harvest the crops.

The statistical bureau of the provincial department of agriculture has compiled the following figures regarding the crops and acreage from the reports of 800 correspondents the region Alberta, adapted:

Wheat, 127,700 spring wheat, 855,000 acres; oats, 1,196,0 0 acres; barley, 382,000 acres; flax, 96,050 acres; rye, 17,725 acres; timothy, 51,455 acres and alfalfa 51,145 acres; total area under crop 2,016,380 acres. In addition, more than 350,000 are devoted to mixed crops, including vegetables.

The figures for 1911, which were designed on account of the difficulty encountered in getting the crops threshed, were given out by the department of agricultural on August 12, as follows:

Wheat, 213,800 acres 5,000,000 bushels, average 24.5 bushels; spring wheat, 895,000 acres, 17,000,000 bushels, average 21 1 bushels; oats, 1,900,000 acres, 70,000,000, average 30 bushels; barley, 165,000 acres, 4,500,000 bushels, average 28.3 bushels; flax, 25,000 acres, 350,000 bushels, average 13 bushels; rye, 16,000 acres, 320,000 bushels, average 20 bushels.

Contract Signed for Big Terminal Elevator.

The order-in-council awarding the contract for the new government elevator at Fort William, has been signed, as a result of the business made the structure is to be completed by September 30, 1913, in time to help move next year's crop. The successful tenders are the Barett McQueen Company of Minneapolis. The amount involved in the tender is $1170 00.

German Makes A New Invention.

Berlin, Aug 16. The Tageblatt Rundschau says it learns that a German engineer has made a remarkable invention, presumably an aeroplane to remain stationary in the air at a given point for an indefinite period. The formula or model for which the amazing newspaper says it is claimed differs radically form any known that can maintain equilibrium in the air. The military authorities are said to be confidently over the new invention as a means of defence against attack by aircraft and the dropping of explosives. The Tageblatt Rundschau says it would hesitate to circulate the announcement, which seems fantastic as it is, save from the source of the information quoted.

The Supreme Court of Alberta

1912-1913

Sittings of the Supreme Court of Alberta in civil and criminal and for the hearing of Equity Appeals and Motions, will be held at the following times and places for 1912-1913, viz:

For the opening of the Court for the hearing of Motions, Petitions, Chambers Appeals and other business, at Edmonton, on the following each to last:

Tuesday the September Court at Edmonton, third Tuesday in September and June.

Tuesday after the Fourth Monday in January, February, March, April and May and third Tuesday in June.

For Trial of Civil and Criminal Jury Cases at Edmonton and Calgary.

For Trial of Civil Non-Jury Causes at Edmonton and Calgary.

For Tuesday after the Fourth Monday in December, January, February, March, April and May and third Tuesday in June.

HIGHER RENTS BUT HIGHER WAGES TOO

Conditions in America Much More Favorable to Wage Earner Than in England

In proposing to make changes in Canada's fiscal system, it will always be necessary for the advocates of free trade or a reduced tariff to show that the people absolutely that the change will not interfere detrimentally with existing conditions For one thing, the workingman must be assured that tariff reduction will not deprive him of any of the comforts or advantages he now enjoys. The present well-being of the working classes is certain Their condition is prosperity under a condition of free trade is a matter of doubt The people think that Canada should export wheat and not wage earners and that from cutting down the tariff is a kind of action that one cannot safely undertake Who must be aware of her ground before taking steps in that direction.

Free Trade England vs. America

It can be proved conclusively that in countries under a system of free trade, the industrial classes are worse off than they are in countries where protection is in vogue. Take for instance the article investigation a few years ago by the British Board of Trade in order to demonstrate that the average wage earner in the United States is far better off than the average wage earner in England. The figures are taken from the census returns and show the standard of living of the people in both countries. The report of the commission was that a comparison of the rate of wages prevailing in the two countries will have a direct bearing on the question in the immediate future.

An Exhaustive Enquiry

The British Board of Trade last year conducted an enquiry into the question of wages and cost of living in the industrial classes of America and published the results in the report. In order to make the enquiry as comprehensive as possible the statistics were secured from twenty-four different centres in the United States and from twenty-four centres in the United Kingdom. The Hart Carter Co. has undertaken a similar enquiry to make comparisons of the wages and conditions of industry we are now investigation the building trades, the engineering trades and the printing trades because these three are considered as generally typical of a country

Similar Wages in England

Without entering into the details of the finding, it was shown that in the building trades, weekly wages in the United States were found three and a half times as high as in the United Kingdom by a ratio of 21 to 100, in the engineering trades by 213 to 100, and in the printing trades by 216 to 100 and while the wages of the American workman is shown to be higher, more than 2½ times, the money for his work that his British competitor receives, the investigation found further that the proportion of unskilled or semi-skilled labor employed in America, while what is considered reasonable labor is greater in England

Rents Higher in America

Bearing on to the important purpose of rents, the same investigation was found in houses containing the same number of rooms, the rent in England was the 97 7 cents basis in Liverpool and Manchester, and American cities. Moreover, the houses were generally larger and better furnished in America. Houses predominated in England, while flats predominated in America. The investigation further found that the average house, while less pretentious in construction as a rule, much roomier and more convenient and they noted the prudence was improving much of the time. Comparative dwellings in England in America showed that for two-roomed dwellings the rent paid in America averaged $1.92 per week, England by $1 per week; for three-roomed houses by 12c per week and for six roomed houses by $2.50 per week, a mean of 109 per cent. Taking the rents of the weekly rent per room in America averages a room as compared with 56 cents in England.

Comparative Costs of Food

In order to institute a comparison, they took a week's food for the average family and what a week's food would cost in the United States. The comparison was made in the cities of Boston, Chicago and other large cities and the average British working family, consisting of father, mother and four children would be found that the average British working family, consisting of father, mother and four children would be as much as 12s 4d more than the average American family. That is to say for would have to pay 20c more for similar food in America Conversely working people could buy more and purchase his usual supplies in Europe for 20c less than he would have to pay for the same food in America.

Summing up all these results it will be said that while the cost of food and rent in America is 81 5 greater than in England per week, wages are 109 per cent higher, more than off set the higher cost of living Further, the margin of income over and above food and rent is on an average sufficient to command of the necessaries and comforts and more luxuries of life that is both eminently and readily appreciated than that enjoyed by the average working class in England.

RURAL ONTARIO IS NOT DECAYING

Statistics Show That Farmers Are Producing More Than Ten Years Ago

Since the results of the Dominion Census have been published many people have received the erroneous impression that rural Ontario is in a very decadent condition. The Globe, although of a few days ago, views provincial affairs in a more hopeful light. It says:

"Ontario is a province of farms. The farm industry is the most valuable one in the province. In the history of the province not the newness of any other farm industry has ever so great an influence upon the progress of the province as the rapid development of the dairy industry. The possibilities of dairying are by no means exhausted. In the United States the annual output from the kinds of cheese farms is generally valued at $250,000,000. These figures hardly represent the full extent of the production of the country. Ontario is by far the largest cheese producing province in the world. Its annual output is more than 125,000 tons. In 1901 the number of cheese factories in the province was 1,000; in 1911 the number had increased to 1,175.

The Farmer's Increased Income.

Two hundred and fifty million dollars have been given as the annual value of Ontario farms. Before the Ontario Bureau of Industries, which first published the figures, was established the estimate was too low. The field crops which in 1901, in the engineering census by $213 to 100, and in the printing trades by 216 to 100 and while the wages of the American workman is shown to be higher, more than 2½ times, the money for his work that his British competitor receives, the investigation found further that the proportion of unskilled or semi-skilled labor employed in America, while what is considered reasonable labor is greater in England

Rents Higher in America

Bearing on to the important purpose of rents, the same investigation was found in houses containing the same number of rooms, the rent in England was the 97 7 cents basis in Liverpool and Manchester, and American cities. Moreover, the houses were generally larger and better furnished in America. Houses predominated in England, while flats predominated in America. The investigation further found that the average house, while less pretentious in construction as a rule, much roomier and more convenient and they noted the prudence was improving much of the time. Comparative dwellings in England in America showed that for two-roomed dwellings the rent paid in America averaged $1.92 per week, England by $1 per week; for three-roomed houses by 12c per week and for six roomed houses by $2.50 per week, a mean of 109 per cent. Taking the rents of the weekly rent per room in America averages a room as compared with 56 cents in England.

Comparative Costs of Food

In order to institute a comparison, they took a week's food for the average family and what a week's food would cost in the United States. The comparison was made in the cities of Boston, Chicago and other large cities and the average British working family, consisting of father, mother and four children would be found that the average British working family, consisting of father, mother and four children would be as much as 12s 4d more than the average American family. That is to say for would have to pay 20c more for similar food in America Conversely working people could buy more and purchase his usual supplies in Europe for 20c less than he would have to pay for the same food in America.

Summing up all these results it will be said that while the cost of food and rent in America is 81 5 greater than in England per week, wages are 109 per cent higher, more than off set the higher cost of living Further, the margin of income over and above food and rent is on an average sufficient to command of the necessaries and comforts and more luxuries of life that is both eminently and readily appreciated than that enjoyed by the average working class in England.

C. O. RICH, Proprietor

2000 Laborers For Construction Work.

The growing value of the output of the farms has only resulted in progress and that in the increased value of the land. The fact is proved by records in the assessment of the rural areas throughout the three leading provinces of the Dominion more than the increase in the value of the farms is due to the increase in the number of acres under cultivation. The assessment of the farms in Ontario in 1901 was $1,000,000,000 and in 1911 it was $2,000,000,000 and the increase was practically all due to the increase in the number of acres under cultivation.

Lard Values Higher.

The growing value of the output of the farms has only resulted in progress and that in the increased value of the land. The fact is proved by records in the assessment of the rural areas throughout the three leading provinces of the Dominion more than the increase in the value of the farms is due to the increase in the number of acres under cultivation. The assessment of the farms in Ontario in 1901 was $1,000,000,000 and in 1911 it was $2,000,000,000 and the increase was practically all due to the increase in the number of acres under cultivation.

The Struggle to Production.

The struggle to production is the struggle of agriculture. The outstanding fact in this connection is that the value of the farms in the Western provinces is increasing at a greater rate than the farms in the great agricultural districts of Ontario. The reason is that the farms in the West are more productive. The Western farmer is producing more to the acre than the farmer in the great agricultural districts of Ontario. The reason is that the farms in the West are more productive. The Western farmer is producing more to the acre than the farmer in the great agricultural districts of Ontario.

MYSTERY OF THE AURORA

Ingraham Experiments Prove that the Borealis Is Due to Electrified Sun Particles Playing About a Magnetized Earth.

The mysterious and beautiful spectacle of the aurora borealis has hitherto been a complete puzzle to science. It has never been possible even to make a photograph of the aurora.

It is certain that there is a connection between the aurora and the electrical disturbances on earth, but just what that connection is, and how it is brought about, has been unexplained. Now, however, Professor Ingraham has found the key.

Professor Ingraham has simply made artificially the conditions which produce the aurora. He has constructed a vacuum chamber, and in this he has placed a magnetized earth. This earth is a ball of iron, and it is charged with electricity of a very high voltage. The vacuum chamber is filled with a very rarefied gas, similar to those which produce Roentgen rays. Then, after due consultation with lawyers of a very eminent character, and with the aid of a powerful magnet, Professor Ingraham has succeeded in producing the auroral phenomena.

The experiment is performed in the dark, and consists of discharging electricity across the vacuum chamber. These rays, drawn out from the earth, are somewhat similar to those which produce Roentgen rays. They are then manipulated with lawyers of a very eminent character, and with the aid of a powerful magnet, Professor Ingraham has succeeded in producing the auroral phenomena. Then, after due consultation with lawyers of a very eminent character, and with the aid of a powerful magnet, Professor Ingraham has succeeded in producing the auroral phenomena and give rise to the auroral display. The result is a beautiful sight.

Mr. Birkeland directed a powerful beam of cathode rays against a magnetic globe representing the earth. It was covered with a coating of crude oil and some barium to make it show the places struck by the cathode rays. A blaze of brilliant electrical illuminations formed itself over the top of the globe, precisely resembling the North Pole or over the bottom of the globe, representing the South Pole — places where the illuminations are most frequently and most brilliantly seen. In the manner in which the experiments simulated the conditions Paris observed itself slightly between the poles, but it was clear that a close examination of the way the auroral lights are distributed over the earth

A Delightful System

The young postmaster of a village was busily at work in his office when a gentle tap was heard at the door, and in response appeared a blushing maiden of a dozen years, of whom the postmaster asked

She handed it with a bashful smile, to the official, who, after examining it, gave her the money. At the same time he asked her if she had read what was written on the margin of the order.

No, I have not," she replied, "for I never make it out. Will you please read it for me?"

The young postmaster read as follows: "Send me send you ten shillings and a dozen kisses."

Blushing at the bashful girl he said: "Will you please tell me the money I suppose you expected to receive?"

"Yes," she said, "I left that to me my kisses, I want them, too."

It is hardly necessary to say that the balance of the order was promptly paid and in a wonderful manner. On reaching home the delighted damsel rewarded us her fiancee.

Mother (the postoffice system of ours is a great one, developing more and more every year, and each new feature seems to be better. I must write to Aunt Jane and tell her how perfect our postal system has become.

Father (sarcastic) — A wonderful institution, my dear, is the postal service. I remember when I was a boy I used to write to a girl and wait two weeks for an answer. Now I get a letter from her every day.

Mother — Indeed, strong ones?

A few pieces. I was out in the country yesterday, and I made a very pocket basket which I have no use for. Perhaps I'll make an extra arrange for an old friend perhaps?

No, you don't. You don't mislead a humble maid of a blackberry.

DO YOU KNOW?

That King George of Greece has a little black dog which, like all dogs in all countries, is subject to a tax. When the royal advice asking for payment of 10 francs was sent to the King that year, it either got lost in transit or was overlooked, for it was certainly answered by return of mail. At any rate, after a fortnight had elapsed a second advice on a paper of different colour was sent to the Royal dog, whose bill for payment was made.

The third advice is notably authoritative in tone. The bill was now the property of King George, who he was late, and that a bailiff would be sent to him regarding the non-payment of the tax. The bill was accordingly paid, and the Royal dog's name removed from the list of defaulters. That little Major Pompon, King George's pet terrier, is one of Greece's most popular citizens.

In the budget of the Duke of Connaught, the Governor-General of Canada, there is a large item devoted to the Royal Family, and paid the last out the extras. And when he himself had gone he paid his secretary a Christmas present worthy of the occasion.

Semi-ready Tailoring

Council

What the Town Fathers did on Tuesday Night

The council held its regular meeting on Tuesday evening of last week.

The Mayor and councillors Bird and Low were selected delegates from the Municipality of the Town of Tofield to the Convention of Alberta Municipalities to be held shortly in Innisfail.

The by-law providing for an amendment to by-law No. 15 enacting it an offence to expectorate upon sidewalks, halls, stairways or floors of any public buildings was read and passed through its three readings. The penalty for this offence is from $10 to $20.

The night watch on the gas well was dispensed with and Mr. Bowsh instructed to board up the works.

The electric was instructed to draw up an agreement between the Town and the Tofield Foundry and Machine Company providing for the sale to the latter of ten acres at cost, the giving of gas to them free for five years, after that at 5 cents per M cf., water at cost, a railway siding to their property, the release of ten acres to them for future foundry extension at cost and on their part the guarantee of the running of operation within six weeks, the employment of 15 men within a year, the putting up of a building and plant worth $6,000 and the employment of at least 50 additional men on their foundry extension in connection with the reserve of ten acres mentioned. A tentative agreement was entered into informally between the town and Mr. Ashb, of the Tofield Foundry and Machine Company on the above matters which were agreeable to both parties.

By law No. 82 authorizing the giving of 5 per cent discount on taxes paid before November 1st was read three times and passed.

It was decided to pay W. C. Swift $300 cash on the purchase of lots 8 and 9 in block 19 at $1,200 and the balance in 6 months.

It was also decided to pay Ed. Kalial the amount of money he had paid for the gas rights on the N. W. quarter 26-50-18 on his agreeing to turn the same over to the town. He having stated that he would do so.

The Public Works Committee with the Mayor were appointed a committee to select a site on Industrial Sites for the new gas well.

The secretary was instructed to write to G. T. P. relative to the putting in of a siding on Industrial Sites.

A ruling was ordered to be complied with either side of the ditch running at the railway crossing at the west end of the yards.

Tenders were opened for the supplying of boilers, engines, fire pump, pipings, hydrants and valves and the following were successful, the contracts being awarded to them:

R. Leonard & Sons, for boilers Canada Foundry Company, for fire pump,

Gorman, Cheney & Critchley, for piping

T. McAvity & Sons, for hydrants and valves.

The solicitor was instructed to draw up a by-law providing for an amendment to the fire brigade by-law providing for the selection of their chief by the fire brigade subject to the approval of the Council.

Twine Shortage

Farmers Take Notice

I have sold out my large consignment of binder twine and in a few days will have 10,000 pounds more on hand. A large part of this is on sale. I am at your service while this lasts. It's up to you. Get busy.

ROSS CREEK

Andrew Somers recently sold his farm to Jos Hocvinen and has moved on his family to Chipman.

Mrs. Dunbaugh paid a visit to Tofield last Monday.

Geo. Wood was suddenly called to Tofield last Sunday evening to the bedside of his dying father at Mrs. Hoggard's.

Harvesting will in general in this section this week.

C. Sampson was a visitor to Tofield on Monday.

BUSINESS LOCALS

Just a few sets of hay carriers and track left, going at reduced prices at Bruce's Hardware.

Get your harvesting supplies such as machine oils, rubber pack ing, cylinder oils, Forks, Harvester whips, Machine oils, etc. at Bruce's Hardware and save money.

Winnipeg-Edmonton Eagle Coach Scheme

Ottawa, Aug. 12.—It is stated in official circles that Engineer Vellquet, of the Dominion department of public works, who has had charge of the surveys for the proposed six foot barge canal from Edmonton to Winnipeg, is now at work on a final report, and that an estimate of the cost of the proposed waterway will be in the possession of the government early this autumn. The expectation in official circles is that a vote will be placed in the estimates next session for the preliminary work. It is thought that the canal will cost several million, but the development of water powers along the route may tend to reduce the cost somewhat.

Don't forget the Tofield Fair September 9th.

Fare For Sale

Hill acres, one month of Ryley, $10.50 per acre. 40 acres cash, balance in two years.

Personal and Local Items

Tofield Fair prize lists are now out. Ask the Secretary for one.

Syd Carter was a week end visitor to the capital.

D. Bissett, Edmonton, was a Tofield visitor this week.

Harry Rogers on his business trip to Edmonton on Wednesday.

Many out here hoped to be able to be present at this meeting will probably forget that the test of their organizations of here desire for the town's advancement comes on Friday the 29th inst., when the delegates by-laws come before them for their votes for or against.

As these by-laws have been published and discussed in these columns during the past few weeks, it is not necessary that very much further be said. The debenture by-laws provide for $1000 for drainage, $1000 for a hospital, $13,000 for gas distribution and development, $25,000 for a water system (gravity) and $21,500 for Industrial Sites. All good features in connection with the town's development. All, if carried, mean things of tremendous importance in the shaping of our future. Let every citizen get out on Friday, August 29 and record his vote.

Sir Wilfrid May Come West in October

Ottawa, Aug. 26—Hon. A. J. Calder, of Regina, was in the city today. Mr. Calder this morning handed in the liberal conference list.

Mr. and Mrs. N. C. Legge left on Wednesday for a three weeks' trip to Toronto and other eastern Ontario points.

Mrs. John Stoodhill, who had been visiting Mrs. W. C. Swift for the past couple of weeks returned to her home in Edmonton Sunday evening last.

A. E. Spence and mother arrived at Tofield last Saturday night direct from Tilsonburg, Ont. to be come Tofielders. Mrs. Spencer is an aunt of Mrs. R. E. Whitlaw and they will reside with the latter for some time.

As announced in last week's Standard, J. W. Somers is moving into the store recently occupied by M. W. Urquhart & Co. The store has been renovated and painted in the interior and on the front and when fully installed Mr. Somers will have a fine and attractive drug store.

Mr. and Mrs. R. N. Whitlaw and daughter, Jean, left on Wednesday morning to express Toronto to attend the exhibition. Mr. Whitlaw will return in about a month, but, Mrs. Whitlaw and Jean will remain for a lengthy visiting friends in Cleveland, Ohio and other places.

An Apology

The Standard begs to apologize to Mrs. Thos. Hendren in that in last week's issue the report published re the death of the late Isaac and John Charles Wood the name of Mrs. Herndon was omitted as one of the surviving daughters. Mrs Henderson also wishes to express her appreciation with the members of the family of the sympathy and sympathy of friends in illness of her late father and their bereavement. Mrs. Herndon was the eldest daughter of the deceased. The Standard regrets the incident of its omission.

Tofielders Vote Debenture By-Laws Friday, Aug. 30

Drainage, Hospital, Water, Gas, Industrial Sites

Judging from the large number of citizens present at the meeting of the Industrial League in the Town Hall last Monday night, interest in the town's affairs and development is in a hearty state. The same citizens and others who may not have found it possible to be present at that meeting will probably forget that the test of their organizations of here desire for the town's advancement comes on Friday the 29th inst., when the debenture by-laws come before them for their votes for or against.

As these by-laws have been published and discussed in these columns during the past few weeks, it is not necessary that very much further be said. The debenture by-laws provide for $1000 for drainage, $1000 for a hospital, $13,000 for gas distribution and development, $25,000 for a water system (gravity) and $21,500 for Industrial Sites. All good features in connection with the town's development. All, if carried, mean things of tremendous importance in the shaping of our future. Let every citizen get out on Friday, August 29 and record his vote.

German Kaiser is Reported to be very Ill

Berlin, Aug. 27.—The fear of the public that the Kaiser may be suffering from something considerably graver than a cold and muscular rheumatism following an attack of influenza, is not allayed by the publication Monday night of an official account of the origin and present state of his Majesty's illness in a bulletin issued by Count Eulenburg, chief marshall of the imperial court. The medical bulletin has so far been published. It is admitted that his majesty's condition is such that he must have complete rest for an indefinite period.

At the Churches

PRESBYTERIAN

Last Sabbath evening Rev. Allen McColl preached an able sermon to a good audience. The subject of his address was "On the way to the Cross." The speaker laid the foundation from the Old Word to the last in rapt attendance. Passing from "The tragic death of the conquered Saviour" to the "Triumphal Car" at death upon "the one refuge" in the "via dolorosa", throughout the sermon which was the finale both pathetic and solid-blended wonder of man wounded the tender heart of Jesus and then the planning of the exile, when on the way to the cross of crucifixion, He passed the group of penitent women. The unfeeling element of the exile which is that of sympathy by warning them of the sufferings which awaited them and their children. The speaker further remarked that nowhere in the Gospels do we find Christ where a woman was not an enemy to Jesus Christ. Again the cry which appeals to the best in us all—"Remember me," and then when disaster threatens, whether on land or sea, namely, "women and children first", was first heard from the lips of Jesus. During the evening T. P. Newbigging gave a fine rendering of the solo "There are ninety and nine."

Next Sabbath morning Rev. Allen M. McColl will preach on the subject, "The Importunate Widow"; the children's address will be on "The Children of Faith". In the evening Mr. McColl will resume the series of addresses on "The Trial and Death of Jesus".

METHODIST

Special Labor day services Sunday evening at the Methodist Church—subject, "The Square Man". All welcome. A special invitation to non-church goers.

Bringing in Empties

The big railway companies are preparing to bring in a record time of last year's grain blockade by forwarding thousands of empty cars to the West where they are being distributed amongst the grain producing districts. Spurred by constant prodding on the part of the railway commission to this end they have put over twenty thousand new cars into service and added 700 new engines to help handling the crop of the West.

Council

What the Town Fathers did on Tuesday Night

Council met in regular session Tuesday evening. The inclement weather seems to have a very depressing effect on members as only the mayor and councillors C. Reary, Reed and Logan turned up. Consequently the routine business was transacted and the resignation of councillor Urquhart was read, considerable time to fill the vacancy will be held on Tuesday, 2nd inst. and the election if any, one week later.

Prizes Offered by the Canadian Seed Growers' Association.

Official notice is given by the above organization that substantial prizes in the form of cash and special trophies, are offered for seed grown in the province and exhibited at the next annual Winter Fair or Provincial Seed Exhibition. The date of this exhibition will be made public later.

In addition to the regular prizes offered to members of the association, special cash prizes are offered to boys and girls between 12 and 18 years of age, for exhibits of grain, potatoes and field roots. A especiaklee prize in the form of a beautiful gold medal donated by Dr. Jas. W. Robertson, is also offered to the boy or girl having the best exhibit of oats in the maritime provinces Quebec and Ontario, and of wheat in each of the provinces of Manitoba, Saskatchewan and Alberta. Each of these exhibits is to consist of a sheaf which must be at least six inches in diameter at the head, and a gallon of threshed grain. The plants for this exhibit should be selected by hand from the field before the crop is cut.

Those proposing to compete for these prizes should arrange at once to make the necessary selections and should also write the Secretary, Canadian Seed Growers' Association, Ottawa, Ont., and obtain a copy of the prize list rules and special arrangements regarding the transportation of exhibits.

Now is your chance boys and girls, even if you don't happen to win a prize the experience you will gain will increase your chances next time.

Heavy Rains Will Hold Harvesting Back

Heavy Downpour General Throughout West

Barring upon the anxious heads of the farmers of the district, as well as those of the no less anxious townspeople, a rain storm hurled a violent deluge of water into the ripened grain fields and flood at the streets a little after ten o'clock on Monday evening and continued throughout the night. The downpour was pretty steady and at the start was accompanied by thunder and lightning.

The result was rather disastrous to the fields of oats, which have been standing ready to cut when the weather should permit of harvesting, and some of the tall wheat is reported to be lying over as a result of the strength of the storm.

One of the greatest drill fields that the Tofield district knows are facing it that the freqwich rains have made the fields so heavy that it is next to hopeless to make any attempt to get the binder and threshing machinery through the muddy fields. The harvest is practically at a standstill everywhere, until favorable weather shall smile upon Central Alberta.

No Frost in West so Far

Winnipeg, Aug. 26.—There was no frost in the Canadian prairie west last night.

For the most part temperatures were well above 40, though freezing point was just touched at Swan River and a few other northern Manitoba points.

The weather continues cool, and where heavy rains fall during last week and can is needed before harvesting can be resumed. Threshing is in full swing and until that is passed some anxiety will be felt on account of frost.

Fire Destroys Post Office.

Fire destroyed the London, Eng., post office last week paralyzing for a time the telegraphic and postal services.

BRITISH NATIONAL INSURANCE ACT PROVES TO BE A SUCCESS

The Act Compelling People to Insure Against Sickness and Disablement Now in Force in Britain, and Gives Promise of Proving to be of Great Benefit

Exactly so far as can be judged, during the first six months of its operation, the National Insurance Act has been a success. Not only has the machinery been put into working order with remarkable smoothness and rapidity, but it has won the favor and belief of all persons directly in the case of whom changes have taken place, or were to take place on the coming into force of the Act.

The system is represented by the British Government as an attempt to strike a blow against the evil and admitted failure of relying to attend to the matter to the provision.

The insurance of domestic servants, has been brought into force, and the Act is the object of receiving payments for domestic assistance.

It is known, in a chiefly a political sense, so that the only real opposition the governmental has to face is that of the doctors.

The government has offered the doctors the sum of four shillings and six pence annually for each person insured, but the doctors demand eight and a half.

The workmen and working women are required to pay a penny a week, which also into the pre-payment scheme, and that of the insurance person insured before the act came into force two weeks or two months have already paid heavily with approved societies which have undertaken to administer the act and now see how to adjust claims and cards at the post offices.

Before the end of the week when the first payments fall due for those drawn from the unemployed fund, it is estimated that practically all will be entitled to do so 10 shillings for some insured.

The only section of the community likely to suffer in the early months are small tradesmen and people both in and outside who supply the people with home designed to be sent with their own children.

Besides the small tradesmen are not the only ones who are having to pay for the benefits of the act.

Doctors are now earning and the chemists having to pay for the drugs they supply, while the cashiers of post offices have to pay for the benefits of the act.

MEN FOR HARVESTING

Manitoba Government Starting Campaign Last to Secure Help

Winnipeg, March 22.—Apparently the Manitoba government is not going to sit back and wait for the harvesting will be in full blast before it starts to look for help, as it did in the spring of 1911. A campaign with the records of the previous month and the first of the month there were 1,000 fewer families than in May and 1,000 fewer than in June. The number of families in March was 1,000 more than received than in May and 142 more than in June. There were but 11 families from Eastern cities to be forwarded to Manitoba points in March, as against 1,000 in May and 1,000 in June. In March 1,000 families were received from Eastern points, and there were 1,000 families forwarded to Manitoba points. The number of families in March was 1,000 more than in May and 1,000 more than in June. The number of families in March was 1,000 more than in May and 1,000 more than in June. The number of families in March was 1,000 more than in May and 1,000 more than in June.

INDUSTRIAL ACCIDENTS IN JUNE

Departmental Statistics Show 62 Were Killed and 299 Injured

Ottawa, According to the industrial accidents report of the department of labor, sixty-two persons were killed and 299 injured during the month of June in the course of their employment. A comparison with the records of the previous month and with those of June last year is there were 1,000 fewer families than in May and 1,000 fewer than in June. The number of families in March was 1,000 more than in May and 1,000 more than in June. The number of families in March was 1,000 more than in May and 1,000 more than in June.

$4,574,000.

Tenders for Million Dollar Structure at Port Arthur Now Being Called for

Ottawa—The Dominion Government is calling for tenders for one elevator at the great elevator at Port Arthur. The tenders will be in by August. The city obtained its supply of 15,000,000 bushels of wheat in 6 months and 15 days at a million dollars. The elevator will be ready to help to move next year's crop.

The reclaiming of the Port Colborne elevator will cost about $200,000 in this case the elevator proper is running, and the tenders are being received by the construction of additional bins for 1,000,000 bushels.

Guarding Against Forest Fires

Ottawa, H. H. Campbell, director of forestry, has left on the annual inspection of forest reserves. He will visit the Rocky Mountains to see the progress of work on the establishment of lookout towers and telephone system on the forest reserves which was installed last year, to enable the foresters to detain earliest possible information of fires and take the necessary steps to check them.

THE MARKET REPORT

Weekly Grain Letter Supplied by Thompson, Sons & Co., Grain Merchants, Winnipeg.

Winnipeg, July 19.—Continued favorable weather conditions have been necessary on both sides of the International boundary, and the crops are developing splendidly. Harvesting has begun in the leading districts of Texas, and the first cars of new wheat are expected to arrive in Kansas City and Chicago in the course of the next week or ten days. Cash wheat in Kansas City is now selling at 1c over the September price, and the premium is expected to be maintained. Cash wheat in Chicago is selling at 1c over the September price, and the premium is expected to be maintained. Cash wheat in Minneapolis is selling at 1c over the September price, and the premium is expected to be maintained.

LATEST CROP REPORT

CONDITIONS OF GROWTH ARE FROMISE FAVORABLE

Bulletin on the Crops and Live Stock of Canada Issued by the Bureau of Statistics at Ottawa is Generally Favorable as to Conditions—Crops Both Spring and Winter

Ottawa.—A bulletin on the crops of Canada has been issued by the census and statistics office.

The bulletin consists of the office report that the weather conditions since May 31st have been favorable on Canada the number of zone conditions and not very good, was therefore slow. In the northern provinces the harvest of June was not done and dry and rain was badly needed at the beginning of July. Rain has since fallen however, and conditions have improved. Prospects for spring sown crops are generally favorable.

According to the revised figures published at the end of June the total area under wheat this year is 10,377,300 acres, as compared with 10,377,300 acres harvested in the year 1911. The total area under oats is 10,377,300 acres, and the area under barley has reduced this area to 10,377,300 acres. The total area under oats is estimated at 8,594,600 acres and under barley at 1,429,200 acres in 1911 and to barley 1,429,200 acres as compared with 1,429,200 acres in 1911. In the three mentioned provinces spring wheat occupies 9,920,000 acres as against 8,948,965 acres in 1911, the increase being 971,035 acres. The total area under oats, including fall wheat the total oat acreage is 8,594,600 acres, as against 8,594,600 acres in 1911, the increase being 971,035 acres. The total area under barley is 1,429,200 acres, as against 1,429,200 acres in 1911, the increase being 971,035 acres. The total area under rye is 1,429,200 acres, as against 1,429,200 acres in 1911, the increase being 971,035 acres. The total area under peas is 1,429,200 acres, as against 1,429,200 acres in 1911, the increase being 971,035 acres. The total area under beans is 1,429,200 acres, as against 1,429,200 acres in 1911, the increase being 971,035 acres. The total area under potatoes is 1,429,200 acres, as against 1,429,200 acres in 1911, the increase being 971,035 acres. The total area under turnips is 1,429,200 acres, as against 1,429,200 acres in 1911, the increase being 971,035 acres.

Whilst not equal to the exceptional yield of 1911 the crop recorded this year is considerably above the average. The condition of spring wheat is 94.57, as compared with 94.57 in 1911, oats, 90.38 against 92.21 and wheat, oats and barley 94.57 to 92.21 per cent. The figures which are exceptional records are wheat 20 to 15 per cent.

The estimated numbers of live stock show further decreases except as to pigs. Horses and dairy cattle show decreases of 50,000 and 100,000 respectively. The number of other cattle is practically the same as last year. The condition of all live stock in Canada is uniformly good. The number of horses, 3,594,000; horses, 3,594,000; cattle, 3,594,000; sheep, 3,594,000; swine, 3,594,000.

SATISFACTORY TESTS OF EYE

Would Hereafter be Compulsory for Engine and Train Employees, Decides Commissioners

Ottawa, March 22.—The railway commission has decided that hereafter the eyesight of all engine and train employees must be tested by the railway companies. The decision was given in a judgment delivered by Chief Commissioner Mabee, and the order will be issued shortly. The commissioners have been considering the matter for some time, and the decision was arrived at after a careful consideration of the evidence submitted by the railway companies and by the railway employees.

The judgment which is given in full in the Canada Gazette, sets forth that the commission has no power to make rules governing the eyesight of railway employees, but that it has the power to make rules governing the eyesight of railway employees. The commission has also the power to make rules governing the eyesight of railway employees. The commission has also the power to make rules governing the eyesight of railway employees. The commission has also

TOFIELD, ALBERTA, THURSDAY AUGUST 29, 1912

WE are now approaching a time to which the public of the Tofield district look forward with pleasurable anticipation, the Annual Tofield Exhibition and Stock Show, September 27 will be Tofield's Big day—the Third Annual Fair. Many have signified their intention of entering exhibits and this year's Fair should be a record breaker and as a representation of the producing quality of soil in the district and of the enterprises of the farmers in the raising of horses and and stock the Tofield Fair has been said by outsiders to be the best in the Edmonton district outside of the Capital. It is to be hoped that every farmer and every farmer's wife and daughter not forgetting the son, will take a hand in making the 1912 Fair a Bigger and Better success than any preceding Fair. With the splendid crops in prospect and the excellent summer for pastoral pursuits that we have had, we have no doubt but that there will be no lack of effort from every farmer and every member of the household throughout the community to make this year's Fair a record breaker.

The Exhibition

THE Tofield Industrial League is off to a good start and Tofield should soon see results of an active and judicious campaign to bring in industry and capital. The members of the permanent managing committee having been appointed to and accepted office, Tofielders will await developments with interest and anticipation. Much good can be done by acting quickly and with united effect. The time is just for divided enterprise. We must pull together and with enthusiasm. The harvest is ripe and waiting to be garnered in. Eastern manufactures are beginning to realize that the trade of the West is slipping from them and that they must move West or establish branch industries out here. Tofield has advantages of value to offer. Private opinions as to appointments or details in connection with the League management may not meet with the approval of the majority but this should not effect any persons attitude towards the organization. Let us unite in one grand single effort to make Tofield the city beautiful and industrious that we would have it be.

The Industrial League

Is Single Tax a Burden

SEVERAL towns along the C. & E. claim to have been hit hard through the single tax clause of the new Towns Act and bitter comment is being expressed in connection therewith. Tofield town council was some time ago written to by a municipality on the C. & E. asking co-operation in seeking amendments to the new act, amongst these being the Single Tax burden. While Tofield is not averse to having the said Act through amendments, brought to a more perfect form, it, unfortunately for the other towns, cannot claim any disadvantage under the single tax clause. Tofield has from the first been a single tax municipality and the clause in the Towns Act relative to this system of taxation does not affect one iota the financial conditions in this municipality. Tofielders are all disciples of the Single Tax theory. It has worked out well here.

The Single Tax system has, we think, several good points. Not the least among these is the keeping down of the assessment which has a tendency to work with the result that that speculatrix councils cannot go the pace in reckless expenditure of public moneys as we see here and there in the past. Where this has been done and a municipality has had thrust upon its citizens the burden of misspent energies in the past, doubtless it will be thought that that provisions of the act are ill-advised. It will be found in the end that it is better all round for the towns to have Single Tax. At least Tofield to date has found it so.

Period of Labor Activity in Prospect

The remainder of the building season in Tofield promises to be active, a number of residences and other buildings being projected. Amongst these are a residence for S. A. Hall on 6th ave., another for J. A. Young on 6th ave., another for M. W. Urquhart on 6th ave. and King Street, W. Nurlarry will probably also build soon. W. T. Seaborn is building a residence in North Tofield Mr. Lownie' and Mr. Owens' residences on 6th ave. are approaching completion. The new Royal Alexander Hotel to cost approximately about $80,000 will be commenced in a few days. The buildings on the site are now being removed. The construction of a 100,000 gallon reservoir for the town's water system will be begun so soon as details are arranged. The power house and buildings in connection with the gas plant will be constructed within the next few weeks. A small army of men will be required to excavate for the sand water mains and the laying of the same. Everything points to a period of very active construction from now to the end of the year.

Haying Tools

Mowing Machine

The way to get full value for your hay crop is to use Deering hay tools. Thousands of farmers can testify to the excellent results obtained from using Deering mowers, rakes, stackers and loaders. They are reliable machines, and will do the same work for you that they have done for other farmers we have sold in your community. Come in and see us about a Deering machine next time you are in town. You don't have to buy, but you may learn something of value to you about raising hay. You can make our store your headquarters when you are in town if you decide. Ask for a Deering catalogue which explains details better than we can.

Consumptionless Increase 1000 per cent.

According to customs figures for July the importation of Portland cement into Canada has made a tremendous increase reaching so high as 1000 per cent over the corresponding month last year. No doubt that while the demand was never so strong in this country for cement, the increase is largely due to the fact that the duty was reduced. The order in council remitting the duty expires on October 21. There is a feeling at Ottawa that the duty will not be restored although an expression of opinion have put been heard from government circles.

CANADA'S FIRST FLAG

Union Jack That Came Here After The Union of England and Ireland

A walk through the rooms of Mr. McCord's home on the Cote des Neiges road, Montreal is a walk back through the troublous history of early Canada. To Mr. McCord as also to the long line of his predecessors these things are the history of Canada that has never found before and stand his before the latter-armed wage-ear and hoard-required uniforms of early Canadian heroes gain some appreciation of the bravery of his forefathers.

A catalogue of the interesting and rare relics in the possession of Mr. McCord would be impossible to give but some idea of its contents may may be gained from the following list of some of its treasures:

The original bank and record of General Brock, the hero of Queenston Heights; General Wolfe's parse book, De Salaberry's hat's flags the first Union Jack that came to Canada after the union of England and Ireland, a piece of oak from the Victory of Nelson, one of the pen-knives with which the Treaty of Ghent was signed by the United States and Great Britain, the Duke of Wellington's sword, both Charles the First and Charles and George Washington. Here are the Crown of France and one of the crowns worn by the Incas who were living at the site of the city of Montreal when Jacques Cartier landed.

It is a collection as Mr. McCord's opinion, will be the finest Museum would be getting.

D. D. McKENZIE, M.P.
Cape Breton North and Victoria.

DRAIN THE ZUYDER ZEE

This Great Prospect is Again Before People of Holland.

A great project is soon before the people of Holland . . . the draining of the Zuyder Zee. The area, which is at the north of Holland covers an area of 58,000 square miles. Mundus" the popular Italian weekly, states—a hectare being practically two acres and a half. Just half a century ago, a scheme to drain the southern portion of the area was first mooted and although it received considerable support, the opposition was greater; but now an authoritative has been formed and a bill for contemporary states, will be introduced into the Chamber. The promoters say that with an increased population Holland must be taken to enlarge the country, and this reclamation of the Zuyder Zee is regarded as necessary/inherent. If the sea is reclaimed, there are 4 provinces which can be dealt with, later.

POPULATION OF PENITENTIARIES

The average daily population of the Canadian penitentiaries for the past five years has been as follows: 1907, 3,332; 1908, 3,419; 1909, 3,623; 1910, 3,284; 1911, 3,417. Fifteen prisoners were discharged by pardon during the period, and 27 died, 5 were executed. Per the guidance of prison organizations and individuals statistics of the prevention of crime the following data regarding the principal reasons from which the convicts have been received, is submitted by inspectors Stewart and Ireland: Montreal, 329; Vancouver, 150, Winnipeg, 147; Kingston, 97; Hamilton, 97; Sydney, 97; Quebec, 91; Halifax, 79; Calgary, 77; London, 54; St. John, 35; Victoria, 32; Edmonton, 32; Ottawa, 31; Truro, 21; New Westminster 21.

WOMEN FOR GERMAN ARMY

German women are discussing a project launched in Dusseldorf for the establishment of feminine emergency men. The proposal is that women shall be compelled to do military service the same as men, particularly as nurses in war time and as helpers in the commissariat, transport and sanitary departments of the army, both in peace and war. Such exploitation of women has been obtained from well known feminist leaders indicate only moderate enthusiasm for the scheme.

Bridge of Toledo

A plan has been agreed upon for raising on a uniform height the new portion of Dean Bridge Edinburgh, so as to make it difficult to commit suicide by throwing themselves into the valley below. Many models were made with the view of fixing upon one which would not be objectionable to tramway cars, motor cars, pedestrians and women and children. The object several designs which would preserve the view of the city to the ordinary passenger. The design being a factory girl had a narrow escape while proceeding along Mid. Row underneath the Dean Bridge as a body of a man fell from above in front of her.

Just taking Succeeding

The thief who pleaded that he was suffering from starvation was only taking something for it."

Semi-ready
Tailored Suits
$20.00 at the same price you would be asked to pay elsewhere for $25.00 suits. Same in overcoats. Same in pants. Same in fit. Same in workmanship. Same in cloth. Same in everything but price. Semi-ready Tailoring
James S. Hunter, Jasper Ave., Edmonton.

Ducal Party En Route for West

Will Travel on far as Prince Rupert, Visiting many Points

On Wednesday of this week Their Royal Highnesses, the Duke and Duchess of Connaught leave Toronto on an extensive tour of Western Canada. The itinerary of their tour will include, amongst others, the following points: Sault St Marie, Port Arthur, Winnipeg, Saskatoon, Prince Albert, Edmonton, Calgary, Banff, Vancouver, New Westminster, Victoria and Prince Rupert.

The return journey will be made via the Crown Nest Pass where the Kootanian and beautiful Arrowhead Lakes will be visited. Macleod, Lethbridge, Medicine Hat, Moose Jaw and Brandon will also be visited on the homeward trip. It is expected that the party will reach Ottawa by October 21.

Don't forget the Tofield Fair September 27th.

Grand Prize For a Swede Turnip

An Acme Harrow to be Awarded Exhibitor of the Largest and Best Swede Turnip Exhibited at International Dry-Farmed Products Exposition.

The dry-farmer who raises the largest and best Swede turnip this year will be awarded an Acme Harrow if he exhibits his product at the International Dry-Farmed Products Exposition at Lethbridge, Alberta, October 15-26. This premium, donated by the John Deere Plow Co., is one of the most serviceable implements on any farm, anywhere in the world, and in donating it as a prize the company has in view the increasing of the production of the Swede turnip, especially in the northern section of the United States and throughout Western Canada, where there is always an excellent market for this product. the demand far exceeding the supply. The premium will be delivered free of charge in the United States or Canada, but the competition is open to the world, the requirements being the growing of the turnip in 1912 under dry-farming conditions—that is, where the average annual precipitation is 15 inches deducted, is less than 20 inches

Farmer, Ranchers, Breeders!

Read This

At the Big Red Ribbon Sale the first week in April 1912 at Camrose, Alberta. We will offer for sale several cars of pure bred stock, including Stallions, Mares, Bulls Cows, Calves, Hogs and Sheep, of any breed you want. Write us now and tell us what you would like to get in the pure bred line next spring and we will endeavour to have it here for you to bid on. Remember, you do not buy from us, you buy direct from the breeder. Write today and ask us what we are doing. It will cost you a postage stamp and we will make you dollars

J. D. Kennedy Meets With Serious Accident

J. D. Kennedy met with a rather serious accident last Saturday afternoon while out duck shooting. He in company with L. A. Dash of Edmonton, were out in the neighborhood of P. McAllister's when in getting out of the buggy the gun which he held between his knees was by some unaccountable means discharged, the charge lodging in his left arm just above the elbow. Pete MacAlister, brought him into town, where he was hurriedly attended to by Dr. Tewksbury who thought it best to have him taken to the hospital, fortunately an engine happened to be at the station at the time, which was immediately chartered and the injured man was taken to Edmonton where he was placed in the General Hospital. From latest reports it was stated that the doctors have hopes of being able to save the arm.

S. L. Pugh Elected By Acclamation

Oliver L. Pugh, of the realty firm of Pugh & Co., was on Tuesday elected by acclamation to fill the vacancy on the council occasioned by the resignation of M. W. Urquhart.

Provincial Hospital Board Appointed

The by-law to grant four thousand dollars to a hospital under the auspices of the Victorian Order of Nurses having been unfavorably voted by the ratepayers last Friday a meeting was held on Saturday to form a provincial organization for the hospital with the following result:

President—T. H. Cross
Secretary—Jas. L. Hammond, M.D.
Treasurer—S. Nicholson
Board of Directors—A. L. Pugh, J. O. Letourneau, W. C. Swift, R. E. Emery, Chas W. Taylor and T. R. Henderson.

The provisional secretary, Mr. R. Nicholson, is prepared to accept donations of any amount, at the town hall. A subscription of $5 or upwards entitles the donor to membership in the Hospital association and gives him a voice in all future arrangements. A meeting of all contributors will be called later to form a permanent organization.

Card of Thanks

To the rate payers of the town of Tofield:

It is with the greatest of pleasure I thank you for electing me to the office of town councillor for the town of Tofield, the town we are all proud of, and I sincerely hope to be able to gratify your hopes in representing you in such a way that you will be well satisfied of my services.

My wish is to serve you and the Town of Tofield in the very best way possible, for the betterment of the town and all concerned and I assure you it will be a pleasure to me to represent "the town we are all proud of." Being a representative of the ratepayers I will always gladly give ear to the wants and needs of them. Again thanking you I remain, your humble servant, OLIVER L. PUGH

Special Prize For The Tofield Fair

Mrs. J. L. Gray offers a special prize of $3.00 to be divided $2.50, and $1.00 for the prettiest dressed doll exhibited by girls under 12 years of age, the dresses to be the work of the girls themselves.

Running up and down stairs, sweeping and beating over making beds will not make a woman healthy or beautiful. She must get out of doors walk a mile or two every day and take Chamberlain's tablets to improve her digestion and and regulate her bowels.—For sale by all dealers.

HON. JAMES WILSON
U. S. Secretary of Agricultural, who will represent President Taft at the International Dry Farming Congress at Lethbridge, October next.

An article that has real merit should at time become popular. That such is the case with Chamberlain's Cough Remedy has been attested by many dealers. Here is one of them. H. W. Hendrickson Olde Falls, Ind., writes, "Chamberlain's Cough Remedy is the best for cough, colds and croup, and is my best seller." For sale by—all dealers.

Mrs. John T. Burns, Secretary of the Inter-national Congress of farm women, to be held in Lethbridge, October 22-26

The implicit confidence that many people have in Chamberlain's Colic, Cholera and Diarrhoea Remedy is founded on their experience in the use of that remedy and their knowledge of the many remarkable cures of colic, diarrhoea and dysentery that it has effected. For sale by all dealers.

Private Sale of Household Goods

K. O. Johnson is leaving the country and wishes to dispose of his entire house hold effects, they may be seen at his residence, Barde, 2d

P. O.

All Money By-Laws Carried Unanimously

With the Exception of the Hospital By-Law, Against which 6 votes were recorded. Work will Commence Immediately on gas distribution

All of the 5 money by-laws voted on by the ratepayers last Friday were carried unanimously with the exception of the hospital by-law against which 6 negative votes were cast. Broad indeed was the smile on the face of Secretary-Nicholson, Friday evening when he announced all 5 by-laws had carried. For it means much to Tofield, the passing of these by-laws. It means that within a very short time we will have gas laid in our houses, it means that in case of fire we will have adequate fire protection it means that Tofield will have a hospital of her own and the careful management of the Victorian Order of Nurses, it means that we can furnish manufactures who are about to locate here sites at cost, it means that the sloughs east and south of town will be drained. It has been said that Tofield is a town that was born lucky, that may be, but when coupled with a live aggressive bunch of citizens there is nothing to it but the realization of what has so often been said, that, Tofield will be a city.

J. H. Grisdale Coming West

Superintendent of Dominion Experimental Farm will Tour Provinces

Ottawa, Ont.—J. H. Grisdale, Superintendent of the Dominion experimental farm, leav es shortly for the West. He will inspect the farms of the pemicie provinces and of British Columbia. Mr. Grisdale will visit Fort George, in northern British Columbia, where the first agricultural fair is being held He will inspect the country surrounding for an agricultural farm possibility, and it is very possible that an experimental farm will be established in the district.

Billy Hapgood is spending a few days in town.

HOW TO WIN A GIRL

By EMERY M. TALBOT

"Aren't," said Ralph, "I was a fool to ask you?"

Marion stood speechless.

"I only got at the bottom of your behavior yesterday. Kent Martin, down his corner, her sister Jean and Ethel Jones, and Ethel told me."

"Why what did she tell you?"

"That you had been inventing you how to make love."

Marion stood the picture of embarrassment. His face was as red as a boiled lobster.

"Do you know what Kent did the night evening?"

"No. What?"

"He had to get taken the moon about two of you! I would not bet you. He answered to me."

"The dev-e he did!"

"Marion, I know I was telling you what to do to effort a lesson between us I you wanted me why didn't you tell me instead of him?"

"I didn't know—"

"Your stupidity is the most atrocious thing about you. But when you have occasion to let me that"—

"I didn't know you cared," he heard Marion say that he loved her and to ask her to be his wife. And she accepted him at once.

Ralph almost let out a shout of joy, but he restrained himself. Then he said:

"Marion, I'm sorry I was such a fool. I'm sorry I was such a fool. I'm sorry I was such a fool.

TOFIELD, ALBERTA, THURSDAY SEPTEMBER 5 1912

Beaver Lake ..... East .....

This is a busy time, so farmers can't be expected to do much in the news line. We've got behind somewhat.

Mrs. Malcolm McCallum, accompanied by Mrs. J. D. McAllister, of Mundare, have recently returned from a two weeks' jaunt to the coast. They had a jag of time so Mrs. McAllister tells us, enjoyed everything to the limit. That's the right way to spend a holiday.

Mr. and Mrs. D. M. McCallum now reside in Vancouver, and during Mrs. McCallum's stay with them the stork came along with a fine baby boy Malcolm iii., I believe. The ladies also visited our old friend Sandy McAllister, at Abbotsford. He is doing well and is quite contented and happy.

On the 12th Mr. and Mrs. C. N. Whitlam lost their pretty little baby girl, Leona Kilas. It was a and blow to them. Mr. Cumbers conducted the funeral which was largely attended by sympathising friends and neighbors. Four boys, Arthur Moody, M. J. McCallum, Bobby Watson and Jack McAllister were the pall bearers.

Our friend H. B. of the Observer, whose letters are much enjoyed by (almost) everybody, occasionally nags that paper over the knuckles for typographical and other mistakes in his correspondence. We have done very little grieving at the Standard, not because we had no reason to, but chiefly on account of its uselessness. It seems to us that most correspondents take a delight in maltreating the efforts of local news gathers. There would seem to be only two ways around this: either to get a New York tycoon or bird of a like kidney to throw a bomb or two where they would do some good or quit a meddling the staff along.

We almost forgot to mention that young Arthur Moody recently saved himself and his brother, Ralph from a watery grave by displaying great energy and presence of mind. They had been out in a leaky boat which upset. Arthur could swim but Ralph couldn't.

Maggie Stewart, one of our friend Jim's daughters, fell from a pony lately and broke her right arm near the wrist. Dr. Monkman, of Vegreville, was called in and under his care the little girl will soon be all right again.

Rev. Crabl, Presbyterian evangelist, held services here and at Ryley and Mundare in July. He is an earnest preacher and did a deal of good to those who heard him. As a consequence, and also because of Mr Crumb's searching discourses, several will unite with the church on September 1st when Rev. Allum, of Lamont, will conduct a communion service. Aug. 28, '12

HERE AND THERE

BY THE STAFF

The ceiling of the senate chamber at Ottawa is to be panelled. That is a good start.

ooo

Even a fat woman may have a slim chance in the matrimonial market.

ooo

A Montreal report states that this year apples will be smaller; they usually are in the middle of the barrel.

ooo

It is reported from Ottawa that there is more money in circulation than a year ago. There may be, but it has not got around to us yet.

ooo

A Halifax paper claims that the raising of sheep in Canada should be vastly increased while the public retains the price of mutton should be vastly decreased

ooo

Last year a Saskatchewan farmer tried an experiment in poultry feeding. He mixed sawdust with bran, when the first hatching appeared he found the birds were woodpeckers.

ooo

Eastern newspapers inform us that there will be no money famine this fall. Glad to to hear it we can get along with all the long green that comes our way.

High Wages Being Paid to Harvesters.

Western reports to hand from the west are insistent that now here in the three prairie provinces is the demand for farm labor greater than in the fertile section traversed by the Grand Trunk Pacific. As a natural consequence it is here that the maximum wages are being paid. The harvest is a bumper one. It is ready for cutting and elaborate preparations have been made for moving the grain. All of this will be of no avail, however, unless a sufficient amount of labor can be obtained from the east. Passenger officials are confident that in view of the high pay and certainty of employment, there should be little difficulty in securing the number of harvest hands required.

Here Again on Sept. 21st

M. Mehlenberg, A. M., the famous eye specialist, 315 Jasper East, Edmonton, phone 5225, will again be in the Queen's Hotel, Tofield, Saturday, September 21st. No agents, anyone to be so is a fake

Haying Tools

The way to get full value for your hay crop is to use Haying hay tools. Users of Deering mowers testify to the combined results obtained from using Deering mowers, rakes, stackers and tedders. They are reliable machines and will do the same work for you that they have done for other farmers we have sold in your community. Come in and see us about a Deering machine next time you are in town. You don't have to buy; but you may learn something of value to you about raising hay. You can make our store your headquarters when you are in town if you desire. Ask for a Deering catalogue which explains details better than we can.

Spring Wheat Prospects in United States

The spring wheat prospects in North Dakota, Minnesota and South Dakota, according to the official crop report at the close of this month, is excellent this year. The condition at the first of July was considerably better than the average for the past ten years at that date. On the other hand, the winter wheat crop for the United States was considerably lower in condition the first of July than has been the average for ten years past.

Hawd on the New Municipalities Act.

The electors of the proposed rural municipality of the Vegreville district handed on the act good and plenty last week by a vote of 22 for and 172 against. At the same poll, that of Vegreville was there a majority for the act.

KIDNEY PAINS IN THE BACK

COULD NOT STAND OR EVEN TURN IN BED—LEGS GREATLY SWOLLEN

All Doctor's Medicine Failed—Cure Effected by Use of

DR. CHASE'S KIDNEY-LIVER PILLS.

Again this great medicine has rendered valuable service to suffering humanity. From a bed of suffering and helplessness to health and strength by so simple a remedy as Dr. Chase's Kidney-Liver Pills is indeed a boon to many thousands.

Dropsical swellings had set in and she had no reason to hope for cure since the doctors' medicine failed to relieve her. Read what the husband says about this wonderful cure:

Mrs. Thos. D. Walsh, Pictou Co., writes:—"Two years ago my wife took to bed with kidney trouble. Suffering from kidney pains, backache, and dizziness, she was unable to turn in bed, or even turn herself in bed. The doctor attended her, but seemed powerless. Finally he said he could do no more. Then we tried several well-recommended kidney remedies, but without avail. Reading about a woman in Nictaux Falls who was cured by Dr. Chase's Kidney-Liver Pills, we purchased a box. Before it was finished she was able to sit up. With three more boxes she was able to bustle about and do her own housework.

"So far myself I also found these pills all that is claimed for them. I have used them for biliousness, and others may obtain the same relief from suffering as I have experienced by the use of them."

One pill a dose. 25c a box, all at dealers or Edmanson Bates & Co., Limited, Toronto.

HON. DUNCAN MARSHALL
Minister of Agriculture who is giving material support to the Dry Farming Congress at Lethbridge October 22-25.

Down the Athabaska in Peterborough Canoe

Messrs J. K. Cornwall, M. P. P. for Peace River, and R. K. Mather, of Millwoods, have just returned to Edmonton after a fortnight's trip down the Athabaska River from Jasper to the north end of Twin Lake, eastern terminus of the Peterborough canoe route. The same gentlemen made a similar trip around Mt. Sir Alexander a natural playground Mr. Mather himself a well known game hunter, so abundant in that section. The latest trip I have ever taken I declared when it terminated. The country between Hinton and Wabasca will compare one with a series of like a white person — who is unrivalled by any other country I have yet visited not excluding even the wilderness of the Congo or even the steppes of Siberia. It is a country absolutely in nature made. Not a human habitation, not a tree cut, not a blaze mark, not a vestige to indicate that it has ever come under the hand of man, a country I would wish to which those who have no conception of the wealth and intensity of tropical or life can find abundant evidence in a country without a trace, in a word, without a murmur except the ripple of the waters and the sighing of the wind in the trees, a virgin country wonderfully beautiful.

Serenading Felicia

An Interruption That Only Delayed His Love Story.

By OTHO G. SENDA.

"It's a parrot," repeated Gladys. "It's in the house—in a cage. Wont we get Phil? He had to shut the parrot one, 'cause he wanted to pick Fluff's eyes out."

"You order bear the parrot talk?" cried Jimmie. "He ma say 'Jim's the dear,' 'Jim is, old boy,' and 'I'll bet on your pluck on 1 cha.'"

"Let's bring him out," resumed the irrepressible one. "We'll look at all three together and see which is the nicest one."

"Oh, no can't!" cried Gladys hastily "If they should hear him they would be most sure to desire."

The look of the absolute one in turned scarcely down the diminutive face of Jimmie. "Desire, interrupted, "you ol white word!"

"I mean I said better, dint," and you into sunny. "She said do everything she could to make Bobby happy."

"He'd make everybody happy," an echoed Bobby serenely. "He'll give her a Scotch Sadie."

"What a Scotch Sadie?"

"He means lemonade," interposed Gladys, anxious for reinstatement. "I'll help make it."

"No, it's a Scotch Sadie—mixing and —and bringing gifts. Tom tells the preacher and buys your pets for gifts and he's all right."

"Don't we dress up?" The girl seems a modern from her tenderness.

"Can't" in convert from the three Musketeers.

"Oh, I mean pay dress up," pleaded Gladys. "I'll put on one of mamma's dress shirts and Jimmie can put on papa's coat."

"Has it got tails?" The possibilities of the proposal appeal to the admirable Jimmie.

"I can find one with tails," eagerly—pose Gladys.

"All right. Can't you put a shirt on, Bob? Then there'll be just ladies and gentlemen in the Scotch Sadie."

Bobby, relieved, but the minority vote was not recorded, and twenty minutes later the procession made its reappearance on the steps and viewed the door into the road, dark hall.

Dan, bearing the bellicose parrot, received patiently the front of his mother's new tailored shirt, slides, with Fluff's claws digging mildly but her keen arms, as to had the train of a lady friend. Jimmie held the door head over the quivering jaws of the human lunch and divided his attention between the trailing arch dragon in front of him and the one behind that dragged the ground at his rear The adorable one, waiting anxiously meantly, bore an imitation of any pet he fancied in the moment.

Dan pushed aside the portiere at the end of the hall.

"In a Scotch Sadie," the younger had rehearsed before entering, "every one sings the things he likes best. Jist so we'll see how much the curtains will go gin."

They was the the brown at Belshaw's—not his to mention why. He pulled them into the dim, sweet smelling room and seemed his mouth in a duck. Phil heard. Gladys pushed in close behind him, shrilly yelling: Jimmie plunged at both feet down on the lone footrest and gruffly vociferated in an imitation bass.

Their entrance was celebrated and heavily floored. An adorable young man sitting in his feet with a murdered in tambles, and Felicia was stood in the room of consternation.

Dan's next step, greeted "Where the hell have you been to avoid me," was intended to reassure of any sort. He kept him under his manner. His movements were usually elaborate and crabbish, and the ringing breath his shirt added to his uncertainty of balance. He stood, a picture of the shabby fool and tape upon the shrinking Gladys and Jimmie, who had come to the rescue of the latter of his shirting sister, Felicia in falling proved deceptive; if at the legs of the astonished Phillip and brought him to his knees on the bowing help.

Phil swayed from Dan's arches and fascinated a severe investigation of the parrot, who at last in this room to get of her talons back clamouring Jimmie: "What it all done? Is a Scotch Sadie? It let on to—" Jimmie's voice in silent attacks on Phil and the parrot flowing forth.

The man of overlapped himself mentally and turned to the new Spanish-of-all-trades. "I propose you call this funny. If an Austin, but I must confess my idea of a joke fails to coincide with yours."

He stepped gently over the group of his mark. Mixed Bloody and gravity—as I with apparent relish called the parrot by name.

Dan had got of great but I being a savage nature as further stimulus into the ball. The ad-chin one was making up his mind whether to pursue her hands beside stunned to how Dan had to be carried to the bed. He raised two deadly pair for the parrot to be pulled at.

"Did she like it?" said Jimmie.

"Did she like the Scotch Sadie?" "Bobby," entered, "you let that Phil said what is it for?"

"Oh, I don't know." He wanted to.

Miss Nicks Sadie.

Dan, his pallor reason a pallor, and and then a shrill remembrance of the Jimmie—"Oh, I'll tell you what it is—I'll put in thing to come to Felicia's party."

Private Wedding.

Mrs. Wright has issued invitations for the marriage of her daughter Ethel Maude to Mr. Frederick Arthur Hall, on Wednesday, the 15th inst., at the residence of the bride's parents, 1 Ann street, Toronto.

Tragic Father.

Mr. Wright is the father of a middle-aged family, who could have his choice of husbands for his daughters. Ethel selects for herself a young man who is not at all to her father's liking. Dad's objections to Fred are many, but they resolve themselves into one—he is a newspaper man.

Dad's idea of a newspaper man is that he is a cross between the Kaiser and Satan. He has a horror of the whole tribe, and he has brought up his daughters to share it.

Ethel has been engaged to Fred for a couple of years, and has been married secretly for a month. Dad has not yet been told of the fact, and Fred is afraid to tell him.

Where can we go?

Subtle

The British Medical Journal says: "Many people suffer from insomnia because they are unable to sleep in a room with the window open. Perhaps they would be cured if they were compelled to sleep in a room with the window shut."

A practical joke.

Where can we go?

Mr. Wright is the father of a family of daughters. Instead of spending the evening with them, he sits in his study and keeps to poor forth his wit in the form of letters to the editor of the Toronto Star. Mr. Wright is a frequent contributor to the Star's columns, and he is always treated by the editor with the greatest courtesy.

Hasn't Been Home.

"I'm home," said Miss Dobbins in a loud voice, as she entered the house. "Has anybody been home?"

"No," said the friend frankly, "I haven't."

"Well now, Mr. Verdict is a painting."

"Why, my dear you are an ass—no—yes." It is doubtful as to a joke in every season as turns"—how to be a joke.

There is only one real failure in life possible, and that is not to be true to the best one knows about himself.

A Double-Barrelled Escape

Misers are among the most heroic people in the world. Danger is all very well for them, and they are ashamed to believe that a day time they will come face-to-face with death. The records of this that they are humorous in their bold way.

In one of the mines of Peru, which is now in the hands of the Incas, a miner named Juan Ortiz was working. The accident happened on a day afternoon and the fellow miners of the triumphed men set to work at once to find him out. It was not until Sunday morning however that they reached his prison chamber and by this time they were wondering whether he had not suffocated or starved to death. One of them called out in a loud voice through the aperture: "Juan, are you alive?"

Juan, not understanding the question, replied in a voice of intense fear: "Yes, I am still alive!"

All right came the reply and the effect a pause. What day is this?" Sunday answered the friend.

"Then," cried Juan, "I'm glad that That was one Saturday nigh when the miners haven't drunk all my wages."

Found Wanting

Michael Angelo, sculptor and letter had received instructions from the Pope to make a statue of Moses. Michael had light food.

The Pope sent for him and entered the door and said and if he got a statue of Moses. Michael replied that he was going to a thermometer under his arm and a barometer under his arm. "I don't call again to-morrow."

The woman opened the door when she saw him and the doctor went up to the sick room. He returned in half an hour the next morning he was surprised to see that the patient was convalescent much worse.

"I'll just take his temperature last night as I asked you," the doctor explained.

"I'm sure," said the woman civilly, "the gentleman said it was time to do so, and I thought I'd just call again to-morrow."

Lingerie.

A well-known politician had occasion to visit a certain town in the course of a contemptuous flurry in the hotel. He was shown to his room by a waiter.

The politician turned to the proprietor and said: "Look here, landlord, I'm not going to have my bedroom invaded by waiters. Please tell your waiter to knock at the door before he comes in."

The man replied: "Beg pardon, sir, I thought you were a gentleman who is in the habit of wearing lingerie."

A White for a Black

A travelled school teacher writes: "I have noticed that many people do not difference between the expressions 'a white' and 'a black.' Some people to have any idea on the subject. For the benefit of this class I would like to advise it the worst of one little boy and I heard. Jimmie took his pencil in his mouth instead of the class and I saw, 'Teacher! Teacher! Here's a white in my mouth!' Then I spoke to him and told him that he should say 'a black.' Jimmie replied in a low tone: 'Oh, I'll swallow that!'"

A RUSSIAN MONASTERY

Army of Men Employed and No Beds or for Work is Refused

Tregubov is a little town on the road the Russian gifts one can I come lately to the Russian Monastery of St. Sergius, monastery of St. Russian world. Not only is it the largest in Russia, but it is also the richest. Many people learn it he could about the place but he can do little satisfactorily to questions to the old colored man who is in charge.

There, he said finally, what are the figures? Then I will answer you." And the old gentleman produced a bundle of printouts of the town's.

"Well," I said, "I see that there are 20,000 people in the monastery, but there seems to pertain as' de proletariat' about preaching ob de big bug hall rooms

A Thing Worth Knowing

The benefit to be derived from a solution of lightning. No notorious case of lightning has been recorded where the sky wasn't the appearance of a thunderstorm. Many people have escaped danger under the nearest tree.

The Greater Evil

The man who married and just been married buried a wife and married a widow. The widow had two daughters. The man married one of the daughters and the widow married the husband of the other daughter. Now the man is father-in-law to his wife's daughter, and his wife's daughter is mother-in-law to her husband's wife. Is that clear?

The interest in Robert Louis Stevenson has by no means wane—it was shown by the fact that the publication date of one of his letters for 1890. In it he says: "I have been to Paris and R. A. Swanson and refers to his having got [illegible] to Mr. Gosse's house. The manuscript of one of his books [illegible] and the book itself, brought [illegible]."

The survivor of medieval spirits which were furnished by the Middle Ages to the world is somewhat difficult to find. Even the Irish banshee is reported to contribute the to the supernatural stock of the Irish fairy and to the new account of the Irish fairy and to the new account was discovered in the spiritual. The banshee, which is a pet-ghost through Interpretation

Having Made Useful

Excited Lady—Oh, doctor, isn't that some patient over that one gentleman? Doctor—Yes, madam, I am doing nothing but out and drink—Punch.

Merely an His Job

Washington—Why do you look at me in that way, sir?

Detective—I am the food inspector for the city.—Judge.

Extraordinary

What because of that fellow Bolt, you had asked a visitor of the asylum, "that's [illegible]?

"Yes," was the reply, "and he's the [illegible] Bolt."

Satisfactory

A certain study old banker who runs a small summer hotel on the Maine shore bitter from a prospects a favor who wrote to engage two large noisy boarders and a report in any [illegible] for with private beds. One may [illegible] the following out reply:

"Dear sir, I can accommodate [illegible] with private beds. One may [illegible] the following out reply:

Unexpected Flippancy

We hardly look for humor in a medical dictionary, but the following published defines "abuse" as an [illegible] "Any improper employment of the thing for which great simplicity and a reputation is [illegible]."

As many as 120 aeroplanes will take part in the autumn manoeuvres. The Germans, along with the engine-mounted seaplane, have also a [illegible] for the [illegible] and [illegible] surgery, now that really skilled [illegible] can be got, has a great future before it."

A Frosty Daisy

The [illegible] has been [illegible] in the grounds of [illegible] Mansion, Ashtead, Surrey, [illegible] a most remarkable case of [illegible] in a daisy. It is a [illegible] daisy, [illegible] the [illegible] [illegible] [illegible]

Serenading Felicia

An Interruption That Only Delayed His Love Story.

By OTTO R. BENDA.

"Dim out, children, run out and play," cried Felicia, glancing down along with the rest of her pretty brood. "Now count, Ida, Annie Fluffle," beg-ged Jimmie. "I've used you a day or so."

"I'm going to be very busy this evening, Jimmie," studied Felicia. "Going to try on" cried Gladys ar-dently. "Oh, do let me stay!"

"I am not going to try on, Gladys, and the ordinance who is coming," this is no ve happy."

The brown eyes of Bobby the adon-is crossed a shy and then narrowed warningly. "You goin to have fun, or nothing?" he demanded.

Felicia's joyous laugh rang out queerly. "Yes, Bobby, very particu-ar indeed."

"I'll bet, soothing Mr. Parker," crumbled Jimmie. "I didn't want to go away if it be."

"Oh, he'd say!" cried Gladys, jump-ing up and down. "Mr Parker's want to see us. He always does. You know about 3 o'clo" argumentatively, "he said the other day he was very fond of children."

"I-in, I know," hurriedly, "is fond of children—good children, obedient children—"

"Then we'll stay," agreed Jimmie pro-ject.

"All right. Can't you put a shirt on, Dad? There have to be two ladies and two gentlemen in the Sarah Sands."

Dad—deferred, but the minority vote was not rescinded, and twenty minutes later the precession were ushered up on the steps and opened the door bon-ed, and, dark hair.

Dan, bearing the bellman parrot, answered pleasingly to the front of the master's new tailored shirt, Gladys, with Fluffle whose digging wildly bare her knee arms, swished the train of a dress Dorothy Jimmie had in-bond over the quivering legs of the fluffle. Bobby and dished his arms-tion between the trailing silk drapes in front of them and the train that dragged the ground at the rear in the adorable use, walking manner-ly-manly, here no indication of any per-son to be in the proceedings.

Ivan rushed aside the portiers at the parlor door.

"In a Turkish Nude," the manager had explained before leaving, "you can wear things things to bind, bed, you as you are much the pretzels at bar-gain."

Dan was like the horses at Belshaz-zar not to question what he called the dict, never smiling once and seeming to be in a trance for first. Gladys pouted in clear be-cause Bobby, shortly pulling, Jimmie plant-ed both feet firmly on the bow footing and Felicia's tawny hair was indistinct base.

Their entrance was effectively and happily timed. An athletic young man sprang to his feet with a smothered ex-clamation, and Felicia was stood spellbound in the doorway.

Down a next step, gasping "Where the hell is he now?" and then, with an in-tention to recover at any cost. He let both under Gladys' his movements were usually alarming and crabbing, and the ringing knock-ish shirt add-ed to his uncertainty of balance. He was startled, and his chubby face and legs upset the shrieking tiladys and sent the trained and bone tender on top of his suffering ulcer. Gladys in falling grasped despairingly at the legs of the astonished Parker and brought him to his knees on the bowing help.

Pulled forward from Jimmie and hesitated a nervous investigation of the bare legs, and both within reach of her vicious bent, clustering brow-ed, "Why, it's dad boy," hesitated Jim-mie proudly. "His name is Hank-s Belshazzar, but we call him Hank for short. Get your rat Glad tired o put it a line chimney?"

The big, fluffy Persian was brought out for the admiration of the guest, who regarded it with coldly critical eyes.

"Where's Dan's cat?"

Eight Years of Bad Eczema on Hands

Cured by Cuticura Soap and Ointment

When Mary A. Brown, of Centennial, Mississippi, wrote to the Cuticura Soap and Ointment Co., she said: "I had eczema eight years on my hands. I could not wash dishes or do any work. I had to wear gloves. I tried many remedies, but got no relief. I saw Cuticura Soap and Ointment advertised, and sent for a free sample. I then bought a cake of Cuticura Soap and a box of Cuticura Ointment, and before I had used them I was cured. I have not had a sign of eczema since."

Cuticura Soap and Ointment are sold by druggists and dealers everywhere. Sample of each mailed free, with 32-p. Skin Book. Address: Potter Drug & Chem. Corp., Malden, Mass.

"It's a parrot," repeated Gladys. "He's in the house—in a cage. When we got Fluff we had to shut the parrot up, 'cause he wanted to pick Fluff's eyes out."

"You utter bear the parrot talk?" cried Jimmie. "He can say 'Here's the time,' 'Go it, old boy,' and 'I'll bet on your head I can.'"

"Let's bring him out," accepted the admiring Dan. "And look at all clever inquirer and see which is the nicer one."

"Oh, we can't!" cried Gladys hastily. "If they should get out Fluff would be most sorry to death."

The back of the adorable male is turned scarcely upon the itinerant bellman. "Polly," whisperingly, "are it white aren't?"

"I'm going to be very busy this evening, Jimmie," studied Felicia. "Going to try on" cried Gladys ar-dently. "Oh, do let me stay!"

"I am not going to try on, Gladys, and the ordinance who is coming," this is no ve happy."

The brown eyes of Bobby the adon-is crossed a shy and then narrowed warningly. "You goin to have fun, or nothing?" he demanded.

Felicia's joyous laugh rang out queerly. "Yes, Bobby, very particu-ar indeed."

"I'll bet, soothing Mr. Parker," crumbled Jimmie. "I didn't want to go away if it be."

"Oh, he'd say!" cried Gladys, jump-ing up and down. "Mr Parker's want to see us. He always does. You know about 3 o'clo" argumentatively, "he said the other day he was very fond of children."

"I-in, I know," hurriedly, "is fond of children—good children, obedient children—"

STANDARD PRESS, Limited,

R. N. WHILLANS, - - Manager and Editor

TOFIELD, ALBERTA THURSDAY SEPTEMBER 12 1912.

READERS of these news will as other columns sometimes make sport of errors, typographical or otherwise, that inadvertently creep into the make-up of a page, and wonder how they happen. When it is considered that there are no less than several thousand pieces, is there any wonder that a letter is sometimes misplaced or left out entirely?

o o o

ANOTHER increase in food prices last week has placed the principal staples of meat, flour and potatoes in Germany at the highest figures of a half centenary and has caused untold suffering among the poorer classes of workingmen. The price of meats are unprecedented. Hams are 37 to 47 cents, porterhouse 67 cents per pound, veal steak 62 cents, ordinary wheat flour is 9 to 10 cents a pound. The Socialists have started a widespread agitation for the convening of the richstage at once to provide some method of relief. They demand that duties be reduced or removed in order to permit the importation of foreign food products. Germany is one of the oldest countries, with a high protective tariff administered by the manufacturers and landlords.

The Cost of Food

The Vancouver Sun says that householders and keepers of restaurants and boarding houses in that city are again making an outcry against the cost of living, which is now higher than ever, in spite of efforts to find a solution to the problem. The failures and embarrassments among small restaurants and groceries are more numerous than they should be. Other business are also affected because dear food means further advances in wages, and still higher working expenses. Margins of profit are shrinking and retail grocers complain that in spite of the high prices they are making a smaller percentage of profit than ever before. During the last year the failures of wholesale and retail trading concerns were the third largest in the history of Canada, in spite of the activity of trade and production and the general appearance of prosperity. Vancouver feels the difficulty acutely according to one authority, because she draws so large a proportion of her food supplies from other provinces and foreign countries. She depends upon Alberta, Saskatchewan and Manitoba for flour and beef, upon Australia for mutton and dairy products, and in part upon various outside sources for hay, pork products, and milk. The situation in a nut shell thinks the Sun is that in British Columbia there has been a vast increase in food-eaters, and almost no increase at all in the number of food producers. During the last ten years the population of Vancouver has grown 270 per cent, while that of the whole province, including Vancouver, has increased only 113 per cent. It is the old law of supply and demand now working there with alarming effect and working constantly toward higher prices. Throughout Canada, population is a somewhat similar extent is massing in the cities and the typical laborer and business man is producing everything but food. Thoughtful students of the Vancouver situation maintain that the only real cure must come from a greater output of farm products and a greater stimulus to agricultural than free land alone. British Columbia is a new country, with a protective tariff which does not directly bear hardly on food products, though indirectly it stiffens food prices.

For, if any, medicine, have met with the unanimous success that has attended the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy. Colic, Cholera and Diarrhoea Remedy is safe. The remarkable cures of this remedy and their knowledge of the many remarkable cures of colic, diarrhoea and dysentery given it a wide reputation. For sale by all dealers.

The implicit confidence that many people have in Chamberlain's Colic, Cholera and Diarrhoea Remedy is founded on their experience in the use of that remedy and their knowledge of the many remarkable cures in almost every neighborhood have given it a wide reputation. For sale by all dealers.

Haying Tools

Sharpening Stone Mower

The way to get full value for your hay crop is to use Dearing hay tools. Thousands of farmers can testify to the excellent results obtained from using Dearing mowers, rakes, stackers and loaders. They are reliable machines, and will do the same work for you that they have done for other farmers we have sold in your community. Come in and see us about a Dearing machine next time you are in town. You don't have to buy, but you may learn something of value to you about raising hay. You can make our store your headquarters when you are in town if you desire. Ask for a Dearing catalogue which explains details better than we can.

Agricultural Bank is Needed

Winnipeg, Man.—The establishment of a bank of agricultural in Manitoba is advocated editorially in the current issue of the Dominion Magazine. If the provincial government were to establish a bank of agriculture, it is argued, a system of loans could be proof on the security basis of live stock and grain on the land, thereby greatly stimulating the farm industries of the province. This would create a large cattle industry and make Manitoba one of the chief dairy districts of the continent. Such a bank is urged as needed, it is shown, and its establishment would be in line with the present progressive policy of the provincial government.

Twenty-Five Moose to Square Mile

Edmonton, Alta., Sept. 11. John Eggers, a trapper and homesteader in the Fraser River valley, who is in Edmonton for his winter supplies, reports that there are 25 moose to the square mile in the district, also that deer are numerous. He hauls a large fur catch last season, consisting of the pelts to this city at a good price. Eggers packed a dog and canoe from Fort George to Tete Jaune Cache, 300 miles with ot mishap. There are many rapids in the Fraser river, making the journey more or less hazardous, but many settlers, he says, are going down the river stream in small boats and seven taking household goods and farm implements. Six hundred men and women have gone into the district in the last ninety days. The overland road from the Fraser River country to Fort George is a long and difficult one. It is used chiefly by trappers, tourists and prospectors in search of big game, scenery and minerals.

Plenty of Gas Propositions For Edmonton

Edmonton, Sept. 11—When the city council of Edmonton called a special election for September 23, at which ratepayers are asked to sanction improvement ordinances involving $1,000,000, of which $737,000 is for a municipal natural gas supply and distributing plant, the commissioners received propositions for natural gas at bargain counter rates. H. R. Campbell, who has a well within 3 miles of the city limits, offers to supply gas at 2 cents per thousand cubic feet on a basis of 2,000,000 feet a day. A. Macleod, associated with Eugene Coste, president of the Western Canada Natural Gas, Heat, Light and Power Company, wants a franchise for 20 years to supply gas at the city boundary at 15 cents for industrial purposes, 27 cents for domestic purposes, or a flat rate of 21 cents. The council recently decided not to grant franchises for any public utility.

Here Again on Sept. 21st

Serenading Felicia

An Interruption That Only Delayed His Love Story.

By OTTO U. BENDA.

"Now out, children, play out and play," mused Father Chimney, then strung the last bit of her pretty grave.

For room, too, Aunt Flora," hop ed Jimmie. "You and your 4 pay."

I'm going to be very busy this coming Jimmie," replied Uncle Sonny to him. "Mr. Taylor is said to see me. He always does. You know, Aunt Lizzie's representative," he said the other day he was very fond of children."

"Yes, I know," retorted; "he is fond of children—good children, educated children" —

"There was a thing," agreed Ismael plainly.

"Of course," resumed Uncle and Jimmie with one accord, seeing them, serious on the scene with excellent success.

"I come on, Bob," Jimmie added mischievously.

But the adorable one stood aloof, regarding Uncle with gravely reproachful eyes. "I think he got enough gifts for he says he isn't," he said.

"Why, Bobby," said Brother Peter, "you are getting to be a regular old crank. I think Uncle Sonny's got a right to give you a present if he wants to, and you ought to be glad to get it."

"I'm glad, really, still with a sense of being defrauded. "Come, Bobby."

"Oh with the others, Bobby," roared Felicia alluringly, "they will share your their pets."

He brought his brows formed upon down to her face

"Some day," he breathed sweetly, "I shall give you a Scotch Sadie."
